cupies another residence, the cost of which equals or exceeds the adjusted sales price of the old residence. Additional time is allowed if (1) you construct the new residence or (2) you were on active duty in the U.S. Armed Forces. Publication 523 (Tax Information on Selling Your Home) may also be helpful.

Alimony Paid.—Payments for alimony are now adjustments to income. You no longer have to itemize deductions to claim a deduction for alimony you paid.

Credit for the Elderly.—An expanded and simplified credit for the elderly has replaced the former more complex retirement income credit.

A taxpayer may be able to claim this credit and reduce taxes by as much as $375 (if single), or $562.50 (if married filing jointly), if the taxpayer is:

(1) Age 65 or older, or

(2) Under age 65 and retired under a public retirement system.

To be eligible for this credit, taxpayers no longer must meet the income requirement of having received over $600 of earned income during each of any 10 years before this year.

For more information, see instructions for Schedules R and RP.

Credit for Child and Dependent Care Expenses.—Certain payments made for child and dependent care may be claimed as a credit against tax.

If a taxpayer maintained a household that included a child under age 15 or a dependent or spouse incapable of self-care, a taxpayer may be allowed a 20 percent credit for employment related expenses. These expenses must have been paid during the taxable year in order to enable the taxpayer to work either full or part time.

For detailed information, see the instructions on Form 2441.

Earned Income Credit.—A taxpayer who maintains a household for a child who is under 19, or is a student, or is a disabled dependent, may be entitled to a special payment or credit up to $400. This is called the earned income credit. It may come as a refund check or be applied against any taxes owed. Generally, if a taxpayer reported earned income and had adjusted gross income (line 31, Form 1040) of less than $8,000, the taxpayer may be able to claim the credit.

Earned income means wages, salaries, tips, other employee compensation, and net earnings from self-employment (generally amount shown on Schedule SE (Form 1040) line 13). A married couple must file a joint return to be eligible for the credit. Certain married persons living apart with a dependent child may also be eligible to claim the credit.

For more information, see instructions for Form 1640 or 1040A.

TRIBUTE TO LILLIAN CRAIG

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Ms. OAKAR. Mr. Speaker, I rise today to pay personal tribute to a very well known dedicated member of our greater Cleveland community, and in particular our near west side neighborhood, who will be honored by the community at the West Side Multi-Service Center on Saturday, February 4, 1978.

Lillian Craig is the mother of three children—Joe, Michelle, and Billy. She has a fine son-in-law, Mitch, and a grandchild, Regina. Her roots are permanently imbedded in the near west side of Cleveland, as she was born in this historical, heterogenous neighborhood on Jay Avenue.

Mrs. Craig is a woman who has devoted her life toward improving the quality of life for others. In the 1960's, she was an outspoken, constructive critic of our welfare system, and raised the level of consciousness of welfare mothers, and instrumentally obtained a hot lunch program for their children. As a member of the West Side Citizens for Better Health, Lillian helped lead a coalition of people who convinced the City Administration to build and staff a much needed health clinic, the McCafferty Health Center, so that people of all economic levels could receive proper health care. In addition, through her persistent efforts other services to the community such as our local hospital and our local neighborhood center became more receptive in serving the people.

Lillian's many kindnesses to others range from housing the poor, feeding the needy, and clothing the elderly.

Presently, Mrs. Craig is director of the West Side Multi-Service Center, which is a program funded by the Federal Government and governed by a resident board.

On a personal note, those of us who hail from the near west side community are proud of our roots. We are proud of the fact that we were raised with people of all economic levels, and of every race and ethnic background. It is truly a cosmopolitan area in our country. We are an older community, and we are a proud community. And we are proud of our people. Yes, dedicated, unselfish people like Lillian Craig.

Lillian Craig is not internationally nor nationally known, but like the late Senator Hubert Humphrey, she has always taught us how to live and how to serve people. Those of us who are fortunate enough to know her have been enriched by her example of the past. We are today blessed by her current example of personal courage, love of people and faith in God. This Saturday we will be with Lillian to pay tribute to her, and to say simply and sincerely, "thank you." Thank you, Lillian, for all you have done for all of us!

MATERNAL AND CHILD HEALTH AND CRIPPLED CHILDREN'S SERVICE ACT

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. CARTER. Mr. Speaker, because of my deep concern over the continuing deficiencies in the health of the children of our Nation it is a pleasure to introduce this bill, to be titled Maternal and Child Health and Crippled Children's Act 1978 Amendments. I am especially honored to introduce the bill with my distinguished colleague PAUL ROGERS, chairman of the Health and Environment Subcommittee.

This act is based on the premise that too many mothers, infants, children, and adolescents still suffer from preventable or crippling illness because of the limited availability of health care services. Since title V of the Social Security Act is the basis of health programs serving mothers and children, extensions and improvements of title V are needed. This act revises and extends title V programs to assure all pregnant women, infants, children, and adolescents a healthy future.

This act increases levels of funding, stresses improved organization of the existing health care delivery system and makes allowances for special grants in that area. At the same time, maximum use of the existing system and the participation of private practitioners in the delivery of benefits under the act are stipulated. Such measures would make health services available to those special groups—pregnant women, mothers and their infants, crippled children, underserved children and youth, and those with disabling diseases—having great health risk and social dependence and for whom the cost of preventive care may be a particular burden.

AUTHORIZATIONS

The act authorizes States to extend and improve services:

First. Reducing infant mortality;

Second. Preventing disease and disability;

Third. Locating, diagnosing, treating and providing follow-up services for children having crippling conditions; and

Fourth. Locating and aiding those in special need.

In addition, the act provides for special grants to States and localities to aid in the solution of existing health problems, training of personnel and for research projects related to the delivery of health care to mothers, infants, children and adolescents.

The act authorizes funding for the fiscal year ending September 30, 1978, in the following amounts and areas:

First, $350 million for maternal and child health services;

Second, $150 million for crippled children's services;

Third, $125 million for special grants for projects of regional or national significance;

Fourth, $100 million for special grants for county and local projects;

Fifth, $50 million for training of personnel; and

Sixth, $25 million for research projects.

The act also sets minimum levels of expenditures for family planning services.

REQUIREMENTS LEVIED ON STATES

To be eligible for funding under the act, States must formulate plans which provide for their financial participation and for administration of the act by a State health agency or similar body. State advisory councils of nine members, at least four being practicing doctors of medicine, would be appointed by State Governors to oversee the act, which requires cooperation with medical, health, nursing, educational and welfare groups

and organizations. State plans must provide for payment of the reasonable cost of inpatient hospital services, for early identification of children in need of health care and services and for services in needy areas and among groups in special need. When such services are available in the community, the State health agency would reimburse individual practitioners or other private health entities to render medical services. Provisions for PSRO review of standards of care and services under the act are included.

States would also be required to develop "unified State plans" encompassing maternal and child health and crippled children's programs. State plans would address health care needs and resources, unmet needs, and objectives and priorities. They would address basic health services for mothers, infants, children and adolescents; family planning and school and health programs plus special programs and projects to respond to particular State needs.

Those special programs and projects could include sudden infant death syndrome, dental programs, expanded perinatal projects, genetic screening and counseling and programs for unwed adolescent mothers.

State plans would also encompass basic services and programs for crippled children, special services for handicapped children and special programs and projects which could include centers to provide multidisciplinary evaluation of children with severe developmental disabilities, special programs for hemophilia, and other programs.

State participation would be funded under two formulas—for maternal and child health services, $200,000 plus an appropriation based on the number of live births and, for crippled children's services, $100.000 plus a similar formula appropriation. State funding would also be determined on the basis of a national ranking by average per capita income and would be dependent on strict compliance with the act's provisions.

GRANTS

The act stresses new approaches to solving problems of health care delivery by providing for a variety of grants. "Special incentives in developing new initiatives to address problems of regional or national significance" would result from provisions for grants to State agencies and to public or nonprofit organizations. Such grants could be used to develop new techniques to provide health services in underserved areas or to develop new programs and problem-solving activities, for example. Priority would be given to programs aimed at the special problems of low-income families.

Other grants are provided for underserved counties and local areas, for training health-care personnel and for research, the latter with special emphasis on projects to develop comprehensive health care programs.

ADMINISTRATION

The act establishes a National Office of Maternal and Child Health Services within the Department of Health, Education, and Welfare (DHEW). This office would monitor, coordinate, and evaluate the act's programs, develop guidelines and organize data collection and retrieval. A Director of Maternal and Child Health Services would be appointed by the Secretary, DHEW.

The Secretary also would appoint a National Advisory Council on Maternal and Child Health Programs consisting of 15 persons, at least 8 of whom would be practicing doctors of medicine. The Council would assist the Secretary in preparing regulations and considering State plans called for in the act.

The Secretary would also be required to conduct a study of all Federal health programs for mothers, infants, children, and adolescents with an eye toward coordination and consolidation of those programs.

Mr. Speaker I am pleased to offer this proposal. I hope my colleagues will give it careful consideration.

CARTER IMMIGRATION POLICY MAKES A MOCKERY OF "TRUST ME"

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. ASHBROOK. Mr. Speaker, while our social security system is in imminent danger of collapse, we are providing substantial incomes to elderly aliens who enter this country within 30 days of the time they reach our shores. Americans who have been paying social security for 40 years may not be able to depend on social security when they must retire, but there is money available for newly arrived public charges.

It was San Francisco columnist Guy Wright who found out about the rip-off of SSI funds by elderly aliens who were sponsored by aliens already resident in this country. By bringing over his father, an alien could—and often did—increase his household income by thousands of dollars annually. When Wright found examples of aliens actually doing this, he wrote to the Social Security Administration, which administers SSI funds. First, the Administration denied that such abuses existed. But after Wright's columns began to get public attention, national columnists and Republican legislators, myself included, began putting pressure on, and the truth was finally admitted: Such rip-offs are being paid for to the tune of tens of millions annually. That is just the cash payment side of it. While receiving less attention, medicaid benefits which are offered with SSI are costing us tens of millions more.

Over 6 months ago, on July 29, 1977, I told this House that:

> In a time when the average workingman's family can be ruined by a major illness, we have no right to offer free medical care to anyone who has just reached our shores.

Medical costs in this country are reaching a crisis point.

Our social security system is in a state of crisis, but we have plenty of money to support elderly aliens after 30 days in this country. Our medical costs are reaching levels where working people and especially elderly retired people who need the most simply cannot pay them. Yet it has been an uphill fight against the bureaucracy to get these abuses recognized, much less corrected.

Many of the elderly aliens being brought in to take advantage of the American giveaway on SSI and medicaid are not poor people. If you are an American who has spent his working life in this country, and have some property or a small extra income in this country, it is quick and easy for the Government to find out about it and deny you medicaid or SSI benefits. But if you are an alien, who has just gotten here and have never paid a dime in taxes in this country, you are pretty safe.

I asked the Social Security Administration to inform me as to whether they ever checked on the foreign assets of these newly arrived SSI recipients' assets in their home countries. The reply was:

> I am sorry, but the information you requested is not available. Field offices have not been instructed to maintain records of this nature because there is no program reason to compile such data. To say that verification of foreign assets never takes place would not be accurate. Certainly there are instances where contact with foreign sources are necessary in order to determine the value of a person's resources for SSI purposes. However, there are no means to measure how often this is done.

In other words, what I have so far is the assurance, with no examples given, that there is some little checking of foreign assets done. This assurance has been given me by the Social Security Administration, which told Guy Wright last year that the SSI rip-off was not really of any importance.

The Social Security Administration gave a similar answer last year, when I tried to find out how much of total SSI money is going to recently-arrived aliens. No instructions had been given to field offices to collect such data.

The SSI and medicaid rip-offs are especially painful because they strike at our elderly citizens, who are most in need, at the worst possible time. But the sort of response we have gotten in trying to get action on these issues are typical of the Carter administration's dodging and delays on far bigger issue, that of illegal immigration.

Here again, Congress has to get its own information. The administration is not interested in having the public know the real facts about illegal immigration. The General Accounting Office is part of the legislative, not the executive, branch. In response to Congressmen's demands for information which they simply cannot get out of the bureaucracy, GAO has issued two reports. The title of the latest one tells a story of its own. It is titled: "Impact of Illegal Aliens On Public Assistance Programs: Too Little is Known."

Congress is making some progress this year on these issues. Reform of SSI so as to close the loophole which allows payments and medicaid to 30-day residents without means has passed the House and should come up for a vote next week in the Senate. We have collected some information on the cost of

illegal aliens to American workers and taxpayers through GAO, and a final report on the cost to taxpayers of SSI and medicaid benefits to new aliens is due this month, again, of course, from GAO. None of these initiatives owes anything, of course, to the Carter administration.

President Carter went into office on a platform saying "Trust me." Carter was going to get the bureaucracy under control. He was going to make the Federal bureaucracy accountable to the people. Just how bad a joke these promises have become is made brutally clear to those of us who are trying, in the teeth of Federal bureaucratic obstinance, to end giveaway programs for new aliens and to stop illegal immigration.

THE PRESIDENT IS VASTLY OUT OF HIS ELEMENT

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. SYMMS. Mr. Speaker, I have found syndicated columnist Michael Novak to be a thoughtful, intelligent writer, who is very perceptive in judging the performances of politicians on the national scene. Mr. Novak is a person who has the courage to observe (as he notes that children have been known to do with kings) that a man may not be equal to the job.

Mr. Novak's column (which is reprinted below and appeared in the January 31, 1978, issue of The Washington Star), whether you agree with it or not, is the product of a syndicated writer who has observed a number of Presidents in the performance of their administrative and executive tasks.

I agree totally with certain of Mr. Novak's observations, such as that "the Carter men plainly misapprehend American reality. Their 'populism' is out of touch with the majority of the American people;" and, I commend the article to your current reading list:

THE PRESIDENT IS VASTLY OUT OF HIS ELEMENT

(By Michael Novak)

Unless I am mistaken, many commentators are still protecting President Carter. They are "giving him a chance," and not daring to face the real fear they are beginning to feel.

It is certainly difficult to admit, in a system like ours, so heavliy committed on the Democratic side to the image of an activist, visionary, admirable executive, that we have saddled ourselves with a leader who is vastly out of his element. Sometimes it seems that even the little children see. Our president has no clothes. He is not the man for the job. But no one dares to say so.

The conventional wisdom of these commentators who supported President Carter in his bid for election—from Time and Newsweek and the major national papers—is that the president is inexperienced, innocent, idealistic, extremely bright, a quick learner. Everyone hopes that the disturbing flaws in his first full year in office will be remedied in 1978.

What if this view is mistaken? What if, from here on, matters get worse? There are several reasons for believing they will. First, Jimmy Carter is an excellent campaigner, but he is not a day-by-day political man. He doesn't like the real stuff of politics: deals, compromises, smoky rooms. He is private, studious, and willful. He excels at conveying an image of boyish goodness and innocence. This is conveyed in the name he prefers, "Jimmy."

He has almost no feel for the complexities of history, egotism, and the intractability of human affairs. He is a rationalist who sees facts and relations abstractly, mathematically.

The dark political side of his being is underdeveloped. It is asking for miracles to hope that he will suddenly change. Even his closest aides shrug, when pressed, and say: "That's Jimmy."

The moral and political side of human life is nourished by delight in the perplexities, orneriness, and quirkiness of human behavior. It is precisely here that (a) political genius resides and (b) human growth can occur. A person who goes at life as if it were composed of machines with problems to be solved misses all this.

He has the wrong habit of mind. Jimmy the problem-solver prevents the mature Mr. Carter, the political leader, from being born.

Secondly, Jimmy Carter is saddled by a deep sense of cultural inferiority. I sympathize entirely with his distrust for the Washington establishment which he, Jody Powell, and Hamilton Jordan regularly express. They seem even more driven into a narrow circle of trust than Richard Nixon was.

Georgia against the world is not much more attractive than Nixon's Southern California against the world. The self-aggrandizement of the Carter family and the long list of important appointments from Georgia are signs of a death-wish. Under the press relations of "openness," psychic closure is evident. It is as though Carter is programming himself to fail. (His speech is constantly haunted by images of failure. "I don't intend to fail." "You'll be proud of me.")

Thirdly, the Carter men plainly misapprehend American reality. Their "populism" is out of touch with the majority of the American people. Their explanations of why the past year went so badly are painfully limp. They think that they are too far "ahead" of the American people, and that they "proposed too much too fast." This is condescending.

What they proposed was, far more often than not, so breathtakingly out of touch with reality that only a deep, innate respect for the presidency, especially on the part of Democrats for a Democratic president, has prevented them from being laughed out of town. Their errors far exceed in number and substance the gaffes the press so criticized in President Ford.

Vice President Walter Mondale is himself not a tough enough realist to have protected the Carter people from themselves. He, too, exhibits high sentiments, of dubious political and economic reality. A nice man, a good man, his role has been reduced to that of making things go a little less badly. He cannot raise a fundamental challenge to the airy thinking of the inexperienced Carter hands.

The Carter people appointed McGovernites to virtually every post, especially in the State Department. The great unreality of 1972 has been installed in the bureaucracy. This is a huge misunderstanding of the will of the people in the past two presidential elections.

As gadflies on the outside, some of the Carterites once added salt to life. As managers of our national life, their illusions can only be corrected by hard experience. The nation may be in for an exceedingly difficult three years. Can a president be forced to resign? What will the growing numbers of his enemies do?

NATIONAL VOCATIONAL EDUCATION WEEK, FEBRUARY 12 TO 18

HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. HARRIS. Mr. Speaker, in recent years, vocational education has emerged as a major component of the American educational system. I think it is time we alert our citizens to the significant contributions vocational education is making to the social and economic development of our citizens and to the still greater challenges for the future.

For this reason, I am introducing a resolution to proclaim February 12–18, 1978, as National Vocational Education Week. The number of people who want and need training for employment is growing dramatically. From a little over 4 million students in 1963, enrollment in vocational programs has climbed to more than 16 million currently. Studies put forth by a number of vocational schools, community colleges, and technical institutes have shown that graduates of vocational programs have an easier time finding and keeping jobs. This has probably been a key reason for the accelerating national interest in vocational education.

Vocational education has expanded not only in numbers of students, but in the scope of the program. From its beginning as a rather narrowly defined secondary program, vocational education has grown to encompass postsecondary and adult programs conducted in all settings. Since 1963, vocational education has also had a strong mandate from the Congress to serve special target groups such as the handicapped, disadvantaged, potential dropouts, unemployed youth, women, and minorities. This charge was reinforced in 1976 by passage of the Education Amendments of 1976 and there is reason to believe that new life is being brought into the movement to serve hard to reach groups through vocational education.

Another reason for increased attention to vocational education is the impact these programs are having on the economic development of cities, communities, and States. Congress is concerned about reducing unemployment, reforming the welfare system, relieving the problems of our urban centers and rural areas, and achieving a stable, prosperous economy. The Nation's programs of vocational education can and should be partners in achieving these economic and social goals.

I would like to take this opportunity to recognize the American Vocational Association (AVA) for its work in support of quality vocational education. The AVA is a professional organization of teachers, adminisrators, guidance counselors, and others in the field of vocational education. They have worked through the years to strengthen their capacity to provide vocational education for those who need and want education for employment.

To show our endorsement and con-

tinued support of vocational education, I am pleased to introduce this resolution calling on the President to designate February 12 to 18 as National Vocational Education Week.

STACKING THE DECK

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. ASHBROOK. Mr. Speaker, last October, the liberal majority in the House of Representatives rammed through the so-called Labor Reform Act. This legislation is now awaiting action in the Senate.

Although endowed with a wonderful-sounding title, the bill is reform in name only. In actuality it is a totally one-sided approach to labor law which takes only a union leadership point of view. It promotes the interests of unions and union organizing while ignoring the legitimate concerns of employers and employees.

Among other things, the bill would pack the National Labor Relations Board with two additional—and undoubtedly prolabor—members. It would also speed up the election process in order to aid union organizing. In addition, it would give union organizers harsh legal tools they could use against employers and employees who resist unionization efforts.

No; the Labor Reform Act would not provide for a true reform of our labor laws. Instead it is an attempt to stack the deck so that unions cannot lose.

Following is an excellent article on this legislation by nationally syndicated columnist, James J. Kilpatrick:

A MONSTROUS LABOR PROPOSAL

(By James J. Kilpatrick)

The sponsors are calling it the "Labor Reform Act of 1978." They ought to be jailed for fraud. At the very least the authors ought to be called to task under the honest labeling laws, for the bill now pending in the Senate constitutes no reform at all.

Oh, in a sense it might be termed reform. If one believes that existing labor law should be rewritten so that (1) the unions have all the advantages and the employers have none, (2) nonunion workers should be deprived of the few safeguards they now possess, (3) small employers especially should be placed in jeopardy, and (4) the government in certain cases should have the power to fix wages in private industry—then, yes, the bill would accomplish precisely such "reforms."

Curiously, this monstrous piece of legislation has aroused much less attention than the common site picketing bill or the minimum wage bill, though its impact would be immeasurably greater. The entire business community rallied to defeat common site picketing; another effective coalition from the private sector significantly improved the original minimum wage measure.

Where are those voices now? The National Right to Work Committee, as always, is yelling like Paul Revere. The U.S. Chamber of Commerce has circulated some excellent background material. A few other organizations have sounded alarms, but a sense of urgency is missing.

Consider, if you will, a few provisions.

The bill would literally reform the National Labor Relations Board, which would be reconstituted with two additional members named for seven-year terms. The board has five members now. Organized labor, rebuffed in its choice of a Secretary of Labor a year ago, would exert irresistible pressure to make certain that two labor flunkeys were named to the posts. We already have seen Mr. Carter's weakness in this regard in his nominations to the Federal Elections Commission. This is Franklin D. Roosevelt's court-packing scheme, born again with Jimmy Carter.

The bill would rewrite the procedures for certification elections. These now are held in most cases about 60 days after a union's petition. The reform bill would speed things up to 14 days—too brief a time for workers who may oppose a union to rally their forces for a fair contest. The whole idea of this provision is to tilt the scales in favor of union victories.

Suppose the union wins one of these instant elections, and management begins to bargain on an initial contract. This is what could happen under this incredible bill: If the newly-packed National Labor Relations Board is not happy with the employer's bargaining, the board on its own motion could compel the employer to raise wages and benefits by whatever percentage the board perceives under "major collective bargaining settlements" in the nation. This is reform?

There is more. Under this bill, an incompetent, insolent, no-account worker need only identify himself with "union activity" to lead a charmed life. The employer who fires such a worker risks an NLRB order directing that the bum be rehired with double back pay. Under one provision, the board would be required to seek court injunctions against employers charged with unfair dismissals, even if the charges were patently frivolous.

The bill is aimed primarily at small companies with 50 to 100 workers. In the eyes of organized labor, these are plump pigeons waiting to be plucked. Under this bill, if the president of such a company dares to talk to his own workers about the union, the union must be given the same time, at the employer's expense, to conduct its counter campaign.

The bill (S. 1833) speaks for itself. If freedom-loving workers fail to lean on their senators, they will have only themselves to blame.

A PRESIDENT OUT OF HIS ELEMENT (WITH FARMERS)

HON. KEITH G. SEBELIUS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. SEBELIUS. Mr. Speaker, I have met with literally thousands of farmers since the Congress recessed in November. One of the questions raised by farmers and others with whom I have met is whether President Carter is out of touch with farmers? Other questions raised include: Is he aware of their plight? Is he equal to the job of governing this Nation as farmers would like to see it governed—with primary emphasis on production and marketing of agricultural products, rather than an agricultural policy and policymakers dominated by consumerism, conservationists, and environmentalists?

I commend to your attention a statement made by Mr. WAMPLER of Virginia in a hearing before the House Committee on Agriculture today relating to "the current agricultural situation." This statement highlights several of the problems facing farmers and ranchers which President Carter appears to be ignoring. The statement also recognizes the shift in agricultural policies—and budgets—under the Carter administration from a farmer to consumer orientation.

MATERNAL AND CHILD HEALTH AND CRIPPLED CHILDREN'S SERVICE ACT

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. ROGERS. Mr. Speaker, today, at the request of the American Academy of Pediatrics and the American Medical Association, I have introduced, along with my distinguished colleague, the ranking minority member of the Subcommittee on the Health and the Environment, Dr. Carter, a proposal entitled, "The 1978 Amendments to the Maternal and Child Health and Crippled Children's Service Act." This measure represents an initiative proposed by these medical organizations to improve and expand service programs under title V of the Social Security Act. I appreciate the work done by these groups in developing this proposal, and am certain that their suggestions will be most useful to the subcommittee during our deliberations on the entire spectrum of maternal and child health service issues.

According to these organizations, this proposal is designed to expand the scope of and increase the funding for health services for pregnant women, infants, children and adolescents under title V.

Delivery of benefits under this proposal would be accomplished through the existing health care system and private practitioners, although improvements in the current system's organization would be affected by this measure. The legislation especially seeks to make health services available to special groups with abnormal health risk, social dependence and limited resources.

Increased funding under the $800 million proposal would allow States to extend and improve services in the area of reducing infant mortality; preventing disease and disability; locating, diagnosing, treating and providing followup services for children having crippling conditions; and locating and aiding groups in special need. In addition, special grants to States and localities would be directed to the solution of other health problems, training of personnel and for research.

Funding would be available to States which provide for administration of the legislation by a State health agency or similar body and which are prepared to share financial responsibility for the program. State advisory councils would oversee implementation of the program. States would be required to develop "uni-

fied State plans" encompassing maternal and child health and crippled children's programs and responding to particular State needs in the areas of basic health services and children's programs.

Grants under the legislation would be targeted to solve special problems of low-income families, underserved counties, and local areas; training of health-care personnel; and research, with particular emphasis on developing comprehensive health care programs.

This legislation would establish a new National Office of Maternal and Child Health Services within the Department of Health, Education, and Welfare. The Secretary of the Department of HEW would appoint a National Advisory Council on Maternal and Child Health Programs to assist in preparing regulations and considering State plans provided under the bill.

Again, I appreciate the efforts of these medical organizations in developing legislation which they feel will improve the delivery of health care services to mothers and children and will enhance the role which can be played by the provision of preventive services. I am introducing this proposal today, as I am certain that it will be of use to the Congress in exploring a broad range of alternatives during our consideration of the issues surrounding the provision of maternal and child health services.

BIG LABOR BACKS LIBERAL ANTI-JOB POLICIES

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. ASHBROOK. Mr. Speaker, the very existence of many heavy industries is threatened in the United States. The production of steel, an industry in which hundreds of thousands of blue-collar, union workers earn their livelihood, is a good example. Environmentalist fanatics want to make steel production more expensive than it is, and it is already hard for domestic steel producers to compete with foreign imports. Internationalists want to continue our trade policy, which favors foreign producers over domestic ones. Capital which is essential to the creation of jobs in heavy industry is being drained off to cover huge annual national deficit. And every one of these movements, from environmentalist fanaticism to huge annual deficits, has the full backing of the leadership of the United Steelworkers' national and of the AFL–CIO. It seems as though big labor has some sort of perverse deathwish for the heavy industry a huge proportion of its membership depends upon for their jobs.

Right now, when liberal internationalist trade policy threatens to destroy our steel industry, the United Steelworkers' national is making a great show of attacking this policy. But that union has backed the liberals in every election who set up that policy in the first place, and who maintain it today. However loudly big labor attacks our giveaway trade policy right now, it will back the liberals who keep that policy going in 1978, and it will back those same internationalist liberals again in 1980.

The fact is that national union leadership is more interested in being good party line liberals than in the welfare of their membership.

Let us take the example of Government deficits. When the Government runs a deficit, it has to sell bonds to investors to cover that debt. To do that, it must go into the capital market and sell Government bonds in competition with industrial bonds, bank deposits, and other uses to which savers could put their money. Banks or industries selling bonds use savers' money to buy machinery or for other job-creating purposes. The Government takes the money and pays for its latest program or welfare boon-doggle. Most of the money which goes to cover each year's deficit is taken out of productive investment.

Heavy industry is more dependent on large-scale investment than any other sector of our economy. Tens of thousands of dollars are required to create an industrial job, and those tens of thousands have to be obtained out of the same capital market the Government dips into every year for tens of billions of dollars to pay for deficit spending for liberal programs. It would seem that if there were ever any fanatics about keeping the budget balanced, it would be the leadership of the industrial unions. But look at what those unions advocate. They want more welfare, which would push up the deficit, they want a national health program, which would push up the deficit borrowing which competes with industrial bonds, bank deposits, and other job-producing uses to which savers could put their money. This waste of investment money hurts all Americans, but it hurts industrial workers most of all.

The fact that Federal deficits use up investment money is crippling America's job-producing ability, as some figures will demonstrate.

Recently, President Carter asked the Congress to raise the ceiling on the national debt by $82 billion. This means that the U.S. Government is going into the capital market for another $83 billion to finance its programs. In 1976, investors put $106 billion into all producers' durable equipment, including the replacement of old equipment. That $106 billion represented all investment in all machinery and equipment in every form of production in this country, not just to make new jobs, but also to keep the jobs we have. Heavy industry is only a portion of this investment. The new debt ceiling will represent 80 percent as much money taken in by the Government to cover its deficit as we used in 1976 to buy all the new and replacement machinery in our whole economy. With the Government eating up capital at this rate, it is amazing we have any heavy industry left, and certainly no surprise that we do not attain any increase in jobs in heavy industry. If you want to know why our economy cannot provide any new jobs, look at the Federal debt that is eating up all the capital that should be producing those jobs.

Besides backing the killing off of industrial capital through deficits, liberal union leadership also backs the outright enemies of industry in the environmentalist movement. Most of the environmentalist fanatics would be happy to see heavy industry disappear in the United States. Big production complexes inevitably produce a lot of chemical and other wastes. If you read what they have in their publications, you see a clear and consistent anti-industrial bias in most of the environmentalist publications. They really got this anti-industrial program going in earnest with the Clean Air Act. By this act, the Federal Government began to divert hundreds of millions more steel investment dollars from production capital into cleaning and filtering equipment. All this came at the worst possible time, when the industry was already in a crisis condition due to imports of low-price foreign steel.

Needless to say, the United Steelworkers national backed the Clean Air Act solidly. Every year, big labor supports liberal extensions of this act, and others like it.

If there ever was a time for a union to stand up to the environmentalist lobby in defense of its members' jobs, this is the time and the United Steelworkers is the union. Instead, the union leaders support liberal candidates pushing these measures with union members' cash and with all the influence they can bring to bear.

When it comes to the vital issue of energy, unions once again are backing the liberal line against their members' livelihoods. A job in heavy industry requires the use of more power than one in any major part of our economy. Steel production, for instance, involves the use of huge amounts of coal, electricity, and water. If the environmentalist, no-growth lobby wins out in this country, the first thing we will have to do will be to close down our heavy industry. You would think, therefore, that the leadership of unions in heavy industry would be in the forefront of the fight for as much energy now as possible, and pushing hard for research into new energy sources. But by now I am sure you know what they are actually backing. You see, liberal ideology favors the no-growthers.

Liberal ideology opposes nuclear power, so of course those candidates fighting nuclear reactors get solid political support from the national industrial unions. Liberal ideology favors putting as many restrictions on the mining of coal as possible, so the candidates backing these measures get the full support of national unions. The leftist anti-energy lobby got full union support in 1976, and will get it again in 1978 and again in 1980, all with the money of the union members whose jobs they are busily destroying.

This battle against union members' economic well-being is a whole new field of callousness for the big labor bosses. We have seen these bosses defy their

members' wishes on one social issue after another. The Massachusetts State Labor Council, AFL–CIO, took an anti-busing stand in 1975. George Meany threatened to remove the council members and put the council under receivership unless they rescinded the resolution, in the teeth of nine-to-one member support for it. Labor bosses are everywhere in the forefront of the battle to register and confiscate the guns of honest citizens, including those of union members. In my experience, 90 percent or more of the union rank and file are opposed to registration or confiscation.

But the new drive against union members' economic well-being is a whole new departure for the labor bosses. It may not be long before their long-suffering membership realizes what is going on. When this happens, the members will force the nationals to back members' interests both economic and social, over the dictates of liberal ideology.

COUNTY GOVERNMENT DISPLAYING PROGRESS

HON. RICHARD H. ICHORD

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. ICHORD. Mr. Speaker, I am very pleased to invite the attention of my colleagues to the fine work of the Boone County government in Columbia, Mo., in developing innovative approaches to the problems of county government.

These appointed and elected officers are demonstrating the potential for the improvement of services and efficiency at the county level by drawing on their own unique talents as well as the help of State and Federal Government.

The Columbia Missourian in an editorial of January 15, 1978, took public note of this activity, and I am pleased to share this commentary with my colleagues:

COUNTY GOVERNMENT DISPLAYING PROGRESS

Despite past accusations—sometimes earned—of dawdling on the job, Boone County government shows heartening signs of progress and efficiency. The men and women in county government are the measure of that progress.

Judges of the County Court, along with Auditor Ken Geel, have been quietly but persistently working to improve, and possibly to computerize, the county's bookkeeping system. County Clerk Chris Kelly entered the picture Friday with what could develop into a breakthrough. A grant that might be available through the Missouri Department of Education would pay for a consutlant to analyze the county's fiscal system.

Before he was appointed to office by Gov. Teasdale, Mr. Kelly became known throughout county government as a whiz at securing government grants. He proved to have an uncanny knack for tiptoeing through the red tape without tripping—and he usually came home with the money. His knowledge of the labyrinths of bureaucracy now has produced the possibility of a significant step forward in county bookkeeping snafus—mostly unpaid bills—that came before the County Court. Since that time, Auditor Ken Geel has cleaned up procedures and eliminated much confusion in the current system.

Mr. Geel, together with County Court Presiding Judge Bill Frech, spawned some innovative approaches to budget procedure, particularly with respect to estimating tax revenues. Budget preparation traditionally has been a matter of organized confusion. Thanks to Messrs. Frech and Geel, future budgets should show more organization and less confusion.

In the county collector's office, Roger Wilson has forged ahead with little fanfare. Collecting back taxes is a perennial problem; the county must sue delinquent taxpayers in order to collect. Encouraged by Mr. Wilson, Rep. John Rollins, D-Columbia, has introduced a bill in the legislature that would require back taxes to be paid before auto license plates would be issued to taxpayers. Certainly the basic idea of the bill would improve county tax collection throughout Missouri.

We don't pretend to have given an overview of Boone County government in a single editorial. But these few recent items are encouraging evidence that county officeholders are earning their stripes.

IS TORRIJOS A DICTATOR?

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. RUDD. Mr. Speaker, the lead editorial in this morning's Washington Post, which was entitled "Remember Panama?" inferred that Panama's military dictator Omar Torrijos is not really a dictator.

How could the editors of the leading newspaper in the Nation's Capital have been so misinformed?

The editorial made this startling inference in order to discredit the argument of those who oppose the proposed new Panama Canal treaties on grounds that the United States cannot trust Panama's totalitarian military dictatorship, and should take no action to legitimize such a regime.

The editorial stated about Torrijos—

If he were in fact a dictator, of course, he would have engineered a larger margin in the first plebiscite, and the treaties would not be facing rejection in the second, and he would not be considering stepping down.

Let us look realistically at the true nature of Panama's military regime under Omar Torrijos.

First, Torrijos took power by force in 1968 with the backing of Panama's National Guard. He overthrew Panama's duly elected government and forced the National Assembly to accept his rewritten constitution making Torrijos chief of state for life. Torrijos has never been elected. He is thus a dictator.

As for allegations that Torrijos might step down if the proposed treaties are approved, Torrijos himself has never made such a public pledge. He has been quoted as saying that he might consider such an action. But then Torrijos would have himself quoted in any manner in order to obtain U.S. ratification of the proposed treaties, turning the $10 billion asset, the Panama Canal and the Canal Zone, over to him.

Torrijos needs U.S. ratification of the proposed treaties in order to maintain his dictatorship in Panama. No dictator would leave office voluntarily, and none ever has. The only time a dictator leaves is when he is shot to death, when he flees, or when he installs another puppet dictator regime in the place of his own.

Torrijos knows that the first two options are entirely possible for himself unless he can win U.S. ratification of the proposed treaties giving him sovereignty, ownership, and control of the Panama Canal—and he will do anything, even if it seems legitimate, in order to deceive our elected officials, and apparently our news media as well, into becoming full partners—guarantors—of his military regime.

Mr. Speaker, I am surprised that the editors of the Washington Post have overlooked some strong evidence about the real totalitarian and repressive nature of the military dictatorship of Omar Torrijos in Panama.

Such evidence exists in a complete survey of all nations of the world recently conducted by Freedom House, the highly respected national organization dedicated to strengthening democratic institutions, showing that Panama under dictator Torrijos is one of only six totalitarian nations among the 47 nations of our hemisphere.

The Freedom House survey, published last month, ranks nations as "free," "partially free," and "not free." Panama is rated as "not free," along with Cuba and all other nations of the Communist world, as well as other military dictatorships, because of its systematic repression of civil, political, and human rights of the Panamanian people.

Freedom House has rated all nations on a scale of 1 ("most free") to 7 ("least free"), and rates Panama at "6"—only one ranking short of being among the most repressive totalitarian nations in the world.

According to the Freedom House definition of this "6" rating, Panama does "not allow competitive electoral processes that would give the people a chance to voice their desire for a new ruling party or a desire for change in policy. The rulers of states at this level assume that one person or a small group has the right to decide what is best for the Nation, and that no one should be allowed to challenge that right."

The Freedom House publication flatly terms Panama's Government as a "military dictatorship," and in this latest survey refers to "Freedom House's frequent analysis and reporting of the deplorable record on human rights of the present regime in Panama?"

Mr. Speaker, it is disappointing that these facts have not become known to the editors of the Washington Post. I have noticed from this newspaper's past editorials concerning policies of other nations that it has often championed human rights and civil liberties of people whose governments have been even slightly undemocratic or repressive.

It has been documented that the military regime of dictator Torrijos systematically jails his political opponents,

denies free elections and a free press to the Panamanian people, and has allied itself with Fidel Castro, the Soviet Union, and other Marxist dictators of the so-called Third World.

Given these unquestioned facts about the Torrijos regime, and the Post's previous editorial policy, it would appear consistent for the Post's editors to vigorously oppose the proposed new treaties with Panama—or any U.S. agreements or aid that would strengthen Torrijos' suppression of the Panamanian people—if they were fully aware of the truly repressive nature of Panama's one-man dictatorship.

I hope that the Post will acknowledge these facts, and correct the public record with regard to the newspaper's characterization of the Torrijos regime. This would be the honest and fair thing to do, in light of the aspersions made by the Post in today's editorial against those who have sincerely opposed a U.S. partnership with the Torrijos dictatorship.

I have every reason to believe that the publisher and editors of the Washington Post take seriously their responsibility as trustees of the Nation's Capital's leading newspaper. I am sure that that trust and the newspaper's credibility are as important to them as they are to those who daily read the Post and support responsible journalism.

That is why I am pleased to bring this matter to their attention, and to the attention of my colleagues in the Congress. General Torrijos is a dictator—and he should be represented properly in that manner by the news media and those of us in the Congress as public debate continues over the proposed new Panama Canal treaties that are currently under consideration.

WILL PRESIDENT CARTER REPEAL OUR IMMIGRATION LAWS?

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. ASHBROOK. Mr. Speaker, President Carter has proposed an "amnesty" for millions of illegal aliens in this country, an amnesty of which one of the preconditions would be that the alien state his intention to become a U.S. citizen. If these millions of aliens obtain citizenship, the flood of immigration will not decrease, it will increase so much that our immigration laws will become meaningless. Do not forget these illegals violate our criminal laws. It is against the laws of the United States to illegally enter our country. A second violation is a felony. Repeat, a felony. Why our President so lightly treats criminal conduct of this type is without reason.

There is no quota on the immigration of relatives of U.S. citizens into this country. Parents or children of citizens may come into this country on the strength of their parents' or children's citizenship without restriction. Once the parents of an alien have been in this country for 5 years, they, too, can take citizenship. Their children who are under 21—the younger brothers and sisters of the original citizen—may then enter free of quota restrictions. These illegals flaunt our laws, becoming welfare burdens in all too many cases and taking good American jobs in others. How much of our unemployment is due to their criminal conduct?

If the millions of illegal aliens in this country—only one portion of whom represent a tenth of the population of the Republic of Mexico—were willing to defy immigration laws and undergo other disadvantages to enter this country, how many parents, sisters, brothers, and spouses are likely to enter when entry is perfectly legal?

According to one estimate "within the lifetime of most of us, the population of Mexico will be larger than that of the United States." Mexico, with an unemployment rate of 9 percent and an underemployment rate of 40 percent, cannot take care of its present population. This does not even take into consideration the different standards of living of the two countries. What will the vastly increased population of the next two decades do? Will they remain in increasing poverty, or will they come to the United States by way of Mr. Carter's open door policy? Accurate unemployment figures for the Philippines are not available, but even the official underestimate admits to 4 percent completely unemployed, and there is substantial underemployment as well. Clearly that country cannot provide for its burgeoning population. Will they remain in their increasing poverty over the next two decades if they can come to the United States through Mr. Carter's open door?

If Mr. Carter carries out his amnesty proposal, the flood of poor and unskilled immigrants into this country will increase. Far from being a solution to the problem of this vast influx, it will legitimize an even greater flow of people, many of whom will take jobs from our workers, and many of whom will become public charges.

At the very outset, amnesty will mean an increase in immigration as newly legitimate immigrants sponsor yet newer ones. Five years later, when these millions become citizens, there will be a massive influx of their parents and children, not to mention a huge number of real and contrived marriages, which will bring their spouses into this country. In 10 years, these immigrants' brothers and sisters will pour into this country as children of their now-naturalized parents and with them their families, and so on. Within two decades of Mr. Carter's "amnesty", there will, practically speaking, be no barriers to mass immigration into the United States. Taxpayers beware.

SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, March 2, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED

FEBRUARY 3

9:00 a.m.

Environment and Public Works

*Water Resources Subcommittee

To hold hearings to receive testimony on Federal dam safety requirements.

4200 Dirksen Building

Human Resources

Employment, Poverty, and Migratory Labor Subcommittee

To hold joint hearings with Banking, Housing, and Urban Affairs on S. 50, the Full Employment and Balanced Growth Act.

4232 Dirksen Building

Human Resources

Health and Scientific Research Subcommittee

To continue hearings on S. 2410, amending certain sections of the Public Health Service Act relative to health planning and health resources development.

1318 Dirksen Building

Veterans' Affairs

To hold hearings on S. 2384, the proposed Veterans and Survivors Income Security Act.

6202 Dirksen Building

9:30 a.m.

Human Resources

Aging Subcommittee

To resume oversight hearings on proposed extension of amendments to the Older Americans Act.

Until noon 457 Russell Building

10:00 a.m.

Budget

To receive testimony from OMB Director McIntyre in preparation for reporting the first concurrent resolution on the fiscal year 1979 congressional budget.

318 Russell Building

Energy and Natural Resources

Parks and Recreation Subcommittee

To hold hearings to receive testimony from the Department of the Interior on S. 1829, to establish the Jean Lafitte National Historic Park, Louisiana.

3110 Dirksen Building

Finance

To hold a business meeting.

2221 Dirksen Building

Governmental Affairs

To hold hearings on the handling of discrimination complaints in the Senate (pursuant to Rule 50 and Section 310 of S. Res. 110).

3302 Dirksen Building

Joint Economic
To resume hearings to receive testimony on the President's economic report.
345 Cannon Building

11:00 a.m.
Foreign Relations
African Affairs Subcommittee
To hold hearings to receive testimony on conditions in South Africa.
4221 Dirksen Building

3:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1979 for the Department of Labor.
1223 Dirksen Building

FEBRUARY 6

9:00 a.m.
Judiciary
Citizen and Shareholders Rights and Remedies Subcommittee
To hold hearings on S. 476, 477, 478, and the substance of S. 1256, 1257, and H.R. 7819, to amend the laws concerning diplomatic immunity.
2228 Dirksen Building

9:30 a.m.
Governmental Affairs
Governmental Efficiency and the District of Columbia Subcommittee
To resume hearings on H.R. 7747, to amend the D.C. Code with regard to pretrial release and detention.
6202 Dirksen Building

10:00 a.m.
Armed Services
Manpower and Personnel Subcommittee
To hold hearings to receive testimony from Comptroller General Staats on the costs of an all volunteer army.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
International Finance Subcommittee
To hold oversight hearings on exchange rate policy.
5302 Dirksen Building

Energy and Natural Resources
To consider the nominations of Lynn R. Coleman, of the District of Columbia, to be General Counsel of the Department of Energy; Stephen J. Gage, of Maryland, to be an Assistant Administrator of the EPA; and George S. McIsaac, of the District of Columbia, to be an Assistant Secretary of Energy; to be followed by consideration of pending calendar business.
3110 Dirksen Building

Finance
Taxation and Debt Management Subcommittee
To resume hearings on the public debt and the implications of President Carter's budget upon the debt.
2221 Dirksen Building

Governmental Affairs
To resume hearings on S. 1785 and S. 2026, to require public disclosure of certain lobbying activities.
3302 Dirksen Building

Select Small Business
To hold hearings jointly with the House Small Business Subcommittee on Minority Enterprise and General Oversight on the SBA minority business contracting program.
424 Russell Building

Joint Economic
To resume hearings on the President's economic report.
345 Cannon Building

11:00 a.m.
Foreign Relations
To hold hearings on U.S. policy with respect to the exploitation of Antarctic resources.
4221 Dirksen Building

5:45 p.m.
Veterans' Affairs
To hold hearings on a National Academy of Science study of health care for American veterans
6226 Dirksen Building

FEBRUARY 7

9:00 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on the Department of Energy's uranium enrichment policy.
3110 Dirksen Building

*Human Resources
Aging Subcommittee
To resume oversight hearings on proposed extension of amendments to the Older Americans Act.
Until noon 6202 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on the future of space science and space applications.
235 Russell Building

Environment and Public Works
To hold hearings on proposed authorizations for fiscal year 1979 for the Federal Highway Administration, and to receive testimony from Secretary of Transportation Brock Adams on the Administration's highway legislative proposals.
4200 Dirksen Building

10:00 a.m.
Appropriations
Labor-HEW Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1979 for the Departments of Labor-HEW, and related agencies.
S-128, Capitol

Banking, Housing, and Urban Affairs
To hold oversight hearings on the budgets of bank regulatory agencies.
5302 Dirksen Building

Finance
Public Assistance Subcommittee
To hold hearings to receive testimony from HEW Secretary Califano, on S. 2084, the proposed "Better Jobs and Income Act."
2221 Dirksen Building

Foreign Relations
To meet in closed session with the Chairman and staff members of the Select Committee on Intelligence for a briefing on certain issues relative to the Panama Canal Treaty and Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal (Exec. N, 95th Cong., 1st sess.).
S-116, Capitol

Governmental Affairs
To continue hearings on S. 1785 and S. 2026, to require public disclosure of certain lobbying activities.
3302 Dirksen Building

Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To resume hearings on alleged irregularities in certain spending practices of the Small Business Administration.
457 Russell Building

Select Small Business
To hold oversight hearings on the SBA procurement programs.
1318 Dirksen Building

Joint Economic
To continue hearings to receive testimony on the President's economic report from OMB Director McIntyre.
2154 Rayburn Building

10:30 a.m.
Judiciary
To hold hearings on the nominations of Jack E. Tanner, to be U.S. district judge for the eastern and western districts of Washington; Robert F. Collins, to be U.S. district judge for the eastern district of Louisiana; A. David Mazzone, to be U.S. district judge for the district of Massachusetts; and Almeric L. Christian, to be U.S. district judge for the district of the Virgin Islands.
2228 Dirksen Building

10:45 a.m.
Select Small Business
To hold hearings on S. 2259, the Small Business Procurement Expansion and Simplification Act.
1318 Dirksen Building

2:30 p.m.
Select Intelligence
To hold a closed business meeting.
S-407, Capitol

FEBRUARY 8

9:00 a.m.
Human Resources
Aging Subcommittee
To continue oversight hearings on proposed extension of amendments to the Older Americans Act.
Until noon 457 Russell Building

9:30 a.m.
Environment and Public Works
To hold hearings on proposed authorizations for fiscal year 1979 for the Nuclear Regulatory Commission.
4200 Dirksen Building

Environment and Public Works
Transportation Subcommittee
To hold hearings to receive testimony on issues relating to the Federal highway program, including the level of Federal support, completion of the Interstate System, and the costs of maintenance on the Federal highway system.
1318 Dirksen Building

Human Resources
Child and Human Development Subcommittee
To hold hearings to review the current programs on child care and child development and the need for additional legislation.
Until 12:30 p.m. 4232 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To hold hearings on the extension of NIH research authorities and community mental health centers.
Until 12:30 p.m. S-207, Capitol

Judiciary
Constitution Subcommittee
To hold hearings on S. 35, proposed Civil Rights Improvements Act.
2228 Dirksen Building

10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Fine Arts Commission, Woodrow Wilson Center, National Capitol Planning Commission, and the National Gallery of Art, Department of the Interior and related agencies.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
To continue oversight hearings on the budgets of bank regulatory agencies.
5302 Dirksen Building

Budget
To resume hearings in preparation for reporting the first concurrent resolution on the fiscal year 1979 congressional budget.
6202 Dirksen Buildng

Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings on proposed authorizations for fiscal year 1979 for the U.S. Railroad Association.
235 Russell Building

Energy and Natural Resources
Energy Production and Supply Subcommittee
To hold oversight hearings on the Federal coal leasing policy and its impact on western coal development.
3110 Dirksen Building

Finance
International Trade Subcommittee
To hold hearings on H.R. 5643, to implement the U.N. Convention on the means of prohibiting and preventing illicit import, export, and transfer of ownership of cultural property.
2221 Dirksen Building

Select Small Business
To hold hearings on S. 1566, to establish procedures for electronic surveillance in the area of foreign intelligence information.
6226 Dirksen Building

Select Small Business
To hold hearings to delineate the problems of attracting capital to small and medium sized independent enterprises.
424 Russell Building

Joint Economic
To continue hearings on the President's economic report.
2337 Rayburn Building

FEBRUARY 9

7:00 a.m.
Human Resources
Child and Human Development Subcommittee
To hold hearings on the reauthorization of the ACTION agency (P.L. 93–113).
Until 11:00 a.m. 4232 Dirksen Building

9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on the nominations of Edith B. Sloan and Susan B. King, both of the District of Columbia, each to be a Commissioner of the Consumer Product Safety Commission.
235 Russell Building

9:30 a.m.
Environment and Public Works
To hold hearings on proposed fiscal year 1979 authorizations for Title V's Regional Commissions of the Public Works and Economic Development Act of 1965, and the Appalachian Regional Commission.
4200 Dirksen Building

Judiciary
Constitution Subcommittee
To continue hearings on S. 35, proposed Civil Rights Improvements Act.
2228 Dirksen Building

10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Advisory Council on Historic Preservation, Museum Services, and Pennsylvania Avenue Development Corporation.
1318 Dirksen Building

Budget
To continue hearings in preparation for reporting the first concurrent resolution on the fiscal year 1979 congressional budget.
6202 Dirksen Building

Finance
Public Assistance Subcommittee
To resume hearings to receive testimony from Secretary of Labor Marshall on S. 2084, the proposed "Better Jobs and Income Act".
2221 Dirksen Building

Joint Economic
To continue hearings to receive testimony on the President's economic report from Treasury Secretary Blumenthal.
5110 Dirksen Building

FEBRUARY 10

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold oversight hearings on the implementation of the National Science and Technology Policy Act (P.L. 94–282).
235 Russell Building

10:00 a.m.
Energy and Natural Resources
Energy Production and Supply Subcommittee
To resume oversight hearings on the Federal coal leasing policy and its impact on western coal development.
3110 Dirksen Building

Select Small Business
To resume hearings to delineate the problems of attracting capital to small and medium-sized independent enterprises.
424 Russell Building

Joint Economic
To continue hearings to receive testimony on the President's economic report from Secretary of Commerce Kreps and Secretary of Labor Marshall.
345 Cannon Building

FEBRUARY 15

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold oversight hearings on the National Bureau of Standards.
235 Russell Building

FEBRUARY 20

9:30 a.m.
Environment and Public Works
To hold hearings on proposed fiscal year 1979 authorizations for programs within the Department of the Interior, including General Services Building proposals.
4200 Dirksen Building

10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Navajo-Hopi Relocation Commission, and Alaska Land Use.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To hold hearings on proposed fiscal year 1979 authorizations for HUD.
5302 Dirksen Building

6:00 p.m.
Human Resources
Child and Human Development Subcommittee
To resume hearings to review the current programs on child care and child development and the need for additional legislation.
Until 9:00 p.m. 4232 Dirksen Building

FEBRUARY 21

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on proposed fiscal year 1979 authorizations for NASA.
235 Russell Building

9:30 a.m.
Environment and Public Works
To hold hearings on proposed fiscal year 1979 authorizations for the Economic Development Administration.
4200 Dirksen Building

10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Office of the Secretary.
1114 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Health Services Administration, Department of HEW.
S–128, Capitol

Banking, Housing, and Urban Affairs
Housing, and Urban Affairs Subcommittee
To continue hearings on proposed fiscal year 1979 authorizations for HUD.
5302 Dirksen Building

SENATE—*Thursday, February 2, 1978*

(Legislative day of Monday, January 30, 1978)

The Senate met at 10:45 a.m., on the expiration of the recess, and was called to order by Hon. HARRY F. BYRD, JR., a Senator from the State of Virginia.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O God, who rulest the worlds from everlasting to everlasting: Speak to our hearts when courage fails, and men faint for fear, and the love of many grows cold, and there is distress of the nations upon the Earth. Keep us hopeful, resolute, and steadfast. Strengthen and confirm our trust in the triumph of justice, and grant us to know that, amid the uncertainties of our time, Thine alone is the Kingdom, the Power, and the Glory forever and ever. Amen.

—Adapted from "Prayers for a New World."

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., February 2, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable HARRY F. BYRD, JR., a Senator from the State of Virginia, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. HARRY F. BYRD, JR. thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Wednesday, February 1, 1978, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. PAUL G. HATFIELD assumed the chair.

THE PRESIDENT'S ADDRESS TO THE NATION

Mr. ROBERT C. BYRD. Mr. President, last night President Carter made a most important address to the Nation on the subject of the Panama Canal treaties.

The President is to be commended on the forthright manner in which he discussed the critical issues involved in the treaties. I think he is to be commended on bringing the public into the discussions, so that the American people may constitute a more informed public as we attempt to reach our decisions, individually and collectively, on these treaties I believe that anyone who seriously considered the President's remarks will come to the same conclusion that I have reached—that the treaties represent what is right for us and fair to others.

As President Carter said, approval of the treaties is the surest way to protect and save the canal; it would also be the strong, positive act of a people who are still confident, still creative, still great.

President Carter's remarks deserve the thoughtful consideration of every Senator and every American.

I ask unanimous consent, Mr. President, that the text of President Carter's televised speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

[From the New York Times, Feb. 2, 1978]

TEXT OF PRESIDENT CARTER'S TELEVISED SPEECH ON THE PANAMA CANAL TREATIES

Seventy-five years ago, our nation signed a treaty which gave us rights to build a canal across Panama to take the historic step of joining the Atlantic and Pacific Oceans. The results of the agreement have been a great benefit to ourselves and to other nations throughout the world who navigate the high seas.

The building of the canal was one of the greatest engineering feats of history. Although massive in concept and construction it is relatively simple in design and has been reliable and efficient in operation. We Americans are justly and deeply proud of this great achievement.

The canal also has been a source of pride and benefit to the people of Panama but a cause of some continuing discontent. Because we have controlled a 10-mile-wide strip of land across the heart of their country and because they considered the original terms of the agreement to be unfair, the people of Panama have never been satisfied with the treaty. It was drafted here in our country and was not signed by any Panamanian. Our own Secretary of State who did sign the original treaty said it was "vastly advantageous to the United States and . . . not so advantageous to Panama."

In 1964, after consulting with former Presidents Truman and Eisenhower, President Johnson committed our nation to work toward a new treaty with the Republic of Panama. Last summer, after 14 years of negotiations under two Democratic Presidents and two Republican Presidents, we reached and signed an agreement that is fair and beneficial to both countries. The United States Senate will soon be debating whether these treaties should be ratified.

CONCERN FOR NATIONAL SECURITY

Throughout the negotiations, we were determined that our national security interests would be protected; that the canal would always be open, neutral and available to ships of all nations; that in time of need or emergency our ships would have the right to go to the head of the line for priority passage through the canal; and that our military forces would have the permanent right to defend the canal if it should ever be in danger.

The new treaties met all of these requirements. Let me outline the terms of the agreement. There are two treaties—one covering the rest of this century and the other guaranteeing the safety, openness and neutrality of the canal after the year 1999 when Panama will be in charge of its operation.

For the rest of the century we will operate the canal through a nine-person board of directors. Five members will be from the United States, and four from Panama. Within the area of the present Canal Zone, we have the right to select whatever lands and waters our military and civilian forces need to maintain, operate and defend the canal.

About 75 percent of those who now maintain and operate the canal are Panamanians; over the next 22 years as we manage the canal together, this percentage will increase. The Americans who work on the canal will continue to have their rights of employ-

ment, promotion and retirement carefully protected.

SOME FEES TO BE SHARED

We will share with Panama some of the fees paid by shippers who use the canal. As in the past, the canal should continue to be self-supporting.

This is not a partisan issue. The treaties are strongly backed by President Gerald Ford and by former Secretaries of State Dean Rusk and Henry Kissinger. They are endorsed by our business and professional leaders, and especially by those who recognize the benefits of good will and trade with other nations in this hemisphere. They are endorsed by the Senate Democratic Leader, Robert Byrd, and by Republican Leader Howard Baker, and overwhelmingly by the Senate Foreign Relations Committee, which this week moved us closer to ratification by approving the treaties, although with some recommended changes which we do not feel are needed.

And the treaties are supported enthusiastically by every member of the Joint Chiefs of Staff, Gen. George Brown, the Chairman; Gen. Bernard Rogers, Chief of Staff of the Army; Adm. James Holloway, Chief of Naval Operations; Gen. David Jones, Chief of Staff of the Air Force, and Gen. Lewis Wilson, Commandant of the Marine Corps—responsible men whose profession is the defense of this nation and the preservation of our security.

WIDE SUPPORT IN LATIN AMERICA

The treaties also have overwhelming support throughout Latin America, but predictably they are opposed abroad by some who are unfriendly to the United States and who would like to see disorder in Panama and a disruption of ties with our friends in Central and South America and in the Caribbean.

I know that the treaties also have been opposed by many Americans. Much of that opposition is based on misunderstanding and misinformation. I have found that when the full terms of the agreement are known, most people are convinced that the national interests of our country will be served best by ratifying the treaties.

Tonight I want you to hear the facts. I want to answer the most serious questions, and tell you why I feel the Panama Canal Treaties should be approved. The most important reason—the only reason—to ratify the treaties is that they are in the highest national interests of the United States, and will strengthen our position in the world. Our security interests will be stronger. Our trade opportunities will be improved. We will demonstrate that as a large and powerful country, we are able to deal fairly and honorably with a proud but smaller sovereign nation. We will honor our commitment to those engaged in world commerce that the Panama Canal will be open and available for use by their ships—at a reasonable and competitive cost—both now and in the future.

ANSWERS TO SOME QUESTIONS

Let me answer specificially the most common questions about the treaties:

Will our nation have the right to protect and defend the canal against any armed attack or threat to the security of the canal or ships going through it?

The answer is yes, and is contained in both treaties and also in the statement of understanding between the leaders of our two nations.

The first treaty says: "The United States of America and the Republic of Panama commit themselves to protect and defend the Panama Canal. Each party shall act, in accordance with its constitutional processes, to meet the danger resulting from an armed attack or other actions which threaten the security of the Panama Canal or of ships transitting it."

The neutrality treaty says: "The United States of America and the Republic of Panama agree to maintain the regime of neutrality established in this treaty, which shall be maintained in order that the canal shall remain permanently neutral."

The statement of understanding says: "Under [the neutrality treaty] Panama and the United States have a responsibility to assure that the Panama Canal will remain open and secure to ships of all nations. The correct interpretation of this prniciple is that each of the two countries shall, in accordance with their respective Constitutional processes, defend the canal against any threat to the regime of neutrality, and consequently will have a right to act against any aggression or threat directed against the canal or against the peaceful transit of vessels through the canal."

It is obvious that we can take whatever military action is necessary to make sure that the canal always remains open and safe.

PLEDGE ON PANAMANIAN INTEGRITY

Of course, this does not give the United States any right to intervene in the internal affairs of Panama, nor would our military actions ever be directed against the territorial integrity or political independence of Panama.

Military experts agree that even with the Panamanian Armed Forces joined with us as brothers against a common enemy, it would take a large number of American troops to ward off a heavy attack. I would not hesitate to deploy whatever armed forces are necessary to defend the canal, and I have no doubt that even in sustained combat we would be successful. But there is a much better option than sending our sons and grandsons to fight in the jungles of Panama.

We would serve our interests better by implementing the new treaties, an action that would help to avoid any attack on the Panama Canal.

What we want is the permanent right to use the canal and we can defend this right through these treaties—through real cooperation with Panama. The citizens of Panama and their Government have already shown their support of this new partnership, and a protocol to the neutrality treaty will be signed by many other nations, thereby showing their strong approval.

The new treaties will naturally change Panama from a passive and sometimes deeply resentful bystander into an active and interested partner whose vital interests will be served by a well-operated canal. This agreement leads to cooperation, not confrontation between our country and Panama.

Another question is: "Why should we give away the Panama Canal Zone?" As many people say, "We bought it, we paid for it, it's ours."

I must repeat a very important point: We do not own the Panama Canal Zone—we have never had sovereignty over it. We have only had the right to use it.

The Canal Zone cannot be compared with United States territory. We bought Alaska from the Russians, and no one has ever doubted that we own it. We bought the Louisiana Territories from France, and it is an integral part of the United States.

PAYMENT SYSTEM CITED

From the beginning we have made an annual payment to Panama to use their land. You do not pay rent on your own land. The Canal Zone has always been Panamanian territory. The U.S. Supreme Court and previous American Presidents have repeatedly acknowledged the sovereignty of Panama over the Canal Zone.

We have never needed to own the Panama Canal Zone, any more than we need to own a 10-mile wide strip of land through Canada when we build an international gas pipeline.

The new treaties give us what we do need—not ownership of the canal, but the right to use it and to protect it. As the chairman of the Joint Chiefs of Staff has said: "The strategic value of the canal lies in its use."

There is another question: Can our Naval ships, in time of need or emergency, get through the canal immediately instead of waiting in line?

The treaties answer that clearly by guaranteeing that our ships will always have expeditious transit through the canal. To make sure that there could be no possible disagreement about what these words mean, the joint statement says that expeditious transit, and I quote, "is intended to assure the transit of such vessels through the canal as quickly as possible, without any impediment, with expedited treatment, and in case of need or emergency, to go to the head of the line of vessels in order to transit the canal rapidly."

POWER VACUUM CHARGE REJECTED

Will the treaties affect our standing in Latin America—will they create a so-called power vacuum which our enemies might fill?

They will do just the opposite. The treaties will increase our nation's influence in this hemisphere, will help to reduce any mistrust and disagreement, and will remove a major source of antiAmerican feeling.

The new agreement has already provided vivid proof to the people of this hemisphere that a new era of friendship and cooperation is beginning, and that what they regard as the last remnant of alleged American colonialism is being removed.

Last fall I met individually with the leaders of 18 countries in this hemisphere. Between the United States and Latin America there is already a new sense of equality, a new sense of trust and mutual respect that exists because of the Panama Canal treaties. This opens up a fine opportunity for us, in good will, trade, jobs, exports, and political cooperation.

If the treaties should be rejected, this would all be lost, and disappointment and despair among our good neighbors and traditional friends would be severe.

In the peaceful struggle against alien ideologies like Communism, these treaties are a step in the right direction. Nothing could strengthen our competitors and adversaries in this hemisphere more than for us to reject this agreement.

What if a new sea-level canal should be needed in the future?

This question has been studied over and over throughout this century, from before the canal was built up through the last few years. Every study has reached the same conclusion: that the best place to build a sea-level canal is in Panama.

The treaties say that if we want to build such a canal, we will build it in Panama—and if any canal is to be built in Panama, we will have the right to participate in the project.

This is a clear benefit to us, for it insures that 10 or 20 years from now, no unfriendly but wealthy power will be able to purchase the right to build a sea-level canal, bypass the existing canal, perhaps leaving that other nation in control of the only usable waterway through the isthmus.

PAYMENTS TO COME OUT OF TOLLS

Are we paying Panama to take the Canal? We are not. Under the new treaties payments to Panama will come from tolls paid by ships which use the canal.

What about the present and future stability of the Panamanian Government? Do the people themselves support the new agreement?

Panama and her people have been our historical allies and friends. The present leader of Panama has been in office for more than nine years, and he heads a stable government which has encouraged the development of free enterprise in Panama. Democratic elections will be held this August to choose the members of the Pana-

manian Assembly, who will in turn elect a President and a Vice President by majority vote.

In the past, regimes have changed in Panama—but for 75 years no Panamanian Government has ever wanted to close the canal. Panama wants the canal open and neutral—perhaps even more than we do. The canal's continued operation is very important to us, but it is much more than that to Panama.

To Panama, it is crucial. Much of her economy flows directly or indirectly from the canal. Panama would be no more likely to neglect or close the canal than we would be to close the interstate highways.

In an open and free referendum last October which was monitored by the United Nations, the people of Panama gave the new treaty their support.

The major threat to the canal comes not from any government of Panama, but from misguided persons who may try to fan the flames of dissatisfaction with the terms of the old treaty.

There is a final question, about the deeper meaning of the treaties themselves—to us and to Panama.

Recently I discussed the treaties with David McCullough, author of "The Path Between the Seas," the great history of the Panama Canal. He believes that the canal is something that we built and have looked after these many years; it is "ours" in that sense, which is very different from just ownership.

DEEP AND ELEMENTAL FEELINGS

So when we talk of the canal, whether we are old, young, for or against the treaties we are talking about the very deep and elemental feelings about our own strength.

Still, we Americans want a more humane and stable world. We believe in good will and fairness, as well as strength. This agreement with Panama is something we want because we know it is right. This is not merely the surest way to protect and save the canal; it is the strong, positive act of a people who are still confident, still creative, still great.

This new partnership can become a source of national pride and self-respect in much the same way as building the canal 75 years ago. It is the spirit in which we act that is so very important.

Theodore Roosevelt, who was President when America built the canal, saw history itself as a force, and the history of our own time and the changes it has brought would not be lost on him. He knew that change was inevitable and necessary. Change is growth. A true conservative, he once remarked, puts his faith in the future.

But if Theodore Roosevelt were to endorse the treaties, as I am quite sure he would, it would be mainly because he could see the decision as one by which we are demonstrating the kind of great power he wished to be.

"We cannot avoid meeting great issues," Roosevelt said. "All that we can determine for ourselves is whether we shall meet them well or ill."

The Panama Canal is a vast, heroic expression of that age-old desire to bridge the divide and bring people closer together. This is what the treaties are all about.

We can sense what Roosevelt called "the lift toward nobler things which marks a great and generous people."

In this historic decision he would join us in our pride for being a great and generous people, with the national strength and wisdom to do what is right for us and fair to others.

Mr. ROBERT C. BYRD. Mr. President, I understand that the distinguished Senator from Virginia wishes to have a portion of my time. How much time does the Senator require?

Mr. HARRY F. BYRD, JR. About 6 or 7 minutes.

Mr. ROBERT C. BYRD. All right, Mr. President, I reserve the remainder of my time. I wish to give the minority leader a chance to say anything he may wish to say at this point, and then I will yield my remaining time to the Senator from Virginia.

RECOGNITION OF LEADERSHIP

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, I thank the majority leader. I have no request for time and no requirements for time, so I yield back my time under the standing order.

Mr. ROBERT C. BYRD. Then, Mr. President, I yield whatever time I have remaining to the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.), my namesake.

THE PANAMA CANAL TREATIES: A MISSING COMPONENT

Mr. HARRY F. BYRD, JR. I thank the distinguished majority leader.

Mr. President, on Tuesday, January 31, Mr. Herbert J. Hansell, legal advisor to the Department of State, testified before the Senate Armed Services Committee.

Mr. Hansell testified that if the proposed new treaties are ratified by the Senate, implementing legislation will need to be enacted.

The implementing legislation will contain crucial interpretations of the treaty language with regard to the appropriations process, pension costs, labor contracts, toll structure, employment practices, accounting procedures, commercial organization, jurisdiction of U.S. courts and law enforcement, and other important details—including direct costs to the taxpayers.

Just how important is the implementing legislation?

Yesterday that question was put to the Governor of the Canal Zone, Maj. Gen. H. R. Parfitt, when he testified before the Senate Armed Services Committee.

Governor Parfitt replied that it would be most helpful to the Senate in its consideration of the proposed new treaties.

Elmer Staats, Comptroller General of the United States, told the Armed Services Committee that if he were a Senator, he would want to have available the implementing legislation before voting on the treaties.

But the most definitive statement was made by Mr. Hansell in his testimony before the Foreign Relations Committee on September 29, 1977.

I quote from Mr. Hansell's testimony, he being the legal advisor to the State Department:

> Finally, Mr. Chairman, I am pleased to have this opportunity to report to this committee on the proposed legislation to implement these treaties that is being prepared for submission to Congress in the near future. That legislation, of course, will be an essential component of the overall program of implementation of the treaties.

For emphasis I repeat again Mr. Hansell's statement to the Senate Foreign Relations Committee:

> That legislation, of course, will be an essential component of the overall program of implementation of the treaties.

Yet, that "essential component" has not been submitted to the Congress.

Mr. Hansell told the Foreign Relations Committee on September 29, that:

> We hope to have a complete draft available for submission to both Houses of Congress within several weeks. We have been at work on it for some period of time. Certainly well before the end of October we expect to have it to you.

But October has come and gone, November has come and gone, December has come and gone, January has come and gone—and still the implementing legislation is not available to the Congress.

Under questioning Tuesday, Mr. Hansell could not tell the committee when such legislation might be available.

The point that I raise with the Senate and the point which I hope the leadership would consider before calling up the Panama Canal treaties is that legislation considered by the State Department "an essential component" in implementing the treaties—and promised to the Congress last October—is not available.

The fact that the legislation was promised to the Congress in October but is not yet available in February suggests to me that it is, indeed, "an essential component" and must, indeed, have wide ramifications and much complexity. Perhaps as a matter of strategy the administration wishes to withhold this "essential" component for fear of weakening support for the treaties.

But would it be fair, wise or appropriate to require the Senate to debate the proposed new treaties without the Senate having available the "essential component" of legislation that would be required if the treaties are ratified?

To determine whether the treaties are sound and should be enacted requires that all of the facts be available. Yet, the implementing legislation, essential to carrying out the purposes of the treaties, is not available for consideration by the Senate.

I urge delay in calling up the proposed Panama Canal Treaties until the implementing legislation is available for consideration—which legislation the Governor of the Canal Zone said would be helpful to the Senate and would shed light on the matter; and which legislation the State Department terms "an essential component" in implementing the treaties.

In conclusion, I emphasize, too, that the State Department on September 29, 1977 promised the Senate Foreign Relations Committee "a complete draft (would be) available for submission to both Houses of Congress in several weeks."

I have no desire merely to delay consideration of the treaties; I do feel it important to have "essential" components available when the debate begins.

I should think, Mr. President, that the

proponents—even more, perhaps, than the opponents—would want this information available to avoid potential serious misunderstanding with Panama and possible difficulties with the House of Representatives in obtaining enactment of implementing legislation.

In ending, I ask this question: How can the treaties be properly debated when essential components are missing?

I thank the distinguished majority leader for yielding to me.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that statements in that period be limited to 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations to the Executive Calendar.

Mr. BAKER. Mr. President, reserving the right to object, I rise only to advise the majority leader that the Executive Calendar on this side is cleared from page 1, beginning with "U.S. Air Force," through page 8, including nominations placed on the Secretary's desk. We have no objection to their consideration and confirmation.

Mr. ROBERT C. BYRD. Mr. President, I thank the minority leader.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all the nominations be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

NOMINATIONS

U.S. AIR FORCE

Lt. Gen. Bryce Poe II, to be general.

Gen. Daniel James, Jr., to be general.

Maj. Gen. Edgar Starr Harris, Jr., to be lieutenant general.

Col. James P. Albritton, to be brigadier general.

Col. Spence M. Armstrong, to be brigadier general.

Col. Ernest A. Bedke, to be brigadier general.

Col. Donald W. Bennett, to be brigadier general.

Col. Schuyler Bissell, to be brigadier general.

Col. William R. Brooksher, to be brigadier general.

Col. James R. Brown, to be brigadier general.

Col. Thomas B. Bruton, to be brigadier general.

Col. Robert E. Buhrow, to be brigadier general.

Col. John T. Chain, Jr., to be brigadier general.

Col. Robert E. Chapman, to be brigadier general.

Col. Joseph H. Connolly, to be brigadier general.

Col. Thomas G. Darling, to be brigadier general.

Col. Donald L. Evans, to be brigadier general.

Col. Kenneth R. Fleenor, to be brigadier general.

Col. James L. Gardner, Jr., to be brigadier general.

Col. Lawrence D. Garrison, to be brigadier general.

Col. Harry A. Goodall, to be brigadier general.

Col. William H. Greendyke, to be brigadier general.

Col. Titus C. Hall, to be brigadier general.

Col. Richard D. Hansen, to be brigadier general.

Col. Guy L. Hecker, Jr., to be brigadier general.

Col. Robert C. Karns, to be brigadier general.

Col. Melbourne Kimsey, to be brigadier general.

Col. Donald L. Lamberson, to be brigadier general.

Col. Gerald D. Larson, to be brigadier general.

Col. John R. Lasater, to be brigadier general.

Col. William E. Lindeman, to be brigadier general.

Col. Leo Marquez, to be brigadier general.

Col. Keith D. McCartney, to be brigadier general.

Col. Gerald E. McIlmoyle, to be brigadier general.

Col. Robert E. Messerli to be brigadier general.

Col. John F. O'Donnell to be brigadier general.

Col. Marvin C. Patton to be brigadier general.

Col. Milton R. Peterson to be brigadier general.

Col. Richard W. Phillips to be brigadier general.

Col. George B. Powers, Jr. to be brigadier general.

Col. Winston D. Powers to be brigadier general.

Col. Marc C. Reynolds to be brigadier general.

Col. Thomas C. Richards to be brigadier general.

Col. Graham W. Rider to be brigadier general.

Col. Davis C. Rohr to be brigadier general.

Col. John P. Rollston to be brigadier general.

Col Robert A. Rosenberg to be brigadier general.

Col. Click D. Smith, Jr. to be brigadier general.

Col. William L. Strand to be brigadier general.

Col. William E. Thurman to be brigadier general.

Col. Edward L. Tixier to be brigadier general.

Col. Harold W. Todd to be brigadier general.

Col. Brien D. Ward to be brigadier general.

Col. Clinton H. Winne, Jr. to be brigadier general.

Col. Thomas E. Wolters to be brigadier general.

U.S. ARMY

Maj. Gen. Ernest Graves, Jr. to be lieutenant general.

Brig. Gen. Freeman Henry Forrest to be major general.

Brig. Gen. Robert Lewis Frantz to be major general.

Brig. Gen. George Emmett McGovern, Jr. to be major general.

Brig. Gen. Frederick John Scheer to be major general.

Col. Jason Alfred Aisner to be brigadier general.

Col. George Leighton Allen to be brigadier general.

Col. Jack Nelson Bohm to be brigadier general.

Col. James Thomas Bonsall to be brigadier general.

Col. James Eliot Chapman, to be brigadier general.

Col. Anthony Harry Conrad, Jr., to be brigadier general.

Col. James Carroll Crawford, to be brigadier general.

Col. Ernest Stephen Ellis, to be brigadier general.

Col. Joseph Melvin Lojeck, to be brigadier general.

Col. Carl Daniel McIntosh, to be brigadier general.

Col. Charles Dunford, to be brigadier general.

Col. Emory Conrad Parrish, to be brigadier general.

Col. Herbert Joseph Riley, to be brigadier general.

Col. Will Hill Tankersley, to be brigadier general.

Col. James Robert Trapp, to be brigadier general.

Col. William Francis Ward, to be brigadier general.

Brig. Gen. Francis Joseph Higgins, to be major general.

Col. Owen Daniel Griffith, to be brigadier general.

Col. David Workman Hancock, to be brigadier general.

Col. William McGee Ingram, to be brigadier general.

Col. Harold Joseph Lavell, to be brigadier general.

Col. Paul Andrew McGowan, to be brigadier general.

Col. Paul Warren Reed, to be brigadier general.

Col. William Grey Waters, to be brigadier general.

Col. John Elina Aiona, Jr., to be brigadier general.

Col. Cornelius Ottway Baker, to be brigadier general.

Col. Douglas Milton Byington, to be brigadier general.

Col. Guy Homer Harding, to be brigadier general.

Col. Hubert Monroe Leonard, to be brigadier general.

Col. Anthony Lewis Palumbo, to be brigadier general.

Col. Arthur Nims Phillips, to be brigadier general.

Lt. Gen. John Holloway Cushman, to be lieutenant general.

U.S. NAVY

Vice Adm. Edward W. Cooke, to be vice admiral.

Rear Adm. William N. Small, to be vice admiral.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, ARMY, AND NAVY

Air Force nominations beginning Jack D. Abercrombie, to be colonel, and ending James W. McBride, to be captain, which nominations were received by the Senate and appeared in the Congressional Record on January 20, 1978.

Army nominations beginning James Bennett, to be colonel, and ending Luther J. McGaughy, to be lieutenant colonel, which nominations were received by the Senate and appeared in the Congressional Record on January 20, 1978.

Navy nominations beginning Rodney A. Marcom, to be commander, and ending Paul F. Krueger, to be ensign, which nominations

were received by the Senate and appeared in the Congressional Record on January 20, 1978.

Navy nominations beginning Jimmy L. Aaron, to be ensign, and ending Harry R. Erichson, to be lieutenant which nominations were received by the Senate and appeared in the Congressional Record on January 20, 1978.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The PRESIDING OFFICER (Mr. SASSER). Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I ask unanimous consent that it be in order to move to reconsider en bloc the vote by which the nominations were considered and confirmed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I so move.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSIONS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the sessions of the Senate on February 22, 23, 24, and 28, 1978, to consider money resolutions and other matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONFERENCE ON ECONOMIC DEVELOPMENT AND BALANCED GROWTH

The PRESIDING OFFICER. Is there further morning business?

Mr. PERCY. Mr. President, I take note of the fact that it is now 10:57. At this very moment, at the Sheraton Park Hotel, the President of the United States is addressing a conference that I just left because of the pending business, the White House Conference on Balanced National Growth and Economic Development. The chairman of that conference is the distinguished Governor of West Virginia, Jay Rockefeller. The concept of the conference came from JENNINGS RANDOLPH, the distinguished senior Senator from West Virginia. Once again, West Virginia has provided leadership to the Nation—a State relatively small in size, but very powerful, indeed, in the voice of the Republic and in providing guidance for the future development of this country.

I commend both Governor Rockefeller and Senator RANDOLPH for this remarkable conference, under way since Sunday, which has brought leaders appointed by Governors from our 50 States and has provided a pattern of development for future economic growth in this country that will be very much in the best interests of our Nation and its citizens present and future.

May I also parenthetically comment that it is the hope of the Senator from Illinois that, through the combined leadership of Government, labor, and management, the present prolonged coal strike will quickly come to an end. It is now reaching a point where it is defeating the economic interest of the very workers it is supposed to benefit. It is reaching the point where it is causing deep concern among coal purchasers about the stable source of supply of coal as a reliable fuel. I do happen to know of the extraordinary efforts being made by Governor Rockefeller to help bring about a settlement on a fair and equitable basis at the earliest possible time. This would be one way to help assure balanced growth and economic development in the country, looking to the future. Our future national energy policy must be based upon dramatically increasing the production and use of coal today and in the years ahead.

I regretted that I had to leave the White House conference in order to be on the Senate floor this morning, but Senator GLENN and I have worked for years together on the nuclear proliferation bill that is now the pending business of the Senate, upon which we will now begin debate.

Mr. GLENN. Mr. President, I would like to associate myself with the remarks of the Senator from Illinois with regard to the White House conference that has been going on.

I could not make my scheduled speech to them yesterday afternoon because of voting here in the Senate. But I, too, am very much concerned we get more into this area of looking forward, laying out the options we have for the future, and then guiding in whatever subjects, education, transportation, economy, or whatever, and consciously approach some objectives for the future.

Some 2½ years ago, shortly after I arrived here in the Senate, we held very extensive hearings in this regard about the lack of forward-looking option setting in this country and it has not been done under the current domestic councils, or the past, to the length I think it should have been done.

I am glad the White House is approaching this.

I appreciate the opportunity to associate myself with the remarks of the Senator from Illinois.

I thank the Chair.

(Routine morning business transacted and additional statements submitted are printed later in today's RECORD.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

NUCLEAR NONPROLIFERATION ACT OF 1977

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of the unfinished business, S. 897, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (S. 897) to strengthen United States policies on non-proliferation and to recognize certain export functions of the Federal Government to promote more efficient administration of such functions.

The Senate resumed the consideration of the bill.

Mr. GLENN. Mr. President, there are a number of staff members on both the Governmental Affairs Committee, the Foreign Relations Committee, and my personal staff, that I ask unanimous consent be granted privilege of the floor during consideration of this bill and voting thereon, including amendments. They are: Len Weiss, Len Bickwit, Sandy Spector, Steve Avakian, Ellen Miller, Bill Ashworth, Norvill Jones, and Richard Wegman.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I ask unanimous consent that Connie Evans and Alan Bennett of the Governmental Affairs Committee, and Kathryn Brewer and Tom Carter of Senator HAYAKAWA's staff be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, if the Senator will yield, I make the same request for Chuck Triant, Mike Hathaway, and Todd Neuenschwander.

The PRESIDING OFFICER. Without objection, is it so ordered.

Mr. GLENN. Mr. President, the distinguished chairman of the Foreign Relations Committee has a statement to make. He asked to be recognized and I am glad to yield to the distinguished chairman for his statement.

Mr. SPARKMAN. Mr. President, I was going to wait for any statement the Senator might want to make, but I shall be very glad to make this brief statement because I do have other business.

Mr. President, I rise in support of S. 897, the Nuclear Non-Proliferation Act of 1977, as reported by the Committee on Foreign Relations on October 3, 1977.

Mr. President, this bill is the result of many months of cooperation and close consultation between the executive branch and the Congress. The version as approved by the Committee on Foreign Relations meets the legitimate concerns of the executive branch and also incorporates provisions suggested by a number of Members. The Senator from Ohio (Mr. GLENN) and the Senator from Illinois (Mr. PERCY), who are members of both the Committee on Foreign Relations and the Committee on Governmental Affairs, have played a leading and guiding role in developing this legislation. The Senator from Rhode Island (Mr. PELL) who is chairman of the Subcommittee on Arms Control, Oceans and International

Environment of the Committee on Foreign Relations, chaired three useful and comprehensive hearings on this bill. Senator CHURCH and other colleagues have also made contributions.

Because of the dangers posed by nuclear proliferation, I attach considerable importance to Senate approval of a strong and effective S. 897. It is strongly supported by the executive branch. In a letter to me on October 14, Secretary of State Vance said,

I cannot emphasize too strongly the importance of this bill to the success of our non-proliferation policy.

This bill has undergone substantial changes since its introduction on March 3. Since the bill was reported October 3, many of us have had an opportunity to review the bill still further. A number of amendments will be offered. Some are technical and should be approved. I will support certain other amendments to be offered. I fully expect that in the course of Senate consideration we can agree upon a good bill which will establish a rational and workable nuclear export policy, while doing much to constrain the proliferation of nuclear explosive devices.

Nuclear proliferation constitutes a critically dangerous threat to all nations. Unless stopped, the spread of nuclear weapons capability will play havoc with present relationships among the world's nations, increase the threat of a kind of war which would be unavoidably catastrophic, and raise the spectre of an international terrorism armed with the most devastating weapons man has yet conceived.

Nuclear proliferation poses a real national security threat to the United States—a threat at least equal to that posed by the strategic offensive weapons we are trying to control in SALT. If proliferation continues, the number of nations able to pose a credible and major threat to the United States and its allies will multiply. To date, we have found no way to defend ourselves against this kind of threat.

Mr. President, we owe it to ourselves and our Nation to do the best we can to deal with nuclear proliferation. At the same time—and of equal importance—we must see that we preserve and enhance the strength and reliability of the United States as a nuclear supplier. It is of critical importance to our Nation that we continue to fulfill our longstanding obligation made to the other parties to the Non-Proliferation Treaty to play a central role in bringing the benefits of the peaceful atom to the rest of the world.

It is not easy to spread the benefits of the atom while enacting measures to reduce the tremendous threat to world security which misuse of nuclear facilities and materials can bring. I believe that with our careful efforts here, S. 897 will be a strong and sound effort to accomplish those purposes.

Mr. President, I have referred to a letter from Secretary Cyrus Vance addressed to me relating to this matter and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF STATE,
Washington, October 14, 1977.

Hon. JOHN SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate.

DEAR MR. CHAIRMAN: The First Session of the 95th Congress is drawing to a close and I am concerned that time will run out before the Congress enacts S. 897, the "Nuclear Non-Proliferation Act of 1977." The Administration strongly supports this legislation since it will establish the framework within which we will renegotiate old nuclear agreements and negotiate new ones. If S. 897 is not enacted before Congress adjourns, three months of the negotiation process will be lost and past uncertainties in this area will remain. Several nations are awaiting urgently the completion of this legislation.

As you know, the House of Representatives on September 28 passed its "Nuclear Anti-proliferation Act of 1977" (H.R. 8638, which is very similar to S. 897) by a vote of 411 to 0. In addition, the Senate Committees on Foreign Relations and Governmental Affairs reported S. 897 and it is now ready for scheduling.

I am very much aware of the difficulty of Senate scheduling at this time, but I cannot emphasize too strongly the importance of this bill to the success of our non-proliferation policy. Thank you very much for your consideration of this matter.

Sincerely,

CYRUS VANCE.

Mr. SPARKMAN. I thank the Senator from Ohio.

Mr. GLENN. I thank the distinguished Senator, chairman of the Foreign Relations Committee, for his remarks.

Mr. President, I ask unanimous consent that the committee amendment by the Foreign Relations Committee in the nature of a substitute be adopted and that the bill as amended be considered as original text for the purpose of further amendment.

The PRESIDING OFFICER (Mr. MCGOVERN). Without objection, it is so ordered.

Mr. McCLURE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCLURE. May we have the bill of the Foreign Relations Committee that is pending be treated as original text for the purpose of amendment?

Mr. GLENN. That was just done.

Mr. McCLURE. And the Senator has asked for the adoption of the committee amendments? Will they be treated as original text for the purpose of amendment?

Mr. GLENN. The request was for unanimous consent that the committee amendment by the Foreign Relations Committee in the nature of a substitute be adopted and that the bill as amended be considered as original text for the purpose of further amendment.

The amendment of the Committee on Foreign Relations is as follows: Strike all after the enacting clause and insert the following:

That this Act may be cited as the "Nuclear Non-Proliferation Act of 1977".

STATEMENT OF POLICY

SEC. 2. The Congress finds and declares that the proliferation of nuclear explosive devices or of the direct capability to manufacture or otherwise acquire such devices poses a grave threat to the security interests of the United States and to continued international progress toward world peace and development. Recent events emphasize the urgency of this threat and the imperative need to increase the effectiveness of international safeguards and controls on peaceful nuclear activities to prevent proliferation. Accordingly, it is the policy of the United States to—

(a) actively pursue through international initiatives mechanisms for fuel supply assurances and the establishment of more effective international controls over the transfer and use of nuclear materials and equipment and nuclear technology for peaceful purposes in order to prevent proliferation, including the establishment of common international sanctions;

(b) take such actions as are required to confirm the reliability of the United States in meeting its commitments to supply nuclear reactors and fuel to nations which adhere to effective non-proliferation policies by establishing procedures to facilitate the timely processing of requests for subsequent arrangements and export licenses.

(c) strongly encourage nations which have not ratified the Treaty on the Non-Proliferation of Nuclear Weapons to do so at the earliest possible date;

(d) cooperate with foreign nations in identifying and adapting suitable technologies for energy production, and in particular, to identify alternative options to nuclear power in aiding such nations to meet their energy needs, consistent with the economic and material resources of those nations and environmental protection; and

(e) cooperate with other nations in protecting the international environment from radioactive, chemical, or thermal contamination arising from nuclear activities.

STATEMENT OF PURPOSE

SEC. 3. It is the purpose of this Act to promote the policies set forth above by—

(a) establishing a more effective framework for international cooperation to meet the energy needs of all nations and to ensure that the worldwide development of peaceful nuclear activities and the export by any nation of nuclear materials and equipment and nuclear technology intended for use in peaceful nuclear activities do not contribute to proliferation;

(b) authorizing the United States to take such actions as are required to ensure that it will act reliably in meeting its commitment to supply nuclear reactors and fuel to nations which adhere to effective non-proliferation policies;

(c) providing incentives to the other nations of the world to join in such international cooperative efforts and to ratify the Treaty; and

(d) ensuring effective controls by the United States over its exports of nuclear materials and equipment, and of nuclear technology.

DEFINITIONS

SEC. 4. (a) As used in this Act, the term—

(1) "Commission" means the Nuclear Regulatory Commission;

(2) "Director" means the Director of the Arms Control and Disarmament Agency;

(3) "IAEA" means International Atomic Energy Agency;

(4) "nuclear materials and equipment" means source material, special nuclear ma-

terial, production facilities, utilization facilities, and components, items or substances determined to have significance for nuclear explosive purposes pursuant to subsection 109 b. of the 1954 Act;

(5) "physical security measures" means measures to prevent the theft or sabotage or unauthorized use of source or special nuclear material;

(6) "sensitive nuclear technology" means any information (including information incorporated in a production or utilization facility or important component part thereof), which is not available to the public and which is important to the design, construction, fabrication, operation or maintenance of a uranium enrichment or nuclear fuel reprocessing facility, or a facility for the production of heavy water, but shall not include Restricted Data controlled pursuant to chapter 12 of the 1954 Act;

(7) "1954 Act" means the Atomic Energy Act of 1954, as amended; and

(8) "the Treaty" means the Treaty on the Non-Proliferation of Nuclear Weapons.

(b) All other terms used in this Act not defined in this section shall have the meanings ascribed to them by the 1954 Act, the Energy Reorganization Act of 1974, and the Treaty.

TITLE I—UNITED STATES INITIATIVES TO PROVIDE ADEQUATE NUCLEAR FUEL SUPPLY

POLICY

SEC. 101. The United States, as a matter of national policy, shall take such actions and institute such measures as may be necessary and feasible to assure other nations and groups of nations that may seek to utilize the benefits of atomic energy for peaceful purposes that it will provide a reliable supply of nuclear fuel to those nations and groups of nations which adhere to policies designed to prevent proliferation. Such nuclear fuel shall be provided under agreements entered into pursuant to section 161 of the 1954 Act or as otherwise authorized by law. The United States shall ensure that it will have available the capacity on a long-term basis to enter into new fuel supply commitments consistent with its non-proliferation policies and domestic energy needs. The NRC shall, on a timely basis, authorize the export of nuclear materials and equipment when all the applicable statutory requirements are met.

URANIUM ENRICHMENT CAPACITY

SEC. 102. The Secretary of Energy is directed to initiate construction planning and design, construction, and operation activities for expansion of uranium enrichment capacity, as elsewhere provided by law.

REPORT

SEC. 103. The President shall promptly undertake a study to determine the need for additional United States enrichment capacity to meet domestic and foreign needs and to promote United States non-proliferation objectives abroad. The President shall report to the Congress on the results of this study within twelve months after the date of enactment of this Act.

INTERNATIONAL UNDERTAKINGS

SEC. 104. (a) The President shall institute prompt discussions with other nations and groups of nations, including both supplier and recipient countries, to develop international approaches for meeting future worldwide nuclear fuel needs. In particular, the President is authorized and urged to seek to negotiate as soon as practicable with nations possessing nuclear fuel production facilities or source material and such other nations as may be deemed appropriate, with a view toward the timely establishment of binding international undertakings providing for—

(1) the establishment of an international nuclear fuel authority (INFA) with responsibility for providing agreed upon fuel services and allocating agreed upon quantities of fuel resources to ensure fuel supply on reasonable terms in accordance with agreements between INFA and supplier and recipient nations;

(2) a set of conditions as called for in subsection (d) of this section under which international fuel assurances under INFA auspices will be provided to recipient nations, including conditions which will ensure that the transferred materials will not be used for nuclear explosive devices;

(3) the establishment of repositories for the storage of spent nuclear reactor fuel under effective international auspices and inspection;

(4) the establishment of arrangements under which nations placing such spent fuel in such repositories would receive appropriate compensation for the energy content of such spent fuel if recovery of such energy content is deemed necessary or desirable;

(5) appropriate financial arrangements regarding transactions carried out under INFA; and

(6) sanctions for violations of the provisions of or for abrogation of such binding international undertakings.

(b) Pending the establishment of INFA the President shall implement such measures as are necessary to make available, for transfer to an international stockpile established pursuant to an international sales arrangement, uranium enriched to less than 20 percent in the isotope 235 up to an amount sufficient to produce 100,000 MWe years of power from light water nuclear reactors. The President shall submit to the Congress not later than six months after the date of enactment of this Act proposals for an initial international undertaking to guarantee the supply of such fuel to nations that adhere to strict policies designed to prevent proliferation.

(c) The President shall, in the report required by section 103, also address the desirability of and options for foreign participation, including investment, in new United States uranium enrichment facilities. This report shall also address the arrangements that would be required to implement such participation and the commitments that would be required as a condition of such participation. This report shall be accompanied by any proposed legislation to implement these arrangements.

(d) The fuel assurances provided by this section shall be exclusively for the benefit of nations that adhere to policies designed to prevent proliferation. In negotiating the binding international undertakings called for in this section, the President shall, in particular, seek to ensure that the benefits of such undertakings are available to non-nuclear-weapon states only if such states accept IAEA safeguards on all their peaceful nuclear activities, do not manufacture or otherwise acquire any nuclear explosive device, do not establish any new enrichment or reprocessing facilities on a national basis, and place any such existing facilities under effective international auspices and inspection.

(e) The report required by section 601 shall include information on the progress made in any negotiations pursuant to this section.

REEVALUATION OF NUCLEAR FUEL CYCLE

SEC. 105. The President shall take immediate initiatives to invite all nuclear supplier and recipient nations to reevaluate all aspects of the nuclear fuel cycle, with emphasis on alternatives to an economy based on the separation of pure plutonium or the presence of high enriched uranium, methods to deal with spent fuel storage, and methods to improve the safeguards for existing nuclear technology. The President shall, in the first report required by section 601, detail the progress of such international reevaluation.

TITLE II—UNITED STATES INITIATIVES TO STRENGTHEN THE INTERNATIONAL SAFEGUARD SYSTEM

POLICY

SEC. 201. The United States is committed to a strengthened and more effective International Atomic Energy Agency and to a comprehensive safeguards system administered by the Agency to deter proliferation. Accordingly, the United States shall seek to act with other nations to—

(a) continue to strength, the safeguards program of the IAEA and, in order to implement this section, contribute funds, technical resources, and other support to assist the IAEA in effectively implementing safeguards;

(b) ensure that the IAEA has the resources to carry out the provisions of Article XII of the Statute of the IAEA;

(c) improve the IAEA safeguards system (including accountability) to ensure—

(1) the timely detection of a possible diversion of source or special nuclear materials which could be used for nuclear explosive devices;

(2) the timely dissemination of information regarding such diversion; and

(3) the timely implementation of internationally agreed procedures in the event of such diversion;

(d) ensure that the IAEA receives on a timely basis the data needed for it to administer an effective and comprehensive international safeguards program and that the IAEA provides timely notice to the world community of any evidence of a violation of any safeguards agreement to which it is a party; and

(e) encourage the IAEA, to the maximum degree consistent with the Statute, to provide nations which supply nuclear materials and equipment with the data needed to assure such nations that bilateral commitments applicable to such supply are being adhered to.

TRAINING PROGRAM

SEC. 202. The Department of Energy, in consultation with the Commission, shall establish and operate a safeguards and physical security training program to be made available to persons from nations and groups of nations which have developed or acquired, or may be expected to develop or acquire, nuclear materials and equipment for use for peaceful purposes. Any such program shall include training in the most advanced safeguards and physical security techniques and technology, consistent with the national security interests of the United States.

STANDARDS AND MEASUREMENTS

SEC. 203. The Department of Commerce (acting through the National Bureau of Standards), the Department of Energy, and the Commission shall, in consultation with the Department of State and the Arms Control and Disarmament Agency, work cooperatively to establish a program to develop reference methods and standards for measurement of nuclear materials and other substances needed to ensure that consistent and compatible measurements can be made at all points of the nuclear materials safeguards system of sufficient accuracy to meet the requirements of the system. These standards and services may be made available to the IAEA for such safeguards purposes and to nations and groups of nations selected for such assistance by the agencies named in this section in accordance with the 1954 Act.

NEGOTIATIONS

SEC. 204. The United States shall seek to negotiate with other nations and groups of nations to—

(1) adopt general principles and procedures, including common international sanctions, to be followed in the event that a nation violates any material obligation with

respect to the peaceful use of nuclear materials and equipment or nuclear technology, or in the event that any nation violates the principles of the Treaty, including the detonation by a non-nuclear-weapon state of a nuclear explosive device; and

(2) establish international procedures to be followed in the event of diversion, theft, or sabotage of nuclear materials or sabotage of nuclear facilities and for recovering nuclear materials that have been lost or stolen, or obtained or used by a nation or by any person or group in contravention of the principles of the Treaty.

TITLE III—EXPORT ORGANIZATION AND CRITERIA

GOVERNMENT-TO-GOVERNMENT TRANSFERS

SEC. 301. (a) Section 54 of the 1954 Act is amended by adding a new subsection d. thereof as follows:

"d. The authority to distribute special nuclear material under this section other than under an export license granted by the Nuclear Regulatory Commission shall extend only to the following small quantities of special nuclear material (in no event more than five hundred grams per year of the uranium isotope 233, the uranium isotope 235, or plutonium contained in special nuclear material to any recipient):

"(1) which are contained in laboratory samples, medical devices, or monitoring or other instruments;

"(2) the distribution of which is needed to deal with an emergency situation in which time is of the essence.".

(b) Section 64 of the 1954 Act is amended by inserting the following immediately after the second sentence thereof: "The authority to distribute source material under this section (other than under an export license granted by the Nuclear Regulatory Commission), shall in no case extend to quantities of source material in excess of three metric tons per year per recipient.".

(c) Chapter 10 of the 1954 Act is amended by adding a new section 111 as follows:

"SEC. 111. The Nuclear Regulatory Commission is authorized to license the distribution of special nuclear material, source material, and byproduct material by the Department of Energy pursuant to sections 54, 64, and 82 of this Act, respectively, in accordance with the same procedures established by law for the export licensing of such material by any person.".

TECHNOLOGY TRANSFERS

SEC. 302. Subsection 57 b. of the 1954 Act is amended to read as follows:

"b. It shall be unlawful for any person to directly or indirectly engage in the production of any special nuclear material outside of the United States except (1) as specifically authorized under an agreement for cooperation made pursuant to section 123, or (2) upon authorization by the Secretary of Energy after a determination that such activity will not be inimical to the interest of the United States: *Provided*, That any such determination by the Secretary of Energy shall be made only with the concurrence of the Department of State and after consultation with the Arms Control and Disarmament Agency, the Nuclear Regulatory Commission, and the Department of Defense under mutually agreed procedures which shall be established within not more than ninety days after the date of enactment of this provision. Any trade secrets or proprietary information submitted by any person seeking an authorization under this subsection shall be afforded the maximum degree of protection allowable by law.".

SUBSEQUENT ARRANGEMENTS

SEC. 303. (a) (1) Prior to entering into any proposed subsequent arrangement under an agreement for cooperation (other than an agreement for cooperation arranged pursuant to subsection 91 c., 144 b., or 144 c. of the 1954 Act), the Secretary of Energy shall obtain the concurrence of the Secretary of State and shall consult with the Director and the Secretary of Defense: *Provided*, That the Secretary of State shall have the leading role in any negotiations of a policy nature pertaining to any proposed subsequent arrangement regarding arrangements for the storage or disposition of irradiated fuel elements or approvals for the transfer, for which prior approval is required under an agreement for cooperation, by a recipient of source or special nuclear material, production or utilization facilities, or nuclear technology. After consultation with the Commission, notice of any such proposed subsequent arrangement shall be published in the Federal Register, together with the written determination of the Secretary of Energy that such arrangement will not be inimical to the common defense and security, and such proposed subsequent arrangement shall not take effect before 15 days after publication.

(2) If in the Director's view a proposed subsequent arrangement might significantly contribute to proliferation, he may prepare an unclassified Nuclear Proliferation Assessment Statement with regard to such proposed subsequent arrangement regarding the adequacy of the safeguards and other control mechanisms and the application of the peaceful use assurances of the relevant agreement to ensure that assistance to be furnished pursuant to the subsequent arrangement will not be used to further any military or nuclear explosive purpose. For the purposes of this section, the term "subsequent arrangements" shall include—

(A) United States Government contracts for the furnishing of nuclear materials and equipment;

(B) approvals for the transfer, for which prior approval is required under an agreement for cooperation, by a recipient of any source of special nuclear material, production or utilization facility, or nuclear technology;

(C) authorization for the distribution of nuclear materials and equipment pursuant to the 1954 Act;

(D) arrangements for physical security;

(E) arrangements for the storage or disposition of irradiated fuel elements;

(F) arrangements for the application of safeguards with respect to nuclear materials and equipment; or

(G) any other arrangement which the President finds to be important from the standpoint of preventing proliferation.

(3) The United States will give timely consideration to requests for prior approval, when required by this Act, to the reprocessing of material proposed to be exported, previously exported and subject to the applicable agreement for cooperation, or special nuclear material produced through the use of such material or a production or utilization facility transferred pursuant to such agreement for cooperation, or to the altering of irradiated fuel elements containing such material when the terms and conditions for such actions are set forth in such agreement for cooperation or in some other international agreement executed by the United States and subject to congressional review procedures comparable to those set forth in section 123 of the 1954 Act.

(b) With regard to any special nuclear material exported by the United States or produced through the use of any nuclear materials and equipment or sensitive nuclear technology exported by the United States—

(1) the Secretary of Energy may not enter into any subsequent arrangement for the transfer of any such material to a third country for reprocessing, for the reprocessing of any such material, or for the subsequent retransfer of any plutonium in quantities greater than 500 grams resulting from the reprocessing of any such material, until he has provided the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate with a report containing his reasons for entering into such arrangements and a period of 15 days has elapsed;

(2) the Secretary of Energy may not enter into any subsequent arrangement for the reprocessing of any such material in a facility which has not processed power reactor fuel assemblies or been the subject of a subsequent arrangement therefor prior to the date of enactment of this Act or for subsequent retransfer to a non-nuclear-weapon state of any plutonium in quantities greater than 500 grams resulting from such reprocessing, unless in his view, and that of the Secretary of State, such reprocessing or retransfer will not result in a significant increase of the risk of proliferation beyond that which exists at the time that approval is requested. Among other factors in making this judgment, foremost consideration will be given to whether or not the reprocessing or retransfer will take place under conditions that will insure timely warning to the United States of any diversion well in advance of the time at which the non-nuclear state could transform the diverted material into a nuclear explosive device; and

(3) the Secretary of Energy shall attempt to insure, in entering into any subsequent arrangement for the reprocessing of any such material in any facility that has processed power reactor fuel assemblies or been the subject of a subsequent arrangement therefor prior to the date of enactment of this Act, or for the subsequent retransfer to any non-nuclear-weapon state of any plutonium in quantities greater than 500 grams resulting from such reprocessing, that such reprocessing or retransfer shall take place under conditions comparable to those which in his view, and that of the Secretary of State, satisfy the standards set forth in paragraph (2).

EXPORT LICENSING PROCEDURES

SEC. 304. (a) Chapter 11 of the 1954 Act is amended by adding a new section 126 as follows:

"SEC. 126. EXPORT LICENSING PROCEDURES.—

"a. No license may be issued by the Commission for the export of any production or utilization facility, or any source material or special nuclear material, no exemption from any requirement for such an export license may be granted by the Commission, and the Department of Energy shall not distribute any special nuclear material, source material, or byproduct material under section 54, 64, or 82 of the 1954 Act until the Commission or the Department of Energy, as the case may be—

"(1) has been notified by the Secretary of State that it is the judgment of the executive branch that the proposed export, exemption, or distribution will not be inimical to the common defense and security, or that any export in the category to which the proposed export belongs would not be inimical to the common defense and security because it lacks significance for nuclear explosive purposes. In submitting any such judgment, the Secretary of State shall specifically address the extent to which the export criteria then in effect are met. In the event he considers it warranted, the Secretary may also address the following additional factors, among others:

"(A) that issuing the license, granting the exemption, or authorizing the distribution will materially advance the non-proliferation policy of the United States by encouraging the recipient nation to adhere to the Treaty, or to participate in the undertakings

contemplated by section 403 or 404(a) of the Nuclear Non-Proliferation Act of 1977;

"(B) that failure to issue the license, grant the exemption, or authorize the distribution would otherwise be seriously prejudicial to the non-proliferation objectives of the United States; and

"(C) that the recipient nation or group of nations has agreed that conditions substantially identical to the export criteria set forth in subsection 127 a. will be applied by another nuclear supplier nation or group of nations to the proposed United States export or distribution and that in his judgment those conditions will be implemented in a manner acceptable to the United States.

The Secretary of State shall provide appropriate data and recommendations, subject to requests for additional data and recommendations, as required by the Commission or the Secretary of Energy, as the case may be; and

"(2) finds, based on a reasonable judgment of the assurances provided and the evidence, that the criteria in subsection 127 a. or their equivalent, and any other applicable statutory requirements, are met: *Provided*, That for a period of twenty-four months after the date of enactment of this section, continued cooperation under an agreement for cooperation as authorized in accordance with section 124 of this Act shall not be prevented by failure to meet the provisions of paragraph (4) or (5) of section 127 if the Secretary of State notifies the Commission that the nation or group of nations bound by the relevant agreement has agreed to negotiations as called for in section 404(a) of the Nuclear Non-Proliferation Act of 1977; however, nothing in this subsection shall be deemed to relinquish any rights which the United States may have under agreements for cooperation in force on the date of enactment of this section: *Provided further*, That if, upon the expiration of such twenty-four month period, the President determines that failure to continue cooperation with any group of nations which has been exempted pursuant to the above proviso from the provisions of paragraph 4 or 5 of subsection 127 a. but which has yet agreed to comply with those provisions would be seriously prejudicial to the achievement of United States nonproliferation objectives or otherwise jeopardize the common defense and security, he may, after notifying the Congress of his determination, extend by Executive order the duration of the above proviso for a period of twelve months, and may further extend the duration of such proviso by one year increments annually thereafter if he again makes such determination. In the event that the Committee on International Relations of the House of Representatives or the Committee on Foreign Relations of the Senate reports a joint resolution to take any action with respect to any such extension, such joint resolution will be considered in the House or Senate, as the case may be, under procedures identical to those provided for the consideration of resolutions pursuant to section 130 of this Act.

"b. (1) Timely consideration shall be given by the Commission to requests for export licenses and exemptions and by the Department of Energy to requests for distributions, and such requests shall be granted upon a determination that the application or request therefor is acceptable, and that all applicable statutory requirements have been met.

"(2) If, after receiving the executive branch judgment that the issuance of a proposed export license will not be inimical to the common defense and security, the Commission does not issue the proposed license on a timely basis because it is unable to make the statutory determinations required under this Act, the Commission shall publicly issue its decision to that effect, and shall submit the license application to the President. The Commission's decision shall include an explanation of the basis for the decision and any dissenting or separate views. If, after receiving the proposed license application and reviewing the Commission's decision, the President determines that with holding the proposed export would be seriously prejudicial to the achievement of the United States non-proliferation objectives, or would otherwise jeopardize the common defense and security, the proposed export may be authorized by Executive order: *Provided*, That prior to any such export, the President shall submit the Executive order, together with his explanation of why, in light of the Commission's decision, the export should nonetheless be made, to the Congress for a period of sixty days of continuous session (as defined in subsection 130g.) and shall be referred to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate, but any such proposed export shall not occur if during such sixty-day period the Congress adopts a concurrent resolution stating in substance that it does not favor the proposed export. Any such Executive order shall be considered pursuant to the procedures set forth in section 130 of this Act for the consideration of Presidential submissions.

"c. In the event that the House of Representatives or the Senate passes a joint resolution which would adopt one or more additional export criteria, any such joint resolution shall be referred in the other House to the Committee on Foreign Relations of the Senate or the Committee on International Relations of the House of Representatives, as the case may be, and shall be considered by the other House under applicable procedures provided for the consideration of resolutions pursuant to section 130 of this Act.".

(b) Within one hundred and twenty days of the date of enactment of this Act, the Commission shall, after consultations with the Secretary of State, promulgate regulations establishing procedures (1) for the granting, suspending, revoking, or amending of any nuclear export license or exemption pursuant to its statutory authority; (2) for public participation in nuclear export licensing proceedings when the Commission finds that such participation will be in the public interest and will assist the Commission in making the statutory determinations required by the 1954 Act, including such public hearings and access to information as the Commission deems appropriate: *Provided*, That judicial review as to such finding shall be limited to the determination of whether such finding was arbitrary and capricious; (3) for a public written Commission opinion accompanied by the dissenting or separate views of any Commissioner, in those proceedings where one or more Commissioners have dissenting separate views on the issuance of an export license; and (4) for public notice of Commission proceedings and decisions, and for recording of minutes and votes of the Commission.

(c) The procedures to be established pursuant to subsection (b) shall constitute the exclusive basis for hearings in nuclear export licensing proceedings before the Commission and, notwithstanding section 189 a. of the 1954 Act, shall not require the Commission to grant any person an on-the-record hearing in such a proceeding.

CRITERIA GOVERNING UNITED STATES NUCLEAR EXPORTS

SEC. 305. Chapter 11 of the 1954 Act, as amended by section 304, is further amended by adding at the end thereof the following:

"SEC. 127. CRITERIA GOVERNING UNITED STATES NUCLEAR EXPORTS.—

"The United States adopts the following criteria which, in addition to other requirements of law, will govern exports for peaceful nuclear uses from the United States of source material, special nuclear material, production or utilization facilities, and any sensitive nuclear technology:

"(1) IAEA safeguards as required by Article III (2) of the Treaty will be applied with respect to any such material or facilities proposed to be exported to any such material or facilities previously exported and subject to the applicable agreement for cooperation, and to any special nuclear material used in or produced through the use thereof.

"(2) No such material, facilities, or sensitive nuclear technology proposed to be exported or previously exported and subject to the applicable agreement for cooperation, and on special nuclear material produced through the use of such materials, facilities, or sensitive nuclear technology, will be used for any nuclear explosive device or for research on or development of any nuclear explosive device.

"(3) Adequate physical security measures will be maintained with respect to such material or facilities proposed to be exported and to any special nuclear material used in or produced through the use thereof.

"(4) No such materials, facilities, or sensitive nuclear technology proposed to be exported, no such materials or facilities previously exported and subject to the applicable agreement for cooperation, and no special nuclear material produced through the use of such material, will be retransferred to the jurisdiction of any other nation or group of nations unless the prior approval of the United States is obtained for such retransfer. In addition to other requirements of law, the United States may approve such retransfer only if the nation or group of nations designated to receive such retransfer agrees that it shall be subject to the conditions required by this subsection.

"(5) No such material proposed to be exported or previously exported and subject to the applicable agreement for cooperation and no special nuclear material produced through the use of such material will be reprocessed, and no irradiated fuel elements containing such material removed from a reactor shall be altered in form or content, unless the prior approval of the United States is obtained for such reprocessing or alteration.

"(6) No such sensitive nuclear technology shall be exported unless the foregoing conditions shall be applied to any nuclear material or equipment which is produced or constructed under the jurisdiction of the recipient nation or group of nations by or through the use of any such exported sensitive nuclear technology".

ADDITIONAL EXPORT CRITERION AND PROCEDURES

SEC. 306. Chapter 11 of the 1954 Act, as amended by sections 304 and 305, is further amended by adding at the end thereof the following:

"SEC. 128. ADDITIONAL EXPORT CRITERION AND PROCEDURES.—

"a. (1) As a condition of continued United States export of source material, special nuclear material, production or utilization facilities, and any sensitive nuclear technology to non-nuclear-weapon states, no such export shall be made unless IAEA safeguards are maintained with respect to all peaceful nuclear activities in, under the jurisdiction of, or carried out under the control of such state at the time of the export.

"(2) The President shall seek to achieve adherence to the foreign criterion by recipient non-nuclear-weapon states.

"b. The criterion set forth in subsection a. shall be applied as an export criterion with respect to any application for the export of materials, facilities, or technology specified in subsection a. which is filed after eighteen months from the date of enactment of this

section, or for any such application under which the first export would occur at least twenty-four months after the date of enactment of this section, except as provided in the following paragraphs:

"(1) If the Commission or the Department of Energy, as the case may be, is notified that the President has determined that failure to approve an export to which this subsection applies because such criterion has not yet been met would be seriously prejudicial to the achievement of United States non-proliferation objectives or otherwise jeopardize the common defense and security, the license or authorization may be issued subject to other applicable requirements of law: *Provided,* That no such export of any production or utilization facility or of any source or special nuclear material (intended for use as fuel in any production or utilization facility) which has been licensed or authorized pursuant to this subsection shall be made until the first such license or authorization with respect to each non-nuclear-weapon state which has failed to meet such criterion is submitted to the Congress (together with a detailed assessment of the reasons underlying the President's determination, the judgment of the executive branch required under section 126 of this Act, and any Commission opinion and views) for a period of sixty days of continuous session (as defined in subsection 130(g) of this Act) and referred to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate, but such export shall not occur if during such sixty-day period the Congress adopts a concurrent resolution stating in substance that the Congress does not favor the proposed export. Any such license or authorization shall be considered pursuant to the procedures set forth in section 130 of this Act for the consideration of Presidential submissions.

"(2) If the Congress adopts a resolution of disapproval pursuant to paragraph (1), no further export of materials, facilities, or technology specified in subsection a. shall be permitted for the remainder of that Congress, unless such state meets the criterion or the President notifies the Congress that he has determined that significant progress has been made in achieving adherence to such criterion by such state or that United States foreign policy interests dictate reconsideration and the Congress, pursuant to the procedure of paragraph (1), does not adopt a concurrent resolution stating in substance that it disagrees with the President's determination.

"(3) If the Congress does not adopt a resolution of disapproval with respect to a license or authorization submitted pursuant to paragraph (1), the criterion set forth in subsection a. shall not be applied as an export criterion with respect to exports of materials, facilities and technology specified in subsection a. to that state: *Provided,* That the first license or authorization with respect to that state which is issued pursuant to this paragraph after twelve months from the elapse of the sixty-day period specified in paragraph (1), and the first such license or authorization which is issued after each twelve-month period thereafter, shall be submitted to the Congress for review pursuant to the procedures specified in paragraph (1); *Provided further,* That if the Congress adopts a resolution of disapproval during any review period provided for by this paragraph, the provisions of paragraph (2) shall apply with respect to further exports to such state.".

CONDUCT RESULTING IN TERMINATION OF NUCLEAR EXPORTS

SEC. 307. Chapter 11 of the 1954 Act, as amended by sections 304, 305, and 306, is further amended by adding at the end thereof:

"SEC. 129. CONDUCT RESULTING IN TERMINATION OF NUCLEAR EXPORTS.—

"(a) No nuclear materials and equipment or sensitive nuclear technology shall be exported to—

"(1) any non-nuclear-weapon state that is found by the President to have, at any time after the effective date of this section—

"(A) detonated a nuclear explosive device; or

"(B) terminated or abrogated IAEA safeguards; or

"(C) materially violated an IAEA safeguards agreement; or

"(D) engaged in activities involving source or special nuclear material and having direct significance for the manufacture or acquisition of nuclear explosive devices, and has failed to take steps which, in the President's judgment, represent sufficient progress toward terminating such activities; or

"(2) any nation or group of nations that is found by the President to have, at any time after the effective date of this section,

"(A) materially violated any guarantee it has given under an agreement for cooperation with the United States; or

"(B) assisted, encouraged, or induced any non-nuclear-weapon state to engage in activities involving source or special nuclear material and having direct significance for the manufacture or acquisition of nuclear explosive devices, and has failed to take steps which, in the Presidents' judgment, represents sufficient progress toward terminating such assistance, encouragement, or inducement; or

"(C) entered into an agreement after the date of enactment of this section for the transfer of reprocessing equipment, materials, or technology to the sovereign control of a non-nuclear-weapon state except in connection with an international fuel cycle evaluation in which the United States is a participant or pursuant to a subsequent international agreement or understanding to which the United States subscribes;

unless the President determines that cessation of such exports would be seriously prejudicial to the achievement of United States non-proliferation objectives or otherwise jeopardize the common defense and security: *Provided,* That prior to the effective date of any such determination, the President's determination, together with a report containing the reasons for his determination, shall be submitted to the Congress and referred to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate for a period of sixty days of continuous session (as defined in subsection 130g. of the 1954 Act), but any such determination shall not become effective if during such sixty-day period the Congress adopts a concurrent resolution stating in substance that it does not favor the determination. Any such determination shall be considered pursuant to the procedures set forth in section 130 of this Act for the consideraton of Presidential submissions.".

CONGRESSIONAL REVIEW PROCEDURES

SEC. 308. Chapter 11 of the 1954 Act, as amended by sections 304, 305, 306, and 307, is further amended by adding at the end thereof the following:

"SEC. 130. CONGRESSIONAL REVIEW PROCEDURES.—

"a. Not later than forty-five days of continuous session of Congress after the date of transmittal to the Congress of any submission of the President required by this Act, the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House of Representatives shall each submit a report to its respective House on its views and recommendations respecting such Presidential submission together with a resolution, as defined in subsection f., stating in substance that such House approves or disapproves such submission, as the case may be: *Provided,* That if either such committee has not reported such a resolution at the end of such forty-five day period, such committee shall be deemed to be discharged from further consideration of such submission and any resolution, as defined in subsection f., which is introduced within five days thereafter within such House shall be placed on the appropriate calendar of such House.

"b. When the committee has reported such a resolution or a resolution has been introduced and placed on the appropriate calendar pursuant to the proviso in subsection a., as the case may be, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) for any Member of the respective House to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. The motion shall not be subject to amendment, or to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the resolution is agreed to, the resolution shall remain the unfinished business of the respective House until disposed of.

"c. Debate on the resolution, and on all debatable motions and appeals in connection therewith, shall be limited to not more than ten hours, which shall be divided equally between individuals favoring and individuals opposing the resolution. A motion further to limit debate is in order and not debatable. An amendment to a motion to postpone, or a motion to recommit the resolution, or a motion to proceed to the consideration of other business is not in order. A motion to reconsider the vote by which the resolution is agreed to or disagreed to shall not be in order. No amendment to any concurrent resolution pursuant to the procedures of this section is in order except as provided in subsection d.

"d. Immediately following (1) the conclusion of the debate on such concurrent resolution, (2) a single quorum call at the conclusion of debate if requested in accordance with the rules of the appropriate House, and (3) the consideration of an amendment introduced by the Majority Leader or his designee to insert the phrase, 'does not,' in lieu of the word 'does' if the resolution under consideration is a concurrent resolution of approval, the vote on final approval of the resolution shall occur.

"e. Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to such a resolution shall be decided without debate.

"f. For the purpose of subsections a. through e. of this section, the term 'resolution' means a concurrent resolution of the Congress, the matter after the resolving clause of which is as follows: 'That the Congress (does or does not) favor the transmitted to the Congress by the President on ,', the blank spaces therein to be appropriately filled, and the affirmative or negative phrase within the parenthetical to be appropriately selected.

"g. For the purposes of this section—

"(1) continuity of session is broken only by an adjournment of Congress sine die; and

"(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of any period of time in which Congress is in continuous session.

"h. This section is enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Rep-

resentatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedures to be followed in that House in the case of resolutions described by subsection f. of this section; and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.".

COMPONENT AND OTHER PARTS OF FACILITIES

SEC. 309. (a) Section 109 of the 1954 Act is amended to read as follows:

"SEC. 109. COMPONENT AND OTHER PARTS OF FACILITIES.—

"a. With respect to those utilization and production facilities which are so determined by the Commission pursuant to subsection 11 v. (2) or 11 cc. (2) the Commission may issue general licenses for domestic activities required to be licensed under section 101, if the Commission determines in writing that such general licensing will not constitute an unreasonable risk inimical to the common defense and security.

"b. The Commission is authorized and directed to determine which component parts as defined in subsection 11 v. (2) or 11 cc. (2) and which other items or substances are especially relevant from the standpoint of export control because of their significance for nuclear explosive purposes. Except as provided in section 126 b. (2), no such component, substance, or item which is so determined by the Commission shall be exported unless the Commission issues a general or specific license for its export after finding, based on a reasonable judgment of the assurances provided and the evidence, that the following criteria or their equivalent are met: (1) IAEA safeguards as required by Article III(2) of the Treaty will be applied with respect to such component, substance, or item; (2) no such component, substance, or item will be used for any nuclear explosive device or for research on or development of any nuclear explosive device; and (3) no such component, substance, or item will be retransferred to the jurisdiction of any other nation or group of nations unless the prior consent of the United States is obtained for such retransfer; and after determining in writing that the issuance of each such general or specific license or category of licenses will not be inimical to the common defense and security.

"c. The Commission shall not issue an export license under the authority of subsection b. if it is advised by the executive branch, in accordance with the procedures established under section 126 a., that the export would be inimical to the common defense and security of the United States.".

(b) The Commission, not later than one hundred and twenty days after the date of the enactment of this Act, shall publish regulations to implement the provisions of subsection (a). Among other things, these regulations shall provide for the prior consultation by the Commission with the Department of State, the Department of Energy, the Department of Defense, the Department of Commerce, and the Arms Control and Disarmament Agency.

(c) The President, within not more than one hundred and twenty days after the date of the enactment of this Act, shall publish procedures regarding the control by the Department of Commerce over all export items, other than those licensed by the Commission, which could be, if used for purposes other than those for which the export is intended, of significance for nuclear explosive purposes. Among other things, these procedures shall provide for prior consultations, as required, by the Department of Commerce with the Department of State, the Arms Control and Disarmament Agency, the Nuclear Regulatory Commission, the Department of Energy, and the Department of Defense.

TITLE IV—NEGOTIATION OF FURTHER EXPORT CONTROLS

COOPERATION WITH OTHER NATIONS

SEC. 401. Section 123 of the 1954 Act is amended to read as follows:

"SEC. 123. COOPERATION WITH OTHER NATIONS.—No cooperation with any nation, group of nations or regional defense organization pursuant to section 53, 54a, 57, 64, 82, 91, 103, 104, or 144 shall be undertaken until—

"a. the proposed agreement for cooperation has been submitted to the President, which proposed agreement shall include the terms, conditions, duration, nature, and scope of the cooperation; and shall include the following requirements:

"(1) a guaranty by the cooperating party that safeguards as set forth in the agreement for cooperation will be maintained with respect to all nuclear materials and equipment transferred pursuant thereto, and with respect to all special nuclear material used in or produced through the use of such nuclear materials and equipment, so long as the material or equipment remains under the jurisdiction or control of the cooperating party, irrespective of the duration of other provisions in the agreement or whether the agreement is terminated or suspended for any reason;

"(2) in the case of non-nuclear-weapon states, a requirement, as a condition of continued United States nuclear supply under the agreement for cooperation, that IAEA safeguards be maintained with respect to all nuclear materials in all peaceful nuclear activities within the territory of such state, under its jurisdiction, or carried out under its control anywhere;

"(3) except in the case of those agreements for cooperation arranged pursuant to subsection 91 c., a guaranty by the cooperating party that no nuclear materials and equipment or sensitive nuclear technology to be transferred pursuant to such agreement, and no special nuclear material produced through the use of any nuclear materials and equipment or sensitive nuclear technology transferred pursuant to such agreement, will be used for any nuclear explosive device, or for research on or development of any nuclear explosive device, or for any other military purpose;

"(4) except in the case of those agreements for cooperation arranged pursuant to subsection 91 c. and agreements for cooperation with nuclear-weapon states, a stipulation that the United States shall have the right to require the return of any nuclear materials and equipment transferred pursuant thereto and any special nuclear material produced through the use thereof if the cooperating party detonates a nuclear explosive device or terminates or abrogates an agreement providing for IAEA safeguards;

"(5) a guaranty by the cooperating party that any material or any Restricted Data transferred pursuant to the agreement for cooperation and, except in the case of agreements arranged pursuant to subsection 91 c., 144 b. or 144 c., any production or utilization facility transferred pursuant to the agreement for cooperation or any special nuclear material produced through the use of any such facility or through the use of any material transferred pursuant to the agreement, will not be transferred to unauthorized persons or beyond the jurisdiction or control of the cooperating party without the consent of the United States;

"(6) a guaranty by the cooperating party that adequate physical security will be maintained with respect to any nuclear material transferred pursuant to such agreement and with respect to any special nuclear material used in or produced through the use of any material, production facility, or utilization facility transferred pursuant to such agreement;

"(7) except in the case of agreements for cooperation arranged pursuant to subsection 91 c., 144 b., or 114 c., a guaranty by the cooperating party that no material transferred pursuant to the agreement for cooperation and no material used in or produced through the use of any material, production facility, or utilization facility transferred pursuant to the agreement for cooperation will be reprocessed, or (in the case of plutonium or uranium enriched to greater than twenty percent in the isotope 233 or 235, or other nuclear materials which have been irradiated) otherwise altered in form or content without the prior approval of the United States;

"(8) except in the case of agreements for cooperation arranged pursuant to subsection 91 c., 144 b., or 144 c., a guaranty by the cooperating party that no plutonium, and no uranium enriched to greater than twenty percent in the isotope 233 or 235, transferred pursuant to the agreement for cooperation, or recovered from any source or special nuclear material so transferred or from any source or special nuclear material used in any production facility or utilization facility transferred pursuant to the agreement for cooperation, will be stored in any facility that has not been approved in advance by the United States; and

"(9) except in the case of agreements for cooperation arranged pursuant to subsection 91 c., 144 b. or 144 c., a guaranty by the cooperating party that any special nuclear material, production facility, or utilization facility produced or constructed under the jurisdiction of the cooperating party by or through the use of any sensitive nuclear technology transferred pursuant to such agreement for cooperation will be subject to all the requirements specified in this subsection. The President may exempt a proposed agreement for cooperation (except an agreement arranged pursuant to subsection 91 c., 144 b., or 144 c.) from any of the requirements of the foregoing sentence if he determines that inclusion of any such requirement would be seriously prejudicial to the achievement of United States nonproliferation objectives or otherwise jeopardize the common defense and security. Except in the case of those agreements for cooperation arranged pursuant to subsection 91 c., 144 b., or 144 c., any proposed agreement for cooperation shall be negotiated by the Secretary of State, with the technical assistance and concurrence of the Secretary of Energy and in consultation with the Director; and after consultation with the Commission shall be submitted to the President jointly by the Secretary of State and the Secretary of Energy accompanied by the views and recommendations of the Secretary of State, the Secretary of Energy, and the Director, who shall also provide to the President an unclassified Nuclear Proliferation Assessment Statement regarding the adequacy of the safeguards and other control mechanisms and the peaceful use assurances contained in the agreement for cooperation to ensure that any assistance furnished thereunder will not be used to further any military or nuclear explosive purpose. In the case of those agreements for cooperation arranged pursuant to subsection 91 c., 144 b., or 144 c., any pro-

posed agreement for cooperation shall be submitted to the President by the Secretary of Energy or, in the case of those agreements for cooperation arranged pursuant to subsection 91 c. or 144 b. which are to be implemented by the Department of Defense, by the Secretary of Defense;

"b. the President has approved and authorized the execution of the proposed agreement for cooperation and has made a determination in writing that the performance of the proposed agreement will promote, and will not constitute an unreasonable risk to, the common defense and security;

"c. the proposed agreement for cooperation (if not an agreement subject to subsection d.), together with the approval and determination of the President, has been submitted to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate for a period of thirty days of continuous session (as defined in subsection 130 g.): *Provided, however,* That these committees, after having received such agreement for cooperation, may by resolution in writing waive the conditions of all or any portion of such thirty-day period;

"d. the proposed agreement for cooperation (if arranged pursuant to subsection 91 c., 144 b., or 144 c., or if entailing implementation of section 53, 54a, 103, or 104 in relation to a reactor that may be capable of producing more than five thermal megawatts or special nuclear material for use in connection therewith) has been submitted to the Congress, together with the approval and determination of the President, for a period of sixty days of continuous session (as defined in subsection 130 g. of this Act) and referred to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate, but such proposed agreement for cooperation shall not become effective if during such sixty-day period the Congress adopts a concurrent resolution stating in substance that the Congress does not favor the proposed agreement for cooperation: *Provided,* That the sixty-day period shall not begin until a Nuclear Proliferation Assessment Statement prepared by the Director of the Arms Control and Disarmament Agency, when required by subsection 123 a., has been submitted to the Congress. Any such proposed agreement for cooperation shall be considered pursuant to the procedures set forth in section 130 of this Act for the consideration of presidential submissions; and

"e. following submission of a proposed agreement for cooperation (except an agreement for cooperation arranged pursuant to subsection 91 c., 144 b., or 144 c.) to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate, the Nuclear Regulatory Commission, the Department of State, the Department of Energy, the Arms Control and Disarmament Agency, and the Department of Defense shall, upon the request of either of those committees, promptly furnish to those committees their views as to whether the safeguards and other controls contained therein provide an adequate framework to ensure that any exports as contemplated by such agreement will not be inimical to or constitute an unreasonable risk to the common defense and security.".

ADDITIONAL REQUIREMENTS

SEC. 402. (a) In addition to other requirements of law, no source or special nuclear material shall be exported under any agreement for cooperation (except an agreement for cooperation arranged pursuant to subsection 91 c., 144 b., or 144 c. of the 1954 Act) for the purpose of enrichment (as described in paragraph aa. (2) of section 11 of the 1954 Act) unless such enrichment is specifically permitted by the applicable agreement for cooperation.

(b) In addition to other requirements of law, no major critical component of any uranium enrichment, nuclear fuel reprocessing, or heavy water production facility shall be exported under any agreement for cooperation (except an agreement for cooperation pursuant to subsection 91 c., 144 b., or 144 c. of the 1954 Act) unless such agreement for cooperation specifically designates such components as items to be exported pursuant to the agreement for cooperation. For purposes of this subsection, the term "major critical component" means any component part or group of component parts which the President determines to be essential to the operation of a complete uranium enrichment, nuclear fuel reprocessing, or heavy water production facility.

PEACEFUL NUCLEAR ACTIVITIES

SEC. 403. The President shall take immediate and vigorous steps to seek agreement from all nations and groups of nations to commit themselves to adhere to the following export policies with respect to their peaceful nuclear activities and their participation in international nuclear trade:

(a) No nuclear materials and equipment and no sensitive nuclear technology within the territory of any nation or group of nations, under its jurisdiction, or under its control anywhere will be transferred to the jurisdiction of any other nation or group of nations unless the nation or group of nations receiving such transfer commits itself to strict undertakings including, but not limited to, provisions sufficient to ensure that—

(1) no nuclear materials and equipment and no nuclear technology in, under the jurisdiction of, or under the control of any non-nuclear-weapon state, shall be used for nuclear explosive devices for any purpose or for research on or development of nuclear explosive devices for any purpose, except as permitted by Article V, the Treaty;

(2) IAEA safeguards will be applied to all peaceful nuclear activities in, under the jurisdiction of, or under the control of any non-nuclear-weapon state;

(3) adequate physical security measures will be established and maintained by any nation or group of nations on all of its nuclear activities;

(4) no nuclear materials and equipment and no nuclear technology intended for peaceful purposes in, under the jurisdiction of, or under the control of any nation or group of nations shall be transferred to the jurisdiction of any other nation or group of nations which does not agree to stringent undertakings meeting the objectives of this section; and

(5) no nation or group of nations will assist, encourage, or induce any non-nuclear-weapon state to manufacture or otherwise acquire any nuclear explosive device.

(b)(1) No source or special nuclear material within the territory of any nation or group of nations, under its jurisdiction, or under its control anywhere will be enriched (as described in paragraph aa. (2) of section 11 of the 1954 Act) or reprocessed, no irradiated fuel elements containing such material which are to be removed from a reactor will be altered in form or content, and no fabrication or stockpiling involving plutonium enriched to greater than 20 percent in the isotope 233 or 235 shall be performed except in a facility under effective international auspices and inspection, and any such irradiated fuel elements shall be transferred to such a facility as soon as practicable after removal from a reactor consistent with safety requirements. Such facilities shall be limited in number to the greatest extent feasible and shall be carefully sited and managed so as to minimize the proliferation and environmental risks associated with such facilities. In addition, there shall be conditions to limit the access of non-nuclear-weapon states other than the host country to sensitive nuclear technology associated with such facilities.

(2) Any facilities within the territory of any nation or group of nations, under its jurisdiction, or under its control anywhere for the necessary short-term storage of fuel elements containing plutonium or uranium enriched to greater than 20 percent in the isotope 233 or 235 prior to placement in a reactor or of irradiated fuel elements prior to transfer as required in subparagraph (1) shall be placed under effective international auspices and inspection.

(c) Adequate physical security measures will be established and maintained with respect to all nuclear activities within the territory of each nation and group of nations, under its jurisdiction, or under its control anywhere, and with respect to any international shipment of significant quantities of source or special nuclear material or irradiated source or special nuclear material, which shall also be conducted under international safeguards.

RENEGOTIATION OF AGREEMENTS FOR COOPERATION

SEC. 404. (a) The President shall initiate a program immediately to renegotiate agreements for cooperation in effect on the date of enactment of this Act, or otherwise to obtain the agreement of parties to such agreements for cooperation to the undertakings that would be required for new agreements under the 1954 Act.

(b) The President shall annually review each of requirements (1) through (9) set forth for inclusion in agreements for cooperation under section 123a. of the 1954 Act and the export policy goals set forth in section 403 to determine whether it is in the interest of United States non-proliferation objectives for any such requirements or export policies which are not already being applied as export criteria to be enacted as additional export criteria and be subject to the procedures of section 128 of the 1954 Act.

(c) If the President proposes enactment of any such requirements or export policies as additional export criteria or to take any other action with respect to such requirements or export policy goals for the purpose of encouraging adherence by nations and groups of nations to such requirements and policies, he shall submit such a proposal together with an explanation thereof to the Congress.

(d) If the Committee on Foreign Relations of the Senate or the Committee on International Relations of the House of Representatives, after reviewing the President's annual report or any proposed legislation, determines that it is in the interest of United States nonproliferation objectives to take any action with respect to such requirements or export policy goals, it shall report a joint resolution to implement such determination. Any joint resolution so reported and shall be considered in the Senate and the House of Representatives, respectively, under applicable procedures provided for the consideration of resolutions pursuant to subsection 130 (b) through (g) of the 1954 Act.

AUTHORITY TO CONTINUE AGREEMENTS

SEC. 405. The amendments to section 123 of the 1954 Act made by this Act shall not affect the authority to continue cooperation pursuant to agreements for cooperation entered into prior to the date of enactment of this Act.

REVIEW

SEC. 406. No court or regulatory body shall have any jurisdiction under any law to com-

pel the performance of or to review the adequacy of the performance of any Nuclear Proliferation Assessment Statement called for in this Act or in the 1954 Act.

TITLE V—UNITED STATES ASSISTANCE TO DEVELOPING COUNTRIES

POLICY; REPORT

SEC. 501. The United States shall endeavor to cooperate with other nations, international institutions, and private organizations in establishing programs to assist in the development of non-nuclear energy resources, and shall seek to cooperate with and aid developing countries in meeting their energy needs through the development of such resources and the application of non-nuclear technologies consistent with the economic factors, the material resources of those countries, and environmental protection. The United States shall additionally seek to encourage other industrialized nations and groups of nations to make commitments for similar cooperation and aid to developing countries. The President shall report annually to Congress on the level of other nations' and group of nations' commitments under such program and the relation of any such commitments to United States efforts under this title. In cooperating with and providing such assistance to developing countries, the United States shall give priority to parties to the Treaty.

PROGRAMS

SEC. 502. (a) The United States shall initiate a program, consistent with the aims of section 501, to cooperate with developing countries for the purpose of—

(1) meeting the energy needs required for the development of such countries;

(2) reducing the dependence of such countries on petroleum fuels, with emphasis given to utilizing solar and other renewable energy resources; and

(3) expanding the energy alternatives available to such countries.

(b) Such program shall include cooperation in evaluating the energy alternatives of developing countries, facilitating international trade in energy commodities, developing energy resources, and applying suitable energy technologies. The program shall include both general and country-specific energy assessments and cooperative projects resource exploration and production, training, research and development.

(c) As an integral part of such program, Department of Energy, under the general policy guidance of the Department of State and in cooperation with the Agency for International Development and other Federal agencies as appropriate, shall initiate, as soon as practicable, a program for the exchange of United States scientists, technicians, and energy experts with those of developing countries to implement the purposes of this section.

(d) For the purposes of carrying out this section, there is authorized to be appropriated a total of $10,000,000 for fiscal year 1978 to the Department of Energy, including such sums which have been authorized for such purposes under previous legislation.

(e) Under the direction of the President, the Secretary of State shall ensure the coordination of the activities authorized by this title with other related activities of the United States conducted abroad, including the programs authorized by sections 103(c), 106(a)(2), and 119 of the Foreign Assistance Act of 1961.

REPORT

SEC. 503. Not later than twelve months after the date of enactment of this Act, the President shall report to the Congress on the feasibility of expanding the cooperative activities established pursuant to section 502 (c) into an international cooperative effort to include a scientific peace corps designed to encourage large numbers of technically trained volunteers to live and work in developing countries for varying periods of time for the purpose of engaging in projects to aid in meeting the energy needs of such countries through the search for and utilization of indigenous energy resources and the application of suitable technology, including the widespread utilization of renewable and unconventional energy technologies. Such report shall also include a discussion of other mechanisms to conduct a coordinated international effort to develop, demonstrate, and encourage the utilization of such technologies in developing countries.

TITLE VI—EXECUTIVE REPORTING

REPORTS OF THE PRESIDENT

SEC. 601. (a) The President shall review all activities of Governmental departments and agencies relating to preventing proliferation and shall make a report to Congress in January of 1979 and annually in January of each year thereafter on the Government's efforts to prevent proliferation. This report shall include but not be limited to—

(1) a description of the progress made toward—

(A) negotiating the initiatives contemplated in sections 104 and 105 of this Act;

(B) negotiating the international arrangements or other mutual undertakings contemplated in section 403 of this Act;

(C) encouraging non-nuclear-weapon states that are not party to the Treaty to adhere to the Treaty or, pending such adherence, to enter into comparable agreements with respect to safeguards and to foreswear the development of any nuclear explosive devices, and discouraging nuclear exports to non-nuclear-weapon states which have not taken such steps;

(D) strengthening the safeguards of the IAEA as contemplated in section 201 of this Act; and

(E) renegotiating agreements for cooperation as contemplated in section 404(a) of this Act;

(2) an assessment of the impact of the progress described in paragraph (1) on the non-proliferation policy of the United States; an explanation of the precise reasons why progress has not been made on any particular point and recommendations with respect to appropriate measures to encourage progress; and a statement of what legislative modifications, if any, are necessary in his judgment to achieve the non-proliferation policy of the United States; and

(3) a determination as to which non-nuclear-weapon states with which the United States has an agreement for cooperation in effect or under negotiation, if any, have—

(A) detonated a nuclear device; or

(B) refused to accept the safeguards of the IAEA on all of their peaceful nuclear activities; or

(C) refused to give specific assurances that they will not manufacture or otherwise acquire any nuclear explosive device; or

(D) engaged in activities involving source or special nuclear material and having direct significance for the manufacture or acquisition of nuclear explosive devices.

(4) as assessment of whether any of the policies set forth in this Act have, on balance, been counter-productive from the standpoint of preventing proliferation; and

(5) a description of the progress made toward establishing procedures to facilitate the timely processing of requests for subsequent arrangements and export licenses in order to enhance the reliability of the United States in meeting its commitments to supply nuclear reactors and fuel to nations which adhere to effective non-proliferation policies.

(b) In the first report required by this section, the President shall analyze each civil agreement for cooperation negotiated pursuant to section 123 of the 1954 Act, and shall discuss the scope and adequacy of the requirements and obligations relating to safeguards and other controls therein.

ADDITIONAL REPORTS

SEC. 602. (a) The annual reports to the Congress by the Commission and the Department of Energy which are otherwise required by law shall also include views and recommendations regarding the policies and actions of the United States to prevent proliferation which are the statutory responsibility of those agencies. The Department's report shall include a detail analysis of the proliferation implications of advanced enrichment and reprocessing techniques, advanced reactors, and alternative nuclear fuel cycles. This part of the report shall include a comprehensive version which includes any relevant classified information and a summary unclassified version.

(b) The reporting requirements of this chapter are in addition to and not in lieu of any other reporting requirements under applicable law.

(c) The Department of State, the Arms Control and Disarmament Agency, the Department of Commerce, the Department of Energy, and the Commission shall keep the Committees on Foreign Relations and Governmental Affairs of the Senate and the Committee on International Relations of the House of Representatives fully and currently informed with respect to their activities to carry out the purposes and policies of this Act and to otherwise prevent proliferation, and with respect to the current activities of foreign nations which are of significance from the proliferation standpoint.

(d) Any classified portions of the reports required by this Act shall be submitted to the Senate Foreign Relations Committee and the House International Relations Committee.

SAVING CLAUSE

SEC. 603. (a) All orders, determinations, rules, regulations, permits, contracts, agreements, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective in the exercise of functions which are the subject of this Act, by (i) any agency or officer, or part thereof, in exercising the functions which are affected by this Act, or (ii) any court of competent jurisdiction, and

(2) which are in effect at the time this Act takes effect,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed as the case may be, by the parties thereto or by any court of competent jurisdiction.

(b) Nothing in this Act shall affect the procedures or requirements applicable to agreements for cooperation entered into pursuant to sections 91 c., 144 b., or 144 c. of the 1954 Act as it was in effect immediately prior to the date of enactment of this Act.

Mr. McCLURE. I concur in the request. I thank the Senator.

Mr. GLENN. Mr. President, the most succinct as well as the most pithy statement of the problem of nuclear proliferation was once given by the great nuclear physicist, Hannes Alfven. He said:

Atoms for peace and atoms for war are Siamese twins.

The objective of this bill is to perform the delicate surgery that is needed to separate these Siamese twins so that as far as nuclear energy is concerned, we can have "benefits without bombs." We wish to make available the "benefits"

and enormous advantages of safe nuclear generated electrical power to an increasingly energy-short world, and do it "without bombs," without the spread of nuclear weaponry that could too easily follow, indeed, without the haunting specter of a future mushroom-shaped-cloud holocaust. Working out the complexities of a bill that would strike that balance has required a tremendous amount of work spanning nearly 2½ years.

I want to pay particular tribute to Senator PERCY for his pioneering effort on this legislation, as well as the prime sponsors of the bill, our chairman, Senator RIBICOFF, whose strong support for this goal has been long known, as well as Senators JAVITS, CRANSTON, KENNEDY, and MATSUNAGA. I also want to acknowledge the full cooperation of representatives of the NRC, ERDA, ACDA, and the State Department.

Senate passage of this bill will mark the most comprehensive piece of nuclear legislation since the Atomic Energy Act of 1954.

This bill, S. 897, is designed to:

Reduce the uncertainty surrounding U.S. nuclear export policy;

Reestablish our reputation as a reliable supplier of nuclear fuel to those countries sharing our nonproliferation objectives;

Establish strict export criteria or guidelines to assure that nuclear exports are used only for peaceful purposes;

Provide sanctions against nations engaging in actions of particularly grave significance for the proliferation of nuclear explosive devices; and

Establish guidelines and goals for the negotiation with other nations of new agreements for nuclear cooperation in which our nonproliferation interests will be protected.

But while doing the above, I believe this legislation substantially enhances the international prospects for U.S. industry, particularly by reducing uncertainty, by long-needed clarification of previously uncertain licensing procedures and criteria, by shortening the present too-long licensing process, and by instituting a new program for nuclear fuel assurance.

S. 897 also does:

Initiate a program for nuclear fuel assurances to nations which adhere to effective nonproliferation policies;

Call for more comprehensive and effective international safeguards;

Provide Presidential override of NRC in extraordinary cases of overriding national interest;

Establish minimum criteria as follows: Phase I clarifies and codifies controls and approval rights under existing agreements; would not cause a moratorium, and phase II, effective in 18 months requires international safeguards on all of the recipient's nuclear activities; already accepted by all but a handful of countries, including some non-NPT states;

Require NRC to grant licenses when all statutory requirements are met;

Require clarification of ground rules for public participation; limit dilatory intervention;

Establish sanctions against those who proceed with bomb detonation or development, who violate safeguards or other agreements, or who engage in dangerous forms of nuclear trade;

Allow U.S. fuel to be reprocessed in new or unapproved existing facilities only if it would not significantly increase proliferation risks;

Set important new goals for upgrading existing bilateral agreements and for new international measures; require active negotiations to achieve these goals; and

Provide for U.S. assistance to developing nations to develop alternative energy options.

But there are also some things that S. 897 specifically does not do. It does not:

Affect military cooperation;

Require breach of existing agreements;

Impose numerous new unilateral conditions;

Call for a ban on reprocessing;

Ignore the need for cooperative and lasting international solutions to the nonproliferation problem;

Bring Congress in on routine licensing decisions; and

Impose extensive new procedures which will be complex and time-consuming.

Controversy surrounding approaches to the nonproliferation problem stem mainly from differing perceptions regarding the character of the proliferation process, the need for controls over this process, the path of energy development most conducive to enhancing national security, and the ultimate view of this legislation by potential foreign buyers of U.S. services and equipment.

It is important to understand this controversy if the arcane subject of nuclear proliferation is to be penetrated.

Until recent years, nonproliferation efforts were based on an approach that was deemed successful as long as it forestalled the specific manufacture or acquisition of nuclear weapons. It has become clear, however, that this approach is too narrow. Our concerns about proliferation must be broadened to include the capability to quickly procure a nuclear explosive device. The basic reason for this lies in the continuing spread of those types of nuclear technology adaptable to the production of weapons-grade fissionable material.

I am referring to both the technology of uranium enrichment in which the percentage of the isotope U-235 is increased beyond its natural level, and the technology of separation of reprocessing of plutonium from spent nuclear reactor fuel. If a nonnuclear weapon state has no direct access to these technologies nor to materials suitable for fission explosives, our nonproliferation concerns are minimal. That is indeed the case with the ordinary once-through, light water reactor (LWR) technology that is the backbone of our commercial nuclear industry. The fuel used in an ordinary light water power reactor is uranium enriched to about 3 percent in the isotope U-235. Weapons-usable material of this kind requires at least 20 percent U-235. Further, the fission process in the reactor core, while producing plutonium, also produces intensely radioactive materials which must be chemically separated from the plutonium in order to obtain weapons-usuable material. Thus, unless an enrichment or reprocessing facility is immediately available, there are intrinsic safeguards in the once-through nuclear fuel cycle. Basically these safeguards provide for a sufficient amount of warning time in case of a diversion or seizure of spent fuel to allow a diplomatic effort to be mounted whose purpose would be to dissuade the country involved from carrying out its apparent course of action in moving down the weapons path.

Once the fuel cycle is closed, however, and stockpiles of plutonium are produced or if a nonweapon state has access to enrichment technology producing stockpiles of highly enriched uranium (HEU), then the leadtime to produce a weapon following diversion of the material may be reduced, just a few days or perhaps even hours, depending on the auxiliary preparations previously carried out. According to Prof. Albert Wohlstetter, a nation can indeed come within hours of exploding a nuclear device without violating any rules of the Nuclear Nonproliferation Treaty.

It is this situation that has produced the present challenge to the international safeguards system and has prompted a closer look at our system of nuclear export controls.

In trying to prevent or slow down the proliferation process, while at the same time assuring the benefits of nuclear power to nations that can well use that power to upgrade their standard of living, one must understand the motivations that cause nations to seek to possess sensitive nuclear technologies and by those I mean enrichment and reprocessing or the fissionable materials produced by them. Generally these motivations may be a combination of a desire for two things, for assurance of nuclear fuel supply coupled with the feelings of security engendered by having a latent weapons capability.

In other words, there is not only a nation's legitimate desire of fuel for legitimate electrical generating purposes but always in the background is the risk that perhaps a weapons capability could be developed if it were ever necessary to do so.

Any nonproliferation policy worthy of the name must deal with these realities of national and international life. A nation's national security concerns over the possibility an external nuclear military threat can be alleviated by widespread commitments by neighboring nations to the provisions of the nonproliferation which prohibits nuclear weapons, as well as through the adoption of other security treaties while efforts to arrive at a fair and equitable system of nuclear and general disarmament are

made. Treaties such as the NAT raise the political threshold which a nation must cross in order to become a weapon state.

Of perhaps equal importance as an inducement against proliferation is the granting of nuclear fuel assurances to those nations which have no abundant indigenous energy resources. No nation, the United States or any other nation, wants to be dependent on others, if possible, for its nuclear fuel supply. But there is some evidence from discussions with other nations that fuel assurances if decoupled from the political winds of the moment or attitudes of the moment of a given supplier nation would be looked upon as an attractive alternative to the construction or importation of reprocessing facilities for the purpose of separating plutonium as an independent source of fuel.

In other words, Mr. President, I believe it highly advisable to consider an International Nuclear Fuel Authority to which supplier nations could sell fuel and from which using nations could buy fuel—and most importantly, on a reliable apolitical basis; in other words, a more guaranteed supply than these user nations now feel they have.

The obvious benefit is that those nations buying from such an assured fuel supply would no longer need the assurance previously sought by owning their own reprocessing plant, which, of course, would carry with it the potential side effect of plutonium production and with that the possibility of nuclear weapon production.

Accordingly, this bill, S. 897, contains a set of provisions for starting the United States along the path of international cooperation toward the establishment of fuel assurances through such an organization. An international nuclear fuel authority, INFA as we refer to it, which would deal with all aspects of the fuel cycle, including provision for the storage of spent fuel in facilities under international auspices. As an initial step, provision is made, subject to congressional review, for the President to indeed go ahead and set aside an amount of low-enriched nuclear fuel, capable of producing up to 100,000 megawatt-years of nuclear power.

A translation of that is that with the usual nuclear powerplant being of approximately a 1,000 megawatt capacity. this would give a guarantee of 33 years of fuel for three average nuclear plants as most of them are built today, not a huge amount of fuel. But this could start the ball rolling and the fuel would be available for sale to an international stockpile under an international sales agreement with the hope that the other supplier nations will join in our efforts.

The fuel assurances arising from these arrangements are to be for the benefit of nations adhering to strict nonproliferation policies. And that, Mr. President, brings me to the other important aspects of this bill, namely, the criteria to which other nations are expected to adhere in order to continue to receive nuclear exports from the United States.

The criteria which go into effect immediately upon passage of this bill represent nothing more than a commonsense codification of existing policy regarding nuclear exports to nonweapon states.

These criteria include:

First, the requirement for IAEA safeguards on exporting U.S. materials or facilities;

Second, a prohibition on use of such exports for nuclear explosive devices;

Third, a requirement of adequate physical security on such materials or facilities;

Fourth, the establishment of prior approval rights by the United States with respect to reprocessing or retransfer of exported materials which could be waived for a limited period of time in those cases where such prior approval rights are not now provided in agreements for cooperation, as long as such agreements are being renegotiated—and

Finally, safeguards on replicated facilities.

Those certainly are common sense arrangements.

Eighteen months after enactment, a requirement of full-scope safeguards on all peaceful nuclear facilities is added. I believe, Mr. President, that these criteria are fair, reasonable, and represent an appropriate leadership position for the United States to take in safeguarding nuclear exports.

Indeed, Mr. President, it is our sincere hope and, I believe, that of the administration that our leadership in the United States in establishing these reasonable and workable criteria will be followed by other supplier nations.

The major "stick," by that I mean the major enforcement measure in this bill, is the section on action's triggering a cutoff of U.S. nuclear exports. Basically, nuclear exports to a nonweapon state will cease if that state explodes a nuclear device or abrogates or terminates a safeguards agreement. Any nation aiding a nonweapon state to achieve the direct capability to manufacture or otherwise acquire nuclear weapons would also risk cutoff as would any nation exporting a reprocessing facility to the sovereign control of a nonweapon state.

I would add in that a reprocessing facility, to those who have not followed the whole nuclear problem in as much detail as some others, is the type of facility that enables a country to take spent fuel, reprocess the plutonium out of it, and then use the plutonium as a substitute fuel in a reactor—or for nuclear weapons.

That is why we are so concerned about the export of these reprocessing plants, why it is so important. Surely these things I have just outlined must also be looked at as minimal commonsense requirements.

It should be added that in each part of the bill discussed above, namely, the initial criteria, the full-scope safeguards requirement, and the "sanctions" section, there is provision for a Presidential override, authority the President does not now have, to grant a license or to continue exporting, with congressional review of the President's decisions in such cases.

In other words, in the case of export licensing, where the Nuclear Regulatory Commission now could deny a license for export of material, if the President in his wisdom thinks it is vitally important to grant the export, then he can do so and open the way for the export by exercising this override provision, a power to reiterate, which he does not now possess.

Thus, any overriding foreign policy considerations can be dealt with in this fashion. The same thing applies to the section on "New Agreements for Cooperation," which provides for a list of requirements to be contained in such new agreements but allows flexibility in the negotiation of specific provisions of such agreements through the mechanism of Presidential submission of the agreement for congressional review.

A major additional aspect of this bill, and one which should be of major help to the nuclear industry, is the regularization of the nuclear export licensing process. Lead agent responsibilities for dealing with specific aspects of the process are clarified and timely processing of applications for licenses or for subsequent arrangements such as retransfers are encouraged.

The bill also delineates future export policy goals to be reached through international negotiations and agreement.

Finally, no nonproliferation strategy would be complete unless it dealt with the process of proliferation at its beginning, when energy options are being considered by recipient countries. The bill provides for U.S. cooperation and assistance to developing countries to develop indigenous nonnuclear energy resources and suitable technologies in order to aid such countries in meeting their energy needs. This places a properly considered balance to the U.S. obligation under article IV of the Nonproliferation Treaty to aid developing nations in the peaceful uses of nuclear technology.

In reviewing the content of the bill, Mr. President, I would be remiss if I did not highlight one of the key provisions, namely, the test to be used by the Secretaries of Energy and State in determining whether to approve a subsequent arrangement for reprocessing of U.S. fuel by a nonweapon state. This test provides that a finding of "no significant increase of the risk of proliferation" must precede a decision to approve reprocessing and further that "foremost consideration" must be given to the principle of "timely warning" in making such a finding.

In my earlier remarks, I alluded to this principle, which in its simplified form, states that the effectiveness of safeguards is a function of the amount of time available between a decision by a non-weapon state to divert fissionable material and the fabrication of a nuclear explosive device. If insufficient time exists between those events for an appropriate and effective political, diplomatic, or military response to be made, then "timely warning" is deemed not to be present, and thus effective safeguards are lacking.

The elevation of the "timely warning" principle to statutory status in dealing with the nuclear proliferation problem is, in my view, a very significant step forward in safeguards.

Mr. President, the proliferation problem is multifaceted, and calls for a multifaceted response. We have considered this problem from every angle and have worked long and hard with administration representatives and Senate colleagues over many months to produce a bill with wide-ranging support.

I might interject here in my remarks also, Mr. President, the course that was followed to get this legislation to the stage it is in now. The original administration bill, which I introduced as a courtesy to the administration, took one approach.

The hard line approach that was originally taken in the legislation which the distinguished Senator from Illinois (Mr. PERCY) and I worked on for a long time, along with other Members of the Senate, took perhaps what might have been a counterproductive approach, in retrospect.

What we did in the middle of this past year was to take the best of both of those bills, added the International Nuclear Fuel Authority proposal to it, and came out with a wholly new approach. But—and this is important—we worked very closely at each step of the way, at every meeting that was held, with representatives of the Nuclear Regulatory Commission, with the Department of State, with the Arms Control and Disarmament Agency people, with everyone from the administration sitting in and trying to hack away at the differences of opinion we had on approaches to this legislation.

Mr. President, I would submit that this bill we have now is the product of not just the floor managers of the bill here today but of all of those people, of the administration, of all these people who worked together on this bill.

I have been asked repeatedly, over and over and over again, by Secretary Vance and by messages from the President as to how soon we could get this bill to the floor, how soon we could get it passed, because they feel we are sort of in limbo until we can get this thing spelled out and pinned down; so we look forward to getting this passed at the earliest possible opportunity.

Mr. President, I believe this bill strikes a very proper balance. I believe it will be a help to American industry in worldwide markets while, at the same time, take a leadership position in the establishment of clear rules that other supplier nations will be encouraged to follow.

Three Senate committees have favorably reported this legislation. The House passed a similar version without a single dissenting vote, 411 to 0. The President of the United States has made the issue of nuclear proliferation a central concern of his foreign policy. Mr. President, we owe it to future generations to take the step of passing this legislation as a step toward the creation of a saner and safer world.

Mr. PERCY. Mr. President, I have stated many times over the past several years that nuclear proliferation is one of the most pressing issues which we will face in the Senate. I have not changed this belief; in fact, the passage of time has only strengthened my concern.

I would like to thank the distinguished majority and minority leaders for bringing this bill to the Senate floor today. We are nearing the end of a very long road which began in the spring of 1975; one which has involved negotiations with two administrations, numerous committees of the House and the Senate, and a range of private interests. The Senate schedule is heavily burdened with important legislation, especially with the extensive debate expected on the Panama Canal Treaties, and the leadership should be commended for allowing the Senate to work its will on this matter on a timely basis.

I have been gratified to see that since we began our hearings in the Governmental Affairs Committee, there has been a continuing high level of interest in the proliferation issue within the United States and overseas. The ramifications of this entire issue are highly controversial, and a spirited debate has ensued. But the important thing is that officials at the highest levels of governments all over the world are considering crucial questions which desperately need resolution.

We all recognize the need to balance specific nonproliferation policy concerns against energy needs and other foreign policy issues. But while it is true that nonproliferation issues cannot be considered in a vacuum, we must also recognize the unique nature of this threat. Unlike many other concerns, each setback in our nonproliferation efforts is irreversible. A nuclear explosive capability is not likely to be undone. Thus, unless we act now to halt the spread of this deadly threat, peace and stability will be undermined at a geometric rate. We have no choice but to place nonproliferation among our very highest national and international priorities.

At one point in the many weeks of hearings that have been held, with numerous witnesses who have contributed to the knowledge of the Senate and the House in this regard and the 3,000 pages of testimony that have accumulated, one witness said,

> It is about time we realized that the nuclear nonproliferators must start to have dominance over the nuclear salesmen.

We are talking about the future of humanity with this issue, and the prospect of gaining a couple of additional millions of dollars of sales is not urgent enough for any nation to put commercial gain ahead of safeguards and caution. We are talking about the terrifying threat of a nuclear explosive capability, as has been well described by my distinguished colleague, the majority floor manager of the bill, Senator GLENN.

I cannot help but recall one of the earliest witnesses we had, one of the most knowledgeable men in the world on nuclear power, the first Chairman of the Atomic Energy Commission of the United States of America, Dr. David Lilienthal, when Dr. Lilienthal said:

> I am glad I am as old as I am. I would not want to be the age of my children or grandchildren. The world is too dangerous for that.

I think we have to stop, look, and listen when authorities of that caliber discuss this subject and the potential holocaust that could occur if we do not start to tighten down the safeguards.

Some have argued that S. 897 is too little, too late. Others have contended that the bill would undermine the U.S. competitive position overseas. Those who have followed the development of this bill know that it is a compromise among widely differing prescriptions for action. I am convinced that the bill before us is a workable compromise which will provide a solid foundation for a strong and effective U.S. nuclear export policy.

S. 897 does not go overboard in imposing massive new unilateral controls on the use of nuclear technology. It recognizes the need for flexibility, international cooperation, and as much predictability as is possible consistent with our primary objectives. Yet the bill also recognizes that without major progress in curbing proliferation we will face an ever growing threat to world peace and human survival. International safeguards need to be strengthened, and we must take care to resolve proliferation risks as we adopt new technologies instead of waiting until little can be done. Perhaps the most important characteristic of S. 897 is that it draws a realistic bottom line from which to build toward new international political and technological solutions.

It appears that the debate on this bill will focus on the contentions of the nuclear industry that S. 897 will undermine the image of the United States as a reliable supplier of nuclear products overseas. That concern has played an important role in the development of this legislation over the past 3 years, and has resulted in numerous revisions in committee. After thoroughly studying the arguments which are now being raised, I am confident that the present version of the bill—with the amendments which will be accepted—will not cause any significant new problems with respect to reliable supply. Indeed, certain provisions will actually strengthen the industry's position—provisions which once were fought for and now are being taken for granted. Under S. 897, nuclear export licensing should be faster in virtually all cases than it is under the present system. It seems to me that the real controversy is not whether this bill will have a negative impact, but whether we should adopt more new mechanisms to expedite processing and increase predictability.

After a long career in business I certainly am sympathetic and intimately familiar with the concerns which have been raised by the nuclear industry, and I will be the first to recognize the important contribtuion which an active U.S. presence in the international nuclear marketplace can make to our nonproliferation policies. In fact, I so testified in 1976 before the Joint Committee on Atomic Energy. However, our first and foremost concern must be to insure that U.S. nuclear exports will not contribute to proliferation. We have tried to accommodate industry's concerns to the maxi-

mum extent possible consistent with that fundamental objective. The adoption of weakening amendments would seriously undermine our nonproliferation policy and would only hurt the nuclear industry in the long run.

Before concluding, I think it would be useful to set forth the three principles which have had the greatest impact on my thinking during the development of this legislation.

First, I am committed to the concept of retaining a strong, independent check on executive branch nuclear export decisions. NRC Commissioner Victor Gilinsky stated this concept eloquently in a recent Washington Post column when he remarked that:

> In giving export licensing authority to an independent regulatory commission in 1974, Congress was saying in effect that it wanted this country's nuclear trade to be handled consistently and to be subject to explicit protective standards rather than to the political exigencies of the moment. This still makes good sense.

The executive branch still plays the leading role in the implementation of U.S. nuclear export policy. But we must recognize that in their zeal to achieve their own institutional interests, these agencies may well overlook important nonproliferation concerns.

Second, we must use every opportunity to strengthen international nonproliferation controls. For many years the United States was reluctant to take decisive action on proliferation even at major watershed points. We were barely heard in our opposition to the Indian explosion—even though U.S. heavy water was probably used. We voiced little if any opposition to the German-Brazilian deal and did not object to the French deal with Pakistan until years after it was initially discussed. Unless we make it clear that there are serious diplomatic costs associated with such action, the message will be clear—that other nations can develop nuclear weapons with impunity.

During the past few years there has been a significant maturation of the U.S. attitude on this issue. In response to congressional concern the executive branch elevated this issue to a high priority, and President Carter has kept his campaign pledge to focus serious attention on the issue. We have made mistakes, and undoubtedly they will not be our last. But the United States can and must assert strong and creative leadership through an appropriate mixture of unilateral controls on our own exports and concerted efforts to negotiate, more effective international controls with other nations. I believe that S. 897 reflects just such a mixture, and that we can make major progress within the framework of this legislation.

Third, in debating the best structure for the U.S. nuclear export licensing process, we had to make several decisions regarding institutional emphasis. I feel that the only responsible choice is to ensure continuing vigilance by the U.S. to guard against the use of U.S. nuclear exports for nonpeaceful purposes. Therefore, I have supported provisions which will encourage the executive branch and the NRC to thoroughly review the impact of U.S. export licensing decisions.

I cannot stress strongly enough that this is not a question of whether we will have a favorable or unfavorable presumption with respect to the approval of an export license. The presumption of S. 897 is clearly in favor of exporting to those nations which adhere in good faith to effective nonproliferation policies. And it is equally clear that the U.S. will no longer grant favorable commercial treatment to those nations which flagrantly reject basic nonproliferation controls.

Mr. President, I look forward to enactment of this vital legislation in the very near future, and pledge to insure active congressional oversight of its implementation, because I do believe that in this case oversight is absolutely necessary.

We have a number of Senators, Members of the House of Representatives, and staff who are not only deeply motivated and concerned, but who are also developing a degree of sophistication and knowledge in this field that can be of immeasurable help in providing guidance through the oversight process and bringing Congress and the executive branch of the Government closer together.

In this regard the majority floor manager of the bill, Mr. GLENN, has mentioned the extraordinary cooperation we have had every step of the way from the executive branch. In the State Department, Joe Nye, Lou Nosenzo, and Ron Bettauer have provided immeasurable help to us, and we have been in intimate contact with them all the way through this process.

In the Department of Energy, Pete Brush has offered valuable assistance and help to our staff as did Bob Lin work with both the Ford and Carter administrations. The members of the Nuclear Regulatory Commission have personally taken an interest in this matter and helped us in testimony and in personal consultation, together with staff members such as Carl Stoiber who has taken a great interest in this legislation.

In the Arms Control and Disarmament Agency, in addition to the head of the agency, Paul Wanke, Charles Van Doren and Harry Marshall have offered considerable help.

One of the greatest sources of satisfaction that I have had in the Senate has been to see the expertise of my distinguished colleagues; and certainly none is more illustrious in this regard than Senator GLENN.

His expertise, his patient help, and the leadership he has provided all the way through will help mark this point in a remarkable career few of us could match. I think this will be, at least here on Earth, the most important single thing he has done for his fellow man, and I cannot express in adequate terms my admiration for what he has accomplished and done, and my respect for the way in which he has done it.

Senator RIBICOFF, the chairman of the Governmental Affairs Committee, and Senator JAVITS have offered immeasurable assistance and help, as have the other cosponsors of this legislation, Senators CRANSTON, MATSUNAGA, and KENNEDY.

Though not a cosponsor, Senator JAMES MCCLURE has worked very closely with us. He has developed an intimate knowledge of this process and has represented interests fairly. His efforts have advanced and expedited the licensing process, which is at the heart of what we are trying to do generally in all regulatory agencies—to move the process forward and enable decisions to be made more expeditiously. At the same time, those amendments which will be accepted by the floor managers of the bill will not undermine at all the nonproliferation concerns that we all share and which I know Senator MCCLURE places ahead of any other interests we may have. We are all interested in economic development and growth. None of us in any way—including, I feel confident, the distinguished labor leaders and managers in the nuclear energy field—would put a commercial interest ahead of the national interest and the interests of all of our fellow men.

I also commend Representative BINGHAM and other cosponsors in the House who developed companion legislation and who certainly have acted expeditiously on this matter in the House. Their start was later than ours in the Senate, but they have completed their work before us. They have contributed immeasurably to moving this legislation forward.

Finally, I should like to mention the staff of the various Senators and committees involved in this bill. Again, never on any piece of legislation have I seen the importance of staff work as I have here. It is they who have worked such long hours, night after night and early in the morning, often with staff from the executive branch, working out the necessary details. This legislation does vitally affect many concerns and interests in the country and certainly, involves the national interest. I think we all owe Paul Leventhal, formerly of Senator RIBICOFF'S staff and who has since left the Senate, an expression of gratitude for his immeasurable contribution to this legislation. My own debt of gratitude to my staff member on the Governmental Affairs Committee, Connie Evans, knows no bounds. Whether in this country or at conferences in Vienna, wherever it may be, she has demonstrated the capacity of a dedicated member of the U.S. Senate staff to carry forward an idea, to work out what often looked to be insurmountable hurdles, and has overcome those hurdles.

Senator GLENN has been ably assisted throughout this process by Len Weiss, Len Bickwit, and Sandy Spector. I have admired and respected the expertise that they have brought to this process. Senator RIBICOFF has been ably assisted by Ellen Miller, and Senator JAVITS by Alan Bennett and Gary Klein.

We have had an opportunity to work with some of Senator MCCLURE'S staff members, especially Chuck Trabandt who has been of great help to us. And on the Foreign Relations Committee, Bill Ashworth and Ira Nordlicht, working under the direction of the chief of staff,

Norville Jones, have provided immeasurable help.

This has been a cooperative effort of the executive branch, the House and Senate, members of the staff, and those who have commercial interests in this field. The industry must have an understanding attitude that our interest is not just to protect producers; our interest here must be to protect the public interest, the national interest. They have presented an able case. But in many cases, they will have to recede and subordinate commercial interests to what we consider to be the public and national interests.

Mr. President, at this point, I ask unanimous consent to have printed in the RECORD a statement by Senator JAVITS, who, regrettably, is not here because of attending the funeral of a lifetime friend in California. I also commend Senator JAVITS for his considerable contribution.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR JAVITS

I rise in support of S. 897, the Nuclear Non-Proliferation Act, a bill which is of paramount importance to this country and to the world. With the increased capability of a number of countries to build nuclear devices, it becomes increasingly important to take steps to limit the spread of these incredibly dangerous weapons. As the world's leading supplier of nuclear fuels and technology, I believe the U.S. has a special responsibility to do everything in its power to limit the potential use of nuclear materials and nuclear technology for other than peaceful purposes. This bill represents a positive first step in fulfilling that responsibility.

The bill sets forth standards that will govern all future nuclear exports. All nuclear activities of countries which receive our exports will be subject to safeguards, and no program that produces weapons grade nuclear material will be permitted. Importantly, these safeguards will provide that the United States must receive "timely warning" of any diversion of nuclear material to weapons programs, so that appropriate diplomatic steps may be taken to attempt to halt further development.

The terms of this bill are meant to prevent any U.S. assistance whatsoever in the development of nuclear weapons by any other nation. It is that simple. If a particular country wishes to go ahead with a nuclear weapons program, it will have to do so without any U.S. nuclear material or technology. And, by such a choice, that country will be foregoing the benefits of a peaceful nuclear program in cooperation with the United States.

I would like to point out that the safeguards contained in this legislation are not incompatible with continued exports of U.S. nuclear technology. Much of the recent decline in the sale of this technology abroad has been due to the uncertainty surrounding U.S. policy toward these sales. Passage of this bill will clear up that uncertainty, spelling out in detail the conditions under which exports will be made available.

Further, the bill would also provide nations that agree to strict non-proliferation controls with an assured source of nuclear fuel supply by establishing an International Nuclear Fuel Authority. A guaranteed fuel supply is of course crucial to any country's nuclear energy program. Thus, this measure enhances, rather than detracts from, the reliability of the United States as a supplier.

It is our hope that no nation will be cut off from our nuclear trade because of the safeguards in this Act. Indeed, the bill is clearly structured to provide incentives rather than penalties. The United States will commit itself to provide peaceful nuclear technology to countries which agree with the fundamental non-proliferation principles in this bill. Although we cannot demand that other nations sign the Nuclear Non-proliferation Treaty, we can at least make sure that every country that receives our aid adheres to its principles.

This bill is the best mechanism available to us now to prevent the spread of atomic weapons. This bill does all that is possible to encourage other nuclear nations to take similar action. But that international negotiation must reside primarily if the U.S. Chief Executive. It is the President who must persuade the other nuclear nations of the world to forego possible temporary economic advantages in order to stop the spread of weapons technology and weapons grade materials. The goals of the bill will be only partially achieved unless the other nuclear powers follow suit. But one nation must take the lead, and all signs say that nation should be the United States.

Mr. PERCY. I take note on the floor that Senator JAVITS is particularly interested in any amendments dealing with judicial review. As a courtesy to Senator JAVITS, I ask that we withhold discussion of such an amendment, if there will be any amendment, or floor discussion on that particular point until Senator JAVITS returns.

Mr. RIBICOFF. Mr. President, my highest praise goes to Senators GLENN and PERCY for their leadership. The Nuclear Nonproliferation Act, S. 897, which we begin to consider is a measure which has a long history. The discussion and debate over this country's nuclear policy and its role in worldwide nuclear trade is one which has demanded our attention for many years. The importance and necessity of this legislation is almost self-evident.

Over the past 2 years nonproliferation has moved to the top of this Nation's foreign policy agenda. The specter of a world controlled by the fear of nuclear weapons is a prospect which makes all mankind shudder.

I have long believed that the United States has a special responsibility for controlling the spread of nuclear arms. We have been active and leading promoters of nuclear energy for a generation. We are presently the leading supplier of nuclear powerplants and fuels. The monopoly supplier position which we have maintained on fuels and plants in the past is rapidly slipping. We no longer have the kind of leverage which we have had in the past. We can, however, through commercial choices and foreign policy initiatives affect the costs—both economic and political—for many states which may wish to acquire a nuclear capability. No assessment of the nuclear future and of American nonproliferation policy can disregard this country's position for positive political leadership.

What has happened in the past 2 or 3 years which necessitates the development of a comprehensive and tough nuclear export policy? First, the Indian explosion of May 1974 had dramatic political and psychological effects throughout the world. Political debate on expansion of nuclear power was stimulated in all countries. India became the sixth nuclear power—the first to join the "nuclear club" since China (1964), and the establishment of the Nonproliferation Treaty of 1970. The Indian explosion made it easier for other countries to follow suit. The 10- to 15-kiloton underground test in the Indian desert underscored the fact that even a developing country, beset with tremendous economic and social problems, is capable of constructing nuclear explosives.

New Delhi described the test as a "peaceful nuclear explosion" but the fact is that this capability cannot be distinguished from a military one. Past atomic testing by the United States, Soviet Union, Britain, France, and China had acknowledged military purposes. India was the first to create a "peaceful" route to nuclear proliferation. India was also the first country to explode a nuclear device with plutonium obtained from a civilian nuclear program. Spokesmen in New Delhi said that India had no intention of developing nuclear weapons, but they took care not to foreclose future possibilities. India's action underscored the fragility of the NPT as an effective mechanism to prevent nuclear proliferation.

Second, the energy crisis and the quadrupling of the price of oil following the Middle East War of 1973 greatly increased the world demand for nuclear energy as a source of power. According to some estimates, the number of nuclear reactors expected to be in operation will sharply rise, with a fourfold increase in nuclear power capacity by 1980 and another tenfold increase by the year 2000. This increasing reliance on nuclear power is significant in that a by-product of nuclear power reactors—plutonium—is also the critical element for nuclear weapons. This will be produced in ever increasing amounts and will be more widely available.

The Stockholm International Peace Research Institute has estimated that in the year 1980, nuclear reactors will probably produce 100,000 kilograms of plutonium, and by that time the world will probably have accumulated about 350,000 kilograms. Only 5 kilograms is enough for the kind of device exploded by India, which was about the same size as the bombs that destroyed Hiroshima and Nagasaki. International safeguards will be placed over most of this plutonium, but even if safeguards are 99.9 percent effective, in 1980, enough plutonium could be diverted without detection to produce, after processing into weapons-grade material, a nuclear weapon a week.

Third, the increasingly widespread familiarity with the technology of producing fissile material gives new urgency to solving the problems of nuclear proliferation. Until recently, the construction of reactors, enrichment or reprocessing plants has been a complex and costly undertaking, generally beyond the technical capabilities and economic resources of most developing countries. This is no longer true. Simpler and cheaper methods of producing fissile materials are already on the horizon. The technological innovations have the effect of weakening the barriers of eco-

nomic cost and technical complexity which in the past limited proliferation.

A fourth reason for the growing concern is the increase of international terrorism. This fear has created a new magnitude of concern about the possible diversion or theft of weapons-grade materials, or even bombs, by terrorists or other subnational groups. A terrorist group, operating either at home or in a foreign country, might calculate that it could gain enormous opportunities for worldwide publicity or even blackmail, should it succeed in acquiring nuclear materials. The recent increase in terrorist activity must, therefore, give pause to anyone who contemplates a proliferated world.

Fifth, the worldwide diffusion of political, economic and military power, accompanying the breakup of the post-war international system, has made nuclear weapons more attractive. Many recent developments in foreign policy have contributed to a gr at emphasis on regional rather than glo al balances. In the economic sphere, he growing demand by "third" and "fou th"' world countries for a new international economic order has heightened their awareness of their strength and need for an independent stance. In the political and military spheres, the diffusion of power has encouraged the development of regional powers. This has led to an increasing desire for military power; hence the growing interest in acquiring armaments, both conventional and nuclear. Increased military power may be sought because nations feel they must be better prepared to defend themselves in the new age of multipolarity, or it may be sought for reasons of prestige and status, or a combination of the two.

What does all this really mean? I like to compare the road which all nations are traveling in nuclear matters with an automobile accident. In an automobile accident, there is a long moment before impact, when you see another car approaching and realize that a collision is imminent, and yet you cannot believe what is happening. When you hear the sound of colliding metal, you know that it is too late. So too with the impending nuclear collision. The question is whether it is too late to change our direction. I believe it is not.

The legislation which we have before us grows out of longstanding Congressional concerns. The Governmental Affairs Committee has considered nonproliferation legislation since the Indian blast in 1974. During the 94th Congress, the committee identified major issues of nuclear proliferation and shaped legislation meant to alleviate the problems. That legislation died at the end of the last session of Congress. Convinced of the correctness of the basic policies embodied in that bill, Senators PERCY, GLENN, JAVITS, and myself, introduced S. 897 early in the 95th Congress. Under the guidance of Senator GLENN and Senator PERCY, this bill moved quickly through extensive and thorough hearings early this session. S. 897, as introduced, was a strong bill, requiring among other things the cutoff of exports within 18 months if recipient countries did not meet up to U.S.-imposed criteria. The bill we consider today accomplishes much of what our original bill set out to do. S. 897 is an excellent starting point for U.S. nonproliferation policy. It establishes basic policy—and points in the direction of our future roads to be taken. However, the nuclear proliferation problem will not be solved by this bill.

There are many items which are still to be considered in our nonproliferation policy. We must head further in the directions in which the bill points us. We must continue to work for an improved nuclear nonproliferation treaty and further strengthening of the International Atomic Energy Agency. Today, the safeguards mainly cover reactors; they should be expanded to the entire fuel cycle, the life of facilities and research institutes, and they should be aimed not merely at "timely detection" but also at prevention of illicit activities. We must provide additional incentives for nations to give up a nuclear weapons capability. Other countries must be confident that they can rely completely on the United States to deliver a steady supply of enriched uranium—so long as they observe stringent safeguards. We must examine the possibilities of cooperative international ventures for the enrichment of uranium and the disposal of nuclear waste. We must continue to discourage the belief that plutonium should be used in reactors. Evidence increasingly indicates that plutonium recycling is uneconomic and impractical. We must continue to work through the London Suppliers Meetings to prevent situations which allow a country to play suppliers off against each other to obtain enrichment or reprocessing facilities. We should pursue a "market-sharing" arrangement which would reduce dangerous competition. We should further tighten American export rules so that, in effect, the United States discriminates against countries that do not cooperate with the NPT system. We should no longer make available cheap credits to help the spread of nuclear power.

We have a long way to go and little time to be successful in stopping that sometimes seemingly inevitable collision. The bill before us now is a good first step in that direction.

Again, I commend my colleagues for their leadership, time and attention to this measure.

Mr. McCLURE. Mr. President, I ask unanimous consent that Fred Craft, Chuck Trabandt, Dave Swanson, Mary McKenna, Faye Widenmann, and Carol Sacchi of the Senate Energy Committee staff be accorded privileges of the floor at all stages of the proceedings on this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, today, we begin consideration of S. 897, the Nuclear Nonproliferation Act, which primarily deals with the regulation of nuclear exports and related international agreements in the context of our nuclear nonproliferation policy. I anticipate that the debate will continue for a number of days, because of the large number of amendments that I and many other Senators ultimately will offer to this bill.

I believe it is critical at the outset of our consideration of S. 897 that all Senators recognize that all of us on both sides of the forthcoming amendments are committed absolutely to supporting this Nation's and the world's nuclear nonproliferation objectives. In that regard, I want to commend Senators GLENN, PERCY, RIBICOFF, and JAVITS, the sponsors of this bill who have worked so hard over many long months to bring this legislation to the floor. Our differences on the floor, which I hope will be few, will be over the specific approaches to achieve best those objectives. I sincerely hope that the debate will proceed in that spirit.

I might note parenthetically that I heard the opening statement of Senator GLENN as he was outlining his feeling on objectives of this legislation. I find no disagreement at all, in my mind or in those of others that I have talked to about this legislation, with the objectives that were expressed. I think there is great unanimity on the objectives of the various Members of the Senate with respect to this legislation. That may not be uniformly true of people across the country. There are those who have different objectives in mind, but I do believe that there is that spirit within the Senate that is uniformly dedicated to the same goals.

I also believe it is imperative that all Senators recognize that I am committed, as I think others are, to enacting a responsible nonproliferation bill in this session. Recent events internationally and domestically, particularly within the independent Nuclear Regulatory Commission (NRC) and its regulation of nuclear exports, have demonstrated that existing statutory provisions under the Atomic Energy Act probably are inadequate to deal with our international nuclear commerce and related nonproliferation activities in the decades ahead.

At the same time, however, enactment of nonproliferation and nuclear export legislation which is not responsible or not workable would be wholly counterproductive and most likely to increase, not decrease, the risks of nuclear proliferation. Our task on this floor in the days ahead will be to insure that we finally pass a bill which is responsiblie and workable.

I know from my conversations with both Senator PERCY and Senator GLENN that they share that objective, that it is their desire, as well as my desire and that of others, that this legislation be truly workable for the great number of people who have raised issues about this legislation or asked questions. I can only say that they have made a very large contribution to our understanding of the pitfalls that lie ahead to allow us to try to make changes at this stage that will make this truly both responsible and workable legislation.

My concerns with the reported legislation, which I believe are shared now by many others, are documented in detail.

I invite the attention of my colleagues to my additional view at page 92 of the joint report on S. 897 (report No. 95-

467) and to a subsequent analysis of the reported bill in the RECORD of October 26, 1977, page 35219. As you will note, the issues include the need for predictable, streamlined, and workable regulation of nuclear exports to preserve U.S. participation in world nuclear commerce, the independent role of the NRC in this international policy field, the application of diplomacy and internationalism versus unilateralism and restrictive domestic regulation, and the potentially premature commitment of U.S. resources to international activities, among others. These issues will be the subject of numerous amendments during the course of the debate.

Initially, I will be offering 30 printed amendments, Nos. 1582 to 1602, which are discussed in the RECORD of November 2, 1977, page 36524. The administration supports these amendments generally, with some minor modifications, as discussed in the State Department letter of January 26, 1978.

Mr. President, I ask unanimous consent that the letter be printed in the RECORD immediately after my remarks.

The PRESIDING OFFICER (Mr. HUDDLESTON). Without objection, it is so ordered.

(See exhibit 1.)

Mr. McCLURE. Mr. President, since the floor managers participated in the development of these compromise amendments and previously agreed to accept them, as discussed in the November 2 RECORD, and I also understand the leadership of the Foreign Relations Committee will support them. I hope these amendments will be accepted.

Later in the debate, I and others will be offering an additional series of amendments of a potentially more controversial nature. One of those, the amendment requiring prior congressional authorization, or a review with one-House veto, of any plan to store foreign nuclear waste for the United States, was the subject of my November 2, 1977, letter. The other amendments will deal directly with the several remaining problems, not remedied by the 30 compromise amendments. Information on these additional amendments will be included in the RECORD and subsequent letters for your review. I believe most, if not all, of the later amendments will have the support of the administration and many members of the committees of jurisdiction.

I urge the thorough consideration of each of these forthcoming amendments by my colleagues and I sincerely request that each of you do so in the context of fashioning responsible and workable legislation. We all are agreed on the need for an effective nuclear nonproliferation policy and for implementing legislation. Our challenge will be to perfect S. 897 to achieve that result, and ultimately decrease, not increase, the risk of nuclear proliferation in the decades ahead. I would greatly appreciate your support in that effort.

Let me turn now to a more detailed discussion of the bill because I think we have wide agreement on the broad statement of objectives and our disagreement and the time that will be consumed is not in the discussion of philosophical agreements which we all share, but in the detailed technical language of the bill upon which there may be some difference of opinion from time to time.

I am convinced that, based on testimony and substantial independent analysis, titles III and IV of S. 897, as reported by the Foreign Relations Committee, are procedurally cumbersome, excessively time consuming, highly unpredictable, and will likely yield far greater litigation in attempts to delay or stop the United States efforts to participate through export in the world's nuclear commerce and to reach new agreements with recipient countries. Because of these factors, the titles may lead to an effective moratorium on new nuclear exports. Consequently the titles do not support the crucial concept, embodied in the other title under the legislative jurisdiction of this committee, of the United States as an assured and reliable supplier of nuclear fuel, nuclear technology and nuclear facilities and equipment.

Such a result would be completely counterproductive for the U.S. nonproliferation policy, as elsewhere enunciated in this bill. Potential foreign purchasers of U.S. nuclear fuel, technology, facilities, and equipment may simply choose to take their nuclear business to one of several other, available nuclear supplier nations. Even where the U.S. and one or more other potential suppliers have the same, or basically similar, policies on nuclear export and nonproliferation, the procedural time predictability, and litigation problems contained in titles III and IV may be sufficient to deter agreement and commerce with the United States.

The resulting loss of exports could have serious and far-reaching impacts on U.S. policy initiatives in the nonproliferation area. If other nations, in fact, choose to go elsewhere for their nuclear supplies, it will be difficult, if not impossible, for the U.S. to play a leadership role in nuclear commerce and nonproliferation because its participation will become increasingly limited. Since the U.S. participation in that commerce is absolutely essential for achievement of our nonproliferation objectives, these two titles ultimately may frustrate the underlying motivation for this legislation. Also, by statute the United States will be placed in a polarized position of unilateralism in the ongoing world negotiations among nuclear suppliers regarding nonproliferation export criteria. The Senate and the Congress will not have fully discharged its responsibility in this extremely important policy area if titles III and IV are allowed to create that result.

It is important to note, in addition to the compelling policies reasons discussed above for amendment of title III and IV, the importance of nuclear exports for the U.S. economy. Historically, on a cumulative basis through 1972, U.S. vendors captured 91 percent of the free world market for commercial nuclear power reactors. Since that time, non-U.S. vendors have controlled 52 percent of the free world market, thus reducing the United States to less than half. There have been no new foreign reactor sales by U.S. vendors in the past 2 years, partly because of foreign competition and partly because of a reduction in sales during the worldwide recession. A significant element in the foreign competition has been a marked decline in the creditability of the United States as a reliable supplier, because of inordinate delays obtaining licenses for nuclear exports, a lack of new enrichment service capacity, delays in the formulation of U.S. nonproliferation policy, and increasingly competitive positions by foreign vendors, whose business capacity was predicated on the basis of continuing export sales.

The procedural, time, unpredictability, and litigation difficulties embodied in title III and title IV of the bill undoubtedly will add materially to the burden placed on U.S. nuclear exporters. Since the decline in creditability of the United States as a reliable supplier has already been a material factor in a loss of nuclear export sales, it is difficult to imagine how title III and title IV could result in anything other than furthering that decline. Consequently, the U.S. nuclear industry stands to lose a potentially significant opportunity for a major share of the world market in the future.

The rest of the world is becoming increasingly committed to the use of the light water reactor for generation of nuclear power, and therefore the world market is expected to increase in the next decade. Since a typical nuclear powerplant export is worth about $353 million in 1977 dollars and can result in about 15,000 man-years of direct employment and another 15,000 man-years of indirect employment in the local communities where manufacture and design work take place, these exports can constitute an important factor in the U.S. economy. For instance, it has been forecast that over the next 5 years the nuclear export market could annually support over 350,000 domestic jobs. And, with the trend toward increasingly larger nuclear plants, with related dollar values approaching at least one-half billion dollars apiece, the balance of payments impact of reactor sales is increasingly significant, particularly to offset increasingly negative balance of payments of deficits resulting from the importation of foreign oil.

The dramtic impacts, then, in terms of domestic employment and balance of payments cannot lightly be dismissed in the policy considerations associated with title III and title IV. Certainly these economic factors should not be completely determinative of our nonproliferation policy, and I agree with the Senator from Illinois (Mr. PERCY) in the statement that he made. At the same time, however, they should not be totally dismissed as irrelevant and immaterial by comparison to the nonproliferation policy aspects. It is noteworthy that some administration and congressional supporters of these titles have supported such dismissal for that reason. Accordingly, these economic factors constitute an additional, compelling reason for amending title III and title IV to reverse

the decline in the creditability of the United States as a reliable supplier, and to reestablish our position as an assured supplier of nuclear exports, once a nation has committed itself to the nuclear proliferation standards embodied in this bill.

While we were unable to offer amendments to titles III and IV, myself and others on the Energy Committee strongly support the administration proposed amendments to those titles of S. 897, as reported by the Governmental Affairs Committee. In fact, in many respects we believe that the original administration bill, S. 1432, still would provide a far more acceptable statutory scheme for agreements for cooperation and export licensing procedures and criteria. While respecting the judgments and motivation of the members of the Committee on Governmental Affairs who have worked so long and diligently on this legislation, we reluctantly must recommend to the Senate that title III and title IV in the Governmental Affairs reported bill be significantly amended to encompass at least all the administration proposed amendments, or effectively return the titles to the provision of S. 1432.

In the committee's analysis of the various pending nonproliferation legislation, the nonproliferation bill reported by the House Committee on International Relations also was reviewed. The House reported bill contains virtually the same provisions as title III and title IV and could lead to the same unacceptable results. It is imperative, therefore, that the Senate adopt the significant amendments to title III and title IV which are necessary to preclude those results, in order to provide sufficient differences in conference to achieve that end. For all of these reasons, I urge the full Senate to consider and adopt the necessary amendments to those titles, which I and others from the Energy Committee will offer and support on the floor.

Mr. President, I now will proceed to briefly outline the spectrum of specific issues which accompany S. 897 to the floor.

For purposes of convenience, I will discuss the issues as they occur in the sections of the bill proceeding sequentially through the bill.

The statement of policy contained in section II of the bill generally reflects the policies with which I am sure most of my colleagues will agree. There, however, is one subsection, section II(B), which raises significant concerns with regard to the possible misinterpretation of its statement. The subsection indicates that the United States will "cooperate with other nations in protecting the international environment from radioactive, chemical, or other thermal contamination arising from nuclear activities." This statement is originally contained in the administration's proposed legislation, S. 1432, but in another title of that bill dealing with international cooperation. Placement of the subsection in the policy statement could lead to either administrative or judicial interpretations leading into a misapplication of the National Environmental Policy Act. The specific concern is that such a misinterpretation could lead to an administrative or judicial requirement for the preparation of environmental impact statements for individual nuclear export applications, specifically taking into account the environmental considerations associated with the ultimate destination for the export in a foreign country. For instance, under such a situation the export of fuel for the reactor at Terrapur, India, conceivably could include an EIS for that location. Obviously, such a requirement would raise significant legal, foreign policy, cost, and time delay considerations. It is particularly noteworthy that these same issues have been raised by proposed guidelines now under consideration within the administration which have been prepared by the Council on Environmental Quality. The CEQ guidelines have been the subject of a recent column in the Washington Post and an editorial in the Washington Post earlier this week. I ask unanimous consent that the column and the editorial be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Jan. 18, 1978]

COUNTERING AN AGENCY'S ENVIRONMENTAL OVERREACH

(By Rowland Evans and Robert Novak)

An angry counterattack against federal environmentalists is now being quietly planned by Cabinet-level departments, led by the State Department, with indications of support in the White House itself.

The counterattack seems certain to modify drastically and could kill altogether new regulations proposed by the Council on Environmental Quality (CEQ) that would make Uncle Sam the environmental policeman of the world—particularly policing nuclear reactors. "Outrageous," one State Department official told us. "These regulations would impose American environmental standards on all our foreign friends and they would end up hating us."

This places President Carter in a peculiar dilemma. While crusading against nuclear proliferation and environmental pollution, he is bound as President by the practicalities of international life. As such, he seems forced to disappoint his environmental constituency.

The proposed regulations were drawn secretly by CEQ planners with apparent help from the Natural Resources Defense Council (NRDC), an environmentalist private action group. They would, in effect, require standard environmental-impact statements (to be called "assessments" in the foreign field) for all exported material or technology sold abroad with some help—export licenses or loan guarantees—from the U.S. government.

The real target may be nuclear reactors, a prospect that has infuriated the Nuclear Regulatory Commission (NRC). At a closed-door meeting called by CEQ Jan. 6, NRC Assistant General Counsel Carlton Stoiber said there is "no legal justification" for imposing U.S. environmental standards abroad. That brought objections from CEQ Chairman Charles Warren and member Gus Speth, who showed reluctance even to discuss legal justification. But Stoiber insisted that neither the 1969 National Environmental Protection Act nor its legislative history in congressional debate could justify the new regulations.

At least as upset as NRC and the State Department was Export-Import Bank President John Moore, who warned the Jan. 6 meeting that the proposed regulations would benefit Japanese and West German exporters at the expense of this country. The reason: endless delays and lawsuits against U.S. exports on often specious environmental grounds would turn impatient foreign buyers away from the United States.

Moore, a former Atlanta lawyer close to Carter, strongly urged White House domestic policy chief Stuart Eizenstat to attend the Jan. 6 session at CEQ. Eizenstat stayed long enough to ask three questions: What is the cost to the federal government of the proposed regulations? What is their legal justification? To what extent would they impose American standards on foreign governments?

Speth, who took the leading role for CEQ in the acrimonious debate, gave uninformative and "fudged" answers, according to one participant. Eizenstat left the meeting before it ended, but those in position to know say he was unimpressed with CEQ's rationale and has strong reservations about CEQ's ambition to be top cop for global environment.

Speth was legal counsel for the environmentalist NRDC before Carter appointed him to the CEQ. Last year the NRDC brought suit against the Export-Import Bank to require it to meet CEQ's domestic standards in all its foreign lending operations.

That suit, while not directly related to CEQ's proposed new regulations, helps to explain why Moore and the Export-Import Bank are so disturbed. The bank has provided more than $20 billion in loans and guarantees for U.S. exports since mid-1974, much of it for nuclear and conventional power facilities and offshore oil drilling. NRDC claims these have direct impact on the environment.

If the Export-Import Bank either loses the NRDC suit (now in U.S. District Court here) or is forced to comply with the proposed CEQ regulations, billions of dollars' worth of exports of U.S. products in the future could go down the drain. Foreign buyers would be forced to wait out endless environmental investigations, filing of impact statements and predictable harassment of court actions brought by well-meaning environmentalist groups.

Add to that danger the equally predictable fury of foreign buyers and governments subjected to U.S. environmental investigations on their own soil and the awesome dimension of CEQ's ambitions comes into focus.

But the CEQ has almost certainly overreached itself. Representing an activist constitutency that takes a highly negative view of extending U.S. military and political power around the globe, it now wants to blanket the world with U.S. environmental power. And that is an unwanted extension of Potomac power that Jimmy Carter, ardent environmentalist though he is, is having trouble accepting.

[From the Washington Post, Jan. 30, 1978]

OTHER COUNTRIES' ENVIRONMENTS

A fierce quarrel has broken out within the Carter administration, as you may have noticed, over environmental regulation of certain U.S. exports. Suppose the Export-Import Bank, a federal agency, finances the sale of nuclear equipment to another country. Should the Ex-Im Bank have to write an environmental impact statement—one that would be subject to attack in U.S. courts? A lot of countries would regard that as infringements of their sovereignty.

But suppose, again, that American foreign aid buys pesticides for an agricultural development projects in an undeveloped country. Does the United States have an obligation to tell the recipient what it knows about the environmental effects of those pesticides? Most Americans would say that it does and, in fact, the Agency for International Devel-

opment already requires environmental statements for its projects.

The President's Council on Environmental Quality is leading the campaign to apply American environmental law to some exports—those that the federal government subsidizes or licenses. The opposition comes mainly from the State Department and the Ex-Im Bank. One thing that they fear is repeated collisions with other governments over regulatory authority. When the United States started to run preliminary environmental studies on the proposed gas line from Alaska down through the Yukon to the Midwest, Canada tartly told the American experts to stay on their own side of the border. Canada thinks, with some reason, that its own standards are at least as high as this country's.

Another fear is litigation tying us decisions on exports, and embroiling foreign buyers in the American courts. The Council on Environmental Quality reflects a tradition of public-interest lawyering that considers the threat of litigation essential to strict enforcement of standards, But law suits are a poor way to make foreign policy.

The rules on environmental protection abroad will have to vary with circumstances. There's not much dispute that American operations in the deep oceans and Antarctica—what lawyers call the global commons—need to be held to the same standards as in the United States. No other country's jurisdiction is involved. Foreign aid does not involve other jurisdictions, but the United States bears a broad responsibility for the consequences of its advice to undeveloped countries.

It's the commercial sales—and above, all, the sales of nuclear reactors and fuel—that raise the hard issues. Some buyers will welcome an American environmental impact statement, since it requires the seller to disclose what he knows about the effects of the product or the project. But what if the buyer's government considers the American requirements to be an intrusion? One solution is to require an environmental statement only if the foreign government agrees. Otherwise the collision of sovereignties becomes unmanageable.

As for nuclear exports, safety standards are far too important to be left to the ambiguous and unsettled provisions of American environmental law. When American reactors go to countries with no great depth of technical experience, they need to be accompanied by the most explicit safeguards. That is the Nuclear Regulatory Commission's job. The present attempt to take the environmental law abroad is grounded in the environmental organizations' suspicions that the NRC tends to tilt in favor of the nuclear industry. The remedy to those suspicions does not lie in the slow and uncertain processes of the federal courts. It lies in the White House. That's what the country has a President for.

Mr. McCLURE. Mr. President, I invite the attention of all my colleagues to the discussion of the guidelines contained in these reports. It is my view that such guidelines requiring international environmental impact statements would have a devastating effect on nuclear exports, not unlike the impact that such statements have had on our domestic nuclear power and other activities. I think it is particularly noteworthy that Robert Strauss, special trade representative, in testimony before the Senate Finance Committee yesterday, indicated his serious concerns and reservations regarding these proposed guidelines in the context of our international trade efforts.

The problem with subsection II(e) and the related concern with the CEQ guidelines will be the subject of amendments which will be offered later in this debate.

Section IV of the bill includes several definitions which are keyed to the subsequent nuclear export regulations established by this bill. Several of these definitions change the existing, accepted definition in related international treaties and law associated with the international nonproliferation safeguards programs. For example, the definition of "physical securities measures" is at variance with the accepted definition contained in various international atomic energy agency documents and also the recent one in suppliers conference export guidelines. Such changes and definitions can cause fundamental disruptions in the continuing understanding by foreign importers of our domestic statutory requirements. These definitions are also noteworthy, because of their later use in the specific requirements for nuclear exports contained in title III and in title IV. In several cases, modifications to the definitions will be required in order that the later requirements based upon these definitions will be reasonably workable in their implementation.

Title I includes a series of U.S. initiatives for providing assured and adequate nuclear fuel supplies to foreign nations in the context of the new emphasis on nonproliferation which has developed among the nuclear supplier nations. Both the Energy Committee and I generally support the notion of such initiatives to provide assurances of adequate nuclear fuel supplies in the future. The Energy Committee and I strongly oppose the premature "international undertakings" contained in section 104 of the reported bill. Our concerns are discussed in detail in the Energy Committee section of the joint report, which begins at page 34. These concerns are also reflected in the Energy Committee amendments which would make major changes in the provisions of section 104. Basically, the objections flow from a committee view that it is far too premature in the changing nonproliferation situation to make a commitment as section 104 would to an international nuclear fuel authority (INFA) and to an immediate commitment of U.S. fuels and enrichment capacity to any international undertaking. This section is particularly important since the President on October 19, 1977, pledged his support to the concept of an international nuclear fuel bank and, therefore, the section would provide an immediate congressional endorsement and authority to carry out such a concept. Thus far, the administration has not formulated the specific details on any such INFA or international fuel bank and Congress has not yet had the opportunity to view such plans. Also, quite importantly from a foreign policy point of view, the administration initiated an international nuclear fuel cycle evaluation last year which will run for the next 2 years. One important element of this evaluation will be the consideration of national, regional, and international arrangements for fuel supplies and assurances. It would seem to be particularly offensive to many of the participating nations in the evaluation for the United States to unilaterally and outside the context of the evaluation by this statute and resulting administrative actions to initiate a fuel bank concept at this time.

Additionally, as the members of the Energy Committee well know, the U.S. domestic activities associated with uranium fuels and enrichment services involve many significant issues at this time. For instance, Congress has just authorized additional enrichment capacity which ultimately will cost between $4 and $5 billion based on the best estimates available at this time. This additional enrichment capacity is required now to meet commitments which we already are aware of in future years. Any significant commitment to an international structure may require some additional capacity that will undoubtedly require large expenditures. This section also involves the highly controversial issue of international arrangements for nuclear wastes from foreign nuclear power reactors. That specific issue will be the subject of at least one major amendment during this debate as well as the amendments which have been reported by the Energy Committee. Finally, the section directs the President to seek agreements dealing with any of these international arrangements for fuel supplies or waste disposition that would require participating states to make agreements on their international safeguards which may be contrary to their own national policies. Again, it would appear premature for the United States to unilaterally by statute attempt to seek such commitments from foreign nations particularly while the international nuclear fuel cycle evaluation program is in its early stages. In fact, the requirements of the section would exceed those which have recently been agreed to in January by the United States and other nuclear suppliers through the nuclear suppliers conference. Consequently, it seems particularly ill-advised at this time for us to move in this unilateral direction.

Title III of S. 897, the export organization and criteria, is the heart of the nonproliferation-motivated regulation of international nuclear commerce. It is this title more than any other that requires significant perfection in our consideration of this bill, to avoid a de facto moratorium on nuclear exports with all of the potential for increased proliferation in the world which such a result would create.

Let me briefly deal with some of the specifics involved in these concerns with title III of the bill. Section 301 establishes an entirely new regulatory regime for government-to-government transfers of nuclear fuels. I am greatly concerned that this newly mandated regulation of the Department of Energy by the Nuclear Regulatory Commission established by this section and later sections sets a particularly onerous precedent of Government self-regulation. Several of the amendments to be offered will deal with this new approach and attempt to re-

duce what otherwise could be a source of great public embarrassment and confusion to the United States, by simply imposing more conventional interagency approval procedures for the required considerations.

Section 302 is an example of another serious problem which permeates throughout title III, and that is the failure of the bill to make various regulatory requirements mutually exclusive. Consequently, some individual activities under this bill would be the subject of multiple regulation and would require as many as three or four separate licensing or regulatory actions. This confusion results from an imprecision in definition and a failure to clearly denote in these sections the exact activities which are intended to be regulated by a given set of requirements and conversely those which would be excluded under such regulation. Several of the amendments to be offered will deal with this particular problem. There are other specific difficulties in terms of the export regulation imposed by section 302 which will be considered in discussions of other sections.

Section 303 establishes the new regulatory regime to cover so-called subsequent arrangements. These arrangements are the various governmental agreements which are made subsequent to an overall agreement for cooperation with a foreign nation in nuclear power activities. In effect, the term "subsequent arrangements" is a new term as defined by the bill, but it is noteworthy that none of these arrangements are not subjected to the type of regulation which this section would impose. Since these arrangements do involve agreements between U.S. Government agencies and other governments or foreign commercial entities, this new regulation is particularly important in terms of our posture and perception in the rest of the trading world. Unfortunately, section 301 raises a whole host of very controversial issues, which have been the subject of much debate in Congress and with the administration and some amendment already in the legislative process. It is my view that much further amendment will ultimately be required to insure that this section is a responsible imposition of this new regulation on these Government agreements. Briefly, this section creates new statutory determination requirements for the United States to enter into these agreements. These requirements include a convoluted and, I believe, highly vulnerable to frustration regulatory regime. For instance, the Arms Control and Disarmament Agency in the reported version of the bill could virtually control any such agreements through its statutory capability under the section to prepare so-called nuclear proliferation assessment statements. Also, the definitional imprecision with which this section was drawn places into serious confusion the exact nature of the subsequent arrangements to be regulated, and their relation to any other requirements which already exist under the Atomic Energy Act or other acts. For instance, because of this new regulatory requirement, it is probable that many of these agreements which previously have not been subjected to the procedures of the Administrative Procedures Act will now be vulnerable to requirements for such procedures.

One such subsection in particular has been the source of a great deal of confusion and, I believe, future difficulty in our international relations. This is subsection 303(b) which establishes new procedures for the U.S. approvals required in many of our bilateral and multilateral agreements for foreign nations to reprocess or transfer their nuclear wastes. The subsection establishes a new statutory standard for such approvals based primarily on the notion of so-called "timely warning" of any diversion activities within a foreign nation involving U.S. fuels. While this section represents the highest of moral values and motivations on the part of the sponsors, it is clear to me that the specific timely warning test will lead to a great deal of diplomatic difficulty for the United States in the future. For instance, the September 1977, agreement which the United States made with the Japanese Government dealing with the Japanese reprocessing facility at Tokai Mura most probably will be the source of a major confrontation when that agreement is renegotiated in 1979. Similarly, the President and the Shah of Iran reached agreement in late December regarding the United States granting of a "most-favored-nation" type clause regarding reprocessing associated with a pending agreement for cooperation. It is my belief that the most-favored-nation clause would not effectively withstand the new considerations that would be required under the statutory application of the timely warning standard contained in this subsection.

Also, this subsection again prejudges the results of the international nuclear fuel cycle evaluation and is likely to be most offensive to foreign nations who now have agreed to give us the prior approval rates on retransfers and reprocessing.

Certainly, the timely warning standard contained in this subsection will be most offensive to those nations which under other sections of the bill are required to renegotiate their existing agreements for cooperation in order to fulfill requirements necessary for export licensing as will be later discussed. I strongy believe that these are problems of very great moment at this juncture in the world energy picture and the increasing importance of nuclear power to the resource deficient nations of the world, which happen to include our free world allies in Europe, this hemisphere and the Far East. Again, in a most noteworthy commentary, Ambassador Strauss, the special trade representative, indicated yesterday that the Japanese, as part of the trade agreement negotiated last month, are contemplating the purchase of $2 billion worth of U.S. nuclear equipments. The inability of the United States to predictably export those equipments and the application of the timely warning standard in 1979 to the renegotiation of the Tokai Mura facility agreement could have an immediate and totally adverse affect on the Japanese willingness to continue in that trade agreement. It is obvious from Ambassador Strauss' testimony that he considered the continued export on a reasonable basis of U.S. nuclear equipment to Japan to be of the highest importance in our overall international economic posture at this time.

The remaining sections in title IV establish the specific procedures for export licensing of nuclear fuels, nuclear reactors, and components.

The detailed discussion of these sections and the legal analysis contained in the October 26 RECORD provides an expanded review of the difficulties created by the specific sections and subsections involved in export regulation. Let me briefly note some of the more recent events which have occurred since the preparation of that analysis which indicate even more compelling need for significant amendment of these export regulations. The legal analysis discusses in length the concern about the independence of the Nuclear Regulatory Commission in the regulatory scheme contained in sections 304 and 309. Recently, as of January 11, 1978, the NRC has been embroiled in an interexecutive agency dispute as to its responsibilities for independent assessment of safeguards in foreign nations. This is a very sensitive area for almost all of our trading partners because it involves an area of extreme national security interest to them. In effect, the NRC staff has now taken the position which will be documented in letters I will include with my statement in the RECORD, that the staff is no longer capable of concurring on nuclear exports, because it does not have any independent basis upon which to make judgments regarding safeguards. It is important to note that that is not to say that the U.S. Government is not in a position to make assessments of foreign safeguards and in fact does make them. Rather, the NRC which is charged by the Atomic Energy Act and the Energy Reorganization Act of 1974 with responsibility for export licensing is now very close to the position of having to require its own independent review under the statutory determination of "not inimical to the common defense and security" contained in the Atomic Energy Act as the criteria for nuclear exports. Section 304 and following sections would immediately codify this problem for the United States, by expressly requiring that the NRC make independent judgments based on evidence and other information available to it regarding the implementation of the safeguards in foreign nations for exported facilities and fuels.

So, it is obviously clear that if there is difficulty now under the current statutory formulation of noninimicality, that the NRC would be in a particularly difficult situation, probably leading to an immediate embargo on nuclear exports pending resolution of the difficulty. This

also would place the United States in a very unfortunate situation of requiring by statute that the NRC in effect police national safeguards, when in fact the United States to date has greatly encouraged the development of the International Atomic Energy Agency (IAEA) as the international organization to handle the implementation of safeguards. It is the expressed view of the Department of State that any such result would completely undermine the international safeguard system and certainly throw existing international commercial procedures into great turmoil until later solved. Once again, this is an example where the good intentions of the sponsors of this bill have been misdirected into an area whereby domestic regulatory approaches have been applied to what in essence is an international diplomatic issue. The United States, in fact, has taken a leading role in the international community in upgrading the safeguards through the IAEA. There is now pending within the executive branch a well conceived and well supported so-called action plan for the United States to initiate the next round of upgraded safeguard initiatives.

Let me read for you a letter from Commissioner Kennedy of the NRC on this subject:

DEAR SENATOR CHURCH: Since my testimony at your hearings in September, I have reexamined S. 897 in the light of the concerns you expressed at that time and am writing you to advise you of my further reflections.

There is growing concern within the Nuclear Regulatory Commission regarding the assessment of IAEA safeguards. Before it can issue an export license for nuclear fuel or a facility the Commission must find that issuance of the license would not be inimical to the common defense and security of the United States and this has been deemed to include assurances as to the implementation of adequate safeguards. Practically speaking, however, the Commission is not equipped to independently examine the adequacy of foreign safeguards, and must in practice accept the word of the Executive Branch as to their implementation and as to the foreign affairs implications of any export. The NRC's Office of Nuclear Material Safety and Safeguards has informed the Commission that it cannot reach independent conclusions on the effectiveness of international material control and accounting safeguards since it is unable to independently verify country-specific safeguards information.

Section 504 of H.R. 8638 as passed by the House of Representatives on September 28, 1977, merely says that IAEA safeguards "shall be applied," but does not say whether the Commission must independently determine whether those safeguards *as applied* are adequate. The Senate Committee report (95-467, October 3, 1977) accompanying S. 897, however, speaks of exports being "subject to *adequate* safeguards." (At page 15, emphasis supplied.) Where does this leave the Commission? The situation will be at the very least ambiguous and there likely will be calls for more directly obtained information as a basis of assessment. I fear that an impasse might develop. Should such an impasse arise I doubt that the Presidential override of NRC negative decisions provided for in S. 897 will be significant help. It would be difficult in all but cases of the most overwhelming importance to foreign policy for the President to rely on that authority.

If the NRC is to responsibly perform its function in nuclear export licensing, I believe that it should accept safeguards regimes negotiated with our nuclear trading partners including the IAEA regimes which we have agreed by treaty should be applied. Moreover, I believe that the assessment of the adequacy of safeguards implementation should be that provided by the Executive Branch. A clear statement to this effect by the Congress is in my view essential if the concerns I express are to be avoided.

I believe that we will maximize our influence in the nonproliferation area only if other nations perceive us as a reliable and predictable supplier of nuclear fuels and equipment. Unfortunately, many representatives of recipient countries with whom I have spoken find us all too predictable, but in the wrong sense. What seems to be predictable is that we will often approve licenses at the last possible moment only after expressions of urgency by foreign nations.

I would like to reiterate here what I said before the Senate Committee on Governmental Affairs last May:

"Energy independence is not the exclusive quest of the United States. Many nations, like our own, seek an uninterrupted source of supply to meet their energy needs. And many of them must rely to a much greater extent than we on fuel imports to meet those needs. Certainly our recent experience in dealing with foreign governments on nonproliferation matters confirms this hypothesis. The widespread international concern which has recently been expressed reflects a deeply-rooted sentiment reflecting the desire of those nations to eliminate or at least significantly decrease their dependence on foreign fuel sources. If these nations perceive the United States as potentially a capricious supplier, they can be expected to turn to other suppliers or, if they have the capacity, to develop their own resources. The consequence can only be a level of United States influence over the nonproliferation policy of these nations correspondingly diminished at the very least and possibly forfeited entirely."

It is not only our nonproliferation goals which can suffer. If export licensing continues in fits of stopping, starting, and stalling, the United States will alienate countries with which it has had its closest and most supportive relationships.

The bill contains provisions for interagency consultations, nonproliferation assessment statements, a Presidential override of NRC negative decisions, and Congressional review of the Presidential override. This multitiered review process for nuclear exports will provide numerous opportunities for mischievous delay in reaching export licensing decisions. Whether any of these provisions provides opportunity for delaying litigation is unclear. What is clear is that the opportunities for delay and thus interference with an orderly pursuit of the President's sound nonproliferation policy will be multiplied.

The nuclear export process is going to be faced with ever-increasing questions concerning the nature of our nonproliferation policy and the controls which we will be exerting on our exports. I believe that Congress must provide a clear legislative mandate and specific direction to this agency, unambiguously describing the requirements which it must satisfy independently and those for which it should rely upon the Executive Branch. Otherwise, there will be increasing delays and escalating interferences with an essential element of nonproliferation policy and United States commerce.

Amendments offered by Senator McClure help resolve some of the difficulties to which I have alluded. But serious problems will remain if the NRC continues to be called upon to make "independent" decisions on safeguards abroad and foreign affairs matters when it is not equipped to do either. Without a clear statement from the Congress, ambiguity of roles will persist, and the NRC thus will not be in a position to contribute effectively to achieving U.S. nonproliferation policy.

Sincerely,

RICHARD T. KENNEDY,
Commissioner.

This section also raised a host of issues which on their face are legal technicalities, but in fact have a tremendous impact on the predictability and time required for U.S. nuclear exports. For instance, the opportunity for intervenor intervention using the Administrative Procedure Acts and tying in any export licenses in litigation through judicial review after administrative action appears to be very great throughout these procedures. This is particularly true where these deficiencies would apply to the proceedings under the Nuclear Regulatory Commission. As we all know and the administration has publicly acknowledged, our domestic nuclear regulatory process is now in chaos as a result of similar actions through intervention and litigation. We will shortly be spending a great deal of time in this body considering new legislation proposed by the administration to try to remedy those difficulties on a domestic scene.

It, therefore, appears most ironic that we are now considering on this floor legislation which would create similar difficulties and problems in the decades ahead for our nuclear export industry. It should be clear to all thoughtful observers that a nuclear export regulatory process which is fraught with intervention, fraught with litigation and involves greatly excessive time delay, because of the labyrinths of procedures will only frustrate any potential trading partners. As Ambassador Strauss so strongly pointed out in yesterday's testimony before the Finance Committee, the United States does not need any more impediments to its international trade activities. This is particularly important in the context of a nuclear suppliers agreement. Although the administration and supporters of the bill have variously claimed that the London suppliers' guidelines closely approximate the provisions of this act, in fact, the guidelines for all of the other nations involved are essentially diplomatic measures and provide a great deal of latitude for negotiations between the other suppliers and their trading partners. Conversely, however, the United States under this legislation will be placed at a severe commercial disadvantage, because our guidelines have been implemented through an independent domestic regulatory process which leaves little room for any negotiating latitude, in the many areas which are of marginal value, if at all, in the context of our nonproliferation objectives. The proposed CEQ guidelines for the requirement of an international environmental impact statement for each nuclear export application obviously would further frustrate any possible future international nuclear commerce by the United States as well. As I noted earlier, one underlying and overriding principle is clear at this point, and that is that the United States must partici-

pate in international nuclear commerce if we are to be in any position to provide continued leadership in the pursuit of a less proliferation prone future for the world. I strongly contend that these procedures with the many problems which I have noted here and identified in detail in the October 26 legal analysis will frustrate to a large degree our future participation in international nuclear commerce and thereby will be totally counterproductive in our pursuit of our nonproliferation objectives.

Another very serious element of this overriding difficulty with future participation in international nuclear commerce is based on the almost no carrot and all stick approach which is used in an attempt to force our trading partners to adopt new export criteria, through either the export licensing process and criteria or through nearly forced renegotiation of their existing agreements for cooperation. The State Department, in its January 26, 1978, letter, strongly recommended that one element of this "stick" approach contained in the export criteria for the European Economic Community, Canada, Mexico, and several other countries be amended to provide much more negotiating room. There are several specific provisions of the title III procedures which effectively could lead to an immediate threat of a U.S. embargo on nuclear exports unless immediate action is taken by our trading partners to change the criteria for such exports. I have been reliably informed that many of the European countries, as well as Japan and others, are becoming increasingly offended by the fact that this legislation includes such unilateral and immediate requirements for renegotiation and reconsideration of past agreements. It is abundantly clear to me that this legislation, in the absence of significant amendment to reduce or eliminate such stresses with our trading partners, will undoubtedly lead to a near-term confrontation of immense significance to the international trade and economic relations among the free world trading partners.

I could continue to expound at length about the specific difficulties incorporated in this legislation that must be remedied to return the United States to a reliable exporter position, while, at the same time, furthering our nonproliferation objectives in international nuclear commerce. I think many of those details are best left to our consideration of individual provisions and amendments to be offered that deal with those very technical and specific problems. Perhaps one of the best ways to get an overview, general perception of the difficulties posed by this highly technical and yet extremely important piece of international related legislation is to quickly review some of the so-called flow diagrams which have been prepared by various reviewing organizations in the executive branch and in industry and among legal practitioners who must ultimately live with the result of this legislation. My own staff on the Energy Committee, early in our consideration of this legislation, prepared such a diagram and it was clear, based on review of it, that we were dealing with a highly complicated and convoluted export regulatory process. I have often concluded that that document alone in the hands of any potential foreign trading partner would be sufficient to eliminate any future U.S. participation in the nuclear export markets of the world.

I hope that we shall be able over the next few weeks, and the next few days, if that is what it takes, while considering this legislation, rationalize our nonproliferation objectives with a far more acceptable and predictable regulatory process in order to avoid that eventuality. At the same time, I must repeat my strong admonitions at the outset that this legislation can and must meet our nonproliferation objectives while providing such predictability in its regulatory processes.

Again, I am sure that myself and others who will be here on this floor in the days ahead to offer amendments in pursuit of that result have the same high commitment to nonproliferation that those who have proposed this legislation. And finally, I again commend them for the strong resolve and commitment with which they have spent the past many long months in steering this legislation through the various committee considerations and bringing it to the floor. While we may not agree on the specifics included in the legislation, I think that in the end, we all will take a great deal of pride and satisfaction that the Senate will have been able to perfect a truly responsible nonproliferation bill in this Congress.

I would be remiss if I did not thank my colleagues (Mr. GLENN and Mr. PERCY) for their tolerance and understanding of the junior Senator from Idaho as we worked endless hours back in November and December on some of these issues.

I particularly also thank their staff, who, oftentimes, had to educate the Senator from Idaho about the things that they had been considering for months and, indeed, for years.

It is my hope that, before this debate is done, we will have, jointly and in substantial agreement, forged the kind of legislation which we all desire and which will meet these objectives clearly and forthrightly.

I thank the Chair.

EXHIBIT 1

U.S. NUCLEAR REGULATORY COMMISSION,
Washington, D.C., January 26, 1978.

HON. FRANK CHURCH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CHURCH: Since my testimony at your hearings in September, I have reexamined S. 897 in the light of the concerns you expressed at that time and am writing you to advise you of my further reflections.

There is growing concern within the Nuclear Regulatory Commission regarding the assessment of IAEA safeguards. Before it can issue an export license for nuclear fuel or a facility the Commission must find that issuance of the license would not be inimical to the common defense and security of the United States and this has been deemed to include assurances as to the implementation of adequate safeguards. Practically speaking, however, the Commission is not equipped to independently examine the adequacy of foreign safeguards, and must in practice accept the word of the Executive Branch as to their implementation and as to the foreign affairs implications of any export. The NRC's Office of Nuclear Material Safety and Safeguards has informed the Commission that it cannot reach independent conclusions on the effectiveness of international material control and accounting safeguards since it is unable to independently verify country-specific safeguards information.

Section 504 of H.R. 8638 as passed by the House of Representatives on September 28, 1977, merely says that IAEA safeguards "shall be applied," but does not say whether the Commission must independently determine whether those safeguards *as applied* are adequate. The Senate Committee report (95-467, October 3, 1977) accompanying S. 897, however, speaks of exports being "subject to *adequate* safeguards." (At page 15, emphasis supplied.) Where does this leave the Commission? The situation will be at the very least ambiguous and there likely will be calls for more directly obtained information as a basis for assessment. I fear that an impasse might develop. Should such as impasse arise I doubt that the Presidential override of NRC negative decisions provided for in S. 897 will be significant help. It would be difficult in all but cases of the most overwhelming importance to foreign policy for the President to rely on that authority.

If the NRC is to responsibly perform its function in nuclear export licensing, I believe that it should accept safeguards regimes negotiated with our nuclear trading partners including the IAEA regimes which we have agreed by treaty should be applied. Moreover, I believe that the assessment of the adequacy of safeguards implementation should be that provided by the Executive Branch. A clear statement to this effect by the Congress is in my view essential if the concerns I express are to be avoided.

I believe that we will maximize our influence in the nonproliferation area only if other nations perceive us as a reliable and predictable supplier of nuclear fuels and equipment. Unfortunately, many representatives of recipient countries with whom I have spoken find us all too predictable, but in the wrong sense. What seems to be predictable is that we will often approve licenses at the last possible moment only after expressions of urgency by foreign nations.

I would like to reiterate here what I said before the Senate Committee on Governmental Affairs last May:

"Energy independence is not the exclusive quest of the United States. Many nations, like our own, seek an uninterrupted source of supply to meet their energy needs. And many of them must reply to a much greater extent than we on fuel imports to meet those needs. Certainly our recent experience in dealing with foreign governments on nonproliferation matters confirms this hypothesis. The widespread international concern which has recently been expressed reflects a deeply-rooted sentiment reflecting the desire of those nations to eliminate or at least significantly decrease their dependence on foreign fuel sources. If these nations perceive the United States as potentially a capricious supplier, they can be expected to turn to other suppliers or, if they have the capacity, to develop their own resources. The consequence can only be a level of United States influence over the nonproliferation policy of these nations correspondingly diminished at the very least and possibly forfeited entirely."

It is not only our nonproliferation goals which can suffer. If export licensing continues in fits of stopping, starting, and stalling, the United States will alienate countries with which it has had its closest and most supportive relationships.

The bill contains provisions for interagency

consultations, nonproliferation assessment statements, a Presidential override of NRC negative decisions, and Congressional review of the Presidential override. This multitiered review process for nuclear exports will provide numerous opportunities for mischievous delay in reaching export licensing decisions. Whether any of these provisions provides opportunity for delaying litigation is unclear. What is clear is that the opportunities for delay and thus interference with an orderly pursuit of the President's sound nonproliferation policy will be multiplied.

The nuclear export process is going to be faced with ever increasing questions concerning the nature of our nonproliferation policy and the controls which we will be exerting on our exports. I believe that Congress must provide a clear legislative mandate and specific direction to this agency, unambiguously describing the requirements which it must satisfy independently and those for which it should rely upon the Executive Branch. Otherwise, there will be increasing delays and escalating interference with an essential element of nonproliferation policy and United States commerce.

Amendments offered by Senator McClure help resolve some of the difficulties to which I have alluded. But serious problems will remain if the NRC continues to be called upon to make "independent" decisions on safeguards abroad and foreign affairs matters when it is not equipped to do either. Without a clear statement from the Congress, ambiguity of roles will persist, and the NRC thus will not be in a position to contribute effectively to achieving U.S. nonproliferation policy.

Sincerely,

RICHARD T. KENNEDY,
Commissioner.

Mr. GLENN. Mr. President, the Senator from Idaho has made a very eloquent statement regarding the legislation as he sees it. We obviously did not agree completely on all of these things, even though we have worked out quite a number of the areas where we do not agree.

Before I make further comment, I ask unanimous consent that Haven Whiteside of the staff of the Committee on Environment and Public Works may have the privilege of the floor during consideration and votes on S. 897.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, the distinguished Senator from Idaho referred to the letter from Commissioner Kennedy to Senator CHURCH. Although I shall not reply by reading a whole letter I do indicate that there is a reply to the statements made by Commissioner Kennedy in that letter, that reply having been sent to me by Commissioner Gilinsky. He very carefully refutes the remarks made by Commissioner Kennedy.

I ask unanimous consent that the letter from Commissioner Gilinsky, as well as an article on the same subject that he published in the Washington Post, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.
January 30, 1978.

Hon. JOHN GLENN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GLENN: In your letter of January 27th, you asked for my comments on the issues raised in Commissioner Kennedy's January 26th letter to Senator Church in which Mr. Kennedy provided his "reflections" on S. 897, the nuclear export bill now before the Senate. These reflections led him to the conclusion that Congress should instruct the Nuclear Regulatory Commission, in determining whether nuclear export licenses should be issued, to accept without question Executive Branch assessments of the adequacy of international safeguards.

The difficulty with this conclusion—leaving aside for the moment the loss of an independent NRC check in the export review process—is that his rationale for not examining country-specific safeguards applies also to every agency of the United States government, not just to the NRC. As Mr. Kennedy sees it, we should not look behind "safeguards regimes which we have agreed by treaty should be applied." In other words, once we transferred U.S. safeguards arrangements to the International Atomic Energy Agency, we relinquished any right to question whether or not they satisfied U.S. safeguards requirements for nuclear exports.

Practically speaking, blind acceptance of international safeguards of unknown effectiveness discounts safeguards altogether, leaving United States exports protected by little more than a simple reliance on promises by recipients that American exports will not be used for nuclear explosives. Even allowing for whatever can be gathered through our own intelligence activities, such a situation would represent a substantial deterioration of the protection Congress thought it was obtaining when it originally insisted on international inspection for U.S. exports.

It is my view that these safeguards are too important, and the IAEA system at too early a stage of development, to be placed beyond the scrutiny of participating governments. In some cases the need for country-specific information in the consideration of export licenses arises because the implementation of international safeguards is not uniform. The IAEA's own recent assessment, the Special Safeguards Implementation Report, reveals deficiencies in the application of international safeguards in recalcitrant countries, where, for example, national systems for keeping track of nuclear materials cannot be audited because records, if they exist at all, are not kept systematically. But the IAEA report does not identify the countries in which these problems occur. Common sense dictates that such information is importantly relevant to a recommendation that an export license be issued. The NRC should not have to trust to luck that the recipient is not in the questionable category. Yet the State Department has told NRC that it cannot provide a list of safeguards-deficient countries, even on a classified basis, because the confidentiality of the IAEA system precludes the Department (and presumably any agency of the U.S. government) from receiving it in the first place.

This is the source of the dilemma of the NRC safeguards office, to which Commissioner Kennedy alludes. That office is, in fact, "equipped" to examine assessments of international safeguards—it is well staffed and expert in accordance with Congress' specific mandate. The difficulty is that no agency in the government is in a position to provide safeguards assessments in connection with export licenses. What information is available in the Executive Branch is gathered on an informal, *ad hoc*, and intuitive basis, and is blended into an overall judgment in which "foreign policy" considerations may be balanced off against any suspicion that safeguards are inadequate. NRC has been informed by the Executive Branch that its recommendation for issuance of a license should not be taken as an approval of how safeguards are operating in any particular country. We are now seeking a resolution of the dilemma in discussions with the State Department.

However, the U.S. government ultimately decides to handle the problem, it advances nothing to follow Mr. Kennedy's advice to eliminate any NRC safeguards review and relegate the Commission to rubber stamping license recommendations.

On the positive side, it is a healthy sign that the IAEA inspectorate has produced a straightforward and critical account of its activities and will continue to do so on an annual basis. It is clear that the international inspectorate is dedicated to its mission, is aware of the flaws in the system, and is looking to its principal members for assistance in gaining universal acceptance of stricter safeguards. There is much lip service paid to "strengthening the IAEA." But the Agency's self-styled protectors would do it a disservice to close off discussion of the effectiveness of its safeguards system. The only beneficiaries of such an approach will those countries interested in limiting IAEA's efforts to develop a more effective system.

As for the Nuclear Regulatory Commission, I believe (as I stated at somewhat greater length in the enclosed Washington Post column) that its greatest contribution to the nuclear export process lies in providing the vital element of consistency which derives, more than anything, from an objective and independent evaluation of the recommendations presented to it by the Executive Branch. Whatever other considerations enter into a decision to allow nuclear exports, the one fixed point must be their protection against diversion to military uses.

Sincerely,

VICTOR GILINSKY,
Commissioner.

THE NRC'S VALID ROLE IN NUCLEAR EXPORTS
(By Victor Gilinsky)

In his Jan. 13 column, Stephen Rosenfeld raised the question of whether the five-man, independent Nuclear Regulatory Commission ought to be licensing exports of nuclear materials and equipment. The question came up in an interview with NRC's chairman, Joseph M. Hendrie, who apparently offered as his personal opinion that NRC, as a domestic technical agency, had no business in diplomacy or intelligence, as it lacked expertise in those areas. Rosenfeld tended to agree, on the grounds of Hendrie's "seemingly indifferent attitude toward the proliferation threat."

In fact, the NRC was never intended to supply diplomatic or intelligence expertise. But it has, I believe, an export role. Let me explain.

The question of NRC's export-licensing responsibilities has come up frequently since Congress, in the legislation creating NRC (the Energy Reorganization Act of 1974), transferred to it the export-regulatory functions of the old Atomic Energy Commission. The law requires that the NRC, in approving nuclear exports, independently determine that they are "not inimical to the common defense and security" of the United States.

It is my view, which I believe is shared by other commissioers, that this assignment of responsibilities makes sense. While it is true that the executive branch can, and should, influence whether a nuclear export goes forward, it must provide NRC, as well as the public and Congress, with convincing justification. This extra element of protection is, of course, an inconvenience to the laissez-faire exporters, to say nothing of those officials who regard U.S. nuclear fuels and equipment as the modern-day equivalent of glass beads and Indian blankets—prime items of international political barter.

The establishment of NRC coincided with a rethinking of our international nuclear policies in the wake of India's nuclear explosion. Until that time nuclear exports were

handled out of public view on a more or less *pro forma* basis by low-level AEC staff, guided by a policy of U.S. encouragement of worldwide commercial nuclear power. There was no systematic examination of the assurances contained in the legal instruments of our nuclear trade nor of the effectiveness of applicable safeguards.

The NRC's increasingly active role in the necessary work of tightening the rules of U.S. nuclear commerce triggered opposition from expected quarters. Opponents of a tough nonproliferation program called for NRC's removal from export regulation on the grounds that this function was an extension of the President's conduct of foreign affairs, that its exercise by an independent commission tagged the United States as an "unreliable" supplier, that the commission in any case lacked the necessary foreign-relations expertise, and so on. But at bottom the real complaint was that things were not as free and easy as before.

And indeed they are not. One of the primary benefits of NRC's role lies in the development of a formal interagency review process for providing coordinated advice to the NRC on individual exports. This has given agencies such as the Department of Defense and the Arms Control and Disarmament Agency a voice in these matters they otherwise would not have. This, added to the knowledge that executive-branch advice will get careful scrutiny at NRC, has led to a much improved review.

In its own review, NRC does not concentrate on the foreign-relations aspects of proposed nuclear sales but rather on assurances that exports will not be used for nuclear explosives and on associated safeguards. This, it seems to me, is our proper statutory province, and one in which we are expert. While NRC has never rejected outright an export recommended by the executive branch (although it did once unanimously reject a State Department petition to speed a fuel shipment to India), it has on a number of occasions urged tighter conditions on exports and the closing of hitherto unnoticed loopholes in the agreements covering our nuclear trade. In several important cases these views have prevailed with the Department of State and with our trading partners and have resulted in significantly higher levels of antiproliferation protection. It is not necessary to reliability of supply that the United States be a "nuclear patsy."

The proposed nuclear-export legislation now pending before the Senate (having passed in the House by a vote of 411 to 0) would confirm and extend the commission's role in nuclear-export regulation. The bill, incidentally, allows for a presidential override of an NRC license denial; this balances the proposed limitation on the President's current authority to bypass NRC with government-to-government exports through the Department of Energy. Significantly, one of the amendments to be offered in the Senate by those opposed to the bill's passage calls for NRC's removal from nuclear-export licensing.

In giving export licensing authority to an independent regulatory commission in 1974, Congress was saying in effect that it wanted this country's nuclear trade to be handled consistently and to be subject to explicit protective standards rather than to the political exigencies of the moment. This still makes good sense.

(Mr. ZORINSKY assumed the chair.)

Mr. GLENN. Mr. President, I ask unanimous consent to have printed in the RECORD a copy of the testimony given before the Energy Committee on September 14, 1977, by two other witnesses that day, Mr. Gilinsky and Mr. Bradford, whose testimony was not included in that which the Senator from Idaho introduced as a part of his minority statement. We should like to have those in the RECORD so that there is a balanced presentation.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
September 13, 1977.

Hon. FRANK CHURCH,
Chairman, Subcommittee on Energy Research and Development Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: While I have no specific points of disagreement with Chairman Hendrie's statement on behalf of the Commission on S. 897, I have been a Nuclear Regulatory Commissioner only for a month, and I still have much to learn about the export licensing process. Therefore, I want to note for your record that I may well develop other thoughts on this general subject in the future, and I would not want to be limited to the Commission comments presented today.

Because the "timely warning" section—Section 303(b)(2)—of the bill has been a point of contention within the Commission, I have paid special attention to it in the last two weeks. While I respect the need for flexibility in negotiations, I do not understand how this term can be criticized simultaneously for vagueness and for inflexibility. As a general principle, I feel that safeguard concepts for which no adequate substitute exists should be written into the law, at least until an adequate substitute becomes available. I am not satisfied that an adequate substitute for the relatively mild timely warning requirement in this legislation exists. Until the same end can be reached by other means, I think that the law should include Section 303(b)(2) as written.

Sincerely,

PETER A. BRADFORD,
Commissioner.

STATEMENT OF VICTOR GILINSKY

I should like to thank the Committee for giving me this opportunity to add a comment of my own to the Commission's statement on S. 897. I ask the Committee's indulgence—particularly any who have had to listen to me on this subject more than once over the past two years—in talking once again about safeguards on U.S. nuclear exports. Today I feel obliged to address two provisions of the bill before you: the "timely warning" standard to be applied to safeguards over plutonium in Section 303(b)(2), and the exemption of Euratom from certain retransfer controls.

TIMELY WARNING

The "timely warning" standard is under strong attack as being unnecessary, unworkable, overly rigid and unrealistic. Yet this same idea lies at the heart of the safeguards system on which we have relied for protection since American materials, equipment and technology first went abroad under the Atoms for Peace program. Safeguards are supposed to deter countries from breaking promises not to use nuclear material and facilities for explosive purposes. They are an alarm that warns of illicit activity. To be effective the warning has to come in time for us to do something about it. The idea of deterrence through timely warning is the explicitly stated objective of the so-called "blue book" safeguards of the IAEA which police the Nonproliferation Treaty.

Under this system, as under the U.S. bilateral safeguards which preceded it, records are kept of all nuclear materials going into and coming out of civilian power reactors throughout most of the world, and verified by an international inspectorate. The idea is simply that the disappearance of any of this material will be reported to the international community in plenty of time to allow for appropriate counteraction. Thus timely warning is essential to effective safeguarding.

Problems arise as we move to the use of plutonium or other nuclear explosive materials. The inspection safeguards on which we have relied for so long to back up assurances of peaceful intent are in this area falling hopelessly behind the technology to which they are being applied. This is because once the relatively difficult process of plutonium separation is complete, the bomb-ready material is vulnerable to swift appropriation for use in a previously prepared weapon. The warning time we can count on collapses practically to zero.

It is as if security checks were performed on a commercial airliner after it is airborne, rather than in the airport lobby before takeoff; discovery of an armed hijacker in the air would obviously come too late. Yet in the application of the present international inspection system to plutonium stockpiles, we are relying on an analogue of this situation.

The bill before the Committee attempts to correct this safeguards deficiency. Section 303(b)(2) would allow U.S. approval of certain foreign activities involving nuclear explosive material derived from our exports—primarily plutonium—only if we can count on getting warning of attempts to misappropriate it well enough in advance to do something about it. It is entirely reasonable to apply this classic alarm standard to plutonium. Should the Congress decide not to do so, or to apply it in some cases and not in others, it should be clear that in so doing it is dropping the requirement for effective safeguards, relying instead solely on promises that U.S. materials will not find their way into nuclear weapons. Retention of international inspectors in this case can provide little more than cosmetic comfort; there is no deterrent function they can perform should promises be abandoned in the face of real or concocted security threats.

The House Committee on International Relations noted in its report on the bill that warning times for safeguards over plutonium should not be allowed to deteriorate below those now in effect for light water reactors. I find myself in agreement on this point: timely warning is central to safeguards, and we would retreat from our existing warning margins at our peril.

Unfortunately, in the past, ambiguities and inconsistencies have crept into the application of safeguards to nuclear explosive material. If our exports are to be protected from misuse we are going to have to state the rules clearly and apply them consistently. Needless to say this may not go down well with some of our close friends and allies, with whose cooperation we are launching the International Fuel Cycle Evaluation, and this is for us the most painful aspect of the situation. I do not, however, share the view that this legislation would prejudge the results of that evaluation; I think it will have the opposite effect. A hold on further commitment to current reprocessing technologies which cannot meet the timely warning standard will act as a powerful incentive to come up with some workable combination of technologies and safeguards that will meet it. In any case, we surely do not have to wait to reaffirm our insistence on effective safeguards over U.S. exports.

The bill permits a number of exceptions to accommodate our close allies. Currently operating commercial reprocessing facilities are to be exempted from the timely warning standard—this would include plants in Britain and France and possibly one or two

others. And U.S. approval for reprocessing can be obtained where there is an agreement to apply timely warning safeguards "within a reasonable period of time." And, of course, Euratom is exempted altogether from immediate application of U.S. reprocessing controls.

I must say I am troubled by these exemptions because they sacrifice uniformity and consistency in our nonproliferation policies. They suggest that when the choice appears to lie between allowing our friends to reprocess and effective safeguards, we choose reprocessing. We are then left with the problem of what to do about those countries outside the circle of our special friends who are also thinking about getting into the reprocessing business.

EURATOM RETAINER EXEMPTION

I would like also to draw the Committee's attention to a specific problem that is a consequence of the bill's exemption of Euratom from U.S. retransfer controls. Under current agreements with a number of countries, and also Euratom, plutonium produced in U.S.-supplied fuel can be exported, essentially free of U.S. control. It need only go to countries with "appropriate" Agreements for Cooperation with the United States, and these include a good many on our proliferation worry list. This means that plutonium produced and separated in any of these countries, including the Common Market countries, can end up almost anywhere in the world without our having any real say in the matter. While the bill apparently corrects the retransfer situation with regard to those agreements where firm controls are now lacking, it specifically exempts Euratom. Presumably the exemption is intended to allow only for transfers within the Common Market; if so, the bill should make this clear. The way it now appears, Euratom could be a conduit through which plutonium produced in U.S.-supplied fuel could flow unhampered to much of the rest of the world.

Mr. GLENN. I might add, Mr. President, that the remarks made at the hearings that day by Mr. Gilinsky and Mr. Bradford very strongly supported the idea of timely warning, which I went into at some length in my opening remarks here today, I believe a review of their remarks will indicate that they felt that that was the very foundation upon which we base all of our trust in IAEA, the international organization working in this regard, that they were very concerned about this time compression that has occurred.

While at one time we had a lengthy period in which to take political or diplomatic actions in the event we learned of a diversion from the light water reactor, now, in the context of separated plutonium and reprocessing, the time between diversion of material and nuclear weapons has become so compressed that it could be a matter of very few days or hours of warning would be all we would have. Therefore, timely warning has become critical, not just in consideration of this bill and not just in our own considerations here, but in all of our whole arrangement with IAEA. Whether we can rely upon IAEA safeguards to give us adequate time to take appropriate action in the event that we see diversion occurring that should not be occurring around a nuclear plant, any diversion of any kind.

The third area I wish to comment on in reply to the Senator from Idaho was with regard to his comments about the amendments of last fall that we had agreed to at that time. It has been my understanding that those have since been replaced by our new package of agreements that have been worked out recently. I think that also is the case because the administration has suggested several changes since last fall that are incorporated in that. I think most of the concerns that we did work out last fall are incorporated in this package of 19 that we have agreed to fully and are prepared to accept.

Mr. McCLURE. If the Senator will yield, yes, I think that is correct.

I think we reached agreement on 19 out of the 30. I think there were some minor language modifications in some others, and I think we are either in agreement or will very likely reach agreement on those small changes.

I thank the Senator for his clarification.

Mr. GLENN. Mr. President, I will not try to reply to all of the statements by the Senator from Idaho. I think it is important, since he referred several times to the international nuclear fuel cycle evaluation and suggested we wait for that group to make their final report, that it should be noted that some 18 countries supposedly either have shown an interest in or are in the process of having the nuclear technology developed to a state where we feel they could have reprocessing capability.

Since that is on the verge of burgeoning into such a much larger proliferation problem than we have now, it seems to me that to wait another 2 years—the mid-1980's is the earliest we expect that report—while they move ahead with reprocessing, which is the key to nuclear weapons, would mean that we probably would have lost the ball game by that time.

So I submit we move ahead with this legislation.

We were aware of the report, of course, since all this was being put together, or the proposals. I think if we lose this opportunity to get some control and encourage the nations to go along with us, the odds are that we will have lost the ball game in making any effort to control nuclear proliferation problems.

Another point is the fact I mentioned a moment ago. We have worked very long and hard and diligently with all of the staffs and with the individual Senators involved in all of this, too, and have accepted a package of 19 separate amendments suggested by the Senator from Idaho that address quite a number of the issues he raised.

I think this is better legislation, because of the efforts of the Senator from Idaho, and we have agreed to those amendments.

I hope in the interest of moving this bill along and making the best use of our time, as soon as we can, we are up against some time constraints with the Panama Canal Treaty coming on the floor next week, and I hope we will be able, since we do have considerable agreement on those, to move them en bloc and consider them, all 19, as a package.

UP AMENDMENT NO. 1171

(Purpose: To authorize appropriations under title V for the development of non-nuclear resources for fiscal year 1979 instead of fiscal year 1978)

Mr. GLENN. Mr. President, if there are no further remarks by any other Senators on the floor as opening statements, I send to the desk an amendment to S. 897 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 1171:

On page 158, line 14, strike out "1978" and insert in lieu thereof "1979".

Mr. GLENN. S. 897, as reported by the Committee on Foreign Relations and Governmental Affairs last October 3, includes a $10 million authorization for fiscal year 1978 to the Department of Energy to support cooperation with other nations in establishing programs to assist in the development of nonnuclear energy resources. Since this bill was developed in its present form toward the end of the last session, a waiver would have been necessary for the bill to include fiscal year 1978 funds.

However, in view of the fact that no appropriations would be available until later this year, I am offering this amendment on behalf of the Committee on Foreign Relations to change the effective date of the authorization to fiscal year 1979, negating the need for a waiver.

The specific provisions covered by this funding may be under further consideration. This amendment in no way will affect any judgment the Senate may make as to those provisions.

In other words, this is introduced completely without prejudice as far as any further amendments or change is concerned. I understand the Senator from Idaho is willing to accept that amendment.

Mr. PERCY. Mr. President, as far as the Senator from Illinois knows, there is no objection on this side.

Mr. McCLURE. Mr. President, I might say that, certainly, we have no objection to that amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WALLOP. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WALLOP. Mr. President, there has been some concern expressed in public and private conversations concerning the application of NEPA, National Environmental Protection Act, to this bill, and I wish to discuss to a certain degree my own concerns on that very issue.

It would seem almost unnecessary to bring up any international consideration of NEPA dealing with U.S. exports constructed in the environment and in the atmosphere of other nations, and yet recent days have disclosed a significant struggle going on within this administration between CEQ and those involved in foreign trade and other things as to whether or not NEPA should apply.

My own opinion is that it should not, but my fear is that it may, and there is reason to have such fear because of a certain amount of case law that has already taken place.

There are two leading cases involving the extraterritorial application of NEPA. One is the Sierra Club against Coleman, and the other is Environmental Defense Fund against the U.S. Agency for International Development. It should be pointed out that in both cases the court simply asumed that NEPA applied, and there was no further discussion on that point.

The first case, Sierra Club against Coleman, which is currently pending on appeal, considered the Federal Highway Administration's construction of the Darien Gap highway through Panama and Colombia. Further action on the highway was enjoined until the substantive and procedural requirements of NEPA were complied with. The court held that the FHA failed to comply with NEPA by not circulating either a draft or final environmental assessment to EPA for comments, by failing to adequately discuss the problem of transmission of aftosa—or more commonly known in this country as foot-and-mouth disease—and by failing to adequately discuss possible alternatives to the route chosen for the highway. The defendants made no claim that an EIS was not required, but rather contended that the document they had prepared was the functional equivalent of an EIS as defined by NEPA. The court stated that the duties in section 102 of NEPA are not inherently flexible. They must be complied with to the fullest extent, unless there is a clear conflict of statutory authority.

Mr. President, it is possible to distinguish this case from the situation of deep bed mining, in reference to the potential for a significant environmental impact on the continental United States. There are those who contend that there is no obligation to comply with NEPA unless there exists such a potential for impact. At this point, there is no evidence that deep seabed mining will have an adverse environmental impact on the continental United States.

(Mr. DeCONCINI assumed the chair.)

Mr. WALLOP. Mr. President, however, there is a possibility, in the Sierra Club case, that aftosa could be transmitted to the United States and could result in the destruction of up to 25 percent of North American livestock, an economic loss of $10 billion, as well as the extinction of such endangered species as the American bison, unless the most stringent of control programs are set up. Thus, the probability of a significant adverse environmental impact on the Continental United States is a distinguishing factor.

The second case was the Environmental Defense Fund, Inc. against U.S. Agency for International Development.

In this consent decree, Judge Sirica approved a stipulation by which the parties agreed that AID would file a programmatic NEPA impact statement on its international pesticide activities and pest management program, within 10 months. AID also agreed to promulgate within 3 months environmental regulations which would subject to NEPA all aspects of its activities. Since AID consented to file an EIS in accordance with NEPA, the court was not forced to litigate the issue of whether NEPA applies outside the continental borders of the United States.

Both these cases, I would remind the Senate, bear heavily on the decision we are making here, particularly in view of the infighting that has taken place within the administration at this moment.

Let me talk a little about the policy of the State Department and the Council on Environmental Quality.

It is the policy of the State Department that an environmental impact statement should be required where a Federal action affects the "global commons," but not in an area where another country has exclusive jurisdiction. Areas in which NEPA studies have typically been required include the high seas and where projects have involved stratospheric pollution. In some instances, environmental impact statements will be done on projects in Antarctica. These studies were completed on the Law of the Sea Treaty and Panama Canal Treaty. An EIS was not completed at the site of a satellite tracking station in Australia, and many questions and complaints subsequently have been raised as to why this was not done. The Department's policy is that an EIS will not be done on weather tracking stations in another country or in other circumstances where another country have sovereign authority.

The Council on Environmental Quality is the other side of this tug-of-war. The policy of CEQ is clearly more stringent than that of the State Department. Since NEPA requires an EIS wherever a major Federal action is involved, it is their policy that the study should be done not only when such action has an impact on the global commons, but even when the project is within an exclusively foreign jurisdiction. CEQ disagrees with both the Departments of State and of Transportation in that the study should not be confined to areas in which there is a potential for an environmental impact on the United States.

There are several arguments in opposition to the extraterritorial application of NEPA. It is a well established canon of statutory construction that in the absence of clear statutory authority or legislative history, congressional enactments should not be presumed to have extraterritorial application. Thus, Congress should be presumed to have intended NEPA to be limited to the continental United States, since neither statutory language nor legislative history clearly requires extraterritorial application of section 102 procedures.

I would say, Mr. President, this is the area in which we have become mired down in recent legal history because the plain fact is the courts have interpreted this differently and, in plain fact, it does threaten the export capability of the United States in the nuclear field.

A second argument against it is that an environmental assessment effort is currently being carried out by NOAA in its deep ocean mining environmental study (the DOMES project). This project was initiated during fiscal year 1975, however its implementation has proved to be a slow, expensive process.

This again has great significance on America's ability to compete overseas in foreign trade, and why I think we may want to consider the possibility of prescribing the application of NEPA to nuclear nonproliferation. The application of NEPA in a strict sense would involve unnecessary and duplicative environmental assessment efforts. Therefore, a separate system of environmental measures which are designed to protect the quality of the environment specifically in the area of the deep seabed must be established.

Third, base line environmental studies have proven to be prohibitively time-consuming in their implementation. It would not be in the public interest to delay deep seabed mining in order to implement such stringent environmental requirements which can be proven unnecessary.

Fourth, the protection of the deep seabed against adverse environmental procedures is a worldwide problem. International cooperation and international designed assessment efforts are required. It should be up to the United States to contribute its share, but not to bear the burden of the world as far as environmental protection of the deep seabed is concerned.

Fifth, if the United States imposes more stringent environmental standard than the rest of the international community, its own citizens will be placed at a severe and unfair disadvantage as far as deep seabed mining development is concerned, and surely as far as our ability to export nuclear technology and nuclear machinery, peaceful nuclear machinery, to the rest of the world.

Last, the strict extraterritorial application of NEPA would militate against the strength of negotiations in Committee 3 of the Law of the Sea Conference. These measures would unreasonably "tie the hands" of our negotiators at the con-

ference and would place an obvious additional burden upon them.

Mr. President, the situation has gotten to the point now where there have been recently two very significant expressions of concern in the public media about the application of U.S. environmental requirements within the jurisdiction of other nations of the world. The first is a rather good editorial from the Washington Post which I would like to share with the Senate at this time. It is called "Other Countries' Environments." It says:

A fierce quarrel has broken out within the Carter administration, as you may have noticed, over environmental regulation of certain U.S. exports. Suppose the Export-Import Bank, a federal agency, finances the sale of nuclear equipment to another country. Should the Ex-Im Bank have to write an environmental impact statement—one that would be subject to attack in U.S. courts? A lot of countries would regard that as infringement of their sovereignty.

But suppose, again, that American foreign aid buys pesticides for an agricultural development project in an undeveloped country. Does the United States have an obligation to tell the recipient what it knows about the environmental effects of those pesticides? Most Americans would say that it does and, in fact, the Agency for International Development already requires environmental statements for its projects.

The President's Council on Environmental Quality is leading the campaign to apply American environmental law to some exports—those that the federal government subsidizes or licenses. The opposition comes mainly from the State Department and the Ex-Im Bank. One thing that they fear is repeated collisions with other governments over regulatory authority. When the United States started to run preliminary environmental studies on the proposed gas line from Alaska down through the Yukon to the Midwest, Canada tartly told the American experts to stay on their own side of the border. Canada thinks, with some reason, that its own standards are at least as high as this country's.

Another fear is litigation tying up decisions on exports, and embroiling foreign buyers in the American courts. The Council on Environmental Quality reflects a tradition of public-interest lawyering that considers the threat of litigation essential to strict enforcement of standards. But law suits are a poor way to make foreign policy.

The rules on environmental protection abroad will have to vary with circumstances. There's not much dispute that American operations in the deep oceans and Antarctica—what lawyers call the global commons—need to be held to the same standards as in the United States. No other country's jurisdiction is involved. Foreign aid does involve other jurisdictions, but the United States bears a broad responsibility for the consequences of its advice to undeveloped countries.

It's the commercial sales—and above all, the sales of nuclear reactors and fuel—that raise the hard issues. Some buyers will welcome an American environmental impact statement, since it requires the seller to disclose what he knows about the effects of the product or the project. But what if the buyer's government considers the American requirements to be an intrusion? One solution is to require an environmental statement only if the foreign government agrees. Otherwise the collision of sovereignties becomes unmanageable.

As for nuclear exports, safety standards are far too important to be left to the ambiguous and unsettled provisions of American environmental law.

Mr. President, I would like to read that again for emphasis:

As for nuclear exports, safety standards are far too important to be left to the unambiguous and unsettled provisions of American environmental law. When American reactors go to countries with no great depth of technical experience, they need to be accompanied by the most explicit safeguards. That is the Nuclear Regulatory Commission's job. The present attempt to take the environmental law abroad is grounded in the environmental organizations' suspicions that the NRC tends to tilt in favor of the nuclear industry. The remedy to those suspicions does not lie in the slow and uncertain processes of the federal courts. It lies in the White House. That's what the country has a President for.

Mr. President, 2 weeks earlier the columnists Evans and Novak also reacted to the struggle that is going on within the administration, expressing the concerns which I am expressing here today about the possible implications of NEPA. Their column is entitled "Countering an Agency's Environmental Overreach," and reads as follows:

An angry counterattack against federal environmentalists is now being quietly planned by Cabinet-level departments, led by the State Department, with indications of support in the White House itself.

The counterattack seems certain to modify drastically and could kill altogether new regulations proposed by the Council on Environmental Quality (CEQ) that would make Uncle Sam the environmental policeman of the world—particularly policing nuclear reactors. "Outrageous," one State Department official told us. "These regulations would impose American environmental standards on all our foreign friends and they would end up hating us."

This places President Carter in a peculiar dilemma. While crusading against nuclear proliferation and environmental pollution, he is bound as President by the practicalities of international life. As such, he seems forced to disappoint his environmental constituency.

The proposed regulations were drawn secretly by CEQ planners with apparent help from the Natural Resources Defense Council (NRDC), an environmentalist private action group. They would, in effect, require standard environmental-impact statements (to be called "assessments" in the foreign field) for all exported material or technology sold abroad with some help—export licenses or loan guarantees—from the U.S. government.

The real target may be nuclear reactors, a prospect that has infuriated the Nuclear Regulatory Commission (NRC). At a closed-door meeting called by CEQ Jan. 6, NRC Assistant General Counsel Carlton Stoiber said there is "no legal justification" for imposing U.S. environmental standards abroad. That brought objections from CEQ Chairman Charles Warren and member Gus Speth, who showed reluctance even to discuss legal justification. But Stoiber insisted that neither the 1969 National Environmental Protection Act nor its legislative history in congressional debate could justify the new regulations.

At least as upset as NRC and the State Department was Export-Import Bank President John Moore, who warned the Jan. 6 meeting that the proposed regulations would benefit Japanese and West German exporters at the expense of this country. The reason: endless delays and lawsuits against U.S. exports on often specious environmental grounds would turn impatient foreign buyers away from the United States.

Moore, a former Atlanta lawyer close to Carter, strongly urged White House domestic policy chief Stuart Eizenstat to attend the Jan. 6 session at CEQ. Eizenstat stayed long enough to ask three questions: What is the cost of the federal government of the proposed regulations? What is their legal justification? To what extent would they impose American standards on foreign governments?

Speth, who took the leading role for CEQ in the acrimonious debate, gave uninformative and "fudged" answers, according to one participant. Eizenstat left the meeting before it ended, but those in position to know say he was unimpressed with CEQ's rationale and has strong reservations about CEQ's ambition to be top cop for global environment.

Speth was legal counsel for the environmentalist NRDC before Carter appointed him to the CEQ. Last year the NRDC brought suit against the Export-Import Bank to require it to meet CEQ's domestic standards in all its foreign lending operations.

That suit, while not directly related to CEQ's proposed new regulations, helps to explain why Moore and the Export-Import Bank are so disturbed. The bank has provided more than $20 billion in loans and guarantees for U.S. exports since mid-1974, much of it for nuclear and conventional power facilities and offshore oil drilling. NRDC claims these have direct impact on the environment.

If the Export-Import Bank either loses the NRDC suit (now in U.S. District Court here) or is forced to comply with the proposed CEQ regulations, billions of dollars' worth of exports of U.S. products in the future could go down the drain. Foreign buyers would be forced to wait out endless environmental investigations, filing of impact statements and predictable harassment of court actions brought by well-meaning environmentalist groups.

Add to that danger the equally predictable fury of foreign buyers and governments subjected to U.S. environmental investigations on their own soil and the awesome dimension of CEQ's ambitions comes into focus.

But the CEQ has almost certainly overreached itself. Representing an activist constituency that takes a highly negative view of extending U.S. military and political power around the globe, it now wants to blanket the world with U.S. environmental power. And that is an unwanted extension of Potomac power that Jimmy Carter, ardent environmentalist though he is, is having trouble accepting.

Mr. President, this week Ambassador Strauss has been testifying before the Senate Finance Committee, and he had a little exchange with my colleague from Wyoming (Mr. HANSEN) which I think is worthy of contemplating here because it bears on my concerns as to the effects of the legislation before us if we do not, in one manner or other, proscribe the application of NEPA.

Senator HANSEN's question was as follows:

The Council on Environmental Quality has distributed a guide—draft guidelines to executive agencies which would require Environmental Impact Statements for U.S. international activities in other countries. I understand the guidelines would require Federal agencies to document and consider foreign impacts, both for direct U.S. government activities abroad and the licensing of commercial exports and activities abroad. This would place an immediate de facto moratorium on nuclear exports and related Ex-

Im Bank financing—as well as many other activities. What is your view, as Special Trade Representative, regarding the advisability of such a new requirement?

Ambassador Strauss:

Senator Hansen, I have some very serious concerns in this whole area. Now these proposals are exceedingly preliminary in nature as I understand it now and I don't want to be negative or critical but I would say to you that is something I intend to monitor very carefully, something I expect to be heard on very forcefully and I have strong reservations about anything being done that would in anyway impede our ability to do business outside the United States with products that are manufactured in this country. We will be, as I said, monitoring any proposals that come out of there closely and presenting our position on it. That's about all I have to say on it for now. We don't need any unnecessary barriers to trade. We're having a tough enough time right now with what we've got overseas.

Mr. President, our precipitous action at this time on S. 897 is, it seems to me, particularly inappropriate in light of the many international initiatives to eliminate the nuclear proliferation threat that are already underway and to which the United States has lent its support.

One such initiative is the London Suppliers' Club agreement—signed January 12 by the United States and 14 other nations—setting out specific criteria for nuclear exports. Now we are legislating, through S. 897, export criteria which goes far beyond those embodied in that internationally agreed upon document.

Another initiative is the establishment last year, on the recommendation of the President of the United States, of the international nuclear fuel cycle evaluation. Part of the efforts to achieve adequate international participation in the evaluation was an agreement that the United States would not change the rules in the middle of the game or in any way encumber foreign national R. & D. programs.

I have concern that we are about to change those rules, even though we have made it a part of the United States international commitment not to. S. 897, it appears to me, does both and prejudges the outcome of the evaluation.

Also sure to be prejudiced by the passage of this bill is the upcoming United Nations' special session on nuclear disarmament during which a discussion of the peaceful uses of nuclear energy throughout the world will take place. At that time the United States will sit down with the other nations of the world, assess proliferation problems, and come up with a program of action to solve them.

Such international dialog and cooperation is essential if we hope to halt the spread of nuclear weapons. Premature and precipitate action on S. 897, at a time when international agreement is so critical to our nonproliferation objectives could prove counterproductive to those objectives.

Given the concerns that I have that the provisions of NEPA might be applied should we fail to proscribe them, it might be, Mr. President, that at some time, I shall propose language, or would support the proposal of language to S. 897 which would be approximately as follows: We would insert a new section, section 310 which would read as follows:

Sec. 310. For the purposes of any Federal action required by this Title for the approval of any export, the Congress hereby endorses the position of the Commission in its opinion. In the matter of Edlow International Co., CLI–76–6, 3NRC 563, 582–84 (May 7, 1976) that the health and safety impact in foreign nations of exported nuclear materials is outside the jurisdiction of the Commission. For the same purposes, the Congress also hereby endorses the position of the Commission in its opinion in the matter of Babcock and Wilcox, CLI–77–18, 5NRC 1332, (June 27, 1977) that the National Environmental Policy Act does not require the preparation of individual environmental impact statements to assess the site specific environmental impacts of a proposed nuclear export on territory within the sovereign jurisdiction of a foreign government, and that therefore the Commission will only consider environmental impacts of nuclear exports within the United States and on the global common environment. And, therefore, Congress hereby declares that the Final Environmental Statement, U.S. Nuclear Power Export Activities, April 1976 (ERDA–1542) shall be deemed, in the absence of such aforementioned impacts within the United States or to the global common environment, to satisfy the requirement of the National Environmental Policy Act for an environmental impact statement for any export under this Title.

Mr. President, it remains to be seen how the dialog proceeds in the consideration of this bill. But I think if we do not make it abundantly clear that NEPA's and CEQ's reach for power do not apply, then this kind of language will probably become necessary before the bill can responsibly leave the Senate. We are, as I suggested, engaged in a piece of legislation which is premature, though necessary should the international talks and agreements in which the United States is involved come to no fruition or come to an unsatisfactory fruition. But for us to prejudge the results of international dialogs or the good will of other nations, or our own capacity to export highly technical expertise bound by the safety provisions that we are capable of binding it with, seems to me to be a drastic mistake. As we go along, I hope that some kind of assurance can be delivered by these distinguished floor managers that these concerns of mine are not as genuine as I suspect they are.

Perhaps the administration, before we are finished, could enlighten us as to their final policy on this whole matter. If they do not, I suspect that we might have to bring up the whole question of the application of NEPA prior to the passage of the bill.

Mr. President, that concludes my remarks.

Mr. GLENN. If the Senator will yield, I have just a very short comment, because we would like to get moving on some of these amendments and move the bill.

I appreciate the concerns of the Senator from Wyoming regarding the Council on Environmental Quality and the problems abroad. I think the language of the act that established the Council required that "all agencies of the Federal Government shall recognize the worldwide and long-range character of the environmental problem."

That is a very broad mandate, and, of course, depends on what course individuals on that council wish to take to put that into effect.

As the Senator also properly pointed out, he cited several cases where it has been held that this goes into the international area. However, I submit that this applies across the board to American industry, business, and governmental actions abroad. We have many environmental concerns abroad quite apart from the nuclear program. I think what the Senator has very properly pointed out is the fact that there has not been the proper guidance given to what the intent of Congress was as to the Council on Environmental Quality. I think we do need to clarify that. I do not think this particular bill is the proper forum to do it, because it is part of a much bigger problem that goes through Government agencies, and goes through business conduct abroad.

There is great disagreement within the administration itself, going back over some period of time, as we have witness of in several different papers that we have available here, as to how this should be applied. Different agencies have interpreted this in different ways. It is obvious that there was not adequate guidance in the legislative history here and that subsequent rules and regulations have not clarified the problem. I shall be glad to support any efforts the Senator thinks might be worthwhile, in whatever congressional forum, including Senate committees or subcommittees, to address this problem, trying to address it on a full, government-wide basis and not just take it up on this bill. I am afraid we shall not solve it on this bill and we would not solve the larger problem that it is part of.

I shall support whatever efforts the Senator wants in that regard and hope that it will not become an issue on this particular piece of legislation.

Mr. WALLOP. I can understand the Senator's concern about having it become a part of this legislation. I hope he can understand this Senator's concern that it might be necessary to become a part of this legislation.

I agree with the Senator from Ohio that the total topic needs to be addressed in the congressional forum. I only suggest that, given the court interpretations that already exist, given the litigation that is now in front of the courts, given the fact that this struggle does exist within the administration, and given the concern of Ambassador Straus and others, it may be that we would not want just to entirely shrug this off before we get done with this bill.

I have great concern that it is partly in the national defense interests of this country, not only the national trade interests of this country, that, if we are not involved in the international technology market to the fullest extent, our ability to monitor what is going on in the world will be dramatically reduced. That does

not seem to me to be in the best interest of the security of the United States, let alone the trade interest. That is basically where I am coming from on this issue.

I am willing to wait to see how the other dialog goes and what other amendments are attached. I only suggest that I have not given up entirely on the idea that we might want to do this.

I thank the Senator.

(Mr. CULVER assumed the chair.)

Mr. GLENN. Fine. I thank the Senator very much.

Mr. President, as far as I am concerned, we are ready to move on to the amendments to this bill. I hope we can. We had one group of 19 amendments that we had agreed to separately. I hope those can be approved en bloc, and move on to the others that are in context, consider them this afternoon, and move the bill along.

Mr. McCLURE. Mr. President, I might just respond. I think it might be well, of course, attempting to do that, I think the Senator from Illinois had a couple of amendments.

I would like to discuss it with the Senator from Ohio as to how we handle those amendments.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER (Mr. MATHIAS). The Senator from Illinois.

Mr. PERCY. Mr. President, I first wish to join with my distinguished colleague in commenting on the remarks made by our distinguished colleague from Wyoming. I do believe they are pertinent comments.

Certainly, we are concerned about worldwide environmental issues, and that is one of the purposes of this bill, to avoid one of the most pervasive and difficult environmental problems the world will ever face if we do not stop the proliferation of nuclear explosive capabilities around the world.

But I believe that our decision as to what should be done about specific concerns that my distinguished colleaue from Wyoming raised should take place only after we have had adequate hearings and know exactly what we are going for so we do not encumber this particular bill.

Mr. WALLOP. Will the Senator yield?

Mr. PERCY. Yes, I am happy to.

(Mr. CULVER assumed the chair.)

Mr. WALLOP. I appreciate those remarks.

Again, I say that I appreciate the concern that amending this bill might raise. Again, I appreciate the concern that failure to amend it might raise.

I want to make it clear that I am not against the environmental attachments and concerns that might go wtih this. This is not a call to avoid environmental considerations. I just think we have to distinguish between, as the Post editorial pointed out, the U.S. responsibility to inform and advise and our intrusions of other nations' sovereignty. I believe we have to put the most stringent environmental constraints on any technology we export. It seems to me that could be easily arrived at. But to add to the confusion that might arise by court challenges to any export sale the failure to deal with this other problem seems to put us in a national security as well as an environmentally insecure position.

I thank my colleague.

Mr. PERCY. I thank my colleague.

I would like to join with the majority floor manager's urging that on the 19 amendments which have been agreed upon, if it is possible to move us along expeditiously, to consider them en bloc, I would certainly recommend that.

We have worked for a long period of time now on a series of amendments offered by our distinguished colleague, Senator McCLURE.

Also, if it is at all possible to determine, because we all know we are working on a deadline of Wednesday to begin proceedings and deliberation on the Panama Canal Treaty, which may take quite some time, that if it is possible to set a time certain, adequate time, sometime on Tuesday, we could work backward to see whether or not the Senate would be in session both on Friday and on Monday.

But while our distinguished colleague is giving consideration to that——

Mr. McCLURE. If the Senator will withhold for a moment, I might make a comment on the discussion the Senator from Wyoming has just had.

I think it is important for us as we look at this measure to recognize that, first of all, it is not just a usual environmental impact that we are concerned with when we are talking about nuclear installations, whether it be a powerplant, a reprocessing facility, a fuel enrichment plant, or a radioactive waste storage site.

Those issues are separate from and go far beyond the generalized environmental impacts that have to do with an industrial installation, the social effects of an industrial plant location, its normal impact of air and water quality in the society in which that plant is located.

I think there is no doubt that when we are talking about the impact of nuclear installations, whether it is in this country or in any other country, we will be looking at things somewhat differently on nuclear installations than we do upon other industrial sites.

The danger I see in the assumption that this is simply another NEPA question is that NEPA is not confined to those peculiarly nuclear or radioactive hazards questions that we ought to be dealing with here under the Nuclear Fuel Assurance Act.

While we perhaps will be concerned and ought to be establishing the guidelines in regard to the nuclear proliferation threat or the nuclear radioactive threat in a regional sense, we should not, at the same time, involve ourselves in trying to determine site location, the social impact, the other aspects of the usual environmental impact statement that would apply to, say, the establishment of a steel mill, an auto assembly plant, a textile factory, the irrigation of a tract of land.

I think we have to carefully separate in our consciousness of this problem the two kinds of concerns that we have, so that while we address the one through a nuclear fuels policy, that we will not confuse that with the general environmental concern over human activity of a general nature which may involve us in quite a different debate, but merges and overlaps over into nuclear installations.

I think it is possible under this act to express a sensitive concern for the nonproliferation hazard separate from the usual EIS statement.

I know the debate is going on within the administration right now as to what position the administration will have.

It is quite possible that before this bill is completed in its action in the Congress or in the conference that the administration will have resolved for themselves within their own mechanisms what position they wish to take on the larger question of environmental impact in foreign countries of actions taken by this country.

I am not sure I want to say at this moment whether we should set that aside completely or whether it is something we may wish to address before we close the door on this bill by way of final action.

So I would say to my friend from Wyoming that he has lifted the edge of the tent to take a look at a whole host of problems inside and that they are very serious problems. They have a peculiar application to this legislation in some senses and yet they are, in other senses, as the Senator from Ohio has pointed out, more broadly applicable than just to the nuclear business. Whether we can resolve that, or should even attempt to resolve that, in this legislation, the Senator from Idaho has not yet determined in his own mind. Perhaps over the weekend the administration, in its processes, will have decided in which direction they are going; and they may or may not have resolved this by early next week.

Mr. GLENN. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. GLENN. What I am afraid of on this bill is that if we tried to resolve this whole big picture on this bill and it would happen to come out adverse to the position I know the Senator from Idaho takes on this matter, we could wind up stifling every bit of business and industry that this country does abroad, if it came out that way. That is the reason why I would be much more in favor of a broad hearing program, a discussion of this matter in Congress.

Let us set this on a broad basis and not try to do something on this bill, where feelings may be considerably different than if we were considering the broad business and industrial impact and the governmental activities abroad that this Nation has. It seems to me that that would be the commonsense and much better way to approach this matter.

If there are amendments to be brought up on this matter, I understand that I am in no position to prevent their being brought up, but I hope that whatever we do is done in the much broader context of the whole business picture.

The Senator from Wyoming stressed repeatedly Ambassador Strauss's concerns in this regard. I know those are very real concerns that Ambassador Strauss has, and I share those concerns. I think these concerns are on a broad

enough basis that I agree with him that we should address them on that broad basis and not try to push on this bill something that is going to have a much broader impact than on the nuclear industry, alone.

Mr. McCLURE. I agree with the Senator from Ohio that there are the broader concerns. I do not know how this body or the other body would vote if they were confronted with trying to solve it narrowly with respect to this particular business enterprise or commercial enterprise, or how they would approach it if they were confronted with a vote immediately upon the entire broad question.

At the same time, it is also the unique character of what we are dealing with here that makes it more difficult to predict a vote here and more difficult to predict the outcome of the administration discussions.

While we express the concern about environmental impact in foreign lands of activities that may have been initiated in this country, or commercial ventures that originate here but have impact there, and we express the concern about the business relationships with other countries, we should not abandon our attempt to increase environmental awareness and concerns in all countries and the sometimes delicate and very difficult business of getting other countries to agree with us, to apply the same concerns that we have applied here, for a number of reasons.

First and foremost is the welfare of all mankind. We have just as much concern about what may happen upon future generations in other countries as we have about what happens here. We just do not as directly control them. That should be our first concern. Also, we should be exploring ways in which we can stimulate foreign countries to exert their concern in the same directions and in the same manner that we do.

There is also a second reason for doing so, and that is to remove the competitive disadvantage which many of our businesses feel today because they have to meet direct environmental costs at the front end, as we have decided they should, but in competition with other businesses in other countries who do not have to bear that front-end cost of doing business. They can continue to defer the cost to future generations to pay.

I mention that only because I do not want this colloquy to be misunderstood as reflecting the view of the Senator from Ohio or the Senator from Illinois or the Senator from Idaho that we are unconcerned about the environmental activities of other countries.

Mr. PERCY. The Senator from Illinois is very sympathetic toward the view of the Senator from Ohio that this is worthy of a full set of hearings. The Senator from Illinois would want to be certain that manufacturers in the steel industry in Illinois and manufacturers in many different fields who are competing in world markets would have an opportunity to address themselves to the extraordinarily high costs we are required to absorb here.

It is estimated that in the steel industry in Illinois, 30 percent of all capital investment today is nonproductive. I just visited United States Steel in Illinois, and they showed me equipment they just installed a few years ago at a cost of $6 million, and they are spending millions of dollars to increase the efficiency of that equipment, which most foreign competitors of theirs do not have to expend at all. Then we wonder why the cost of the American product is unusually high.

I think it deserves considerable consideration and requires a large body of testimony to learn what is happening worldwide and why we are having a balance of payments problem, not just in oil but also in goods and other services that we are trying to sell abroad. It deserves a forum of its own.

I ask this of the distinguished Senator from Idaho: When he referred earlier in his comments to the Nuclear Fuel Assurance Act, was he really referring to the bill presently before us, which is the Nuclear Non-proliferation Act? The Nuclear Fuel Assurance Act is the title of a previous bill that had been considered a year or so ago.

Mr. McCLURE. The Senator is correct, and I thank him for that clarification.

UP AMENDMENT NO. 1172

Mr. PERCY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1172:

On page 115, line 9, insert the following: "Department of Commerce" after "Nuclear Regulatory Commission".

Mr. PERCY. Mr. President, this amendment would simply call for consultation with the Department of Commerce on subsequent arrangements. It is already provided that such determinations by the Secretary of Energy shall be made only with the concurrence of the Department of State, and after consultation with the Arms Control and Disarmament Agency, the Nuclear Regulatory Commission, and the Department of Defense, under mutually agreed procedures. This amendment, which is supported by the administration, would insert consultation with the Department of Commerce as well.

Mr. GLENN. Mr. President, I accept the amendment.

Mr. McCLURE. Mr. President, this is an amendment which I understand the administration supports. I think it does further the objectives which I share, and I support the amendment as well.

Mr. PERCY. We thank our distinguished colleague. I believe that bringing in the Department of Commerce will strengthen the act.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1173

Mr. PERCY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1173:

On page 156, line 2, insert the following: "(a)" after "Sec. 405.".

On page 156, after line 6, insert the following new subsection:

(b) Nothing in this Act shall affect the authority to include dispute settlement provisions, including arbitration, in any agreement made pursuant to an Agreement for Cooperation.

Mr. PERCY. Mr. President, this is really a technical amendment.

The executive branch considers it desirable, in order to avoid any possible negative inferences or misunderstandings, to include a provision confirming the continued authority of the United States to incorporate arbitration provisions in agreements or other arrangements which may be concluded pursuant to an agreement for cooperation. To accomplish this, we have simply submitted language, which the clerk has read, that will insure that there is no misunderstanding.

Mr. GLENN. Mr. President, I agree with the amendment of the Senator from Illinois.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HODGES. Mr. President, will the Senator yield to me a moment?

Mr. GLENN. I yield.

Mr. HODGES. Mr. President, I ask unanimous consent of the Senate that Diane Steigler, of my staff, be permitted the privilege of the floor during consideration of and votes on Senate bill 897 under consideration now.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I ask unanimous consent that Pat Wyndham and Burt Rosen, of Senator HOLLINGS' staff, be accorded the privilege of the floor during consideration of and votes on S. 897.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORT OF SENATORIAL DELEGATION TO PANAMA—ORDER FOR PRINTING AS A SENATE DOCUMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a report entitled "Report of the Senatorial Delegation to the Republic of Panama" dated November 9 through November 12, 1977, be printed as a Senate document. This request has been cleared by the chairman and the ranking minority member of the Rules Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged——

The PRESIDING OFFICER. There is no time limit.

Mr. ROBERT C. BYRD. With no time charged.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO HAVE UNTIL MIDNIGHT TO FILE REPORTS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that committees may have until midnight tonight to file reports.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. MATHIAS). The Chair, on behalf of the Vice President, pursuant to Public Law 95–45, appoints the Senator from Oklahoma (Mr. BELLMON) and the Senator from Virginia (Mr. SCOTT) to the Interparliamentary Union Spring Meeting, to be held in Lisbon, Portugal, March 27–31, 1978.

WAIVER OF REQUIREMENT THAT COMMITTEE RULES BE PUBLISHED EACH YEAR IN THE CONGRESSIONAL RECORD

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the requirement to publish the rules of each Senate committee in the CONGRESSIONAL RECORD not later that March 1, of each year as set forth in section 133B of the legislative reorganization of 1946, be waived for this year.

May I say that my request is based on this premise:

The request does not waive the requirement of printing in the CONGRESSIONAL RECORD any amendments a committee might make in its rules, to be printed within 30 days thereafter. The public is entitled to know of any changes each committee makes in its rules.

The reason for this request is as follows:

First, all of the rules of each committee have already been printed in the CONGRESSIONAL RECORD during the first session of this Congress;

Second, the rules of each committee are printed in each issue of their respective committee calendars; and

Third, the Committee on Rules and Administration has printed, as a committee print, a volume compiling the rules adopted by committees of the Senate. Here it is in my hand.

Finally, to print all of these rules again this session in the CONGRESSIONAL RECORD would really be a duplication, at an unnecessary cost to the taxpayers in the approximate amount of $8,536.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, I have discussed this matter just now with the distinguished majority leader. I think it is a wise request under the circumstances, and I join in the request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader. I guess there is no way of knowing if there are many, and if so how many, unanimous-consent requests made, any one of which saves more than $8,000 to the taxpayers; so the minority leader and I are happy to join in this request.

Mr. President, I suggest the absence of a quorum.

Mr. BAKER. Mr. President, will the majority leader withhold that?

Mr. ROBERT C. BYRD. I withdraw it.

NUCLEAR NONPROLIFERATION ACT OF 1977

The Senate continued with the consideration of S. 897.

Mr. BAKER. Mr. President, I have remarks on the pending business, and unless the distinguished majority leader has another reason for a quorum call at this time, I will proceed with those remarks.

Mr. ROBERT C. BYRD. Yes; I withdrew my suggestion.

Mr. BAKER. All right. Mr. President, I appreciate the opportunity to speak to the Senate today on what is undoubtedly one of the most vexing problems facing us as a nation and as a people.

First of all, let me congratulate my good friends the distinguished Senator from Ohio (Mr. GLENN), the distinguished Senator from Connecticut (Mr. RIBICOFF), and my colleague and classmate the distinguished senior Senator from Illinois (Mr. PERCY) for their leadership in the field of nuclear nonproliferation.

There is a great deal in the legislation that is now pending before the Senate which I can and will support, and which will contribute to the lessening of international tension and reduce the threat of nuclear proliferation.

Beginning with President Nixon and continuing through President Ford's administration, and certainly under the current administration, efforts have been put forward and are continuing to reduce the likelihood of enriched material falling into the wrong hands.

Even as we stand here today, the Nation's attention is drawn to a potential radiation hazard in Canada's northwest territories resulting from the untimely fall of a Soviet satellite whose electrical system was fueled by highly enriched uranium.

In our haste to deal with the international problems of nuclear nonproliferation, however, in my view there are three main concepts that must be kept in mind.

First, this is an international problem. Unilateral action on the part of the United States without corresponding efforts on the part of other countries could actually be counterproductive. The detonation of a nuclear device by India in May of 1974, which has been referred to on this floor earlier today, underscores the international nature of the difficulty we are seeking to address.

America's relationship to other countries such as Brazil, France, India, Iran, Japan, South Africa, and Spain, among others, will be impacted by our proceedings here today. The encouraging word on this front is the recent agreement signed by the 15 nuclear supplier nations that have participated in the London Supplier Club meetings. The agreement which has been formally signed with the IAEA, the International Atomic Energy Agency, earlier this year is a good-faith effort on the part of supplier nations to reduce the likelihood of further proliferation.

The disturbing thing to me about S. 897 as it now stands, is that the export criteria apparently go far beyond those agreed upon by the suppliers' conference. The natural result of what we do here today could be, in my opinion, to place such stringent requirements on American suppliers that we lose any leverage left to America in the international nuclear market.

A second principle that must be kept in mind is that the United States cannot continually sit in judgment on the nuclear agreements negotiated between other countries unless we do have some leverage in that respect. This line of reasoning has been most capably expressed by our colleague, the distinguished Senator from Idaho (Mr. CHURCH), and particularly brings to mind recent transactions between the Federal Republic of Germany and the Government of Brazil.

After repeated attempts to work out arrangements with American firms, the Brazilians evidently consummated a transaction with the West German Government, which, in my opinion, is clearly significant in terms of world peace and stability. It clearly reduces the leverage of the Government of the United States and nuclear firms within our country to deal with this problem in this region of the world. Furthermore, the United States is a participant in the International Nuclear Fuel Cycle Evaluation, in

which the United States has agreed to accept international participation on the basis that we not seek to change the rules of the game during this evaluation and that foreign nations are allowed to proceed unencumbered in their programs.

Therefore, it appears to me that S. 897 is inconsistent with both the suppliers' conference and the International Nuclear Fuel Cycle Evaluation. It is my understanding that both Senator CHURCH and the distinguished chairman of the Foreign Relations Committee, the Senator from Alabama (Mr. SPARKMAN), have requested a comparative analysis of the continuing impact of S. 897 in relation to the suppliers' conference.

Mr. President, during my own recent visit to the nuclear facility in Brazil, ANGRA-1, I was able to see firsthand and on the ground the large commercial nuclear powerplant being constructed under contract with Westinghouse Electric of the United States and to see at close hand the nearby beginnings and foundations of an even larger nuclear powerplant to be built for Brazil Electrical Authority by a consortium of companies in the Federal Republic of Germany. This comparison underscored the fact that we are losing our clout in this field. It also helped me understand that if we do not come to terms with this issue in a reasonable and realistic way, the enormous leverage of the United States to assist in establishing a safe and sane nuclear policy abroad will be dissipated.

During that visit to those facilities in Brazil and my discussions with the leaders of that country—including President Geisel and the head of their nuclear resource facilities and administration—I have been helped to place our export policy in focus because it appears to me that, with or without the United States, Brazil will develop an extensive nuclear program. I believe—indeed, I was told by reponsible Government officials directly involved in the undertaking—that Brazil would still prefer U.S. technology, particularly in the fields of uranium enrichment, in terms of fuel recycling, rather than to deal with other countries. I assume that preference does not even exclude the transaction that has now been completed between Brazil and the Federal Republic of Germany.

It was pointed out to me, and I believe it, that the enrichment facilities which are being purchased from Germany are probably inferior—in terms of economic operations, in terms of efficiency, in terms of safety, in terms of modern technology—to what the Brazilians might reasonably expect to buy in the United States. Particular reference was made to me about this Brazilian preference to purchase uranium enrichment facilities of the ultracentrifuge type instead of the gas nozzle type, which is the purchase which they have undertaken and is now being fulfilled. But I believe, Mr. President, that Brazil would prefer U.S. technology only within the framework which eliminates unnecessarily burdensome requirements imposed by the American Government which make exports of our technology and our expertise so disadvantageous to that country that it is no longer attractive, notwithstanding the superior technology.

It is my belief that we need to legislate a nuclear export bill that will maintain American leadership in the export of nuclear technology and assure that peaceful development does not lead to the production of weapons.

I believe it is important to remember that efforts relating to an international fuel cycle certainly would be counterproductive—indeed, futile and useless—if there is not adequate and appropriate American participation.

The General Accounting Office is currently working on a request submitted by our late colleague, Senator Humphrey, for an extensive analysis of alternative fuel cycles in terms of proliferation resistance. It is my hope that the General Accounting Office recommendations, along with licensing regulations about to be promulgated by the NRC, will be given full assessment before a bill such as that now pending before us, S. 897, is enacted in final form by this body. Not only is foreign policy concerned, but also balance-of-payments and domestic job considerations are at stake.

Our colleague in the other body, Representative MCCORMACK, writing recently in the Washington Post, offered a candid analysis under title of "How Not To End Nuclear Proliferation," that I shall share in part with my colleagues. I am reading from the Sunday, April 24, 1977, edition of the Washington Post, page C-5:

[From the Washington Post, Apr. 24, 1977]

HOW NOT TO END NUCLEAR PROLIFERATION

(By Mike McCormack)

President Carter's recent proposals to modify America's long-range nuclear energy policies, although intended to reduce the threat of nuclear weapons proliferation, could well have precisely the opposite effect; and would probably deny our country its only chance to produce the energy we will need for economic stability.

The President has proposed that we:

Defer indefinitely nuclear fuel reprocessing;

Restructure our nuclear breeder program and defer the date of breeder commercialization;

Fund research and development programs in alternate fuel cycles—"which do not involve direct access to materials usable in nuclear weapons."

The President also proposed a substantial increase in the number of conventional nuclear power plants, and proposed increasing our uranium enrichment capacity for domestic and foreign fuel requirements.

I commend the President for his initiative in making the energy crisis a major national issue, and I support his emphasis on conservation and shifting from oil and gas to the use of coal. I commend him for his attempts to reduce the threat of nuclear war and nuclear weapons proliferation.

However, his specific recommendations dealing with nuclear fuel reprocessing and breeder programs are clearly based on several fundamental assumptions that are unsubstantiated, and which I believe constitute a serious threat to the success of any program to overcome the energy crisis. They have been challenged by experts in this country and by our friends overseas, with whom we have obligations under the Nuclear Non-Proliferation Treaty. The assumptions are based on a recent report, funded by the Ford Foundation, which the President has apparently embraced in its totality.

BREEDERS AND WEAPONS

The first of these assumptions is that a program of research, development and demonstration involving the liquid metal fast breeder (LMFBR) will, in itself, uniquely contribute to the potential for nuclear weapons proliferation and constitute a "potential security risk." There is no theoretical or other justification for this assumption, and all experience demonstrates that it has no foundation in fact.

As far as is known, no weapon has been made from any fuel produced in any commercial nuclear power plant in the world. (India's nuclear explosive did not come from a power plant, but was made from a research reactor sold to India by Canada. This demonstrates the ease with which many nations can, if they wish, make weapons totally outside the energy program.)

There is every reason to believe that diversion to weapons would be less likely for breeders, because breeder fuel will be more difficult to handle than fuel from conventional nuclear plants. The next U.S. demonstration breeder reactor to be built, known as the Clinch River plant, will produce only about one-third as much plutonium, one of the materials than can be used to make weapons, as is produced in conventional nuclear power plants now going on the line in this country.

The reason that weapons have not been made from commercial nuclear power plant fuel is that it is much cheaper and simpler to make nuclear weapons from natural uranium using facilities designed and built exclusively for that purpose. Trying to divert nuclear power plant fuel into weapons production is the most expensive, clumsiest, dangerous and inefficient way for any nation to make a weapon.

The virtue of a breeder is that future models, which should be in operation late in this century, will produce more fuel than they consume. Thus, with a breeder program, the otherwise useless uranium-238 (which comprises 99.3 per cent of natural uranium) provides a potential fuel resource of extraordinary value to almost every nation. The United States has many tons of purified uranium-238 in storage which, when used in a breeder program, will produce the electrical equivalent of more than five times all the oil possessed by all the oil-exporting nations combined.

It will be easily seen why the breeder offers many nations of the world their only discernable hope of relative energy independence from OPEC and from the nightmare of worldwide inflation and economic chaos.

However, bringing a breeder technology to the point where commercialization can occur (possibly starting about 1990 in the United States) constitutes a difficult engineering challenge requiring many years. This country has had a small breeder in operation in Idaho since 1963. The next larger one, the Fast Flux Test Facility, is about 80 per cent complete at Hanford, Wash. The Clinch River plant will be the third in the series, followed by a full-size prototype plant to be built before 1990. Other nations, including France, England, Germany, Japan and the Soviet Union, have breeder programs under way. Each nation has chosen the same specific type, the liquid metal fast breeder, because it holds the most economic and technological promise. France and the Soviet Union are far ahead of us, and all these nations probably will be soon. France may soon start selling breeders on the international market.

Knowledgeable scientists throughout the world, dedicated to minimizing the threat of nuclear weapons proliferation, scoff at the suggestion that these breeder development programs, by themselves, constitute any special threat of weapons proliferation. What is required, they insist, to provide protection against weapons proliferation originating

from the civilian nuclear energy program is strict controls over the reprocessing of nuclear fuels, including the manufacture of new fuel elements from reprocessed fuel.

OTHERS WON'T FOLLOW

The next assumption is that, if the United States defers or abandons breeder development and nuclear reprocessing programs, other nations will follow our lead. This suggestion has left our friends overseas openmouthed with amazement. Japan and most Western European nations do not have our supply of fossil fuels, and we cannot supply them with their requirements for either nuclear or fossil fuels. In their view, it is absolutely vital to their survival to proceed promptly with their breeder programs.

Only Canada and Australia, which have large supplies of uranium and a comparatively small electrical demand, can afford the "throw-away nuclear fuel cycle." (This involves burying the fuel rods, with the unused uranium and newly created plutonium still inside, after they are removed from a power plant.) No more profligate waste of energy resources could be imagined. If we were to do this, it would deprive us of the only source of fuel available to give us a chance at energy self-sufficiency, even if the President's proposals for conservation, coal and solar energy are successful. Other nations will not follow us if we choose this course.

The next assumption is that there are some "safe" breeder technologies which this country, and the other countries of the world, have bypassed in favor of the "unsafe" liquid metal fast breeder program. This represents a flight of fancy apparently born of wishful thinking. The basic fact is that any nuclear material which will produce energy in a power plant can be extracted from the fuel and used in a weapon, if one is willing and able to build the complex and expensive equipment to do it. (There are three nuclear fuels: uranium 233 and 235 and plutonium 239. All three will produce energy in a power plant, and all three can be used in weapons.)

An alternative to the LMFBR, breeding uranium 233 from thorium, is no safer than any other fuel cycle, especially since it, too, produces plutonium. The ease or complexity of extracting weapons material varies, but the difference between a simple technology and a more complex one is insignificant compared to the difficulty of diversion from one of them—if simple technological and institutional procedures are, as they should be adopted for all.

Any reprocessing and fuel fabricating system can easily be designed to make clandestine diversion of nuclear fuel immeasurably difficult, even for large terrorist groups. Furthermore, all fuel cycles and all breeder technologies, whether they use uranium, thorium or plutonium, require, within a factor of two, the same amount of weapons material. In short, there is no magic or simple proliferation-proof technology to which the United States can switch if we abandon the LMFBR.

GAMBLING ON URANIUM

The most dangerous unverified assumption of the Ford Foundation report is that far more recoverable uranium will be found in this country than intense exploration has indicated will be available.

During recent years a series of studies by federal and private agencies, and more recently by the National Academy of Sciences, have agreed that the known and probable reserves of uranium in this country total about 1.8 million tons and that this should be considered as the "prudent planning base." It will provide fuel for about one-half of the nuclear energy production required by this nation during this century, using a throw-away cycle and the President's figures for conservation and other energy sources. The Ford Foundation report simply assumes that much more uranium will be found and that recycling will therefore be unnecessary.

No one can know for certain how much uranium will or will not be discovered, but we would be taking a completely unacceptable risk if we were to proceed under the assumption that we will not need a breeder technology until sometime in the 21st Century because fuel will be found as we need it. This may happen, but if it does not, we will almost certainly suffer a serious energy shortage, with all the attendant social and economic disruptions—and be without the technology to do anything about it. The result would be catastrophic. Therefore, our energy policy must include the development of one or more breeder technologies and the reprocessing of our nuclear fuel, one of the most important energy conservation undertakings available to us.

We don't need to decide now whether or not we must commercialize one breeder technology or another, or to what degree. Such decisions can be made as late as 1990. However, we must be able to make such a choice at that time, and the cost of the research and development, between now and then, is insignificant compared to the losses we will suffer if we don't have the breeder when we need it, or the benefits if we do.

REGIONAL REPROCESSING

There is a rational solution to the dilemma that nations face in attempting to provide adequate supplies of energy while minimizing the potential for nuclear weapons proliferation. I suggest that our national energy policy should include a positive approach to making it work, rather than a negative approach that nothing can be done. If we adopt a positive approach, the other nations of the world may follow our leadership.

The rational solution involves the establishment of regional nuclear reprocessing centers, closely supervised by the International Atomic Energy Agency, with the involvement of all the participating nations. Two regional fuel centers could be established in the United States, and one each in Europe, Japan and the Soviet Union. (There is no secret national defense information involved.) Additional nuclear fuel centers could be established as needed, possibly in the Middle East and in South America.

In the United States all nuclear fuel would be owned by the federal government, which would be responsible for all facilities, security and accountability. Fuel elements would be leased to foreign and domestic utilities on the condition that they be returned and on condition that the leasing nations be subject to IAEA inspection.

No plutonium or other weapons material would ever be produced in pure form or in any form in which it could be used for weapons fabrication. Weapons material would always be blended with other materials to make it unworkable for weapons. For instance, a chemical reprocessing step would produce only blended uranium and plutonium, which could be used for fuel elements, but which would simply not work in a weapon.

Fuel fabricating facilities would be built immediately adjacent to the chemical separation plant, as would a facility for glassification of all waste for deep burial. New fuel elements could be slightly irradiated as a last step before being shipped from the facility. Thus, they would require the same heavy shielding that is necessary to return irradiated fuel elements from a nuclear power plant. There would be no shipment anywhere of any material which could be used for weapons, unless it would first be reprocessed through large, expensive, remote separation facilities.

With these procedures, it would be necessary to steal at least one, and perhaps several, 50-ton shipping casks in order to steal enough material to make a single weapon. Then it would be necessary to extract the weapons material, even from new fuels. This would reduce the potential for illicit diversion of weapons material virtually to zero.

U.S. LEADERSHIP REQUIRED

Of course, no system is perfect or foolproof. It should be obvious, however, that this nation and the world can have the energy required for economic stability and a high degree of nuclear security as well.

If some nation decides that, in spite of all the attendant problems, it is determined to obtain nuclear weapons, then it will obviously be much easier to make the weapons outside the fuel cycle, as was done by India. This could be done secretly today, regardless of any restraints the United States places on its own energy programs. It is more likely to happen if the United States does not provide leadership for a workable program to assure adequate controls and supplies of energy.

Above all else, this nation must lead, and from a credible position. The other nations of the world do not believe that we can provide them with nuclear fuel unless we have a breeder program and unless we recycle and reprocess our fuel. They are already turning away from us. Nations which are our friends are looking even behind the Iron Curtain for nuclear facilities and fuel.

One of the obstacles facing this nation as it attempts to deal with the energy crisis is the lack of understanding of the complex programs involved and the difficulty in obtaining accurate information concerning them. Nevertheless, we must demand that our nation's energy policies be based on scientific, engineering and economic facts.

Mr. SCHMITT. Will the Senator yield for a question?

Mr. BAKER. I am happy to yield.

Mr. SCHMITT. It seems that the gist of the Senator's initial remarks, in effect, describes the present situation as one in which a certain form of technical imperialism may be underway, where developing nations, in particular, are being deprived of superior American technology by the present policies and potential policies of this country. Is that a correct analysis?

Mr. BAKER. I must say that it is not only a correct analysis, but also an attractive and unique description of the situation. I had not thought of it in those terms, but I think it is clear—I know it is clear to me and believe it is to most people—that technology is not that sort of coin that can be put away in bank vaults or stored, say, from theft. Technology is in an evolving and developing state. Developing countries, by their very nature, are likely to overtake us in these fields; and if we do not use our advantage and our leadership to try to formulate a sane, sensible nuclear policy abroad, then I think we have relinquished a very valuable asset and tool.

Mr. SCHMITT. The Senator also would agree, would he not, with the analogy from sports that if you are merely a spectator, you do not write the rules.

Mr. BAKER. I think that is an appropriate analogy, too. I think the United States dares not be just a spectator and we are running that risk.

The United States does not export many things now, really, in terms of the full range of our potential. In the past, we exported numerous items; but now, we almost always export either agri-

cultural products, which have suffered recently because we have not fully realized our export potential there or high technology in terms of air frames, nuclear development, computer science, and the like. So the real risk we run, if we overlegislate in this field, is that we will, indeed, become a spectator nation in one of the few fields where we have an opportunity to expand and extend our export policies and use it as leverage for formulation of sensible international policy.

Mr. SCHMITT. I think the Senator believes, as I do, that this country has a great reservoir of moral leadership, moral tradition to apply to the problems of international nuclear proliferation and use of nuclear energy in its various forms. If we are determined to take the role of spectator, that we, in fact, have done a greater disservice to the world than we would otherwise because we would have denied the world what we believe, at least, is a higher moral set of values with respect to the use of nuclear energy. something we brought on the scene in terms of the inventing of it by the Americans, the use of science to derive technology that can, in fact, be used for the betterment of mankind.

I think the Senator's remarks are extremely important to the point I hope our colleagues will pay attention to them.

(Mr. HODGES assumed the chair.)

Mr. BAKER. Mr. President, I thank my friend and our colleague from New Mexico who has contributed so much to the Senate in so many ways, but particularly in his perception of the value and the danger of science and technology. His background in that field and his training for it are superb and his insights are very superior.

I am grateful for these remarks and for his general contributions in this field.

Mr. President, on that general subject—that is the continuing and unfolding development of sensible nuclear policy for the United States—I remember that barely 18 months ago, I was the ranking member on the Senate side of the Joint Committee on Atomic Energy and the distinguished former Senator from Rhode Island, Mr. Pastore, was chairman.

I also recall that he and I made a trip together—together with one staff person—to inspect our nuclear facilities in Europe, those facilities which were constructed to store and hold in readiness our stockpile of strategic weapons, so-called, meaning nuclear weapons.

I remember the enormous emotional impact that went with my first visit to one of these facilities.

We saw row after row of nuclear devices in the megatonnage range that seemed so enormous in terms of their size and proportion, and. the deep acrylic white that seems to be the standard paint job for an atom bomb. We also observed, in some cases, the rather cavalier and sometimes callous way these devices were stored, which was the reason for our trip; and I think this aspect has now been significantly improved.

But I remember, as well, another emotional trauma I suffered on that trip with our former colleague, Mr. Pastore. It suddenly dawned on me that the nuclear genie is so far out of the bottle that we will never put him back.

I could wish for a different situation and, indeed, I would fervently hope that mankind would not have to deal with such terrible problems as the proliferation of nuclear weapons or nuclear material; but in the face of the numbers, the thousands of nuclear weapons in our arsenal and the arsenal of the Soviet Union and others, it was clear that the nuclear genie was completely out of that bottle.

Something else happened during that trip as I was being briefed by the experts regarding the security of the weapons and the protection we have against the stealing of those devices.

By the way, I was convinced we could succeed in that kind of protection and, in fact, we have. There is no real significant danger that someone will seize and carry away a nuclear weapon. We cannot totally rule it out, but I think we have adequate safeguards.

Anyway, I was told in the course of those briefings that if a developing country wanted to build a nuclear device of its own, the very last thing it would probably do would be to build a large enrichment facility.

The next least likely thing they would do is try to go to nuclear fuel reprocessing. That is not to say we cannot build nuclear weapons that way. Plutonium is always a threat. It is a deadly weapon that may, in fact, obliterate civilization some day if we will not rise where we can deal with it intelligently.

But if we were a developing country, a Third World country, a small emerging nation, or even in some cases nonnational entities—I can think of maybe 50 corporate groups around the world that might qualify in this discussion—there are other and different ways that we could obtain nuclear material.

It now is a question for chemists and engineers, not for scientists and physicists.

And then it would follow, Mr. President, that the only way we had any possibility of protecting against the annihilation of civilization from nuclear weapons was to use whatever advantage we had by our superiority in science and technology and our lead in the development of this industry, as leverage, to try and produce the safest circumstance we could contrive.

We are not likely to be able to completely contain the threat, and there is enormous risk and danger. The real question, however, seems to be whether or not mankind matures at a rate adequate to the challenge, or whether we are so foolish, as historically we have been in the past, that we do not seize our opportunities or realize our prospects to utilize our advantage.

That, Mr. President, is why I am concerned for a sensible legislative approach to nuclear fuel exports, because I think our technological advantage is perishable; because I think our advantage and leverage will disappear in a few years, because if we do not do this now we may not have an opportunity to do it later.

If we have many repeating instances of a country as large and as promising as Brazil deciding to, in fact, go elsewhere to buy a full fuel cycle when they would prefer to deal with us, and the United States thus forfeiting whatever leverage we have, then I worry that we may, with export legislation, worsen that situation instead of improve it.

No one here wants to do that, but it is a risk.

Mr. McCLURE. If the Senator will yield on that point, I wish to thank my colleague for the statement he is making and the point he has just made, that we do have some advantage in our negotiations at the present time, because of a diminishing technological advantage.

There was a time when we were the total nuclear technology in the free world. We had almost total control over what would be done. Year by year that has changed and it is changing rapidly now.

I think the warning was just voiced, that whatever technological advantage we have, whatever leverage we have because of our lead, can easily be dissipated if we make the wrong moves now and force people to take the risks of not going with the United States, instead of the risks of staying with the United States in our nuclear technologies.

Mr. BAKER. If the Senator will permit me, I dare say that in a huge majority of cases, those countries would rather go with the United States, if for no other reason but for the superior technology in this country.

Mr. McCLURE. I think it is obvious. For instance, our friends in Japan have already arrived at an agreement with us on Tokai Mura, and are relying upon us to develop rational policies to make it possible for us to continue as reliable suppliers and reliable partners with them.

One of the concerns I have is that a provision of this bill, or several of those provisions, may make it necessary for us to renegotiate that in 1979, which is an immediate signal to the Japanese that instead of being the reliable supplier that they have assumed that we are, and the reliable partner that they have taken us to be, that we may, indeed, be moving away from that position and that they, in turn, must begin to look to other alternatives rather than being able to be secure in their relationship with us in the nuclear field. That would be a tragedy for the world, to have that happen. It would be a tragedy for us, and it would be a tragedy for our hopes of nonproliferation.

Mr. BAKER. Mr. President, I thank the Senator.

I apologize for referring to my recent experience in Brazil one more time, but I will shortly file with the Senate a report of that trip; and at that time I intend to ask that it be printed as a Senate document, and it will be available.

A significant part of that report will deal with the question of Angra I and Angra II. Angra I is the powerplant that

was purchased from Westinghouse by the Brazilian Government and is now nearing completion. I think it is a shame that Angra II is not. It is within a hundred yards of the other side, and is being built by the Germans as a part of the sale of a total nuclear fuel site. I think we could have prevented that. We could have realized that billion dollars or so in nuclear exports, which we will not have, had we had a realistic and sensible fuel export policy.

I will state in that report that I think it is not too late, that the Brazilian Government indicated to me that they would like to reconsider the possibility of dealing with the United States on future nuclear facilities and would especially like to reestablish a close relationship between research and development facilities in this country and research and development facilities in Brazil. I believe that is extraordinarily important. My plea to my friends and colleagues who support or oppose this bill is that we structure and configure this legislation so that we do not extinguish that and other similar possibilities to leverage our technological superiority into a sensible nuclear policy.

Mr. PERCY. Mr. President, will the Senator yield on that point?

Mr. BAKER. I am glad to yield.

Mr. PERCY. I think this colloquy is extraordinarily important and very helpful, because it really focuses on what we are concerned about and focuses on what we certainly do not want to precipitate inadvertently.

The Senator from Illinois asserted this morning in his opening statement—and the Senator from Tennessee was there when the Senator from Illinois testified before the Joint Committee on Atomic Energy—the necessity of this country being looked upon as a reliable source of supply.

Mr. BAKER. I recall the testimony that the Senator gave before the Joint Committee on Atomic Energy. It was extraordinarily helpful and very good and set the tone of the deliberations of that committee in trying to construct legislation. The Senator from Illinois has consistently been a leader in that field, and I salute him for it.

Mr. PERCY. I thank my colleague.

What the Senator from Illinois is very concerned about is exactly the point the Senator from Tennessee made—the lack of precision as to what our policy is going to be. We have had a fuzziness about it, an ambiguity, which leads people to believe that we do not have a policy; and that is really what we have tried to carve out.

I wish Senator Pastore were here, because between Senator Pastore and Senator BAKER, we really had quite a combination of expertise.

Mr. BAKER. We were both little, but we were both loud. [Laughter.]

Mr. PERCY. I can see eyeball-to-eyeball with both Senators, and I like that very much, indeed.

What we really carved out was a policy of aiming toward the peaceful use of nuclear power. In obtaining commitments from many nations who said they would not use this material for weaponry of any kind, they were helping to insure the safety of the world.

Our problem was that if someone refused to sign the Non-Proliferation Treaty, what was our policy? We had a fuzziness about that policy, no real guidelines, no definite assurance that if you did not go a sensible, rational route, we would do something about it.

So we have the case of India. I happened to be in India—I know that the distinguished Senator from Tennessee has followed this matter with tremendous interest—shortly after the so-called peaceful nuclear explosion occurred.

At that time, I said to Madam Ghandi, who was Prime Minister:

> You or your subsequent government will rue the day that you have opened this Pandora's box.

Today, India has unquestioned conventional superiority over any of its presumed adversaries. But you are equal if you have atomic weaponry. It does not matter how many tanks or ships or troops or aircraft you have. If you both have nuclear explosives capability, you have shrunk it down. The world is much smaller all of a sudden. Now that India has developed this capacity, other countries feel that they have to follow a similar route and develop nuclear explosives capability.

There was no policy from our standpoint as to what we would do. We presumed it was not the result of our heavy water, and then we learned, to our dismay, that it was; that it was our technology and know-how and that of the Canadians that gave them the ability to explode this bomb. Obviously, that resulted in incentive on the part of others to develop along the nuclear route.

Mr. BAKER. I think the example of India is pertinent for another reason. I read in the newspaper—and I have no reason to think it is not true—that the fuel reprocessing facility in India from which the Indians harvested their weapons grade material was not purchased from us but that they purchased valves and machinery and tubing on the open market around the world.

The point is that those purchases are no longer difficult to make. It has become so simple to enrich material or to recover material from reactors that it does not matter any more. If you really want to build a weapon, you are going to build a weapon; and any country of any size or consequence, I suppose, can do it.

What we must do is use our remaining meager leverage deriving from our technological superiority to make it undesirable for countries to proceed as India did.

For example, I have an idea that if we had given an assured supply of nuclear fuel to Brazil and agreed to build the pressurized water reactors they are going to depend on, they probably never would have decided to employ the full fuel cycle.

I have an idea that we would have used that leverage to suggest to India that there should be something other than an enrichment facility. We knew they were building an enrichment facility. I will not elaborate on why we knew that, but we knew we were not giving it to them. They can buy the material to do that.

I think the goal of the distinguished Senator from Illinois is the same as my goal—that is, to use America's technological advantage to develop an American policy that will produce a safer world. The question is, how?

The distinguished Senator from Idaho has spent a great deal of time examining in detail the various provisions of the measure now pending. He has cited the efforts of the supplier nations' conference and of other agencies within our Government to examine this in terms of recent and new developments. My only suggestion, my only request, is that we proceed carefully, so that we do not throw the baby out with the bath water.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. McCLURE. I thank the Senator for yielding.

I point out that there is one other factor that is associated with this and that this legislation, in and of itself, certainly is not the total answer to the problem in being a reliable partner in the world's nuclear commerce, remembering that commerce in and of itself is not perhaps our major preoccupation. Our major preoccupation is the safety of the world in the presence of this commerce, that is, that for any country that is an energy deficient country that depends upon imported energy they must seek their own sources of energy to reduce their dependence upon foreign sources. Brazil, for instance, just late last week, early this week, took a step which our country ought to take and that is to mandate the inclusion of alcohol in motor fuels. They have gone to a 20-percent alcohol program, and we are just toying with the possibility of getting a 10-percent alcohol program.

But that is only another sign of the urgency that that Government has in dealing with their problem of energy self-sufficiency and energy dependence.

When we get into the nuclear field, it is not enough just to offer them the pressurized reactor vessels and equipment, nor even to guarantee a supply of fuel to them unless there is also in that guarantee of supply a pricing question. Integral to that pricing question must also be the ownership of the spent fuel and the possibility of reprocessing to recapture the vast quantities of energy locked in the spent fuel.

So if we forgo in our country the opportunity, with appropriate safeguards, to reprocess spent fuels, we will have increased the cost of the raw materials, the raw fuels or the enriched uranium fed into the pressurized reactor and will have by pricing alone removed ourselves from the opportunity to influence their movement and their development of commercial reactors and commercial uranium electric power.

So this bill by itself is not the total answer, but an important answer, if we will contrive it carefully, if we will construct the right scenario, to be able to make the right assurances in connection

with this and other policies of government.

I agree fully with the comments my friend from Tennessee has made concerning the tragedy of the lost opportunities if, as a matter of fact, we do not put in place certain policies, policies that are certain, that are predictable, that are dependable, not just in our eyes, but in the eyes of those who must deal with us so that they will deal with us and that we can have that influence on their policy that we desire.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. PERCY. I think the Senator from Tennessee still has the floor.

To comment briefly, we do not disagree at all about the desirability of our becoming reliable enough suppliers so other nations will want to depend upon us. That is one of the main thrusts of this legislation, to take away all of the ambiguity and to provide assurances that if reasonable standards are met, we direct that there shall be enlarged facilities to enable us to fulfill that pledge on our part.

I did not expect to have a plug this afternoon for gasohol, the so-called Percy amendment in the energy bill, but if it is a miniscule 10 percent and we have been outbid by 20 percent in, say, Brazil, it is still a very significant step and I hope the conference will accept this and have it in the final energy bill if we get one in this century.

I do not think that we want to also use that leverage that the Senator from Tennessee mentioned. I think it is not a miniscule leverage. I think we have an immense leverage available today, and the fact is that time will run out within a few years. The world would think us pretty foolish if we did not now clarify, while we are in this dominant position where we stand. The world will applaud our moving ahead and this, after all, is the direction that all the supplier nations have taken recently in London. I have not heard a criticism from a foreign government in recent months of what we are doing right here today. I think they really expect us to move forward.

But under existing circumstances, it is possible for a nation like India to do what it did and shake the world. First of all, it has been clearly demonstrated that a developing country can have this capacity. As the Senator from Tennessee said, it does not take all that much know-how. But they were able to do it without any concern that they would have any sanctions imposed against them. In fact, we were in the position where we had not clarified what we would do and we had to thrash around for a couple of years to determine what we would actually do. We have had negotiations as recently as the President's trip to New Delhi in which we did assure that another 7.5 tons of enriched uranium would be made available to Tarapur to keep it going so they would not have to turn out the lights on 25 million people or shut down the factories and cause widespread unemployment.

But if we had just had a clear-cut policy from the outset that that would be an action so contrary to our policy that we would sever our supply if technology and materials were used for explosives, then I do not think they would have taken the action. What we must do now is move very rapidly to prevent another miscalculation—in fact not a miscalculation if the precedent says the United States will do nothing about it if country A, B, C, D, or E, explodes another peaceful nuclear explosion—which in a sense is not very peaceful to anyone who is underneath it or in the vicinity of it. So we are just trying to say let us clarify these policies. Finally, the example the Senator from Tennessee has given about the ability to buy components and parts on the open market is all the more reason why we should clarify the degree of controls we should have in the United States over the export of significant component parts so you cannot buy on the open market as you can buy an M–16, or something like that on the market in Belgium. You cannot buy and put together this kit that would enable you to then have nuclear explosive potential.

Those are simply too sensitive for us to allow an open, free market because then a Qaddafi or an Amin—almost anyone can get their hands on this capability who has a few million dollars and a will to do it. And there are plenty of people who are radicals who have a few million dollars and a will to do it. In fact, Qaddafi said he wants it and he has more than a few million dollars. And then what is the world going to do? That is the time pressure we are racing under.

I think a moral issue is in all of our hands as we try to work out the combination between being a reliable supplier and a setter of guidelines. We think that this legislation will give assurances that we will be a reliable supplier to those meeting certain guidelines and standards, and we are setting standards which we hope everyone will agree to.

I thank my distinguished colleague for yielding.

Mr. BAKER. I thank the distinguished Senator from Illinois and I reiterate no one in this body has shown more leadership than he in trying to propound a genuine, sane, sensible nuclear policy. He has been concerned with it as long as I have known him in the Senate as a colleague, and he continues to be. With his good offices and that of the Senator from Ohio and the Senator from Idaho, and others, I am sure we will synthesize a piece of legislation that will contribute to the regularizing of American policy on nuclear fuel export.

I really have said more than I planned to at this time. I want to speak another time on this matter later, but I have four newspaper clippings on the Brazilian question that I would like to include appropriately in my remarks, and I ask unanimous consent they may be included in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 23, 1977]

VANCE ASKS BRAZILIANS TO CURB NUCLEAR PROGRAM

(By Juan de Onis)

BRASILIA, Nov. 22—Secretary of State Cyrus R. Vance urged Brazil's leaders today to reconsider their commitment to a nuclear-energy program using plutonium fuel, calling it uneconomic and politically hazardous.

Mr. Vance, who arrived here from Argentina on the second stop of a trip to three South American countries, emphasized President Carter's determination to prevent the proliferation of nuclear weapons while cooperating with the countries of Latin America in developing nuclear energy for peaceful purposes.

The United States last week moved to authorize the export of 2,900 pounds of mildly enriched uranium fuel for a nuclear power plant, Brazil's first, now under construction at Angra dos Reis.

But Mr. Vance told Brazil's highest officials that the construction here of facilities for reprocessing spent fuel to recover plutonium under an agreement with West Germany could endanger the transfer of further United States nuclear fuel or technology to Brazil.

SAFEGUARDS ARE LACKING

The Carter Administration's position is that there are at present no adequate safeguards against diversion of the plutonium for the building of weapons.

The United States attempted early this year to persuade West Germany to revoke that part of its agreement with Brazil calling for the building of the reprocessing facilities.

The move met strong Brazilian resistance and the present talks are largely an attempt to approach the problem through an understanding with Brazil. Mr. Vance indicated that the views of the countries were still far apart.

"They have their position and we have ours; it is an ongoing process," he said after a private session with Foreign Minister Antônio Azeredo da Silveira. Mr. Vance later met with President Ernesto Geisel.

Mr. Vance said that he had also discussed human rights and a broad range of international questions, ranging from peace prospects in the Middle East and southern Africa to economic relations between the industrialized and developing countries. Brazil is a major voice among the developing countries.

Mr. Vance will fly to Caracas, Venezuela, tomorrow where he will meet with President Carlos Andrés Pérez. The main subject is expected to be oil prices.

BRAZIL ADAMANT ON NUCLEAR POLICY

(By Karen DeYoung)

BRASILIA.—Should Brazil persist in its plans to build a nuclear reprocessing plant, Secretary of State Cyrus Vance warned during a visit here two weeks ago, it runs the grave risk of triggering a nuclear arms race with neighboring Argentina, which already has stockpiled enough uranium waste to produce several hundred pounds of bomb-building plutonium once it develops the reprocessing technology.

The message he brought from Buenos Aires, Vance said, was that if Brazil would renounce reprocessing, Argentina would likely do the same.

"How childish," a senior official in the Brazilian Foreign Ministry said after Vance had gone. "He probably said the same thing to Argentina." Brazil, the official said, can handle its relations with Argentina without U.S. help, thank you.

In any case, Vance added during the discussions, if Brazil defers developing its own

reprocessing technology the United States could then offer all manner of substitutes—perhaps including the secrets of thorium, a uranium like fuel found in natural abundance in Brazil.

Nothing but vague promises, the Brazilian, who was present during the discussions, said later. "How do you say it?" his aide asked. "A bird in the hand is worth two in the sky?"

Besides, the official said, West Germany, a country that has been much more generous with its nuclear technology, has its own thorium research program. "The Americans think we don't know anything," he added.

The end of round three in Brazil's nuclear "disagreement" with the United States has left Brazil, by its own account, feeling quite self-satisfied. While the United States has not given up its struggle to keep reprocessing technology from Brazil, it has, a Foreign Ministry spokesman said, "learned the error" of what Brazil considers U.S. heavy-handedness.

Brazil now seems almost taken aback at what it regards as the overwhelming success of its audacity. The Brazilians feel they have proven, for the first time, that a developing country, highly dependent on U.S. trade and support, can strongly disagree and live to tell about it.

Round one was a visit to West Germany early this year by Vice President Mondale to persuade the Germans to cancel the reprocessing part of $10 billion, eight-reactor sale to Brazil on the ground that the Carter administration considers reprocessing technology too dangerous to spread around the world. Brazil, which was not consulted during the talks was furious. West Germany refused to cancel.

Round two, a visit here last March by Deputy Secretary of State Warren Christopher, was by all accounts "disastrous." After seven hours of rancorous talks, the Brazilians said, Christopher presented a prewritten joint communique outlining a curtailed Brazilian nuclear energy program. Brazil refused to sign. Christopher abruptly got on a plane back to Washington, and bilateral relations went into a deep freeze.

Then came Vance, calm and businesslike. The idea, U.S. negotiators said, was to convince Brazil, on a purely technical level, that reprocessing—the procedure whereby plutonium is separated from the uranium wastes of nuclear reactors—is inefficient and unnecessary. More importantly, the U.S. argument continues, highly volatile plutonium is so dangerous to have around that even the United States has banned construction of reprocessing facilities.

In response, Brazil tried a new tactic. The Brazilians smiled, nodded sagely, said they would take it all into consideration and cordially sent Vance on his way with a brass band, an airport red carpet and a promise to talk again.

"Their objective was to get him back on the plane as soon as possible without opening their mouths," a Latin American diplomat here said. "They were very satisfied that Vance didn't get anything out of them."

Discussions will doubtless continue this spring, when President Carter picks up the southern hemisphere leg of the 11-country tour he postponed last month. "We hope we can convince him," the Foreign Ministry official said.

Carter does not want Brazil, or any other country, to have reprocessing technology. While reprocessed plutonium can be used as a reactor fuel, thus theoretically providing a virtually limitless fuel supply, it can also be converted into nuclear weapons fuel much faster than ordinary enriched uranium. Carter believes it is virtually impossible to safeguard large plutonium stockpiles.

Current international nuclear safeguards amount to regular international inventory checks of nuclear fuels and wastes. Plutonium could quickly be diverted or stolen, Carter and others believe, and made into a bomb before anyone would discover it was missing.

U.S. officials say privately that they are less worried about countries like West Germany and Japan developing their own reprocessing technology than they are about a Third World country, with no substantive nuclear research program of its own, getting reprocessing "cheap and easy" through technology transfer.

Brazil finds that attitude unfathomable. "We have always been a friend. They had a war with Japan in this world. . . . The U.S. believes very much in the information it has. Because they are very developed, they are sometimes inclined to think they have discovered the truth."

He pointed to the fact that while the United States originally objected to both reprocessing and enrichment technology being transferred to Brazil, it has since decided that enrichment is safe after all.

While reprocessing is only a minor part of Brazil's energy scheme for the next 10 years, the resulting conflicts have made it the symbol of what Brazil considers a life-and-death struggle to continue a monumental development program begun more than a decade ago.

That program, which brought phenomenal yearly growth rates of 10 per cent, took a sudden dive with the 1974 quadrupling of oil prices.

Brazil now imports more than 80 per cent of the oil it uses, at a cost of more than $300 million a month. To lessen oil dependency, Brazilian experts have developed an energy plan they predict will reduce oil's share of energy consumption from nearly 44 per cent in 1974 to little more than a third by 1986.

The slack will be taken up by hydroelectric capability, through a monumental series of dams now operating, under construction, or planned.

A large-scale switchover to nuclear power is to come much later. Brazil's first power reactor, called Angra I, a 600 megawatt facility now under construction outside a small village on the South Atlantic, will not go into operation until 1978. Three more are scheduled to be on line by 1985 when nuclear energy will still only provide 4 per cent of Brazil's power requirements.

While Brazil is to start enriching its own uranium fuel for those reactors in 1979, thanks to German blueprints for an enrichment facility, explorations for domestic uranium resources have proved nearly as disappointing as the search for oil. To reach the goal of 85 per cent nuclear fuel self-sufficiency within 10 years, the Brazilians say they need reprocessing.

[From the Washington Post, Jan. 27, 1978]

BRAZILIANS STUNG BY U.S. ATTEMPT TO BLOCK W. GERMAN NUCLEAR DEAL

(By Bruce Handler)

RIO DE JANERIO, January 26.—President Carter's attempt to undermine a controversial Brazilian-West German agreement under which Brazil theoretically could learn how to make its own atomic bombs has become an issue of sharp national concern here.

Brazil, which insists it will use the nuclear technology it is to get from West Germany exclusively for making electricity, believes that the United States is selfishly trying to prevent it from becoming a major world nation.

Brazilians also feel betrayed because Vice President Mondale, on his first official foreign mission for Carter, took up the nuclear pact directly with West German Chancellor Helmut Schmidt without telling Brazil anything about it first.

Less than a year ago, when Henry A. Kissinger was Secretary of State, the United States signed a "memorandum of understanding" with Brazil, giving it special "consultant status" and pledging to confer regularly with the Brazilian government on matters of mutual importance.

The Mondale trip to Germany is front-page news here. The possibility that the United States could actually get West Germany to back out of the deal has rallied internal support for President Ernesto Geisel, head of Brazil's authoritarian military regime and a strong backer of the nuclear pact.

When Brazil and West Germany signed the nuclear agreement, in mid-1975, Geisel's office issued a statement saying: "All activities resulting from this pact will be destined exclusively for peaceful uses. We give assurances that fissionable material will not be used for weapons or other nuclear explosive devices."

Brazil's sole legal opposition party has joined ranks behind Geisel and the official government party in defending the agreement, Rep. Joa Cunha, an opposition congressman from Sao Paulo state, said: "President Geisel, speaking in the name of all Brazil's 110 million citizens, should repudiate this U.S. maneuver."

Cunha claims that the United States is trying to keep Brazil as "an eternal supplier of raw materials" and wants to prevent this fast-developing South American nation from "sharing in the economic, cultural and scientific progress of the 20th century."

Diplomatic sources here say that in reality, if the United States succeeds in getting West Germany to renege on the nuclear agreement, there will be little Brazil can do about it. This may help explain why Brazil has suddenly begun a diplomatic strategy of talking about German honor and West Germany's reputation for keeping promises.

Brazil has repeated its justification for signing the nuclear pact so many times that most foreign correspondents here can recite the arguments by heart:

As a rapidly developing country, Brazil needs atomic energy to produce electricity for its burgeoning metropolitan areas and industrial complexes.

Brazil asked the United States in the past to supply it with equipment for enriching its own uranium, to guarantee a permanent supply of fuel for its nuclear reactors, but the United States refused. So Brazil turned to West Germany, which agreed to make available such know-how and equipment.

Brazil cannot run the risk of having its access to energy supplies controlled by outsiders, such as the United States—look what happened to the United States during the Arab oil boycott, Brazilians point out smugly.

Although the capability to enrich uranium, under the so-called full fuel cycle, will theoretically make it possible for Brazil to build atom bombs, Brazil is a peaceful country concerned with its own internal development than with foreign conquests.

The Brazilian-German nuclear agreement has been approved by the International Atomic Energy Agency, which sets rigorous standards against unauthorized uses of atomic power.

Eight atomic reactors are to be built in Brazil by 1990 under the agreement with West Germany. An official said that work under the agreement "is coming along on schedule, and in some areas you could say that we're moving ahead faster than we expected."

Construction has not begun on any of the German-designed reactors or the controversial uranium enrichment plant. Most of the work carried out under the agreement so far

has been setting up and staffing the joint companies that are to build and install the nuclear equipment, along with some site-clearing and preliminary construction.

Brazil already has one nuclear power plant, which is expected to begin producing 630,000 kilowatts of electricity later this year. This plant, however, was built by an American company, and under U.S. law, the U.S. government will strictly control the amount of enriched uranium to be made available to it. The sale of nuclear technology could retroactively affect Bonn's projected $4.8 billion deal with Brazil, but there were hints that the United States is starting to negotiate with Brazil to provide an alternative source of nuclear fuel for its economy.

When Schmidt was asked if West Germany still intends to honor its contract with Brazil, he said the question involves "sensitive problems," but noted that his country has "so far fulfilled all the obligations it has undertaken in every treaty," including the 1970 non-proliferation pact, "and that will be the case also in the future."

Then he added: "That does not exclude the possibility that in the future new, additional duties in the form of treaty obligations will have to be included."

Schmidt said he expects wider exchanges on the nuclear pact to begin "very quickly" and officials in the Mondale party said the talks could begin as early as next week.

Carter has made reduction of nuclear arms and equipment a major emphasis of his foreign policy, and the West German-Brazilian deal, along with a similar planned transfer of nuclear technology from France to Pakistan, is regarded as a key test of his policy.

American officials called today's discussion "quite encouraging." "We made progress today," said one of Mondale's aides. But West German sources, while indicating that Bonn would avoid such deals in the future, cast doubt on the possibility of its taking the initiative in abrogating any part of the lucrative contract with Brazil.

Considerable emphasis was given here to reports in the Brazilian press that Carter's State Department appointees are discussing an American guarantee of nuclear fuel for Brazil if it gives up just the purchase of the West German equipment for enriching uranium and recycling nuclear fuel. Bonn officials suggested privately that they would have no objection to such a request from Brazil, which would allow them to complete the rest of the sale.

But the Brazilian deal is a potential bombshell for Schmidt at home. The $4.8 billion contract is the largest single export sale ever made by West Germany, the reward for some $7 billion invested in nuclear research in recent years. The deal to supply eight power stations plus a complete atomic fuel-processing system will produce some 10,000 new jobs here.

Only the technique for reprocessing used fuel is controversial: It yields plutonium, which can be used in making atomic bombs. The Americans and the West Germans disagree on the effectiveness of the controls imposed on the use of the reprocessed fuel.

Another disagreement exists in the governments' economic policies. Mondale said he had "urged the chancellor, as I will the prime minister of Japan, to pursue similarly stimulative packages" to the one Carter is about to send Congress.

The economists traveling with Mondale argue that only a coordinated effort by the three strongest countries in the non-Communist world can lift the international economy from the doldrums and help cure the rising unemployment and trade deficits in such countries as Britain and Italy—the next stops on Mondale's tour.

American officials calculate that the public-works program Schmidt outlined last week is only a quarter the relative size of the American and Japanese "stimulative packages." They also note that Schmidt is projecting only a $5 percent economic growth—a figure some economists consider too modest—and is planning to reduce his budget deficit by $3 billion even though West Germany's unemployment of more than 1 million is near a postwar high.

Bonn officials reply that their successful anti-inflation policies have contributed to the economic stability of Western Europe and note that West Germany is already making major loans and price-support contributions to other European Common Market countries. A Carter-sized stimulus program, they assert, could touch off an inflationary wage-price spiral destructive to all these countries.

The Vice President said Schmidt indicated that he is still "working on the size and timing" of his stimulus package, but Schmidt, speaking in English at their joint press conference, gave a different impression.

He said he was already "fully aware" of the viewpoint Mondale had expressed and had formulated his own program "in knowledge of what" Carter was recommending to Congress. Aides said later they doubt that there would be any change in the chancellor's thinking.

Despite such apparent differences, both Mondale and Schmidt went to great lengths to establish a cordial basis for future dealings.

Schmidt, who had made no secret of his preference for President Ford before the election, went beyond the normal diplomatic courtesies in welcoming the early visit from Carter's running mate.

The two men and their aides met for four hours this afternoon, an hour longer than scheduled. Tonight Mondale was the guest of honor at a banquet that Schmidt expanded from the original "working dinner" to a festive occasion at which the Vice President was introduced to a wide variety of West German leaders.

Last week Schmidt told The New York Times that Carter's inaugural speech was eloquent but "lacking in clear direction." Today he was beaming with pleasure when Mondale presented him a copy of the same speech, autographed by Carter.

Mr. BAKER. Mr. President, having discussed the facts that the nuclear genie is out of the bottle, that atom bombs are painted white, and that anybody can build one, I am reminded of a story that was told to me. A young fellow was flying me in a small plane in Tennessee through a thunderstorm, and I was sitting in the right-front seat watching the radar intently. He said, "Senator, why don't you turn off that radar, we are liable to scare ourselves." [Laughter.]

I rather think that is what we may do if we continue this conversation. But, unfortunately, it is true, Mr. President. This situation is a reality instead of a fiction.

We live in a nuclear world that has already proliferated, and we must try to keep it from proliferating any more than it has, and try to learn to live with that genie now that he is out of the bottle.

I commend all of those who participated in this debate, and I hope the Senate will not treat it casually but will try to produce the very best result it can deliberately, cautiously, and carefully.

I thank my colleagues. I yield the floor.

Mr. DOMENICI. Mr. President, I, too, commend those who have worked so diligently on S. 897.

I want to talk for just a few moments about the great concerns I have for what might happen, even with the bill in its present form, in the hope that we will generate some interest in making the bill better.

It is only in that context that I would like to make a little analysis that is my own in terms of what it does and what it does not do.

I said to my good friend from Illinois that I have heard him for many, many months talk about this issue as being one of the most serious the world faces, and I hope as I go through my own critique—where there are many questions in my mind—he will understand it is in that context that I, too, want to prevent some of the things he wants to prevent, but I am very worried about some of the effects of this bill in terms of that kind of goal.

I think it is fair to say that our present method of controlling nuclear exports badly needs revision. Our present nuclear export policy is in serious disarray and can be called a disaster area.

Major delays in granting export licenses have alienated long-time trading partners that have traditionally been our allies.

There have been attempts to renegotiate bilateral agreements while our Government was in some cases holding up the shipment of nuclear equipment which had been contracted for, needed and paid for.

Expensive delays have resulted in foreign customers that felt themselves almost in a position of being blackmailed into agreeing to conditions that were not there when they started their relationships with the United States, and they begin to feel they have no other choice than that which we dictate kind of unilaternally and ex post facto.

We are now seen or at least beginning to appear as a very unreliable supplier, and other nations are looking elsewhere for nuclear materials. I think that is a very important point because there is no exclusivity left in this area, and we certainly have lost ours.

This is costing us, if we were only concerned about export sales and jobs—that is not the whole issue—but if we were only talking about that, the condition that I have just described is costing us—as much as, in the last 4 years, $12 billion in sales.

Now, that is many thousands of jobs, and in an American economy and an international economy of the type we have today, that is not anything to be ignored.

On the other hand, I make it quite clear that I do not think when we are dealing in this area we are talking exclusively about economics, because we are talking about something very serious. If there were ways, to be sure, that what we wanted to do in these quick decisions we have made, and this disarray, that that was going to be effective, I might opt for taking the economic loss. But, as I say, we no longer have any kind of exclusivity.

Another point I want to stress is that the Nuclear Regulatory Commission—I think we all know that that Nuclear Regulatory Commission as an independent agency with the charges and respon-

sibilities given to it by Congress was long overdue when it was formed—but it, too, is now besieged with problems, and it is being asked to make decisions of profound significance not only with reference to things that happen in America but profound significance to our foreign policy in granting export licenses.

Several commissioners have indicated serious concern about the Nuclear Regulatory Commission's capability to fulfill this responsibility. On that score I have a letter—I will not read it at this point—which is to the distinguished subcommittee chairman, Senator CHURCH, from Commissioner Kennedy, with copies to Senators MCCLURE, PERCY, HART, and GLENN—in which that commissioner expresses far better than I could the statement I just made a while ago about the grave concern for their capability to fulfill this responsibility.

I regret to say that the bill before us, in its present form, will not make matters any better. It will in some areas, but in others it will make them worse.

I truly have great concern that if this bill is passed it will not accomplish the goals intended. I do not think the fact that a similar bill passed the House of Representatives means anything more than the two-House system in Congress works.

We have now had an opportunity to carefully examine this bill and the importance of it and, thus, the fact that it passed the other body should be nothing more than a starting point, in this Senator's opinion.

This bill mandates export procedures that are enormously complex, time-consuming, uncertain, and subject to what I believe are undue delays and litigation almost ad infinitum.

In my opinion, it opens the door to the importation of foreign nuclear wastes into the United States. I say that in my opinion it opens the door to the importation of nuclear wastes into the United States. I regret to say that we have a serious enough domestic problem without adding this serious complication.

My good friend and colleague, Senator SCHMITT, who was here a moment ago, could attest to the fact that just this morning a delegation from New Mexico met for well over an hour with the Secretary of Energy and others high in research in the Department of Energy to discuss just the problem of a temporary disposal over in New Mexico; and the terrible concerns, the uncertainty, the lack of a policy leads me to repeat that I do not favor a bill that opens the door to the importation of foreign nuclear wastes unless we have explored every avenue to make sure it is part of a plan that would work.

It thrusts the Nuclear Regulatory Commission even more into the making of foreign policy. The Nuclear Regulatory Commission is not equipped to do this nor should it since it is an independent regulatory agency only.

I have spoken to that a moment ago and, at this time, I ask unanimous consent that the letter of January 26, 1978, from Commissioner Kennedy to the Senators whom I described be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. NUCLEAR REGULATORY COMMISSION,
Washington, D.C., January 26, 1978.

HON. FRANK CHURCH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CHURCH: Since my testimony at your hearings in September, I have reexamined S. 897 in the light of the concerns you expressed at that time and am writing you to advise you of my further reflections.

There is growing concern within the Nuclear Regulatory Commission regarding the assessment of IAEA safeguards. Before it can issue an export license for nuclear fuel or a facility the Commission must find that issuance of the license would not be inimical to the common defense and security of the United States and this has been deemed to include assurances as to the implementation of adequate safeguards. Practically speaking, however, the Commission is not equipped to independently examine the adequacy of foreign safeguards, and must in practice accept the word of the Executive Branch as to their implementation and as to the foreign affairs implications of any export. The NRC's Office of Nuclear Material Safety and Safeguards has informed the Commission that it cannot reach independent conclusions on the effectiveness of international material control and accounting safeguards since it is unable to independently verify country-specific safeguards information.

Section 504 of H.R. 8638 as passed by the House of Representatives on September 28, 1977, merely says that IAEA safeguards "shall be applied," but does not say whether the Commission must independently determine whether those safeguards as applied are adequate. The Senate Committee report (95–467, October 3, 1977) accompanying S. 897, however, speaks of exports being "subject to adequate safeguards." (At page 15, emphasis supplied.) Where does this leave the Commission? The situation will be at the very least ambiguous and there likely will be calls for more directly obtained information as a basis for assessment. I fear that an impasse might develop. Should such an impasse arise I doubt that the Presidential override of NRC negative decisions provided for in S. 897 will be significant help. It would be difficult in all but cases of the most overwhelming importance to foreign policy for the President to rely on that authority.

If the NRC is to responsibly perform its function in nuclear export licensing, I believe that it should accept safeguards regimes negotiated with our nuclear trading partners including the IAEA regimes which we have agreed by treaty should be applied. Moreover, I believe that the assessment of the adequacy of safeguards implementation should be that provided by the Executive Branch. A clear statement to this effect by the Congress is in my view essential if the concerns I express are to be avoided.

I believe that we will maximize our influence in the nonproliferation area only if other nations perceive us as a reliable and predictable supplier of nuclear fuels and equipment. Unfortunately, many representatives of recipient countries with whom I have spoken find us all too predictable, but in the wrong sense. What seems to be predictable is that we will often approve licenses at the last possible moment only after expressions of urgency by foreign nations.

I would like to reiterate here what I said before the Senate Committee on Governmental Affairs last May:

"Energy independence is not the exclusive quest of the United States. Many nations, like our own, seek an uninterrupted source of supply to meet their energy needs. And many of them must rely to a much greater extent than we on fuel imports to meet those needs. Certainly our recent experience in dealing with foreign governments on nonproliferation matters confirms this hypothesis. The widespread international concern which has recently been expressed reflects a deeply-rooted sentiment reflecting the desire of those nations to eliminate or at least significantly decrease their dependence on foreign fuel sources. If these nations perceive the United States as potentially a capricious supplier, they can be expected to turn to other suppliers or, if they have the capacity, to develop their own resources. The consequence can only be a level of United States influence over the nonproliferation policy of these nations correspondingly diminished at the very least and possibly forfeited entirely."

It is not only our nonproliferation goals which can suffer. If export licensing continues in fits of stopping, starting, and stalling, the United States will alienate countries with which it has had its closest and most supportive relationships.

The bill contains provisions for interagency consultations, nonproliferation assessment statements, a Presidential override of NRC negative decisions, and Congressional review of the Presidential override. This multitiered review process for nuclear exports will provide numerous opportunities for mischievous delay in reaching export licensing decisions. Whether any of these provisions provides opportunity for delaying litigation is unclear. What is clear is that the opportunities for delay and thus interference with an orderly pursuit of the President's sound nonproliferation policy will be multiplied.

The nuclear export process is going to be faced with ever increasing questions concerning the nature of our nonproliferation policy and the controls which we will be exerting on our exports. I believe that Congress must provide a clear legislative mandate and specific direction to this agency, unambiguously describing the requirements which it must satisfy independently and those for which it should rely upon the Executive Branch. Otherwise, there will be increasing delays and escalating interference with an essential element of nonproliferation policy and United States commerce.

Amendments offered by Senator McClure help resolve some of the difficulties to which I have alluded. But serious problems will remain if the NRC continues to be called upon to make "independent" decisions on safeguards abroad and foreign affairs matters when it is not equipped to do either. Without a clear statement from the Congress, ambiquity of roles will persist, and the NRC thus will not be in a position to contribute effectively to achieving U.S. nonproliferation policy.

Sincerely,

RICHARD T. KENNEDY,
Commissioner.

Mr. DOMENICI. Continuing on with some of the things I think this bill does, it virtually bans reprocessing by other nations that trade with us, without offering any alternatives or incentives. I understand the serious debate, the very bona fide differences of opinion that exists in this country with reference to reprocessing. I, for one, believe it is inevitable. On the other hand, the point I make is that my understanding of this bill is it would virtually ban reprocessing by other nations that trade with us, and then I stress, without offering any alternatives or incentives.

As I understand it, it would impose some very onerous criteria and conditions

upon even our most trusted friends which no other supplier nation requires; and I might add with no assurance that those other nations which are entering the arena might make similar requirements in the foreseeable future.

It gives no preference to signatories to the NPT. I think that should be analyzed.

It creates additional uncertainty by a requirement that Presidential exemptions be reviewed by Congress. I understand Congress' continual and almost institutional desire to be involved, but I merely state that, as I understand it, an additional uncertainty is created for Presidential exemptions which might otherwise have answered many of the questions I have raised, because of the review by Congress.

By requiring an annual review for more new criteria, I think it threatens almost all potential customers with the possibility of a year-by-year additional scenario of changes, some of which might be arbitrary, or at least so perceived, in export licensing requirements. Certainty is certainly missing from the process as we look at that part.

I believe it ignores our responsibility, to some extent, to fulfill existing commitments by insisting on renegotiation within a fixed period of time.

Nuclear exports are important to the United States. I do not think anyone denies that. I have already stated my views on that subject. I am sure Senator BAKER, in referring to the genie being out of the bottle, has done it better than I could. The fact is that for every reactor we do not produce, more than 30,000 man-years of employment are lost, and our balance of payments is impacted by at least $350 million. I have seen estimates, I believe by ERDA, of a potential export market of $100 billion by the end of this century. Each reactor contains 100 tons of steel, costing some $66 million.

Let me repeat here, to make sure once again I am understood, that I have said it is my belief that we are no longer in a position where we can say that if we do not do these things, no one else will, that if we do not sell, and if we impose unilateral conditions that we think are right, everyone else in the world will follow, because I think experience in that respect is the proof of the pudding, and that is not happening.

Therefore, I think it is relevant that if we expect to have an influence in this area, we take into consideration the impact on the economics of our Nation. The industrial base of our Nation remains heavily dependent on exports. Three billion dollars in export business is currently pending, representing approximately 19,600 jobs spread over 5 years. This business will be lost in the next 12 to 18 months unless U.S. credibility can rapidly be restored.

Mr. President, I repeat, if this business was not going to be picked up by some other country, it would be another story. But it will be. I believe the evidence is rampant and conclusive that it will be picked up by other countries.

Also at stake is the projected $7 billion in foreign payments for uranium enrichment for 1980 to 1985. The loss of this business will add 50 percent to the cost of domestic enrichment, due to the direct relationship between enriching costs and capacity utilization.

There are other reasons for the United States continuing to be an exporter of nuclear materials. I have stated some of them. It is obvious that the world is going nuclear, regardless of what we do. It is obvious that the world is moving in that direction. I believe there is more potential for safety, as the world goes nuclear, with us as a full partner than with us sitting on the sidelines. A U.S. moratorium on exports would merely isolate us from this market. Many countries that are deficient in fossil fuel of their own recognize that nuclear power is vitally important for their future.

We are no longer in a position to unilaterally impose conditions on the world nuclear trade. I make that statement with certainty, though with regret. The United States is no longer in a position to unilaterally impose conditions on the world nuclear trade. I wish it were not so, but we no longer have a technical monopoly on any part of the nuclear fuel cycle. Many countries sell reactors. At least 14 are involved with reprocessing the back end of the fuel cycle. Some of these are already marketing their capability on a commercial scale. At least eight nations can create enriched uranium. Others are developing this capability.

Nonproliferation concerns, Mr. President, are very real. I shall have more to say, as the debate and amendments move along, on this matter later. For now, I would just like to make this important point:

Nonproliferation is a top priority concern for all of us. All reasonable Americans want to avoid the nightmare possibility of nuclear weapons in the hands of countries or terrorists who will not hesitate to use them to achieve their objectives. Our only disagreement here is over the most effective means to minimize the proliferation risk.

It is my contention, which is shared by many of my colleagues here, that the way to minimize proliferation is through international negotiation and agreement based on mutual trust and respect, not by unilateral and precipitous action by the United States. The Nuclear Non-Proliferation Treaty is one outstanding example of what can be achieved by international negotiation. In this, more than 100 countries voluntarily renounced any intention to develop nuclear weapons. This is really a remarkable achievement—and may be the first such voluntary renunciation in history.

It should be kept in mind that no country has ever developed a weapons system based on the use of reactor-grade plutonium. This is not to minimize the seriousness of the problem, but to put it somewhat more in perspective.

The decision by other countries to build nuclear weapons is a political rather than a technical one. The technology and scientific and technical base are available to many advanced nations. Only a deliberate political choice separates them from moving ahead. A strategy of nonproliferation based solely on denial of equipment and technology will at most only delay, not prohibit this possibility that political action will be taken to move some country in the direction I have just described.

The U.S. unilateral actions driving customers elsewhere will actually work to encourage proliferation. Not only will other nations buy elsewhere, and the United States lose its ability to influence international standards, but other nations will move to develop their own enrichment and reprocessing capabilities in order to assure a supply of nuclear fuel for their reactors. Such nationally owned facilities will greatly increase the proliferation risk. In addition, by failing to fulfill our responsibilities under the NPT to provide assistance to those countries endeavoring to develop a peaceful nuclear program, we will be providing those nonweapon signatories with every justification for ignoring their commitments under this treaty.

Mr. President, I am certain that in the next few days amendments will be offered to correct some of the deficiencies that I see. Certainly many Senators have amendments. I have attempted to analyze these deficiencies, and hope that in the next few days we will correct as many of them as possible.

Mr. President, I yield the floor.

Mr. PERCY. Mr. President, just a brief comment in reply to the statement of our distinguished colleague.

The Senator's statement reflects the concerns of many other Senators that have been expressed here today. Certainly one of the concerns that the Senator from Idaho (Mr. MCCLURE) has mentioned to us frequently is the possibility of undue delay, and this would be totally contrary to everything we are trying to accomplish.

As our distinguished colleague knows, the Governmental Affairs Committee is trying to address itself to regulatory reform, where we shall try to deal directly with the problem of excessive delay. We do not want to add more delay. An amendment that the distinguished Senator from Idaho (Mr. MCCLURE) has discussed with managers of the bill would expedite the decisionmaking process and insure that there would be no undue delays.

I assure my distinguished colleague that the floor managers of the bill are aware of this concern. We feel that the present bill, plus the amendments that we agreed to accept, will accommodate that particular provision that concerns my colleague.

Mr. THURMOND. Mr. President, I rise to speak on S. 897.

An important factor behind S. 897, the Nuclear Non-Proliferation Act, is its effect on the competitive position of the U.S. suppliers in the world market. This competitive position is important, first and foremost, because our ability to influence global nonproliferation policies will depend upon our overall participation in the nuclear marketplace throughout the world. Second, nuclear exports can offer substantial benefits to the U.S. economy in terms of the creation of millions of jobs and the reduction in our balance-of-payments deficit.

On the first point, I am deeply concerned about the rapidly declining influence of the United States in the international nuclear community. This has been primarily due to U.S. positions in direct opposition to those of a majority of other nations, and to the rapidly declining U.S. market share of nuclear reactor sales resulting from uncertainty of U.S. policy.

On the second point, Mr. President, numerous foreign officials have responded negatively to the President's proposal for halting the breeder and reprocessing technologies. These countries are also concerned with nonproliferation, but they are optimistic that international solutions can best provide the mechanism for protection against proliferation.

Last year our country had a record balance of payment deficit of nearly $27 billion, primarily due to payments for energy imports which were not offset by similar exports. Efforts to stem this outflow of payments and the resulting decline of the dollar are leading to higher interest rates, which tend to act as a brake on the economy. The slower economic growth that results from all this necessarily leads to higher unemployment. I am greatly concerned, Mr. President, that S. 897 would further exacerbate the decline in the U.S. market share for nuclear exports, a vital element in our overall export program.

Until recently, U.S. suppliers dominated the free world market in nuclear power plant equipment—capturing over 90 percent of the market prior to 1973. However, since 1973 the U.S. market share has greatly eroded—plummeting to some 40 percent, largely as the result of the inability of our Government to develop a coherent and internationally workable nuclear export policy.

The economic loss to American workers and industries is staggering. To use only one substantial example: The typical exported nuclear power plant requires the purchase in the United States of at least 100,000 tons of steel. This in turn represents an estimated 1,000 jobs for 5 years in the steel and related industries alone.

Each exported nuclear power plant represents a favorable contribution of approximately $500,000,000 to our Nation's balance of trade.

Indeed, Mr. President, it is conservatively estimated that during the next 18 months there are 8 to 10 orders in five nations that the United States could reasonably expect to obtain.

The export value of these potential orders is between $2.5 and $3 billion.

They would represent between 17,200 and 19,600 jobs in the United States for each year of the 5-year period.

Without workable legislation establishing clear ground rules for the export of nuclear powerplants by our Nation, the United States will lose these sales to our competitors in West Germany and France.

Because of concern lest U.S. exports possibly be misused by a nation that might seek to develop a nuclear weapon, U.S. nuclear export policy since 1973 has been in constant flux. Mr. President, this inability to fashion an export policy has resulted in substantial delays in obtaining export licenses for equipment ordered from American companies—in some cases delays measuring in years—and has led potential customers to be extremely hesitant to place any new orders with American firms.

No foreign orders have been placed with U.S. companies in the last 2 years. With confidence lost in the United States as a dependable supplier, the export business, which is still quite healthy, has been shifted to companies in France and West Germany. Both of these nations now have the full industrial capability to provide any of the equipment and material that can be purchased from America and offer such equipment under terms and procedures far more favorable and certain than those offered by our Government. Beyond the economic and job loss to America that this shift has produced, there has also passed to these other suppliers the ability to influence, to monitor, and to alter the nuclear programs in the importing countries.

Mr. President, as presently written, S. 897 would continue to keep the United States out of competition for foreign nuclear orders, which has been the economic backbone of the industry in a period when domestic orders have not been available because our domestic energy policy is being redefined. Because of the importance of the above factors, it is necessary, Mr. President, that any legislation that the Senate might pass dealing with nonproliferation and nuclear exports will create a condition of certainty with respect to U.S. policies and procedures among our foreign customers, and will not take a unilateral approach that the rest of the world rejects. I am deeply concerned that S. 897, the Nuclear Non-Proliferation Act of 1978, runs directly contrary to these objectives, and thus will only prove deleterious to our ability to control nonproliferation.

TIME-LIMITATION AGREEMENT—S. 897

Mr. ROBERT C. BYRD. Mr. President, I am about to propound a unanimous-consent request. This request has been worked out by Senator GLENN after consultations with Senator PERCY, Senator HOLLINGS, Senator MCCLURE, and with the minority leader and other Senators. It would become effective on Monday next at 11 a.m. and would continue beginning at 10 a.m. on Tuesday next.

The unanimous request is as follows:

Provided that there be 4 hours for debate on the bill to be equally divided between Mr. GLENN and Mr. PERCY; that there be a time limitation on any amendment of 1 hour, a time limitation on any amendment to an amendment of ½ hour, a time limitation on debatable motions, appeals, and points of order if such are submitted to the Senate for discussion of 20 minutes; provided further, that there be a time limitation on what is referred to as a "spent fuel" amendment which will be offered by Mr. MCCLURE, the time to begin running on that amendment to be at 1:30 p.m. on Tuesday next, with a vote up or down to occur on that amendment no later than 4:30 p.m. on Tuesday next.

Ordered further, that upon the disposition of the "spent fuel" amendment there be 1 hour of debate on the bill to be equally divided between Mr. GLENN and Mr. PERCY, and that a vote then occur on the bill upon the expiration of that hour or upon the times having been yielded back; provided, further, that the agreement be in the usual form; and with the further proviso that if the agreement is entered into, there will be no session of the Senate tomorrow.

Mr. BAKER. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER (continuing). And I will not object, I am happy the majority leader has propounded this request, which has been in process of negotiation for most of the day today, and I want to take this opportunity to express my appreciation to the Senator from Ohio (Mr. GLENN), the Senator from Illinois (Mr. PERCY), and the Senator from Idaho (Mr. MCCLURE) for giving enough in each case to accommodate the schedule of the Senate. I think it is a good arrangement, and I understand it is acceptable to our side and, particularly, to Senator MCCLURE, and I have no objection.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, this would mean, the agreement having been entered into in the usual form, that there would be no nongermane amendments eligible to be called up; and it would also mean that the provision about control of time would be in accordance with the usual form, which would mean on amendments the author of the amendment would have control of half the time, Mr. GLENN, being the manager of the bill, would control the other half, except in the event Mr. GLENN supported the amendment in which case the time in opposition to the amendment would be under the control of the minority leader or his designee.

Mr. President, I add the further proviso that on Monday no rollcall votes occur, even though ordered, prior to the hour of 2 p.m.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, anent the unanimous consent agreement in respect to the unfinished business, I ask unanimous consent that paragraph 3 of rule 12 be waived.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I again tender my thanks to the distinguished Senator from Ohio (Mr. GLENN) who has worked long and hard in an effort to reach this agreement, and I also thank Mr. PERCY, the ranking member, for his efforts in this regard. I thank the minority leader, and I thank Mr. MCCLURE and all others who have contributed to this agreement.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. MCCLURE. Mr. President, there are 19 amendments on which there is agreement, and I would like to call up

those 19 amendments and ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENTS NOS. 1582, 1584, 1585, 1586, 1588, 1590, 1591, 1592, 1593, 1596, 1598, 1599, 1600, 1601, 1605, 1606, 1608, 1610, and 1611

Mr. McCLURE. Mr. President, the amendments are printed amendments numbered 1582, 1584, 1585, 1586, 1588, 1590, 1591, 1592, 1593, 1596, 1598, 1599, 1600, 1602, 1605, 1606, 1608, 1610, and 1611.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCLURE. Mr. President, as I indicated, these printed amendments have been agreed upon, and I think both of the managers of the bill have agreed to accept them. I ask unanimous consent that the reading of the amendments be dispensed with. And I move that they be adopted en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 104, line 15, amend subsection 4(a)(5) to read " 'physical security measures' means measures to reasonably insure that source or special nuclear material will only be used for authorized purposes and to prevent theft and sabotage;".

On page 110, line 5, after "committed" insert "to continued strong support for the principles of the Treaty on the Non-Proliferation of Nuclear Weapons,".

On page 112, line 1, through line 16, strike section 203.

On page 114, line 20, strike "TECHNOLOGY TRANSFERS".

On page 115, line 2, after the comma, insert "including a specific authorization in a subsequent arrangement under section 303,".

On page 115, line 15, strike the first period and insert in lieu thereof ": *Provided further*, That the export of component parts as defined in subsection 11 v.(2) or 11 cc.(2) shall be governed by sections 109 and 126 of this Act.".

On page 115, line 17, insert the following immediately after "SEC. 303." and make confirming changes wherever necessary in section 303: "Chapter 11 of the 1954 Act, as amended by sections 304, 305, 306, 307, and 308, is further amended by adding at the end thereof the following: "SEC. 131. SUBSEQUENT ARRANGEMENTS.—".

On page 116, beginning on line 24, delete "shall include—" and insert in lieu thereof "means arrangement entered into by any agency or department of the United States Government with respect to cooperation with any nation or group of nations (but not purely private or domestic arrangements) involving—".

On page 117, line 1, delete "United States Government".

On page 117, line 9, insert the following immediately after "Act" "which is not subject to the procedures set forth in section 111(b), section 126, or section 109(b)".

On page 164, line 13, insert the following immediately after "Act": "or arrangements pursuant thereto".

On page 115, line 23, after "Director" insert ", Commission".

On page 116, lines 6 and 7, strike "After consultation with the Commission, notice" and insert in lieu thereof "Notice".

On page 118, line 7, after the period, insert the following new subsection,

(4) All other statutory requirements under other sections of this Act for the approval or conduct of any arrangement subject to this subsection shall continue to apply and any other such requirements for prior approval or conditions for entering such arrangements shall also be satisfied before the arrangement takes effect pursuant to subsection (a)(1).

On page 120, line 13, insert the following immediately after "special nuclear material," "including distributions of any material by the Department of Energy under section 54, 64, or 82, for which a license is required or requested, and".

On page 120, beginning on line 15, delete "and" and all that follows through "Energy," on line 19.

On page 120, line 22, delete "export, exemption, or distribution" and insert in lieu thereof "export or exemption".

On page 121, line 8, delete "license," and insert in lieu thereof "license or".

On page 121, delete line 9 insert in lieu thereof "exemption will".

On page 121, line 16, delete "license," and insert in lieu thereof "license or".

On page 121, delete line 17 and insert in lieu thereof "the exemption would".

On page 121, line 25, delete "or distribution".

On page 124, delete line 1 and delete "and" in line 2.

On page 122, line 9, and on page 140, line 8, strike "the evidence" and insert in lieu thereof "other information available to the Federal Government, including the Commission".

On page 123, line 23, strike the period and insert in lieu thereof ": *And additionally provided*, That the Commission is authorized to (1) make a single finding under this subsection for more than a single application or request, where the applications or requests involve exports to the same country, in the same general time frame, of similar significance for nuclear explosive purposes and under reasonably similar circumstance and (2) make a finding under this subsection that there is no material changed circumstances associated with a new application or request from those existing at the time of the last application or request for an export to the same country, where the prior application or request was approved by the Commission using all applicable procedures of this section, and such finding of no material changed circumstance shall be deemed to satisfy the requirement of this paragraph for finding of the Commission. The decision not to make any such finding in lieu of the findings which would otherwise be required to be made under this paragraph shall not be subject to judicial review.".

On page 124, line 3, strike "that the application or request therefor is acceptable, and".

On page 126, insert the following immediately after "Commission" on line 15: ": *Provided further*, That until the regulations required by this subsection have been promulgated, the Commission shall implement the provisions of this Act under temporary procedures established by the Commission".

On page 140, line 20, before the period, insert: ": *Provided*, That a specific license shall not be required for an export pursuant to this section if the component, item or substance is covered by a facility license issued pursuant to section 126 of this Act".

On page 141, line 23, insert the following:

(d) The amendments to section 109 of the 1954 Act made by this section shall not affect the approval of exports contracted for prior to November 1, 1977, which are made within one year of the date of enactment of such amendments.

On page 154, insert the following between lines 13 and 14:

(d) Nothing in this section shall be interpreted to require international control or supervision of any United States military activities.

On page 164, line 14, after the period, insert

(c) Except where otherwise provided, the provisions of this Act shall take effect immediately upon enactment regardless of any requirement for the promulgation of regulations to implement such provisions.

On page 117, line 20, after "to" insert "all".

On page 118, line 2, after "material" insert ", and additionally, to the maximum extent feasible, will attempt to expedite such consideration".

Mr. GLENN. I have no objection to that. The amendments that were read are correct, and the numbers that were read are correct, and we do accept those amendments. They are worked out by staff and by the principals involved, and we are happy to accept them en bloc.

Mr. PERCY. Mr. President, I would just like to say we not only accept them but both Senator GLENN and I—I know I speak for him also—say in some respects these amendments have clarified certain ambiguities, have insured the expediting, and have strengthened the process of having us an assured fuel source, and we very much appreciate the work done by our distinguished colleague from Idaho.

The PRESIDING OFFICER. The question is on agreeing to these amendments en bloc.

The amendments were agreed to en bloc.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendments, en bloc, were agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HART. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ROBERT C. BYRD). Without objection, it is so ordered.

UP AMENDMENT NO. 1174

Mr. HART. Mr. President, I send an amendment to the desk and ask unanimous consent that it be considered in order.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. HART) proposes an unprinted amendment numbered 1174:

On page 147, line 12, after "the Secretary of Energy," insert "the Nuclear Regulatory Commission,".

The PRESIDING OFFICER. Is there objection to the calling up of this amendment at this time?

The Chair hears none. The Senator may proceed.

Mr. HART. Mr. President, very briefly, this amendment would insure that the views of the independent Nuclear Regulatory Commission would also be

presented to the President—along with those of the Secretary of State, Secretary of Energy, and the Director of the Arms Control and Disarmament—in conjunction with his consideration of new and revised agreements for civil nuclear cooperation with foreign nations.

Under S. 897, although the NRC is to be consulted, its views need not be formally transmitted to the President. In my opinion the NRC has an important function in assessing the safeguards aspects of proposed agreements. Therefore, if the views of all other agencies involved are to be transmitted to the President, the NRC should not be excluded. I believe the amendment is acceptable to the floor manager of the bill, and I urge my colleagues to support the amendment.

Mr. GLENN. Mr. President, I am happy to accept this amendment. I believe that it is a technical amendment that insures that NRC's views will be transmitted to the President along with those of the other responsible agencies.

When the Nuclear Regulatory Commission was established, it was established as an agency responsible to both the executive and the legislative branches of the Government. I think the amendment proposed by the Senator from Colorado will help them carry out the mandate they were given by Congress, and I am glad to accept the amendment.

Mr. PERCY. Mr. President, the amendment is fully acceptable to us.

Mr. HART. I thank the Senator from Ohio and the Senator from Indiana.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado.

The amendment was agreed to.

Mr. HART. I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I ask unanimous consent to have printed in the RECORD at this point an exchange of correspondence between myself and Senator PERCY and the Department of State, involving areas of agreement concerning amendments that the Senate has agreed to in this bill. I think putting this correspondence in the RECORD at this point will mean it will be published tomorrow and will give Senators and other interested parties and friends an opportunity to review the matter over the weekend. I think it is appropriate that both of these letters be printed in the RECORD at this point, and I ask unanimous consent to that effect.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
February 2, 1978.

Hon. CYRUS VANCE,
Secretary, Department of State,
Washington, D.C.

DEAR SECRETARY VANCE: It is our understanding that an agreement has been reached on a number of issues relating to S. 897, the Nuclear Non-Proliferation Act.

As the floor managers of the bill, we are prepared to support an amendment to section 305 to delete the references to prior U.S. approval of the retransfer or reprocessing of previous exports from paragraphs 4 and 5 of section 127 of the 1954 Act (see attachment 1) in recognition of the concerns raised in Assistant Secretary Bennet's letter of January 26, 1978 to Senator Sparkman. In addition, we shall refrain from offering a compensating amendment to require such controls in all new and amended agreements for cooperation under section 401 or an amendment to retain such criteria in section 305 for those nations for which we do have controls on previous exports, if certain other provisions are added to the bill.

Specifically, we understand that the Administration will support an amendment to section 404(a) to clarify the U.S. position with respect to existing rights under agreements for cooperation and to direct the President to vigorously seek to obtain controls over previous exports where we do not now have such rights (see attachment 2). In addition, we anticipate Administration support for an amendment to section 304 to ensure that the NRC will receive all needed information from the Executive Branch regarding the extent to which each export recipient has adhered to the terms of its agreement for cooperation with the U.S. (see attachment 3). Mutual agreement was also reached on an amendment to clarify a technical ambiguity in the language of section 30 concerning sanctions in the event of a material violation of an agreement for cooperation (see attachment 4).

Finally, we have been advised that the Administration has reconsidered its position on two points discussed in the January 26th letter. First, we understand that the Administration has withdrawn its proposed revision of McClure amendment #1607, and is satisfied that the above agreement resolves its concerns on retroactivity in section 305. We also understand that the Administration no longer proposes a revision of McClure amendment #1595, but instead opposes that amendment and any other amendment to restrict judicial review of findings under the Act.

We have also been advised that, consistent with Enclosure 4 of the January 26th letter, the Executive Branch is still reviewing its position on National Environmental Policy Act requirements for foreign jurisdictions and opposes all amendments on that subject. Furthermore, we look forward to a reiteration of the Administration's support for an independent NRC role in the nuclear export licensing process.

Sincerely,

CHARLES H. PERCY,
JOHN GLENN,
U.S. Senators.

DEPARTMENT OF STATE,
Washington, D.C.

Hon. JOHN GLENN,
Committee on Governmental Affairs,
U.S. Senate.

DEAR SENATOR GLENN: The Secretary has asked that I respond to your letter of February 2, 1978, concerning the Nuclear Non-Proliferation Act. The Administration concurs in your understanding of the agreement which has been reached on several issues relating to S. 897, the Nuclear Non-Proliferation Act.

The Administration's concerns on retroactivity in Section 305 of the bill would be satisfied by the series of amendments which you describe in your letter. Specifically, we understand that amendments will be offered to (1) delete the references in paragraphs 4 and 5 of Section 127 of the 1954 Act to prior U.S. approval of the retransfer or reprocessing of previous exports; (2) amend Section 404 (a) to clarify the U.S. position with respect to existing rights under agreements for cooperation and to direct the President to vigorously seek to obtain controls over previous exports where we do not now have such rights; and, (3) ensure that the NRC will receive all needed information from the Executive Branch regarding the extent to which each export recipient has adhered to the terms of its agreement for cooperation with the U.S. The Administration supports these amendments (see Attachments 1 through 3), and withdraws its proposed revision of McClure Amendment 1607.

The Administration also understands that, as part of this agreement, the floor managers will not offer or support an amendment to require prior approval rights on previous exports in new and amended agreements under Section 401 or an amendment to retain an export licensing criterion to that effect in Section 305 for those nations with which we do have controls on previous exports.

The Administration supports the amendment to which you refer to clarify a technical ambiguity in the language of Section 307 concerning sanctions in the event of a material violation of an agreement for cooperation (see Attachment 4).

In addition to withdrawing its proposed revision of McClure Amendment 1607 in the context of the above agreement, the Administration has also reconsidered its position with respect to McClure Amendment 1595. The Administration sees no need for any amendment to limit judicial review of findings under this legislation and opposes any amendment for that purpose, including Amendment 1595.

The Executive Branch is still reviewing its position on National Environmental Policy Act requirements for foreign jurisdictions. We do not believe that S. 897 is the appropriate vehicle to decide this issue, and would, therefore, oppose any amendments on this subject.

Finally, we would like to take this opportunity to reiterate the Administration's support for the independent role of the NRC in the nuclear export licensing process which is embodied in S. 897, as reported.

If the amendments set forth in this letter and the remaining amendments suggested in my letter of January 26 to Senator Sparkman are adopted, the Administration strongly supports passage of S. 897, as reported. We look forward to prompt enactment of this vital legislation.

The Office of Management and Budget advises that from the standpoint of the Administration's program, there is no objection to the submission of this report.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

ATTACHMENT No. 1

AMENDMENT

On page 128, beginning on line 2, delete ", no such materials or facilities previously exported and subject to the applicable agreement for cooperation,".

On page 128, beginning on line 14, delete "or previously exported and subject to the applicable agreement for cooperation".

EXPLANATION

This amendment deletes the references in Section 305 of S. 897 (Phase I licensing criteria) to prior U.S. approval of the reprocessing or retransfer of previous exports. As explained in Enclosure 5 of Assistant Secretary Bennet's January 26, 1978 letter to Senator Sparkman, it has come to the attention of the Administration and the Congress since S. 897 was reported from committee that these provisions would bar exports to Canada, EURATOM, and the IAEA since those agreements for cooperation do not contain such controls with respect to certain previous exports, and it will be difficult to obtain retroactive application of these controls in all three of these cases.

ATTACHMENT NO. 2

AMENDMENT

On page 154, line 20, insert the following immediately after the period:

"To the extent that an agreement for cooperation in effect on the date of enactment of this Act with a cooperating party contains provisions equivalent to any or all of the criteria set forth in Section 127 of the 1954 Act with respect to materials and equipment transferred pursuant thereto or with respect to any special nuclear material used in or produced through the use of any such material or equipment, any renegotiated agreement with that cooperating party shall continue to contain an equivalent provision with respect to such transferred materials and equipment and such special nuclear material. To the extent that an agreement for cooperation in effect on the date of enactment of this Act with a cooperating party does not contain provisions with respect to any nuclear materials and equipment which have previously been transferred under an agreement for cooperation with the United States and which are under the jurisdiction or control of the cooperating party and with respect to any special nuclear material which is used in or produced through the use thereof and which is under the jurisdiction or control of the cooperating party, which are equivalent to any or all of those required for new and amended agreements for cooperation under Section 123 a. of the 1954 Act, the President shall vigorously seek to obtain the application of such provisions with respect to such nuclear materials and equipment and such special nuclear material. Nothing in this Act or in the 1954 Act shall be deemed to relinquish any rights which the U.S. may have under any agreement for cooperation in force on the date of enactment of this Act.".

EXPLANATION

The first sentence of this amendment will ensure that no controls comparable to those of the Phase I licensing criteria which we already have under an existing agreement for cooperation will be relinquished during renegotiation of that agreement. The second sentence expresses the strong desire of the Congress for the President to seek vigorously to obtain retrospective application of the requirements for new and amended agreements to strengthen the barriers against the nonpeaceful use of any nuclear material or equipment which has been exported by the United States. The third sentence ensures that this bill will not be misconstrued as relinquishing any existing non-proliferation controls.

ATTACHMENT NO. 3

AMENDMENT

On page 121, line 5, delete the period after "met" and insert in lieu thereof the following: "and the extent to which the cooperating party has adhered to the provisions of the applicable agreement for cooperation."

EXPLANATION

This amendment, together with the general requirement for the State Department to provide information to the NRC on page 122 of the bill, will ensure that the NRC will receive all needed information from the Executive Branch regarding the extent to which each export recipient has adhered to the terms of its agreement for cooperation with the U.S. This information will be especially relevant in the NRC's consideration of whether the statutory licensing criteria will be met with respect to proposed exports.

ATTACHMENT NO. 4

AMENDMENT

On page 133, lines 23 and 24, delete "any guarantee it has given under".

EXPLANATION

This is a technical amendment to clarify the original intent of new section 129a. (2) (A) of the Atomic Energy Act of 1954 that sanctions should be applied in the event of a material violation of any of the provisions of an agreement for cooperation with the U.S., not just those provisions which are referred to as "guarantees."

Mr. CHURCH. Mr. President, the Committee on Energy and Natural Resources, upon review of S. 1432, the President's nonproliferation bill which was sent to the Congress last spring, was concerned about the possible effects of the bill on the domestic nuclear energy program and on the foreign nuclear energy programs. Hence, the committee sought rereferral of the President's bill and the committee was granted jurisdiction over a limited number of provisions of the bill which was jointly referred to the Governmental Affairs and Foreign Relations Committees.

The Subcommittee on Energy Research and Development held a public hearing on June 10, 1977, to review the provisions of the entire bill to be able to assess the impact of the provisions beyond its jurisdiction upon the provisions within the Energy Committee's jurisdiction. When the Governmental Affairs Committee chose to report an amendment in the nature of a substitute for S. 897, the Energy Committee again sought referral of those portions of that bill which fell within the committee's jurisdiction.

Under this referral agreement, the Committee on Energy and Natural Resources had jurisdiction over only sections 102, 103, 104, 105, 202, 501, 502, and 503 of the bill, S. 897, as reported from the Committee on Governmental Affairs. The Subcommittee on Energy Research and Development held 2 days of hearings on this bill on September 13 and 14, 1977, in addition to the day of hearings on S. 1432. In order to understand the interrelationship of the sections of this bill before the committee with the rest of the bill, as well as with S. 1432, the committee witnesses were asked to provide comment on the entire text of S. 897 as well as to compare it to S. 1432.

The committee witnesses on September 13, included:

Mr. Robert W. Fri, Acting Administrator, Energy Research and Development Administration;

Mr. Joseph S. Nye, Deputy to the Undersecretary, Department of State; and,

Mr. Spurgeon Keeny, Deputy Director, Arms Control and Disarmament Agency.

The committee witnesses on September 14, were:

Dr. Joseph Hendrie, Chairman, Dr. Victor Gilinsky, Commissioner, Mr. Richard T. Kennedy, Commissioner, and Mr. Peter Bradford, Commissioner, Nuclear Regulatory Commission;

Dr. Gerald Tape, former Commissioner, Atomic Energy Commission and past U.S. representative to the International Atomic Energy Agency; and,

Mr. George J. Stathakis, Chairman, Committee on Nuclear Export Policy, Atomic Industrial Forum.

As part of the administration's testimony, the committee received a detailed critique of S. 897, as reported by the Committee on Governmental Affairs, pointing out numerous problems with the bill. The nongovernmental witnesses expressed grave concerns about the potential negative impact of the bill on nonproliferation objectives, foreign policy beyond the area of nonproliferation, and international trade in nuclear fuels and technology. The testimony demonstrated that the bill did not provide sufficient emphasis on insuring that the United States would license nuclear exports in a prompt and expeditious manner to countries which agreed to make revisions in existing agreements for cooperation, and to accept our nonproliferation criteria and conditions on the use of nuclear exports. The witnesses' testimony sharply criticized title III, which establishes new, more stringent export procedures and criteria, and title IV, which calls for renegotiation of all existing agreements for cooperation and for negotiation of all new agreements for cooperation in a manner to obtain stronger nonproliferation commitments. Concern was expressed with regard to the wording of numerous provisions in these titles with regard to the large number of subjective judgments, determinations, and findings to be rendered by the Federal agencies. This testimony also suggested that these administrative actions offer significant opportunity for litigation by third parties with resulting delay and uncertainty for foreign countries.

Even though the Committee on Energy and Natural Resources did not have jurisdiction over titles III and IV, several committee members were concerned that the effect of these titles, as reported by the Committee on Governmental Affairs, would be to seriously undermine the intent of those sections in title I which were intended to make the United States an insured supplier of uranium enrichment services and nuclear technology for those nations which adhere to our nonproliferation policy.

Based on suggestions made in testimony before it, the committee voted to amend section 102 by adding the following:

Further the Administrator as well as the Nuclear Regulatory Commission, the Secretary of State, and the Director of the Arms Control and Disarmament Agency are directed to establish and implement procedures which will ensure to the maximum extent feasible, consistent with this Act, predictable processing of subsequent arrangements and export licenses with minimum time delay.

The committee believes that this amendment will help to eliminate bureaucratic delay and interagency en-

tanglements which would delay administrative actions and reduce the Nation's credibility as a responsible trading partner.

In subsection 104(A) of the Governmental Affairs Committee bill, the President is directed to begin immediate negotiations to establish an international nuclear fuel authority (INFA) which would be essentially a nuclear fuel stockpile under international control so that a nuclear fuel embargo would not be a threat to those nations which adhere to an international nonproliferation policy. The subsection also emphasized spent fuel disposition as a part of INFA which may be construed by foreign nations to require the throw-away fuel cycle. To the committee, this seemed to be premature and at variance with the existing international nuclear fuel cycle evaluation (INFCE) program which is specifically authorized by section 105 of the bill, and which was entered into by other nations with an intent not to prejudice the existing technologies.

The committee proposes to amend the preamble of subsection 104(A) to, first, limit the Presidential activity to discussions about INFA; second, make these discussions consistent with the INFCE program; and, third, insure that the discussions will include IAEA participation and involvement. The President is authorized to broaden the INFA discussions to include fuel fabrication, enrichment services, reprocessing, and other nuclear fuel cycle services. The committee specifically added as item (3) in subsection 104 (A), a provision from the administration's bill, S. 1432, to insure that the regional fuel cycle center concept under international study currently in the IAEA is fully considered. The committee's specific amended language for subsection 104(A) is as follows:

Sec. 104(a). Consistent with sec. 105 of this Act, the President shall institute prompt discussions with other nations and groups of nations to develop international approaches for meeting future worldwide nuclear fuel needs. The President, in cooperation with the IAEA, is authorized to consider in these discussions with nations possessing nuclear fuel production facilities or source material and such other nations as may be deemed appropriate, the following:

(1) the establishment of an international nuclear fuel authority (INFA) with responsibility for allocating agreed-upon quantities of fuel resources and providing other agreed-upon services to ensure fuel supply on reasonable terms in accordance with agreements between INFA and supplier and recipient nations;

(2) a set of conditions under which international fuel assurance under INFA auspices will be provided to recipient nations, including conditions which will insure that the transferred materials cannot or will not be used for nuclear explosive devices;

(3) devising feasible and environmentally-sound approaches for the siting, development, and management under effective international auspices of facilities for the provision of nuclear fuel services and the storage of special nuclear material which is sensitive from the standpoint of preventing the proliferation of nuclear explosive devices."

Also, subsections (3) and (4) were renumbered as (4) and (5). Subsection (5) which explicitly called for inclusion of financial arrangements as part of the INFA discussions was stricken as being redundant since any discussions would by necessity include consideration of financial arrangements. The INFA discussions, in the committee's view, should be balanced and not prejudicial to existing technology unless clearly superior alternative technologies are forthcoming from the INFCE program. Committee members understand that the agreements of foreign governments to participate in the INFCE program was based on their understanding that their existing breeder reactor and reprocessing activities would not be excluded or prejudiced during the INFCE program for studying alternatives and methods technology.

The committee wanted to avoid a premature commitment of nuclear fuel in the form of enriched uranium to an international stockpile without taking cognizance of the limitations of existing enrichment capacity and commitments of the existing stockpile of enriched uranium to meet existing contractual arrangements for future delivery. Therefore, the committee agreed to a substitute amendment which strikes the language of subsection 104(b) and inserts the following:

(b) The President shall submit to the Congress no later than twelve months after the date of enactment of this Act proposals for the establishment of an initial international undertaking to guarantee the supply of nuclear fuel to nations that adhere to strict policies designed to prevent proliferation. In preparing these proposals, the President may consider making available, pursuant to an international agreement, uranium enriched to less than 20 percent in the isotope 235 up to an amount sufficient to produce 100,000 MWe years of power from light water nuclear reactors.

Under this provision, the President has 12 months to submit a proposal for guaranteeing a nuclear fuel supply through an international arrangement. He may give consideration to selling a portion of our current stockpile as part of an international fuel arrangement, but the Committee on Energy and Natural Resources will review any such proposal for its consistency with other contractual arrangements and the need for a contingency stockpile in case of emergency for our domestic needs.

The committee amended the language of subsection 104(d) with a substitute which, first, makes it consistent with the fact that subsections (A) and (B) have been limited to discussions and proposals; second, gives the President flexibility in negotiating fuel assurances by striking the word "exclusively"; and, third, provides latitude for enrichment and reprocessing facilities if they are established and operated on an internationally acceptable and agreed-upon basis, such as regional fuel cycle centers.

The committee adopted a motion to amend subsection 104(d) to read as follows:

(d) The fuel assurances contemplated by this section shall be for the benefit of nations that adhere to policies designed to prevent proliferation. In the discussions called for in this section, the President shall, in particular, seek to insure that the benefits of such arrangements are available to non-nuclear-weapons states only if such states accept IAEA safeguards on all their peaceful nuclear activities, do not manufacture or otherwise acquire any nuclear explosive device, do not establish any new enrichment or reprocessing facilities except on an internationally acceptable and agreed upon basis, and place any such existing facilities under effective international auspices and inspection.

The committee wanted to make the language of section 105 consistent with the terms of reference agreed to by the participants in the INFCE program. Hence the committee amended this provision to state explicitly the balance struck in the terms of reference of the INFCE program for looking at alternative reactors and fuel cycles and at methods of safeguarding the existing reactors and fuel cycle reprocessing including the liquid metal fast breeder reactor and its fuel cycle. The committee amended section 105 by striking the period"." after "storage" and inserting the phrase "and on methods to improve the safeguards for existing nuclear technologies." The committee expects that the INFCE program will be pursued with such a balanced approach to insure that if no alternatives prove attractive with respect to technical, economic, and environmental feasibility, that the time period of the INFCE program will not be lost without seeking methods to reduce the proliferation concerns regarding light water and breeder reactors and their fuel cycle.

Title V of the Governmental Affairs Committee version authorized $10 million for the Energy Research and Development Administration to institute a program of assistance for developing nonnuclear energy resources in lesser developed countries. This type of assistance was fully considered in the committee's review of the fiscal year 1978 DOE authorization request for $10 million for an international cooperation program of a similar nature. The bill S. 1340, which is pending on the Senate calendar as a replacement for S. 1811 which was vetoed, contains $5 million for this international cooperative program. This matter is within the jurisdiction of the Committee on Energy and Natural Resources and has already been considered and funded in other legislation. Before a broader program of technical assistance and cooperation to developing nations is instituted, it should be the subject of extensive hearings and detailed review by the committees of jurisdiction with full analysis by the administration.

The executive branch stated that they prefer deletion of this title in its entirety. Moreover, the committee believed that this title was inappropriate to a bill which is intended to offer the quid pro quo that the United States will be an insured supplier of enrichment services and nuclear technology to those countries which subscribe to our nonproliferation controls on their use of the nuclear materials and technology. If this title is included it may appear as an implicit bias that even if the United States obtains the full nonproliferation cooperation of other nations, the United States will try to steer their national decision away from the use of nuclear energy. The

committee felt compelled to offer an amendment to delete this title in its entirety.

The committee voted by a 10 to 2 margin to report favorably those sections of the bill within its jurisdiction with amendments. However, the motion to report was stated so that the Members explicitly stated that they were not approving the provisions of the bill outside the committee's jurisdiction. In fact, many Members expressed serious reservations and objections to the provisions in titles III and IV as reported by the Committee on Governmental Affairs.

Mr. PELL. Mr. President, I rise in support of S. 897, the Nuclear Nonproliferation Act of 1977, as reported by the Committee on Foreign Relations on October 3, 1977.

The Subcommittee on Arms Control, Oceans and International Environment of the Committee on Foreign Relations held three hearings on S. 897. At the first hearing, the subcommittee heard Executive branch witnesses, who included Dr. Joseph Nye, Deputy Undersecretary of State for Security Assistance, Science and Technology; the Honorable Robert Fri, then Acting Director of the Energy Research and Development Administration; and the Honorable Marcus Rowden, then Chairman of the Nuclear Regulatory Commission. At the second hearing, testimony was received from Carl Walske, president of the Atomic Industrial Forum, Inc.; Dwight J. Porter, director of the International Affairs Division of the Westinghouse Corp.; Llewellyn King, editor and publisher of the Energy Daily; and John E. Gray, president of the International Energy Association. Witnesses at the final hearing included Sterling Cole, a former Member of Congress and first Director-General of the International Atomic Energy Agency; John G. Palfrey, a Commissioner of the Atomic Energy Commission from 1962–66, and now a fellow at the Woodrow Wilson International Center for Scholars; George W. Rathjens, professor of political science at MIT; and Thomas B. Stoel, Jr., a staff attorney with the Natural Resources Defense Council.

In the course of its consideration by the Governmental Affairs Committee, a number of changes were made in the bill as introduced on March 3, 1977. The result was an amendment in the nature of a substitute to the original bill. That substitute was further considered by the Foreign Relations Committee in subcommittee and full committee markups, and a number of changes were made to meet objections by the executive branch and to incorporate suggestions of Members.

As reported by the three committees on October 3, the bill has several main purposes:

To try to prevent proliferation through international initiatives and more effective controls over commerce;

To confirm the U.S. ability to be a reliable supplier to all nations sharing our nonproliferation objectives;

To encourage all nations to ratify the Nonproliferation Treaty (there are now 103 members);

To aid other nations with energy technology, including alternatives to nuclear energy; and

To cooperate with others in protecting against contamination from nuclear activities.

Mr. President, I believe that S. 897, as reported last October 3, is a basically sound and good bill. However, many of us have had an opportunity to discuss it with various experts and to receive their judgments since reporting the bill. There will be a number of amendments offered. Some of them will improve the bill, and I intend to support those amendments which I think do strengthen the bill during the course of Senate consideration.

With these improvements, the bill should reinforce earlier efforts to control proliferation commencing with the Nonproliferation Treaty, and such initiatives as the Symington amendment to the Arms Export Control Act of 1976-77, and the Glenn amendment to the Arms Export Control Act of 1978.

Clearly, the United States will need the cooperation of other suppliers and recipients for the policies this bill promulgates to work. I believe that the bill encourages that cooperation, since it recognizes the problems and concerns of other suppliers and recipients.

Of course, the problem of nuclear proliferation will not go away with the passage of this bill. It will require the best efforts of the Congress and the executive branch over the coming years to make sure that energy needs do not fall victim to efforts to control nuclear weapons and that weapons do not spread because we do a poor job with nuclear energy.

I hope that the world has come to realize the dangers of nuclear weapons. Fortunately, we have been spared nuclear weapons as instruments of war since 1945. Yet, in the more than 30 years since World War II, the world's nuclear arsenal has grown from those initial few weapons to arsenals in the tens of thousands. Undoubtedly, we should have done better sooner in our efforts to control nuclear weapons, but I do believe that S. 897 does serve to demonstrate that we have now become serious about this problem.

Mr. HART. Mr. President, I am pleased to support S. 897, the nuclear nonproliferation bill. Let me congratulate the three Senate committees which have worked long and hard to forge a reasonable compromise on this difficult issue.

The Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works had a hearing last spring, where the authors of the Ford Foundation/MITRE study on nuclear power vividly describe the dilemma of nuclear power today:

> By far the most serious danger associated with nuclear power is that it provides additional countries a path for access to equipment, materials, and technology necessary for the manufacture of nuclear weapons. We believe the consequences of the proliferation of nuclear weapons are so serious compared to the limited economic benefits of nuclear energy that we would be prepared to recommend stopping nuclear power in the United States if we thought this would prevent further proliferation.

The Nuclear Nonproliferation Act before us today is designed to minimize this danger and to avoid the consequences of proliferation of nuclear weapons, while allowing for the orderly international development of nuclear power for peaceful purposes. Because of our historical leadership in nuclear energy development, the United States bears a large share of the responsibility for finding a solution to the proliferation problem. Therefore the legislation before us deserves the strong support of this body.

As chairman of the Senate Subcommittee with primary jurisdiction over activities of the Nuclear Regulatory Commission, I am particularly pleased that this bill fully recognizes the important role that this Agency should play in licensing of nuclear exports. It is clear that there can be no realistic separation between the criteria for nuclear exports and the criteria for licensing domestic uses of similar materials and facilities. The Energy Reorganization Act of 1974 gave the responsibility for regulation of these matters to the new created Nuclear Regulatory Commission. I am pleased that the bill before us today clarifies and strengthens the role of the Commission in this process.

It is clear to this Senator that the Nuclear Regulatory Commission can play a very important technical role in nuclear export licensing, while relying upon other departments for matters of foreign policy. As NRC Commissioner Victor Gilinsky has recently said:

> White it is true that the executive branch can and should influence whether a nuclear export goes forward, it must provide NRC, as well as the public and Congress with convincing justification. This extra element of protection is, of course, an inconvenience to the laissez-faire exporters, to say nothing of those officials who regard U.S. nuclear fuels and equipment as the modern day equivalent of glass beads and Indian blankets—prime items of international political barter.

Mr. President, I ask unanimous consent that an article by Commissioner Gilinsky which appeared in the Washington Post on January 26, 1978, be inserted into the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE NRC'S VALID ROLE IN NUCLEAR EXPORTS

(By Victor Gilinsky)

In his Jan. 13 column, Stephen Rosenfeld raised the question of whether the five-man, independent Nuclear Regulatory Commission ought to be licensing exports of nuclear materials and equipment. The question came up in an interview with NRC's chairman, Joseph M. Hendrie, who apparently offered as his personal opinion that NRC, as a domestic technical agency, had no business in diplomacy or intelligence, as it lacked expertise in those areas. Rosenfeld tended to agree, on the grounds of Hendrie's "seemingly indifferent attitude toward the proliferation threat."

In fact, the NRC was never intended to supply diplomatic or intelligence expertise. But it has, I believe, an export role. Let me explain.

The question of NRC's export-licensing responsibilities has come up frequently since Congress, in the legislation creating NRC (the Energy Reorganization Act of 1974), transferred to it the export-regulatory functions of the old Atomic Energy Commission. The law requires that the NRC, in approving nuclear exports, independently determine that they are "not inimical to the common defense and security" of the United States.

It is my view, which I believe is shared by other commissioners, that this assignment of responsibilities makes sense. While it is true that the executive branch can, and should, influence whether a nuclear export goes forward, it must provide NRC, as well as the public and Congress, with convincing justification. This extra element of protection is, of course, an inconvenience to the laissez-faire exporters, to say nothing of those officials who regard U.S. nuclear fuels and equipment as the modern-day equivalent of glass beads and Indian blankets—prime items of international political barter.

The establishment of NRC coincided with a rethinking of our international nuclear policies in the wake of India's nuclear explosion. Until that time nuclear exports were handled out of public view on a more or less *pro forma* basis by low-level AEC staff, guided by a policy of U.S. encouragement of worldwide commercial nuclear power. There was no systematic examination of the assurances contained in the legal instruments of our nuclear trade nor of the effectiveness of applicable safeguards.

The NRC's increasingly active role in the necessary work of tightening the rules of U.S. nuclear commerce triggered opposition from expected quarters. Opponents of a tough nonproliferation program called for NRC's removal from export regulation on the grounds that this function was an extension of the President's conduct of foreign affairs, that its exercise by an independent commission tagged the United States as an "unreliable" supplier, that the commission in any case lacked the necessary foreign-relations expertise, and so on. But at bottom the real complaint was that things were not as free and easy as before.

And indeed they are not. One of the primary benefits of NRC's role lies in the development of a formal interagency review process for providing coordinated advice to the NRC on individual exports. This has given agencies such as the Department of Defense and the Arms Control and Disarmament Agency a voice in these matters they otherwise would not have. This, added to the knowledge that executive-branch advice will get careful scrutiny at NRC, has led to a much improved review.

In its own review, NRC does not concentrate on the foreign-relations aspects or proposed nuclear sales but rather on assurances that exports will not be used for nuclear explosives and on associated safeguards. This it seems to me, is our proper statutory province, and one in which we *are* expert. While NRC has never rejected outright an export recommended by the executive branch (although it did once unanimously reject a State Department petition to speed a fuel shipment to India), it has on a number of occasions urged tighter conditions on exports and the closing of hitherto unnoticed loopholes in the agreements covering our nuclear trade. In several important cases these views have prevailed with the Department of State and with our trading partners and have resulted in significantly higher levels of antiproliferation protection. It is not necessary to reliability of supply that the United States be a "nuclear patsy."

The proposed nuclear-export legislation now pending before the Senate (having passed in the House by a vote of 411 to 0) would confirm and extend the commission's role in nuclear-export regulation. The bill, incidentally, allows for a presidential override on an NRC license denial; this balances the proposed limitation on the President's current authority to bypass NRC with government-to-government exports through the Department of Energy. Significantly, one of the amendments to be offered in the Senate by those opposed to the bill's passage calls for NRC's removal from nuclear-export licensing.

In giving export licensing authority to an independent regulatory commission in 1974, Congress was saying in effect that it wanted this country's nuclear trade to be handled consistently and to be subject to explicit protective standards rather than to the political exigencies of the moment. This still makes good sense.

Mr. MATHIAS. Mr. President, we are entrusted today with a large responsibility. The legislation before us—S. 897 the Nuclear Non-Proliferation Act of 1977—grapples with issues of vast importance not only to ourselves but to the world.

We live in a world plagued by serious energy shortages. We contribute to these worldwide shortages by our wasteful ways. We are currently importing almost 50 percent of our petroleum needs. Many other countries have far greater fuel import requirements than we do. Nuclear power is seen as one very practical answer to the problems of energy shortages.

The United States must be a reliable contributor to the world's nuclear power needs. We must be consistent in our policies. We must recognize the requirements of an interdependent world.

At the same time we must face the responsibilities that leadership in the nuclear field imposes upon us. The dangers of unrestrained nuclear proliferation are immense. The nuclear waste problem is an issue which is of particular concern to me. We must do our very best to deal with these important issues.

The legislation before us today is an earnest effort to confront many of these issues. It is not perfect. I am hopeful that the amendment process will strengthen this bill. But it is a good attempt to meet the issues head on.

In this connection I commend to my colleagues the excellent speech Gerard Smith, our Ambassador at Large for nonproliferation matters, gave recently at a meeting of the Trilateral Commission in Bonn. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS ON NONPROLIFERATION

(By Gerard C. Smith)

I

It was apparent in 1945 that atomic energy faced the world with an unprecedented dilemma: how to harness it for worldwide peaceful purposes without spreading the deadliest instrument of war conceivable.

Since then the world has made slow progress in dealing with this question. The Baruch plan, representing the first and very comprehensive approach, failed. But more modest and practical steps have followed in the field of non-proliferation and arms control which after some squirming we have come to realize are tightly linked. The IAEA was established in 1956, the NPT signed in 1968, and a variety of arms control agreements were negotiated in the 1960's and early 1970's, including limits on nuclear tests and on strategic delivery systems.

Two recent events highlighted the dangerous dilemma presented over thirty years ago.

The oil crisis of 1973 reminded us that nuclear power must play an increasing role in meeting energy needs. The crisis may be past, but the prospect of diminished oil supplies remains.

In 1974, India exploded a nuclear device, demonstrating that nuclear explosive proliferation is a real, not a theoretical, peril. The recent South African episode suggests that proliferation remains a clear and present danger.

No two issues are of more common concern to the trilateral countries or more naturally suited to trilateral cooperation than energy and proliferation.

The further spread of nuclear explosives poses the same threat to all of us. Each additional weapon state diminishes the security of our three areas and jeopardizes regional stability. The trilateral community has worked on vital security issues not merely by establishing various formal alliance ties, but also by cultivating a shared sense of common interests. We should thus be able to work together to prevent further nuclear spread. We must if this effort is to succeed.

II

But I am bound to say that suspicions and policy differences among us persist. Some Americans think that other countries may be more interested in economic advantage from exports than in containing the security dangers associated with nuclear energy. Some of our friends abroad think that resource-rich Americans are callous about foreign energy needs and seek to dictate solutions to the quite different problems facing some other countries.

Non-proliferation and other nuclear issues cannot be settled by any one nation or even by any one regional group. Failure to contain the spread of nuclear weapons capabilities will at the very least damage the ability of all our countries to reap the larger and longer-term benefits of nuclear power. It is not extravagant to suggest that, unless present trends are changed, countries may conclude that nuclear energy material and facilities are becoming just too dangerous for international commerce. Fortunately, we believe that effective measures can still be taken to curb proliferation and need not slow down the efficient use of nuclear material and equipment to generate energy.

The IAEA and the NPT in combination represent a good start on an international regime made up of political commitments against nuclear weapons and international controls to deter their spread. But the U.S. believes that this regime must be strengthened and expanded as new types of nuclear technology come into use.

The London Suppliers Group working on export controls has demonstrated that countries *can* respond effectively to the challenge of applying nuclear power in safe ways. Strengthened and standardized guidelines have been established to help remove controls as a factor in nuclear commercial competition.

Proliferation has recently been raised to the highest political level. It is now dealt with by Presidents, Prime Ministers, and Foreign Ministers as a priority part of our basic relationships and our common security concerns. Several countries beside the U.S.

now have special diplomatic representatives for non-proliferation matters.

III

One issue especially continues to create obstacles to trilateral nuclear cooperation: There are sharply differing views on the prospective use of plutonium as a commercial fuel. Should it be recycled in present generation reactors? When will it be economic and safe to use in the breeder reactors of the future?

The U.S. has somewhat belatedly realized that, even if international safeguards work perfectly, in a "plutonium economy" where bomb-grade material in large quantities will be produced it will be vulnerable to national diversion or terrorist seizure, with virtually no advance notice to permit effective diplomatic or other countermeasures.

We have come to believe that, at least in the U.S., nuclear energy can safely and efficiently meet needs for some time to come by the use of material, not of bomb-grade, in facilities using natural or only slightly enriched uranium (LWR's). This gives us time to work for solutions to the plutonium problems that will face us in the future. Nations not so well endowed with uranium feel they cannot pause as we have in the march toward a plutonium economy.

We have decided on a temporary deferral of commercial reprocessing in the U.S. I would emphasize the words temporary and deferral. This is a policy of stop, look, and listen. It is not based on any dogmatic faith, but rather on a cautious agnostic uncertainty about the future.

We are not alone in taking a deadly serious view of proliferation. Other countries are equally concerned and have developed comprehensive policies reflecting that concern. And segments of the public in a number of our countries are increasingly apprehensive about the problems and dangers presented by nuclear power. While we may feel that concern to be emotionally based, it is not entirely irrational.

It is as important to know what U.S. policy is not as to know what it is. It is not anti-nuclear power. That form of energy remains an important element in our planning. Nor is it anti-breeder. This year the U.S. plans to spend nearly one-half billion dollars on research into various forms of breeder technology. Nor are we opposed to reprocessing for all time. We believe that at present, commercial scale reprocessing is not economically warranted. We also worry about how such plants will be adequately safeguarded. Before we, and we hope other nations, decide irreversibly to enter a "plutonium economy," we want to carefully examine what other options are available and what the costs and risks will be.

IV

As a result of decisions taken at the London, May 1977 Summit of seven of the trilateral countries, these countries together with a number of developing nations and international institutions (44 in all) have just launched an International Nuclear Fuel Cycle Evaluation (INFCE).

This study will not only investigate new types of "proliferation-resistant technologies," but will also consider new institutional arrangements that can help the world to rely increasingly but safely on nuclear energy in the future.

We approach INFCE with an open mind, but with the hope that our pause will "give pause" to other nations before they commit themselves to a plutonium economy.

The Federal Republic of Germany, France, Britain and Japan are among the major countries participating in INFCE (in spite of obvious differences in policy from ours). The first two of these states have agreed to suspend, at least for a while, further exports of facilities for reprocessing and enrichment.

V

In the course of our recent negotiations with Japan, developing a satisfactory solution to the thorny reprocessing Tokai issue, consistent with seemingly divergent Japanese and U.S. interests, demonstrated that we can move forward cooperatively. The agreement to employ a limited amount of U.S. origin fuel in the Tokai facility for conventional reprocessing coincident with the two-year period of INFCE will permit testing of advanced safeguards and of a co-processing technique designed to avoid the production of plutonium. In the Tokai communique, Japan and the U.S. expressed the shared view that plutonium poses a serious proliferation danger and their common intent to defer decisions to recycle plutonium in light water reactors during INFCE. Japan also agreed to defer other plans looking toward plutonium production. I like to believe that my experience on this Commission gave me a better understanding of Japanese concerns and perhaps helped in the working out of this very difficult issue.

VI

The United States in good measure is to blame for uncertainties which now surround the fuel supply aspect of the nuclear cycle. But we are trying to regain our former place as a reliable supplier.

We are going to enter into new bilateral undertakings and try to develop new international machinery to give greater assurance of fuel supplies. The President has authorized consultations with other countries and organizations as to the desirability and feasibility of an international fuel bank to be available for countries which accept mutually agreed nonproliferation constraints. If such a bank can be established on acceptable terms, the President will be prepared to allocate a significant amount of enriched fuel to it.

We also will be prepared to accept for storage limited amounts of foreign spent fuel to relieve pressure in other countries to reprocess.

Pending U.S. legislation supports such uranium fuel policies. The Congress recognizes the link between assured "front-end" fuel supplies and the need to deal with the difficult "back-end" (reprocessing and storage) problems we all face.

VII

There is no question that the third world, in addition to some of our friends in the developed countries, is troubled by some aspects of our non-proliferation policy. These nations are concerned by "double discrimination." Under the NPT they have accepted a different status from the weapons states. Now they see recent non-proliferation efforts as aimed at depriving them of the full range of fuel cycle technology which they had believed was guaranteed to them under this very same NPT Treaty. This perception is sharpened by other North-South tensions and widespread concern in the third world about having to remain in a dependent status in regard to nuclear technology.

We want to continue to help these states in the energy field. We also plan to increase cooperation in non-nuclear energy technology. As nuclear power becomes economical on a scale suitable for the lesser demands of many LDC's, we are prepared to provide low-enriched uranium and reactors under appropriate safeguards. But we do not believe that proliferation of national enrichment and reprocessing plants, for example, make economic or security sense at this time.

In the future, we hope to see a reduction in North-South tensions on the proliferation issue and to work out acceptable solutions. INFCE should contribute to that process through its broad membership and its effort to develop international consensus about fuel cycle problems. Institutional arrangements such as international and regional fuel services and fuel cycle centers also may prove to be a fruitful approach.

Trilateral cooperation is essential to make non-proliferation policy workable and we should continue to work with the Soviet Union and interested East European countries as well as the developing countries.

VIII

In conclusion, I think it is time for us to raise our sights from the immediate pressing proliferation problems that preoccupy our energies. We must begin to spell out specifics of a new international framework for nuclear energy and non-proliferation suited to the circumstances of the future, and serving our national and collective interests.

We are, perhaps, inching towards a new comprehensive program for the international control of atomic energy. We most likely will never get back to the radical scope of the Baruch proposal, but the insights and ideals underlying that early and original concept could profitably guide our more limited approaches today.

Mr. HANSEN. Mr. President, in commencing consideration of the Nuclear Nonproliferation Act, S. 897, I would like to stress the importance of enacting a workable bill.

Significant concerns have been raised as to a possible misinterpretation of subsection II(B) which requires the United States to cooperate with other nations in protecting the international environment from radioactive, chemical, or other thermal contamination arising from nuclear activities.

This statement could lead to an administrative or judicial requirement for the preparation of environmental impact statements for individual nuclear export applications. It seems to me that putting environmental impact statements as a prerequisite to the export of materials and manufactured machinery in this country raises issues that I feel are of serious foreign policy concern that question the sovereignty of foreign countries.

These same issues have been raised by proposed guidelines now under consideration within the administration which have been prepared by the Council on Environmental Quality. Special trade representative, Robert Strauss, testified before the Finance Committee yesterday that he has "some very serious concerns" regarding these draft guidelines. He further stated that he has "very strong reservations about anything being done that would in any way impede our ability to do business outside the United States with products that are manufactured in this country."

I understand that these guidelines would require Federal agencies to document and consider foreign impacts, both for direct U.S. Government activities abroad and licensing of commercial exports and activities abroad. This would place an immediate de facto moratorium on nuclear exports and related Ex-Im Bank financing, as well as many other activities.

I will not expound on the many other difficulties incorporated in this legislation that should be remedied, the details

of which will be considered at the time individual provisions and amendments are offered to deal with the specific problems.

I urge my colleagues to give long and careful thought to perfecting a workable nonproliferation policy, a policy that recognizes the realities of the nuclear capabilities as well as the ideological aspirations of some in this country.

The zeal to halt nuclear proliferation, if carried too far, could also halt a vigorous domestic manufacturing and export business of peaceful nuclear electric generating plant components and the fuel to operate them.

That certainly is not an objective of this legislation and any possibility of adverse effects on U.S. exports should be deleted from this bill.

SENATE RESOLUTION 268—PROVIDING FOR RADIO COVERAGE OF SENATE PROCEEDINGS DURING CONSIDERATION OF THE PANAMA CANAL TREATIES

Mr. ROBERT C. BYRD. Mr. President, for the Senator from Rhode Island (Mr. PELL), on behalf of the Committee on Rules and Administration, I send to the desk a resolution, together with the committee report thereon, and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER (Mr. HART). The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 268) providing for radio and television coverage of proceedings of the Senate during consideration of the Panama Canal Treaties.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution, which had been reported from the Committee on Rules and Administration with amendments.

Mr. ROBERT C. BYRD. Mr. President, I ask that the clerk read the amendments. They are very brief.

The legislative clerk read as follows:

On page 1, line 3, strike "and television coverage (including and making of videotapes)" and insert "coverage (including radio broadcast recordings)";

On page 2, beginning with line 1, strike through and including line 6, and insert in lieu thereof the following:

SEC. 2. Under such terms and conditions as the Committee on Rules and Administration may prescribe—

(1) radio coverage of proceedings in the Senate chamber provided for in the first section shall be made available to public and commercial radio broadcasting stations and networks; and

(2) recordings shall be made available to such stations and networks, to Members of the Senate, and to such other organizations and persons as the Committee may authorize.

On page 2, line 7, strike "and television coverage" and insert "coverage and recordings";

The amendments were agreed to.

The resolution, as amended, was agreed to, as follows:

Resolved, That the Committee on Rules and Administration be and is hereby authorized and directed to provide for radio coverage (including radio broadcast recordings) of proceedings in the Senate Chamber during consideration of the Panama Canal Treaty and the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, both signed at Washington, District of Columbia, on September 7, 1977. Such coverage shall be provided for continuously at all times while the Senate is considering the treaties, except for any time when a meeting with closed doors is ordered.

SEC. 2. Under such terms and conditions as the Committee on Rules and Administration may prescribe—

(1) radio coverage of proceedings in the Senate Chamber provided for in the first section shall be made available to public and commercial radio broadcasting stations and networks; and

(2) recordings shall be made available to such stations and networks, to Members of the Senate, and to such other organizations and persons as the Committee may authorize.

SEC. 3. The radio coverage and recordings of proceedings in the Senate Chamber under this resolution shall be carried out in such manner as the Committee on Rules and Administration shall prescribe.

Amend the title so as to read: "Resolution providing for radio coverage of proceedings of the Senate during consideration of the Panama Canal Treaties.".

The title was amended so as to read:

Resolution providing for radio coverage of proceedings of the Senate during consideration of the Panama Canal Treaties.

Mr. ROBERT C. BYRD. Mr. President, does the amendment to the title strike out the words with reference to television?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

I move to reconsider the vote by which the resolution was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PANAMA DRUG TRAFFIC: NEW EVIDENCE, OLD EXCUSES

Mr. DOLE. Mr. President, nearly 4 months ago I advised the Senate of certain allegations I had received of direct involvement by Gen. Omar Torrijos and other members of his regime in drug trafficking in the United States and elsewhere. On October 13, I suggested that these charges, if true, could prove relevant to the Panama Canal Treaty issue. I feel now, as I did then, that the credibility and the personal integrity of General Torrijos and his colleagues will bear upon their reliability as Panama's guarantors of the new treaties.

Furthermore, since ratification of these proposed Panama Canal Treaties will definitely strengthen the political and financial status of the Torrijos regime, I maintain that it is important for us to know in advance if we will be bolstering a corrupt government which facilitates transport of illegal drugs to our own shores.

EFFORTS TO SECURE INFORMATION

Mr. President, I think that any Member of Congress who became aware of such allegations would feel a responsibility to call for full disclosure of relevant materials. This is what I have attempted to do during the last 15 weeks, only to find those efforts frustrated by bureaucratic roadblocks. Two full months after filing a "freedom of information request" on October 14, I received 75 pages of highly censored material from the U.S. Drug Enforcement Administration. I was advised that additional DEA files, as well as the deleted portions of the files I received, could not be provided because it could "jeopardize" national security or U.S. foreign policy interests. In late December, I filed an appeal with the Department of Justice, which is currently reviewing the case.

NEW MATERIALS SURFACE

Despite the cloak of secrecy that the executive branch has wrapped around its files on the alleged Torrijos drug connection, the matter will not simply go away. To the contrary, materials relating to the allegations have continued to surface in recent months through unofficial channels.

The latest development that I am aware of occurred on Tuesday of this week, when two copies of Drug Enforcement Administration files were delivered to my office in a plain white envelope by an unknown source. The documents appear to be authentic photostatic copies of DEA and Bureau of Narcotics and Dangerous Drugs files. Both contain agent reports which refer by name to Gen. Omar Torrijos or members of his immediate family, and implicate them in narcotics traffic going through Panama.

Mr. President, these documents raise more questions than they answer. Perhaps the reports contained within the documents are unfounded. Perhaps the documents themselves are forgeries. But when I sent similar documents to the DEA administrator on October 21 asking for confirmation of authenticity, no response was received. This is typical of the lack of cooperation that the executive branch has demonstrated so far in my efforts simply to determine whether there is any substance to these allegations.

Mr. President, I will not release the two documents which I received yesterday. I believe it is a responsibility of the U.S. Drug Enforcement Administration to make a full disclosure of its files in this regard, and I intend to pursue the matter until they do so. At the moment, I am of the opinion that "someone is trying to tell us something" about drug-trafficking information that is in the possession of the executive branch of our government. As a Member of Congress who is concerned both about the drug traffic coming into this country and about the pending Panama Canal treaties, I feel a responsibility to pursue the matter to its end.

I can say with certainty that the particular items which were delivered to my office on Tuesday by an unknown source

were not contained within the 75 pages of sanitized documents which I received from DEA in December, in response to my "freedom of information request." If these documents are authentic, then they were willingly and knowingly withheld from me by the DEA. It is for that reason that I raise the question: Just what else does the executive branch know about the Torrijos drug-trafficking operations, and why is it being withheld from Members of Congress who seek to learn the truth of the matter?

Mr. President, when the Senator from Kansas visited Panama in December of last year he had an opportunity to visit with Gen. Omar Torrijos. General Torrijos seemed very disturbed that anything concerning drug traffic might become involved in the canal treaty debates, and I agreed with General Torrijos. I said the matter should be disposed of. It should not be an issue in the Panama Canal Treaty debate. General Torrijos indicated to this Senator that someone was playing games. He said, "Some agency, your own agency is playing games with you. I will send you the information."

Well, so far General Torrijos has not forwarded the material, but I have written General Torrijos. I have asked for the information. The Senator from Kansas believes we should debate the treaties on the merits. We should not have side issues.

But the Senator from Kansas also believes this may not be a side issue. And how do we know if our own agencies, our own Government will not give us the information? Why does the DEA withhold information? Why does the DEA withhold information from this Senator and others who have made the requests?

What is this national security interest that must be protected? What about the rights of Americans? What about the future of the canal itself?

So far the Senator from Kansas said today as I said on this floor many weeks ago all the Senator from Kansas asks is cooperation, some spirit, some effort, some indication, just some indication that Mr. Bensinger and the Drug Enforcement Administration are willing to give us some assurance that there is not any involvement. The Senator from Kansas can only speak for himself, but if that is forthcoming this Senator will not raise that in the canal treaty debate, and I would hope that they are listening.

Mr. President, I yield the floor.

THE PRESIDENT MISLEADS THE PEOPLE ON THE PANAMA CANAL

Mr. HELMS. Mr. President, the President of the United States last night talked to the people of the United States by television and radio about the Panama Canal. He said that much of the opposition to the proposed treaties was based upon misunderstanding and misinformation. His statement is quite understandable when one contemplates the misunderstanding and misinformation disseminated by the President himself last night.

I admire the President personally, but, candidly, his statements of alleged fact were far from the truth. This Senator naturally expected that the President would strive to present his treaties in the best possible light, and that he would present favorable interpretations and conclusions. But I expected that Mr. Carter would base his statements on fact and not fiction. One is forced to the conclusion either that he was misleading the American people unintentionally, or he was misleading them intentionally. There is no alternative to those two possibilities.

Let us take just one minor statement—a minor issue really, but important in building up the myth of U.S. "guilt." Mr. Carter said that the 1903 treaty "was not signed by any Panamanian." The President was obviously referring to Philippe Bunau-Varilla, who negotiated the treaty with Secretary Hay of the United States. It is true that Bunau-Varilla was a Frenchman; but one of the first acts of the new Panamanian Government in 1903 was to issue full credentials to Bunau-Varilla as Panamanian Ambassador Extraordinary and Plenipotentiary. He had full powers to sign the draft, which he did. But the formal signing did not take place until December 4, 1903.

On that date, the following Panamanians placed their signatures on the treaty:

Junta members: J. A. Arango, Tomas Arias, Manuel Espinosa B.

Minister of Interior: Eusebio A. Morales.

Minister of Foreign Relations: F. V. de la Espriella.

Minister of Justice: Carlos A. Mendoza.

Minister of Treasury: Manuel E. Amador.

Minister of War and Marine: Nicanor A. de Obarrio.

Subsecretary of Public Instruction: Francisco Antonio Facio.

Needless to say, the 1903 treaty was reaffirmed in each of the treaties of 1936 and 1955, which were also signed by Panamanians, and ratified freely by the Panamanian constitutional process.

Nor must it be thought that the treaty was unfair to Panamanians or that the Senate would consent to it without persuasion. If the future was indeed in doubt, which is why Secretary Hay was attempting to pursuade Senators that it was "vastly advantageous to the United States and—not so advantageous to Panama." Secretary Hay, like President Carter after him, was merely, tailoring his words to a reluctant Senate.

But even on more substantive issues, the President shaded the truth. On the issue of national security, for example, Mr. Carter was less than forthright when he said:

> Throughout the negotiations, we were determined that our national security interests would be protected . . . and that our military forces would have the permanent right to defend the canal if it should ever be in danger.

It is to be assumed that he would try to interpret the ambiguous defense provisions favorably; but the fact is that the negotiations backed down from the unilateral right of military intervention, the only right that would give the canal adequate protection.

In hearings before the Senate Armed Services Committee on Tuesday of this week, former Deputy Defense Secretary William Clements testified that he had negotiated a clear-cut clause granting unilateral intervention to the United States, one that was approved by the Defense Department, the State Department, and the National Security Council.

Mr. President, in response to a question which I put to him, he stated unequivocally that General Torrijos himself had approved that clause.

The language of the clause is as follows, and I think it is important that it be in the RECORD:

> In the event of any threat to the neutrality or security of the Canal, the parties shall consult concerning joint and individual efforts to secure respect for the Canal's neutrality and security through diplomacy, conciliation, mediation, arbitration, and the International Court of Justice or other peaceful means. If such efforts would be inadequate or have proved to be inadequate, each party shall take such other diplomatic, economic or military measures as it deems necessary in accordance with its constitutional processes.

That is why Mr. Clements testified that he is now unalterably opposed to the Carter treaties. The most crucial issue in the whole treaty had been agreed upon by all parties concerned; yet the Carter administration backed down and accepted vague and ambiguous language.

Although the President stated last night that "the treaties are supported enthusiastically by every member of the Joint Chiefs of Staff," he neglected to mention that they are enthusiastically opposed by former members of the Joint Chiefs, and by the overwhelming majority of retired military officers. It was not long ago that I placed in the RECORD the names of 320 high-ranking retired officers who were willing to go public in opposition to these treaties.

Moreover, the "enthusiasm" which the President detected in the JCS support was noticeably absent among the JCS representatives who testified before the Senate Armed Services hearings last week. Adm. James Holloway, Chief of Naval Operations, for example, testified that it was his military judgment that it would be better for the United States to stay in Panama indefinitely with a military presence, rather than to try to go back in if there were trouble. He testified that he supported the treaties only on balance, for the sake of diplomatic considerations.

It is interesting to note, Mr. President, that not one scintilla of this information was conveyed, insofar as this Senator knows, to the American people by the major media of this country. Why the blackout on what the Joint Chiefs actually said?

Similarly, the President's statement that "the treaties also have overwhelming support throughout Latin America" simply is not and can not be supported either by the experience of members of the Armed Services Committee who have traveled rather widely in Latin America, or by the objective situation.

I have visited the heads of state and

high ranking military officials of countries which represent at least 75 percent of the population, gross national product, and geography of Latin America, and I have yet to meet one urging us to give up the canal to Panama. The distinguished Senator from Virginia (Mr. SCOTT) reported a similar response. And high-ranking defense experts, such as Lt. Gen. Gordon Sumner, Chairman of the Inter-American Defense Board, testified just the other day that he has yet to find a single member of the Board, other than Panama and the United States, who favors the treaties. The economic arguments alone are enough to sway their decisions, for the canal, proportionately, is far more important to the health of their economies than to ours.

Perhaps that is why the two biggest Latin American nations, Brazil and Mexico, did not send their Presidents to the signing ceremony, Guatamala has broken diplomatic relations with Panama, because Torrijos has promised aid to the terrorists in Belize. And in 1975, Panama had to call off a scheduled meeting in Panama City of all Latin Presidents because so many of the leaders refused to come and dignify Torrijos' association with Fidel Castro.

So where is all the love and affection for Torrijos? Where is all the pressure for the United States to surrender our sovereign rights in the Canal Zone?

But perhaps the most interesting falsehood—and I regret to use that word—that Mr. Carter perpetrated last night was his denial that we own the Canal Zone. He said:

> We do not own the Panama Canal Zone—we have never had sovereignty over it. We have only had the right to use it.
>
> The Canal Zone cannot be compared with United States territory. We bought Alaska from the Russians and no one has ever doubted that we own it . . . The Canal Zone has always been Panamanian territory. The U.S. Supreme Court and previous American Presidents have repeatedly acknowledged the sovereignty of Panama over the Canal Zone.

The fact is that no previous President of the United States has ever acknowledged Panamanian sovereignty. It is my intention to develop these facts at greater length on this floor at a more appropriate time; but suffice it to say the U.S. Supreme Court has declared many times that the Canal Zone is a U.S. possession and U.S. territory. In fact, it was the U.S. Supreme Court that actually compared our title to the zone to our title to Alaska, in Wilson against Shaw, 1907:

> It is hypercritical to contend that the title of the United States is imperfect, and that the territory described does not belong to this Nation, because of the omission of some of the technical terms used in the ordinary conveyances of real estate . . . The fact that there may possibly be in the future some dispute as to the exact boundary on either side is immaterial. Such disputes not infrequently attend conveyances of real estate or cessions of territory. Alaska was ceded to us 40 years ago, but the boundary between it and the English possessions was not settled until within the last 2 or 3 years. Yet no one ever doubted the title of this Republic to Alaska.

It is incredible that President Carter should choose Alaska as the basis of a comparison coming to the opposite conclusion.

In fact, we do own the Canal Zone. I have referred on this floor on other occasions to the statements of Mr. J. V. Luitweiller, of my State, who was the Secretary of the Claims Commission which settled all the property transfers when we took over the zone.

Moreover, Miss Doris McClellan, clerk of the U.S. District Court in Balboa, and daughter of the late distinguished Senator from Arkansas, whom we all revered, has assured me personally that microfilms of the deeds, both warranty and quit-claim are on file at the district court, and that the deeds themselves are in storage in Suitland, Md.

We are giving away U.S. property—property that belongs to the U.S. taxpayers. It is an act of enormous constitutional significance, because of article IV, section 3 of the Constitution. Is it possible that the President is attempting to evade the consequences of article IV by denying that the Canal Zone is, indeed, U.S. property? I hope that he is not.

Yet at the same time, he is denying that we are paying Panama to take the canal. He says that under the new treaties payments to Panama will come from tolls paid by ships which use the canal. The fact is that under the Constitution, those tolls are paid into the U.S. Treasury and belong to the taxpayers. In addition, as the Armed Services Committee hearings have brought out so dramatically in the past few days, there will be enormous deficits which will have to be made up by the taxpayers of the United States, either directly or in the form of interest foregone.

Mr. President, I am prepared to debate the treaties on the basis of fact. Men of good will can agree or disagree on implications of the treaties, or on the probable outcome of a given situation. But give us facts, Mr. President, facts that we can all agree on. If the debate on these treaties is to be meaningful, it must remain on a high level, and it must be solidly grounded in fact. I hope that the President of the United States hereafter will be more discerning in presenting the facts of the case.

Thank you, Mr. President.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

MESSAGE FROM THE HOUSE

At 4:15 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the bill (H.R. 7442) to amend the Communications Act of 1934 to provide for the regulation of utility pole attachments, with amendments, in which it requests the concurrence of the Senate.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC–2671. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to repeal the statutes relating to the publishing of cotton price predictions in Government reports and the issuance of cotton crop reports (with accompanying papers); to the Committee on Agriculture, Nutrition, and Forestry.

EC–2672. A communication from the Secretary of Defense, transmitting, pursuant to law, a secret report on "Rationalization/Standardization Within NATO" (with an accompanying secret report); to the Committee on Armed Services.

EC–2673. A communication from the Chairman of the Board of Governors, Federal Reserve System, transmitting, pursuant to law, the second Annual Report of the Board of Governors of the Federal Reserve System (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC–2674. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Highway Safety Act of 1966 to authorize appropriations, and for other purposes (with accompanying papers); to the Committee on Commerce, Science, and Transportation.

EC–2675. A communication from the Chairman, Consumer Product Safety Commission, reporting, pursuant to law, authorization levels for the Consumer Product Safety Commission for the fiscal years 1979, 1980, and 1981; to the Committee on Commerce, Science, and Transportation.

EC–2676. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report relating to the Emergency Rail Services Act of 1970 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–2677. A communication from the Administrator, National Aeronautics and Space Administration, transmitting a draft of proposed legislation to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes (with accompanying papers); to the Committee on Commerce, Science, and Transportation.

EC–2678. A communication from the Acting Assistant Secretary, Department of the Interior, transmitting a draft of proposed legislation to amend the Surface Mining Control and Reclamation Act of 1977 (P.L. 95–87) to raise certain authorized funding levels contained therein, and for other purposes (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–2679. A communication from the Assistant Secretary, Department of the Interior, reporting, pursuant to law, on activities carried on by the Geological Survey during the reporting period January 1 through December 31, 1977; to the Committee on Energy and Natural Resources.

EC–2680. A communication from the Chair-

man, Water Resources Council, transmitting a draft of proposed legislation to amend the Water Resources Planning Act of 1965 (P.L. 89–80), as amended, to provide authorization of appropriations necessary to continue the Water Resources Council (WRC) and its programs through fiscal year 1979 (with accompanying papers); to the Committee on Environment and Public Works.

EC–2681. A communication from the Administrator, General Services Administration, transmitting, pursuant to law, a prospectus for alterations at the Washington, D.C., James Forrestal Building, in the amount of $8,243,000 (with accompanying papers); to the Committee on Environment and Public Works.

EC–2682. A communication from the Administrator, General Services Administration, transmitting, pursuant to law, a prospectus which proposes the exercise of one five-year renewal option for space presently occupied at 1405 Eye Street, N.W., Washington, D.C. (with accompanying papers); to the Committee on Environment and Public Works.

EC–2683. A communication from the Administrator, General Services Administration, transmitting, pursuant to law, a prospectus which proposes a succeeding lease for space presently occupied at 211 Main Street, San Francisco, California (with accompanying papers); to the Committee on Environment and Public Works.

EC–2684. A communication from the Secretary of Commerce, transmitting, for the information of the Senate, a Status Report on the Local Public Works (LPW) Program as administered by the Economic Development Administration, January 1978 (with an accompanying report); to the Committee on Environment and Public Works.

EC–2685. A communication from the President of the United States, transmitting, pursuant to law, a report setting forth a determination that relief for the U.S. High Carbon Ferrochromium Industry is not in the national economic interest, and explaining the reasons for the decision (with an accompanying report); to the Committee on Finance.

EC–2686. A communication from the Special Representative for Trade Negotiations, relating to actions to be taken by the President in response to certain trade practices of foreign governments (with accompanying papers); to the Committee on Finance.

EC–2687. A communication from the Staff Secretary, National Security Council, relating to a delay in the development of its Arms Control Impact Statements (AIS) for fiscal year 1979; to the Committee on Foreign Relations.

EC–2688. A communication from the Secretary of the Treasury, transmitting, pursuant to law, a report entitled "Foreign Credits by the United States Government: Status of Active Foreign Credits of the United States Government, September 30, 1977," September 30, 1977 (with an accompanying report); to the Committee on Foreign Relations.

EC–2689. A communication from the Assistant Secretary for Congressional Relations, Department of State, transmitting, pursuant to law, a proposed amendment to existing legislation that authorizes additional appropriations during fiscal year 1978 for the Department of State to carry out authorities, functions, duties and responsibilities in the conduct of the foreign affairs of the United States, including trade negotiations and other purposes authorized by law (with accompanying papers); to the Committee on Foreign Relations.

EC–2690. A communication from the Assistant Secretary for Congressional Relations, Department of State, transmitting a draft of proposed legislation to authorize appropriations for the Department of State for fiscal years 1979, 1980, and for other purposes (with accompanying papers); to the Committee on Foreign Relations.

EC–2691. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, international agreements other than treaties entered into by the United States sixty days after the execution thereof (with accompanying papers); to the Committee on Foreign Relations.

EC–2692. A communication from the Chairman, Commission on Federal Paperwork, transmitting, pursuant to law, a report with recommendations concerning administrative reform in welfare, June 10, 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2693. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Computed Tomography Scanners: Opportunity for Coordinated Federal Planning Before Substantial Acquisitions," January 30, 1978 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2694. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "U.S. Participation in International Agricultural Research," January 27, 1978 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2695. A communication from the Chairman, Commission on Federal Paperwork, transmitting, pursuant to law, a report with recommendations concerning information resource management, September 9, 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2696. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on December 6, 1977, which would establish a hazardous waste management program for the District of Columbia (Act 2–133) (with accompanying papers); to the Committee on Governmental Affairs.

EC–2697. A communication from the Director, Office of Administrative Services and Procurement, Office of the Assistant Secretary for Administration, Department of Commerce, transmitting, pursuant to law a report on disposal of foreign excess property for the fiscal year 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2698. A communication from the Chairman, Commission on Federal Paperwork, transmitting, pursuant to law, a report with recommendations concerning the records management program in the executive agencies, July 29, 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2699. A communication from the Vice President and General Manager, C. & P. Telephone Company, transmitting, pursuant to law, a statement of receipts and expenditures of the Chesapeake and Potomac Telephone Company for the year 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2700. A communication from the comptroller General of the United States, transmitting pursuant to law, a report entitled "Need for Improvements in the Federal Supply Service's Priority Requisitioning System," January 25, 1978 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2701. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "A Critique of the Performance of the Defense System Acquisition Review Council; Billions in Public Funds Involved," January 30, 1978 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2702. A communication from the Director, Federal Bureau of Investigation, Department of Justice, transmitting, pursuant to law, a report with respect to positions in the FBI in grades GS–16, 17, and 18, as of December 31, 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2703. A communication from the Principal Deputy Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics), pursuant to law, a report on civilian positions in the Department of Defense allocated or placed in grades GS–16, 17, and 18 during calendar year 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2704. A communication from the Chairman, Civil Service Commission, transmitting, pursuant to law, a report with respect to positions in grades GS–16, 17, and 18 during calendar year 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2705. A communication from the Director, National Science Foundation, transmitting a draft of proposed legislation for authorizations for the National Science Foundation for fiscal years 1979 and 1980 (with accompanying papers); to the Committee on Human Resources.

EC–2706. A communication from the Executive Secretary to the Department of Health, Education, and Welfare, transmitting, pursuant to law, final regulation amending the Family Contribution Schedules for use during the 1978–79 academic year, under the Basic Educational Opportunity Grant Program (20 U.S.C. 1070a, Subpart I of Part A of Title IV of the Higher Education Act of 1965, as amended, P.L. 92–318, amended by P.L. 94–482, Education Amendments of 1976 (with accompanying papers); to the Committee on Human Resources.

EC–2707. A communication from the Staff Secretary, National Security Council, reporting, pursuant to law, relating to the Freedom of Information Act; to the Committee on the Judiciary.

EC–2708. A communication from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, reports covering the period January 3 through January 13, 1978, concerning visa petitions which have been approved according the beneficiaries of such petitions third- and sixth-preference classification (with accompanying reports); to the Committee on the Judiciary.

EC–2709. A communication from the Vice Chairman, Federal Election Commission, transmitting, pursuant to law, a copy of correspondence which it has sent to the Office of Management and Budget (with accompanying papers); to the Committee on Rules and Administration.

EC–2710. A communication from the Administrator, Veterans' Administration, transmitting, pursuant to law, a study of the dependency and indemnity compensation program, October 1977 (with an accompanying document); to the Committee on Veterans' Affairs.

EC–2711. A communication from the Administrator, Veterans Administration, transmitting, pursuant to law, a report on findings and recommendations of a comprehensive investigation, analysis and evaluation of existing and alternative nonservice-connected pension programs, October 1977 (with an accompanying report); to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ROBERT C. BYRD (for Mr. PELL), from the Committee on Rules and Administration, with amendments and an amendment to the title:

S. Res. 268. A resolution providing for radio and television coverage of proceedings of the Senate during consideration of the Panama Canal Treaties (Rept. No. 95-630). Considered and agreed to.

BILL REFERRED

The bill (S. 2420) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world in their efforts toward economic development by establishing the International Development Cooperation Administration, and for other purposes, introduced by Mr. SPARKMAN (for himself, Mr. CASE, Mr. BAKER, Mr. ANDERSON, Mr. BAYH, Mr. BROOKE, Mr. BUMPERS, Mr. CHURCH, Mr. CLARK, Mr. CRANSTON, Mr. EAGLETON, Mr. GLENN, Mr. JAVITS, Mr. MATSUNAGA, Mr. MCGOVERN, Mr. MOYNIHAN, Mr. SARBANES, Mr. WILLIAMS, Mr. STONE, Mr. KENNEDY, and Mr. RIBICOFF), on January 25, 1978, and ordered held at the desk until February 2, 1978, was referred to the Committee on Foreign Relations and the Committee on Governmental Affairs, jointly, by unanimous consent, and that when one of the committees orders the bill reported, the other committee be granted 30 days within which to report the bill or be discharged from further consideration thereof.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. CHURCH (for himself and Mr. LAXALT):

S. 2475. A bill to improve the range conditions of the public grazing lands; to the Committee on Energy and Natural Resources.

By Mr. HUDDLESTON:

S. 2476. A bill to provide emergency assistance to farmers by increasing the target prices for the 1978 crops of wheat and feed grains and requiring a 20-percent set-aside of such commodities; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. CRANSTON:

S. 2477. A bill for the relief of John L. Shane and Beatrice Rosenus Oakland; to the Committee on the Judiciary.

By Mr. LONG:

S. 2478. A bill to amend the Rail Passenger Service Act to extend the authorizations of appropriations for an additional fiscal year, to provide for public consideration and implementation of a rail passenger service study, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. DOLE:

S. 2479. A bill to amend section 422(c) of the Higher Education Act of 1965, relating to the eligibility of new State guarantee agencies for advances to reserve funds under such section; to the Committee on Human Resources.

By Mr. BARTLETT:

S. 2480. A bill for the relief of Ock Soon Kim; to the Committee on the Judiciary.

By Mr. DOLE (for himself, Mr. TOWER, Mr. THURMOND, Mr. ZORINSKY, Mr. ALLEN, Mr. CURTIS, Mr. HAYAKAWA, Mr. DOMENICI, Mr. BENTSEN, Mr. WEICKER, and Mr. SCHMITT):

S. 2481. A bill to provide wheat, feed grain, and cotton producers the opportunity to receive parity prices for the 1978 crops; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DOLE (for himself, Mr. TOWER, Mr. THURMOND, Mr. ZORINSKY, Mr. ALLEN, Mr. CURTIS, Mr. HAYAKAWA, Mr. DOMENICI, Mr. BENTSEN, and Mr. SCHMITT):

S. 2482. A bill to amend the terms and conditions of the producer storage program for wheat and feed grains to provide incentives for participation by farmers; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2483. A bill to direct the Secretary of Agriculture to increase financing for exports in fiscal year 1978 under title I of the Agricultural Trade Development and Assistance Act of 1954; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BELLMON:

S. 2484. A bill to impose quotas on the importation of beef, including processed beef and beef quantities in the form of live cattle, when the domestic market price of cattle is less than 110 percent of parity and to impose custom duties on such articles when the domestic market price of cattle is less than 80 percent of party; to the Committee on Finance.

By Mr. RIEGLE:

S. 2485. A bill to provide reemployment rights for workers who temporarily relinquish employment to pursue education or childcare, and for other purposes; to the Committee on Human Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CHURCH (for himself and Mr. LAXALT):

S. 2475. A bill to improve the range conditions of the public grazing lands; to the Committee on Energy and Natural Resources.

PUBLIC GRAZING LANDS IMPROVEMENT ACT OF 1978

Mr. CHURCH. Mr. President, I am introducing legislation today which addresses the management and improvement of the 160 million acres of Federal land administered by the Bureau of Land Management for livestock grazing.

Severe problems stand in the way of improving the conditions of the range—funding for rangeland improvement has been inadequate; certain areas have been overpopulated by free-roaming wild horses and burros; uncertainty about current law and the affect of court decisions have slowed or halted many range improvement projects; and a substantial hike in grazing fees has been proposed by the administration.

Each of these issues represents a serious problem which could be dealt with individually. However, it is my belief that a balanced program on our public range demands that they be considered in one bill. I note that Congressman RONCALIO has taken a similar approach in the other body.

FINDING FOR RANGE IMPROVEMENT

A great need exists for improving the condition of the public grazing lands. Our rangelands are not delivering their full potential in livestock grazing, fish and wildlife habitat, recreation, and water and soil conservation. The BLM and numerous reports have indicated that over three-fourths of the lands administered by the Bureau are in an "unsatisfactory" condition.

While it is not disputed that this sorry state is, in part, the result of the lack of effective regulation of grazing in the West up until 40 years ago, current levels of funding for range management and improvements have not been able to improve overall range conditions.

We have a great deal to do before our rangelands reach their full potential. The public, the livestock industry, and wildlife are being deprived of the benefits that should stem from our public grazing lands.

In order to revitalize our public range, my bill would authorize a total of $350 million in appropriations over 20 years. These funds would supplement the ordinary budget for ongoing BLM range, wildlife, soil and water programs, and constitute addition to moneys allocated to on-the-ground range improvements under the BLM Organic Act. No less than 80 percent of the $350 million would be restricted to such activities as financing water development, increased vegetation, wildlife, and soil and water conservation projects. The funds will not be used for conducting inventories and studies, nor will they be used for preparing land use plan or environmental impact statements. Thus the bill assures that the bulk of the funds will go toward "on-the-ground" range improvements and not be eaten up in paperwork and administration.

Up to 15 percent of the funds would be available to the BLM to bring on additional personnel to supervise and enforce land use and allotment plans at the local level. Hopefully, this will enable BLM to put more qualified people in the field to work closely with range users, grazing advisory boards, and others in order to be responsive to specific needs and conditions of a particular allotment or unit. We must get BLM personnel out in the field if we are to be successful in improving and properly managing the range.

RANGE IMPROVEMENT

Users of the public range in Idaho are acutely aware of the confused state of affairs bogging down any attempt at range improvements. On the one hand, the courts have forbidden BLM from implementing any new "allotment management plan or its equivalent" until an environmental impact statement on the allotment management plan has been completed. On the other hand, the BLM Organic Act provides that the distribution and use of certain range betterment funds should not require an impact statement. Additional ambiguity was added by language in the conference committee's report on the Organic Act and by language in the act itself.

This confusion has brought efforts at range improvements virtually to a halt. Congressman RONCALIO. calls this the "chilling effect." Clearly we must thaw out the freeze which has paralyzed the BLM on range improvements.

This legislation seeks to address this problem by detailing those improvements which can proceed prior to the completion of the court-ordered impact statements, and those which cannot. Many of the environmental impact statements will not be finished until the late 1980's, or later if court challenges occur—as took place with the first grazing EIS for the Challis unit in Idaho. The importance of a legislative solution to the problem becomes clear.

My bill would permit improvements such as fencing, small water developments, fish and wildlife projects, restoration of native vegetation, and vegetative manipulation through grazing management, to proceed without completion of an EIS. These activities do not artificially alter the environment or pose a threat of environmental disruption or pollution. They merely permit the use of existing forage and other range values more efficiently, and make it possible to augment existing values without a commitment to irreversable decisions that could lead to poorly considered environmental modifications.

Indeed, there are certain activities which are major Federal actions that may significantly affect the environment. The bill prohibits the use of any earmarked range improvement funds for projects such as chaining, chemical and herbicide treatment, major water developments, stream modification, and seeding to introduce nonnative species such as crested wheatgrass, until the court-ordered EIS and other planning documents for the area have been satisfactorily completed. Thus, activities which could significantly alter the existing ecology of the range through artificial means will not occur until their desirability has been fully evaluated.

WILD HORSES AND BURROS

In 1971, Congress passed legislation to protect wild and free-roaming horses and burros from capture, branding, harassment, and death. While the act has been successful in its goal, it has become evident that, in certain areas, populations of wild horses and burros have been so well protected that their numbers now exceed the carrying capacity of the range. This poses a threat to wildlife, livestock, overall range conditions, and even to the horses and burros themselves.

BLM has initiated a program whereby certain of these excess animals are captured and may be "adopted" by individuals who will accord the animals humane treatment. However, this program has been frustrated by the fact that the 1971 law prohibits the Government from transferring title to the animals to the adopting party.

To alleviate this problem, my bill would do three things. First, it requires the Secretaries of Interior and Agriculture to conduct up-to-date inventories to determine whether overpopulations of wild horses or burros exist in an area. If either Secretary finds an area is overpopulated, he is then directed to round up the excess animals for which an adoption demand exists, and put the animals out for adoption. Second, to encourage adoption, the 1971 law is changed to allow transfer of title to the adopter after a period of 1 year, if the animal has been well treated. I believe that the 1-year "holding period" under humane conditions will involve expenses to the adopter that will preclude resale of the animals to slaughterhouses. Third, excess animals for which an adoption demand does not exist, are required to be disposed of in the most humane manner possible so as to restore a thriving natural ecologic balance to the range.

GRAZING FEES

Unless Congress acts prior to March 1, the Secretaries of the Interior and Agriculture plan to increase public land grazing fees by 25 percent per year until the Secretaries' definition of "fair market value" is reached sometime in 1980 or 1981. This would mean an increase in grazing fees of from 80 to 100 percent by 1981. While I have cosponsored legislation to place a 1-year moratorium on any increase in grazing fees, it only allows time for Congress to consider the issue. The bill I introduce today is the proper way to deal with the grazing fee issue. Livestock owners in Idaho using the public range do not want another moratorium—they want a fee formula which not only reflects long-term changes in forage value, but also the short-term influences on forage value inherent in production costs and beef prices.

My bill adopts the formula recommended by the Secretaries' own experts, the Technical Committee to Review Public Land Grazing Fees. This proposal is, I believe, far more equitable than the administration's proposal because it includes both long- and short-term indicators of forage value in arriving at grazing fees. Moreover, to prevent undue fluctuations in any one given year, my bill would also limit increases and decreases to 25 percent of the previous year's fee.

10-YEAR GRAZING PERMITS

The BLM Organic Act directed that public lands grazing leases or permits be issued for a period of 10 years, unless "it be in the interest of sound land management to specify a shorter term." Unfortunately, the Department of the Interior soon determined that only 1-year leases would be issued in all cases where land use planning is not complete. My bill reiterates the intent of Congress' mandate to require the issuance of 10-year leases or permits except when it has been determined, on a case-by-case basis, that a shorter period is required. Land management decisions must be as responsive to the range needs of a particular area as possible and should not be imposed in a manner which does not give sufficient consideration of the local condition.

I am hopeful that this legislation will serve as a means to focus on the very real and immediate problems affecting the public range. They urgently require attention and it is my intention to urge the Energy and Natural Resources Committee to move as expeditiously as possible to deal with the problems this bill is intended to correct.

Mr. LAXALT. Mr. President, I am pleased to join my distinguished colleague from Idaho, Senator CHURCH, in introducing this legislation as an effort to move toward resolution of many of the problems involving the management and improvement of range conditions on the public lands administered by the Bureau of Land Management and the Forest Service.

Specifically, Mr. President, this proposal addresses the following matters: problems with levels of range improvement funding; an overpopulation of free-roaming wild horses and burros, which is of particular concern in Nevada; uncertainty as to what scale and type of range improvement projects may proceed under current law and court decisions; the potential hardship to the ranching community throughout the West, and particularly in my State of Nevada, from proposed increases in grazing fees; and several other matters of serious concern.

Mr. President, each of these issues could be dealt with in separate legislation. In fact, on January 30, 1978, I introduced legislation which would fix into statute a method for deriving grazing fees. However, I agree with my distinguished colleague, Senator CHURCH, that these are interrelated issues that merit consolidated consideration by the Congress in an "omnibus" bill rather than proceeding in a piecemeal fashion.

Due to various factors, current range conditions are cheating the public, the livestock industry, and wildlife out of benefits that should be inherent on the public grazing lands. Although concerted efforts on the part of many conscientious ranchers, government agencies, and environmental groups have resulted in some needed improvements, there is still a long way to go before the rangelands attain the condition which enables them to best serve the multiple use values associated with a fully healthy and productive range. It is obvious to me, Mr. President, that the current levels of range improvement funding and range management have not been able to achieve the necessary improvements in overall range conditions.

To correct this situation, the measure that Senator CHURCH and I are introducing would authorize approximately $350 million to improve range conditions. These moneys would be in addition to funds to be requested for ongoing BLM range, wildlife, soil and water problems, and in addition to the money allocated to on-the-ground range improvements in 1976 under the provisions of the Federal Land Policy and Management Act of 1976. Mr. President, no less than 80 percent of the $350 million would be limited for the sole purpose of financing on-the-ground range maintenance and improvements such as fencing, water development, increased vegetation, wildlife and soil and water conservation projects.

These improvements are needed if existing forage is to be more efficiently used by livestock and wildlife, and ranges are to become more productive for livestock and wildlife values. Further, Mr. President, to insure that the moneys will physically go toward range improvements and not be eaten up in paperwork and administration, Senator CHURCH and

I have specified that the moneys cannot be used for the conducting of inventories and studies, nor for the preparation of land use plans, allotment management plans, or environmental impact statements.

This measure also provides that up to 15 percent of the funds can be used by BLM to train and hire additional qualified and experienced personnel. I hope that these moneys will enable the BLM to put more qualified people in the field to work closely with range users, grazing advisory boards, and other interested parties in refining range management plans, improvements, and techniques that are responsive to the specific needs and range conditions of the area to which it applies. At present, it appears that in far too many cases, paperwork and other administrative requirements have monopolized the time of BLM employees, so much so that they have insufficient time to work with range users to achieve the range improvements that we all desire.

Mr. President, there has been much confusion by the BLM and others in ascertaining exactly what types of range improvements can proceed in the absence of an environmental impact statement for a given area. The measure Senator CHURCH and I introduce seeks to solve this dilemma by specifically spelling out those range improvements which can proceed prior to the completion of the court-ordered environmental impact statements. Since many of the environmental impact statements cannot be completed until 1988, or later if court challenges to their adequacy occur—as has occurred with the first grazing EIS for the Challis unit in Idaho, the importance of this legislation solution becomes clear.

Simply, this measure allows certain range improvements such as fencing, water developments, fish and wildlife projects, the restoration of vegetation, and vegetative manipulation through grazing management to proceed without completion of an environmental impact statement. In my view, these improvements are clearly desirable. It is important to note that these improvements do not artificially alter the environment or pose a threat of environmental disruption or pollution. As such, they merely enable the existing forage and other range values to be used more efficiently and make it possible to augment these values without a commitment to irreversible decisions that could lead to poorly thought out impacts.

Mr. President, acknowledging that perhaps some provisions of allotment management plans and range improvements may indeed be major Federal actions which may significantly affect the environment, the measure that Senator CHURCH and I are introducing will prohibit the use of the designated range improvement funds for projects such as chaining, chemical and herbicide treatment, major water developments, stream modification, and the introduction of non-native vegetative species until such time as the court ordered environmental impact statements and other planning documents are completed. This will insure that range improvements and techniques that would significantly alter existing ecologic and vegetative patterns through artificial means will not be implemented until the necessary background data to support or refute the desirability has been thoroughly gathered and evaluated.

In 1971, Congress passed the Wild Free-Roaming Horse and Burro Act to protect wild horses and burros. Mr. President, that act has been more than successful in its goal, and it has become evident that, in certain areas such as Nevada, populations of wild horses and burros have been so well protected that their numbers now exceed the carrying capacity of the range. This matter now poses a serious threat to wildlife, livestock, overall range conditions, and even to the horses and burros themselves.

BLM initiated a program whereby those excess animals that were captured could be "adopted" by individuals who would accord the animals humane treatment. However, both the Bureau of Land Management and the Forest Service acknowledge that the 1971 act has been inadequate because the law prohibits the Government from transferring title of the animals to the adopting party.

To alleviate this problem, the Church-Laxalt bill would do three things. First, it requires that the Secretaries of Interior and Agriculture conduct up-to-date inventories to determine whether overpopulations of wild horses or burros exist in an area. If either Secretary finds an area is overpopulated, he is then directed to round up the excess animals for which an adoption demand exists, and put the animals out for adoption. Second, to encourage adoption, the 1971 law is changed to allow a transfer of title to the adopter after a period of 1 year, if the animal has been well treated. The 1-year holding period under humane conditions will involve expenses to the adopter that will preclude resale of the animals to slaughterhouses. Third, excess animals for which an adoption demand does not exist, are required to be disposed of in the most humane manner possible so as to maintain the ranges ecological balance.

On October 21, 1977, the Secretaries of Interior and Agriculture submitted a report to Congress which recommended an upward adjustment in grazing fees charged for domestic livestock grazing on public lands. The proposal submitted by the Secretaries would increase public land grazing fees by 25 percent per year until the Secretaries' definition of "fair market value" is reached sometime in 1980 or 1981. Depending on the lease rate charged on private grazing lands in future years, this would mean an increase in grazing fees from 80 to 100 percent by 1981.

Mr. President, each increase in grazing fees raises operating costs and reduces operators' returns because a rancher has little control over the price he can demand for his product. So, in essence, each increase in grazing fees must be deducted from his profit. And, to further emphasize the significance of grazing fee increases, it should be noted that cash flow problems often plague ranch owners—much more so than other businesses that have control over production and delivery schedules. Even a small increase in grazing fees can have serious impacts on some ranchers even to the extent of forcing some ranches out of business.

On January 30, 1977, the Public Lands and Resources Subcommittee of the Energy and Natural Resources Committee had hearings on S. 2297 and Senate Resolution 311, which would prevent the implementation of the Secretaries recommended grazing fee for the 1978 grazing year. I was pleased to cosponsor S. 2297 and Senate Resolution 311, but in my view, to prevent the grazing fee increases to go into effect is only appropriate if Congress intends to enact legislation designed to provide an alternative method for determining grazing fees.

While I have already introduced legislation (S. 2458), as a followup I am pleased to again introduce the formula recommended by the Secretaries' own experts, the Technical Committee to Review Public Land Grazing Fees, with Senator CHURCH as part of this omnibus measure. In my view, the Technical Committee's recommended formula is far more equitable because it takes into consideration the short-term costs of production and beef prices, while at the same time being sensitive to the long-range forage values. During hearings on this measure, it may become evident that the formula may need some further refinement. However, I believe its paramount virtue is that it recognizes the critical items of cost of production.

When Congress passed the Federal Land Policy and Management Act of 1976, it directed that public lands grazing leases or permits be issued for a period of 10 years, unless 'it will be in the interest of sound land management to specify a shorter term." Mr. President, in my view, the directive of the Congress has been subverted. The Secretary of the Interior has determined to issue only 1-year leases in all cases or on a blanket basis. The Church-Laxalt bill would require the Secretaries of Interior and Agriculture to issue 10-year leases or permits except when it is determined on a "case by case" basis—as opposed to a "blanket" basis—that a short term is necessary. This is to insure that land management decisions are not indiscriminate and inflexible, but gives sufficient attention to localized needs and conditions.

Mr. President, other features of the Church-Laxalt bill would: Require an inventory of range land conditions and trends; insure, to the extent feasible, that the authorized appropriations of $350 million are actually spent; to the extent practicable, require that environmental impact statements, land use plans, and other planning documents for a land management unit be rolled together into one consolidated unit plan and set a goal to make public grazing lands as productive as feasible for all range values.

Mr. President, I wish to commend my colleague, Senator CHURCH, for his efforts in regard to this legislation. I am honored to be able to join with him in its introduction and urge its favorable consideration.

By Mr. HUDDLESTON:

S. 2476. A bill to provide emergency assistance to farmers by increasing the target prices for the 1978 crops of wheat and feed grains and requiring a 20 percent set-aside of such commodities; to the Committee on Agriculture, Nutrition, and Forestry.

Mr. HUDDLESTON. Mr. President, during committee consideration of the 1977 farm bill by the Committee on Agriculture, Nutrition, and Forestry, of which I am a member, I was plagued by the question of how high should the loan levels and target prices of the basic commodities be set. Some persons whom I spoke with, and I spoke with many, many people from all sectors of our agricultural economy, suggested that the loan levels and target prices should be set low. Others suggested high target prices and low loan levels while still others called for high loan levels and abandoning the target price concept.

During the past 18 months I have met with hundreds of farmers. And they were all concerned about two things—profitability and stability. The recent concerns that farmers have been communicating to Congress are still profitability and stability.

The economic rationale for both target prices and loan levels is to lend stability to the markets of the respective commodities. To do this, target prices must approximate total cost of production, and loan levels should approximate variable costs. Without the stabilizing influence of realistic target prices and loan levels, wide swings in production and prices can be expected. The resulting instability in crop prices means not only wide swings in the availability of crops, but throws additional uncertainty into livestock production. And this sector has already been in deep trouble for several years.

Mr. President, there is no question that the whipsaw changes in prices and persistent upward trend of costs endanger not only agriculture, but the entire economy. Low profitability in farming causes particular hardships for rural America where agriculture is the dominant economic activity. Even though relatively few people are directly employed in agricultural production, thousands of other people are engaged in providing goods and services to farmers.

When farming suffers economic setbacks the problem is quickly transmitted to all other sectors of the economy. Not only will the supply of food and fiber decline or be irregular, but demand for machinery, clothes, housing, and automobiles will drop. In fact, demand for all goods and services will decline. This means fewer jobs in every production center of the country.

Agriculture is the central sector of our economy. It cannot be permitted to lag if economic stability or growth are to be achieved.

The goods that American agriculture supplies provide jobs for thousands in transportation, processing, wholesaling, and retailing. This economic activity accounts for over $100 billion a year. All of these wage earners in turn purchase food and consumer goods, further stimulating economic activity.

American agriculture has been the lone prop of the dollar in the world market. It is a prop that must not be knocked out. I have repeatedly suggested that with the proper trade policy, U.S. agricultural exports could, in essence, offset the trade deficit that will be created by the rise in fuel imports.

Mr. President, it simply boils down to the fact that agriculture is the base of our economy and food is a basic need. We cannot afford low or no profitability, losses in production, or economic instability in this sector.

During the past month I have been meeting with farmers who feel they have solutions to the dilemma facing them. And I have received all sorts of different proposals ranging from no agriculture program to 100 percent of parity.

Mr. President, I know farmers have a problem, a serious problem. I do not think that either the Congress or the USDA have an adequate solution to the problem. But I am willing to work with and for the agriculture sector to find a long-range permanent solution to low profitability and price instability.

At the outset it seems so easy to just enact a law to raise prices. But every action taken produces another action or reaction somewhere else in both the agriculture sector and the economy.

In my judgment, it is going to take time and lots of diligent work to examine the American agricultural policy alternatives. We are going to have to look at prices, production controls, marketing methods, exports, imports, and a whole host of other areas. These areas and policy alternatives must be examined in depth.

We need to employ the resources of the Government, the private sector, and the Congress in finding the best solution. We need to hear from farmers, from farm organizations, and from the consumer interests.

Today I am introducing 1-year emergency legislation to increase the target prices of wheat and corn by 50 cents per bushel. This increase in target prices is coupled with a mandatory 20-percent set-aside. Simply stated, for a farmer to receive the deficiency payment or be eligible for the nonrecourse Government loan he must set aside 20 percent of the acreage planted for harvest. I hope the set-aside will have the effect of significantly reducing production and producing a boost in commodity prices.

This bill is not the long-run solution. It is an emergency provision designed to temporarily alleviate the unfavorable situation faced by farmers during the 1978 crop year. What this legislation will do is to pump approximately an additional minimum of $5 billion into the farm economy. And the mechanism to administer the program is already in place. This is not legislation that is a radical departure from our current agricultural policy. Therefore, in my judgment, it is a measure which would be easy to implement and there would be no risk of disequilibrium of dislocation.

Mr. President, the agricultural capacity of this Nation is its greatest asset and our farmers must do well if we are to remain an economically strong nation. Their interests and ability to produce food and fiber must be protected—at all costs—if this Nation is to continue to enjoy the standard of living we have come to expect.

I urge my colleagues to favorably consider the emergency legislation I am introducing. I also urge them to join me in working for a long-term answer to the low profitability and price instability faced by the farmers of this Nation.

Mr. President, I ask unanimous consent that S. 2476 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2476

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title I of the Agricultural Act of 1949 is amended by adding at the end thereof a new section 112 as follows:

"SEC. 112. Notwithstanding any other provision of this Act—

"(a) (1) The established price for the 1978 crop of wheat shall be $3.50 per bushel.

"(2) The Secretary shall require, in the case of the 1978 crop of wheat, a set-aside of cropland equal to 20 percent of the acreage of wheat planted for harvest.

"(b) (1) The established price for the 1978 crop of corn shall be $2.60 per bushel.

"(2) The Secretary shall require, in the case of the 1978 crops of corn, grain sorghums, and barley, a set-aside of cropland equal to 20 percent of the acreage of such commodities planted for harvest.".

By Mr. LONG:

S. 2478. A bill to amend the Rail Passenger Service Act to extend the authorizations of appropriations for an additional fiscal year, to provide for public consideration and implementation of a rail passenger service study, and for other purposes; to the Committee on Commerce, Science, and Transportation.

NATIONAL RAIL PASSENGER CORPORATION AUTHORIZATION ACT OF 1978

Mr. LONG. Mr. President, I am introducing today the National Railroad Passenger Authorization Act of 1978 for appropriate reference. This bill would accomplish three things: First, it provides a method to comprehensively look at Amtrak's route system. As many of my colleagues are already aware, the size of Amtrak's annual operating deficit has grown over the last several years and is now approximateely $500 million a year. There is a significant body of thought that we are simply not getting as much as we should for this amount of money. It appears that one of the important reasons for this is that Amtrak's route system is not properly tailored to the areas where maximum demand for rail passenger service exists. In some areas, we are today running trains that simply are not sufficiently used to justify the funding. In other areas, we are not operating enough trains to make the service attractive and hence ridership is low. In some corridor areas, the addition of train frequency would lead to quantum leaps in

ridership. This phenomenon has already been demonstrated, for example, in the Los Angeles to San Diego corridor. In other areas, trains currently are operating with very light ridership and hence high per passenger mile deficits. The entire route system needs to be redesigned to maximize the public benefits—which for the most part flow from ridership—for the public resources expended on the system.

The Appropriations Committee, in report language, has asked the Department of Transportation to come up with a new route system for Amtrak. This report, which will be preliminary in nature, could serve as the basis for the kind of change in the route system that is necessary. This bill would take that report and incorporate it into a process to bring about change after public hearings and after the Congress has had time to review the proposed changes and turn them down if necessary.

The bill also provides for authorization of appropriations for both operating and capital expenses and several technical amendments to the Rail Passenger Service Act and title VII of the Railroad Revitalization and Regulatory Reform Act.

Section 2 of the bill provides for authorization of appropriations for the coming fiscal year, as required by the Budget Act. Only 1 year of authorization has been provided for because of the fact that we do not know yet what the financial requirements of the new route system will be. Obviously, since it will take almost a year to put the new route structure in place, we will need sufficient authorizations to operate the existing system until such time as we can make the change to a new system. The funding level contained in this bill, therefore, is based on an assumption that that level of service would continue during the implementation period for the new route structure. Funding levels submitted by the Department of Transportation are considerably less than called for in this bill. During the course of the authorization hearings the committee will want to satisfy itself that, based upon the Department's view, or Amtrak's view, or other views submitted during the course of the hearing, that the final fiscal year 1979 authorization levels are consistent with the kinds and quality of service that the public has a right to expect from the provision of Government subsidies.

Paragraph (1) contains the authorization for national operations, paragraph (2) contains the authorization for capital improvements, including improvements to the "spur" lines of the Northeast Corridor that are owned by Amtrak, paragraph (3) contains the authorization for corridor operations, paragraph (4) continues the program begun under the last administration of repaying outstanding loans which were originally guaranteed under section 602 of the Rail Passenger Service Act.

Section 3 of the bill provides for a procedure for Amtrak to optimize its route structure to more efficiently use Federal funds for rail passenger service. The bill is relatively self-explanatory, and I would only like to point out that the procedure is designed to be as fair as possible and to incorporate public comment and congressional review of the new proposed route structure.

Section 4 of the bill contains two technical amendments to title VII of the Railroad Revitalization and Regulatory Reform Act which make clear that the mandatory goals for traveltimes in the Northeast Corridor are not to be read as precluding faster times if that is possible and also to assure that adequate planning for equipment acquisition is carried out from a marketing point of view in the corridor. It is very important to assure that marketing decisions which maximize ridership in the various types of potential travel markets in the corridor are reflected in equipment which is also designed to be compatible on a systems basis with the new track structure in order to minimize maintenance costs.

Section 5 is a rewrite of section 402(a) of the Rail Passenger Service Act which is intended to clarify for the Interstate Commerce Commission that the proper level of compensation for railroads operating Amtrak trains is to be based upon avoidable costs. This amendment is intended to reverse the Commission's decision in a case involving the Texas and Pacific Railway (F.D. 27819, 348 ICC 645) which improperly made a distinction between services rendered by contracting railroads and the use of the facilities of those carriers.

Section 6 is intended to allow the transportation of pets on Amtrak trains, particularly in private roomettes or bedrooms with passengers who are willing to pay whatever additional cleaning costs Amtrak imposes because of this kind of transportation.

Section 7 is intended to reduce Federal spending by combining mail routes with Rail Passenger Service routes. At present, many Amtrak routes are duplicated by mail hauled by truck, which results in the Federal Government paying for two kinds of transportation where in many cases the mail could be more efficiently carried by train at a lower overall cost to the Government.

Section 8 would rewrite a portion of the Rail Passenger Service Act in order to eliminate a confusion that has arisen over Amtrak's role. The original act creating Amtrak defined it as a "for profit" company when in fact it has no chance of ever becoming profitable. The Transportation Research Board, among others, has identified this as a lack of clarity regarding Amtrak's mission, and the redefinition is intended to better harmonize this part of the statute with the realities of Amtrak's role.

Section 9 would accomplish two things: First, it provides a mechanism for Amtrak to assume operations of any other private carriers if those carriers can reach an agreement with Amtrak to join the system. For example. Southern Railway has been in negotiation with Amtrak over the possibility that the Southern Crescent will become part of the Amtrak system. This section would also, in subsection (b), clarify that those limited places where Amtrak owns its own right-of-way as it does in the Northeast corridor, it has no responsibility to maintain public roads that may cross its right-of-way. This of course is the legal state of affairs in any case because the Regional Rail Reorganization Act transferred these properties free of these responsibilities, but it has been suggested that this further clarification would be useful in order to make clear that Amtrak has it hands full enough trying to operate trains without fixing public highways as well, which is something that will be addressed in the new highway bill.

Mr. President, I am hopeful that the Commerce Committee will be able to hold hearings in the near future on Amtrak and will be able to report a bill that will address the need to create a route system which can better maximize the public benefits flowing from the Nation's investment in rail passenger service. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2478

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Rail Passenger Corporation Authorization Act of 1978".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. (a) Section 601(a)(1) of the Rail Passenger Service Act (45 U.S.C. 601(a)(1)) is amended as follows:

(1) Clause (1) of such section is amended by (A) striking out "and" immediately after "1977,"; and (B) inserting ", and not to exceed $550,000,000 for the fiscal year ending September 30, 1979", immediately after "1978".

(2) Clause (2) of such section is amended by (A) striking out "and" immediately after "1977,"; and (B) striking out "1978;" and inserting in lieu thereof "1978, and not to exceed $200,000,000 for the fiscal year ending September 30, 1979, which shall include amounts authorized for expenditure for compatible equipment under section 703(5) of the Railroad Revitalization and Regulatory Reform Act of 1976;".

(3) Clause (3) of such section is amended by (A) striking out "and" immediately after "1977,"; and (B) inserting ", and not to exceed $83,000,000 for the fiscal year ending September 30, 1979" immediately after "1978".

(4) Clause (4) of such section is amended by inserting ", and not to exceed $25,000,000 for the fiscal year ending September 30, 1979" immediately after "1978".

ROUTE REEXAMINATION

SEC. 3. Title IV of the Rail Passenger Service Act is amended by adding at the end thereof the following:

"SEC. 406. ROUTE REEXAMINATION

"(a) The Secretary, in cooperation with the Corporation, shall immediately develop a preliminary recommendation for a route system for the Corporation which will provide an optimal intercity railroad passenger system, based upon current and future market and population requirements, including, where appropriate, portions of the Corporation's basic system. In developing his recommendations the Secretary shall consider—

"(1) the adequacy of other transportation modes serving the same points to be served by the recommended route system;

"(2) any unique characteristics and advantages of rail service as compared to other modes of transportation;

"(3) the role that passenger rail service can play in helping meet the Nation's transporta-

tion needs while furthering the national energy conservation efforts;

"(4) the relationship of benefits of given intercity rail passenger services to the costs of providing such services, computing the costs in loss or profit per passenger mile rather than total loss or profit per route;

"(5) the transportation needs of areas lacking adequate alternative forms of transportation; and

"(6) frequency and fare structure alternatives and the impact of such alternatives on ridership, revenues, and expenses of rail passenger service.

"(b) The Secretary shall develop and publish the preliminary recommendations specified in subsection (a) on or before May 1, 1978, and, at the same time, submit them to the Rail Service Planning Office (hereinafter in this section referred to as the 'Office'). The Secretary shall at that time also provide copies of the preliminary recommendations to the Corporation; the Office of Rail Public Counsel; the Commission; Secretary of Energy; the Governors, Departments of Transportation and Public Utilities Commissions of each State in which passenger rail service is proposed to be modified; railroads affected by the recommendations; labor organizations duly authorized under the Railway Labor Act to represent railroad employees; and the United States Postal Service. In addition, copies of the preliminary report shall be made available by the Secretary to interested persons at a reasonable cost. Such recommendations shall include—

"(1) a recommended route structure for the Corporation by end points and principal intermediate points to be served;

"(2) quality and type of intercity rail passenger service recommended for each route including frequency, speed, and classes of services offered;

"(3) ranges of projected operating expenses, ridership, and revenues, by route, including a measure calculated by loss or profit per passenger mile, and separated for non-State-supported routes and State-supported routes;

"(4) an estimate of the equipment and facilities necessary to support the recommended route structure;

"(5) a recommended plan for coordinating intercity rail passenger service at points on the system with other modes of transportation serving those points; and

"(6) based upon the route level projections, an estimate of operating and capital appropriations required to operate the system for fiscal years 1980 through 1984.

"(c) During the period beginning on May 1, 1978, and ending on August 31, 1978, the Office shall conduct public hearings on the recommendations of the Secretary developed pursuant to subsection (a). Such public hearings shall be held in such places and at such times as the Office determines will afford the affected States and communities an adequate opportunity to participate in such hearings. The Office of Rail Public Counsel, to the extent practicable, shall provide the services of attorneys and such other personnel as may be required in order to protect the interests of those communities and users of rail passenger service which the Director of the Office of Rail Public Counsel determines, for whatever reason (such as size or location), might not otherwise be adequately represented in the course of the hearings and evaluations which the Office is required to conduct. During such period, in addition to holding public hearings, the Office shall invite comment on such recommendations from the Corporation, the Commission, the Office of Rail Public Counsel, the Governors, Departments of Transportation and Public Utilities of each State in which intercity rail passenger service is proposed to be modified, the railroads affected by the recommendations, labor organizations authorized under the Railway Labor Act to represent railroad employees, the Secretary of Energy, interested citizen groups, and the United States Postal Service.

"(d) By September 30, 1978, the Office shall submit a summary and analysis of the evidence received in the course of its proceedings conducted under subsection (c), together with its critique and evaluation of the recommendations, to the Secretary. The Secretary shall thoroughly consider the material submitted to him by the Office with respect to the recommendations and, based on that consideration (and further evaluations of the Secretary), develop a final recommended route system for the Corporation as he deems appropriate. Such final recommendation shall include a summary of the significant recommendations received, together with the reasons for adopting or not adopting any such recommendation.

"(e)(1) By December 31, 1978 the Secretary shall submit the final recommendations, along with its supporting and explanatory material, designating a new basic route system of intercity rail passenger service, to both Houses of Congress, and to the Committees on Appropriations and Interstate and Foreign Commerce of the House of Representatives, and the Committees on Appropriations and Commerce, Science, and Transportation of the Senate. The final recommendations shall be deemed approved, and shall take effect, at the end of the first period of 60 calendar days of continuous session of the Congress after such date of submission, unless either the House of Representatives or the Senate adopts a resolution during such period stating that it does not favor such final recommendations.

"(2) If either House or the Senate adopts a resolution of disapproval under paragraph (1), the Secretary shall, within 45 days after such date of adoption, determine and resubmit a revised final recommendation to those committees of the Congress specified in paragraph (1).

"(3) For the purposes of this subsection—

"(A) continuity of a session of the Congress is broken only by an adjournment sine die; and

"(B) the days on which either House is not in session because of an adjournment for more than 3 days to a day certain are excluded in computing the 60-day period.

"(f) Immediately upon approval of the final recommendations, the Corporation shall implement the basic route system designated therein and shall complete such implementation as soon thereafter as possible, but in no event later than 12 months thereafter.

"(g)(1) During the period beginning on the date of enactment of this section, and ending on the effective date of the new basic route system designated by the Secretary under this section, the provisions of sections 403 and 404 of this Act shall not apply to the development or implementation of the new basic route system. After such effective date, any additions, deletions, or modifications to such new basic route system may be made by the Corporation in accordance with the applicable provisions of such sections 403(c) and 404 (including the route and service criteria and procedures developed under section 404(c)(1)).

"(2) During the period beginning on the date of enactment of this section, and ending 12 months after the effective date of the new basic route system designated by the Secretary under this section, the provisions of section 801(a) of this Act (including the regulations of the Commission promulgated thereunder) shall not apply to the development or implementation of the new basic route system.

"(3) The basic route system designated by the Secretary in the recommendations developed under this section, when effective, shall supersede the basic system including any route previously in effect.".

NORTHEAST CORRIDOR

SEC. 4. Section 703 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 853) is amended by (a) inserting "at most" immediately before "a 3-hour-and-40-minute" and "a 2-hour-and-40-minute", respectively, in subsection (1)(A)(i) of such section; (b) inserting "or other responsible parties" immediately after "(or local or regional transportation authorities)" in subsection (1)(B) of such section; and (c) adding at the end thereof the following:

"(5) COMPATIBLE EQUIPMENT.—The Corporation shall develop economical and reliable rolling stock and related equipment designed to be compatible with the track, operating and marketing characteristics of the Northeast Corridor at and after the completion of the Northeast Corridor improvement project, including the capability to reliably meet the trip times set forth in subparagraph (1)(E) of this section in regularly scheduled revenue service in the Northeast Corridor. The Secretary shall advise and assist the Corporation in the development of such equipment, and the Corporation shall obtain the Secretary's concurrence before purchasing such equipment with Federal financial assistance that the equipment meets the goals specified in this paragraph. The Corporation shall submit requests for authorization of appropriations for the production of such equipment and shall, together with the Secretary, include equipment planning in the reports required by subparagraph 1(E) of this section.".

FACILITY AND SERVICE AGREEMENTS

SEC. 5. Section 402(a) of the Rail Passenger Service Act (45 U.S.C. 562(a)) is amended to read as follows:

"SEC. 402. FACILITY AND SERVICE AGREEMENTS.

"(a)(1)(A) The Corporation may contract with railroads or public transportation agencies for use of tracks and other facilities and the provision of services on such terms and conditions as the parties may agree. In the event of a failure to agree, the Interstate Commerce Commission shall, within 90 days after application by the Corporation, if it finds that doing so is necessary to carry out the purposes of this Act, order the provision of services or the use of tracks or facilities of the railroad or agency by the Corporation, on such terms and for such compensation as the Commission may fix as just and reasonable and the rights of the Corporation to such services or to the use of tracks or facilities of the railroad or agency under such order or under an order issued under subsection (b) of this section shall be conditioned upon payment by the Corporation of the compensation fixed by the Commission. In fixing just and reasonable compensation for the use of tracks and facilities ordered by the Commission under the preceding sentence, the Commission shall limit such compensation to the avoidable costs of permitting the Corporation to use the railroad's or agency's tracks and facilities. In fixing just and reasonable compensation for the provision of services ordered by the Commission under the second sentence of this subsection, the Commission shall order compensation (if any) in excess of avoidable costs only in proportion to increases in the quality of service and only where the railroad or agency provides ontime performance in excess of 80 percent of the time under the fastest practicable operating schedule (consistent with Federal safety standards established pursuant to the Federal Railroad Safety Act of 1970). If the amount of compensation fixed is not duly and promptly paid, the railroad or agency entitled thereto may bring an action against the Corporation to recover the amount properly owed.

"(B) For purposes of this section, 'avoidable costs' shall mean all reasonable and necessary expenses (including use of tracks

and other facilities) which would be incurred by a carrier in providing a service which the carrier can establish that it would not incur if such service were not operated, and all other services were continued. Such costs shall be restricted to costs solely related to the service and the variable portion of common costs which would not be incurred but for the existence of the service. Such costs shall exclude fixed common costs, allocation of any common costs which do not vary as a consequence of providing the service, return on investment, rent, and any other costs which the carrier cannot establish that it would not have reasonably and necessarily incurred but for the existence of the service.

"(2) Notwithstanding any other provision of this Act, the Corporation may enter into agreements with any other railroads and with any State (or local or regional transportation agency) responsible for providing commuter rail or rail freight services over tracks, rights-of-way, and other facilities acquired by the Corporation pursuant to authority granted by the Regional Rail Reorganization Act of 1973 and the Railroad Revitalization and Regulatory Reform Act of 1976. In the event of a failure to agree, the Commission shall order that rail services continue to be provided, and it shall, consistent with equitable and fair compensation principles, decide, within 180 days after the date of submission of a dispute to the Commission, the proper amount of compensation for the provision of such services and use of tracks, rights-of-way, and other facilities. The Commission, in making such a determination, shall consider all relevant factors, and shall not permit cross-subsidization among intercity, commuter, and rail freight services.".

TRANSPORTING CERTAIN ANIMALS

SEC. 6. Section 21 of the Animal Welfare Act (7 U.S.C. 2151) is amended by adding at the end thereof the following: "The Secretary shall exempt from the requirements of this Act the transporting of cats and dogs in passenger rail service when the Secretary determines that such exemption shall result in an increase in reliable humane transport service for cats and dogs.".

TRANSPORTATION OF MAIL

SEC. 7. Section 5203(a) of title 39 of the United States Code (relating to transportation of mail by surface carrier) is amended by adding at the end thereof the following: "In establishing mail routes and selecting carriers to provide mail transportation services thereon, the Postal Service shall use the railroad services operated by the National Railroad Passenger Corporation, so long as using such railroad services results in no significant deterioration of mail services or increase in costs to the Federal Government.".

POLICY

SEC. 8. The second sentence of section 301 of the Rail Passenger Service Act (45 U.S.C. 541) is amended to read as follows: "The Corporation shall provide intercity rail passenger service, employing innovating operating and marketing concepts so as to fully develop the potential of modern rail service in meeting the Nation's intercity passenger transportation requirements, while maximizing the public benefit for the public expenditure made.".

MISCELLANEOUS

SEC. 9. (a) Section 404(a) of the Rail Passenger Service Act (45 U.S.C. 564(a)) is amended by adding at the end thereof the following. "In order to continue such train operations, the Corporation may, notwithstanding the pendency of the route reexamination being conducted under section 3 of the National Rail Passenger Corporation Authorization Act of 1978, contract for the provision thereof with any railroad filing a notice of discontinuance.".

(b) Section 306 of the Rail Passenger Service Act (45 U.S.C. 546) is amended by adding at the end thereof the following:

"(1) The Corporation shall not be subject to any State or local law with respect to the construction, maintenance, repair, or rehabilitation of structures carrying public roads.".

By Mr. DOLE:

S. 2479. A bill to amend section 422(c) of the Higher Education Act of 1965, relating to the eligibility of new State guarantee agencies for advances to reserve funds under such section; to the Committee on Human Resources.

Mr. DOLE. Mr. President, I send to the desk a technical amendment to the Higher Education Act of 1965 and ask unanimous consent that it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America assembled, That section 422(c)(5) of the Higher Education Act of 1965 is amended by striking out "the effective date of this subsection" each place it appears in subparagraphs (A) and (B) and inserting in lieu thereof "the date of enactment of this subsection".

SEC. 2. The amendments made by the first section of this Act shall take effect on October 1, 1977.

By Mr. DOLE (for himself, Mr. TOWER, Mr. THURMOND, Mr. ZORINSKY, Mr. ALLEN, Mr. CURTIS, Mr. HAYAKAWA, Mr. DOMENICI, Mr. BENTSEN, Mr. WEICKER, and Mr. SCHMITT):

S. 2481. A bill to provide wheat, feed grain, and cotton producers the opportunity to receive parity prices for the 1978 crops; to the Committee on Agriculture, Nutrition, and Forestry.

FLEXIBLE PARITY ACT OF 1978

Mr. DOLE. Mr. President, the Senator from Kansas will take just a few moments to talk about what I consider to be one of the real crises in America today. That is agriculture.

Farmers are caught in a vicious cost-price squeeze. Today, the American farmer is unable to recover his cost of production. His situation is the worst since the Great Depression.

Farm debt has increased 63 percent in the last 5 years (in 1974 was $74 billion, by 1977 it had increased to $119 billion). Young farmers are hard hit.

In terms of current dollars, farm income declined from $33 billion in 1973 to only about $20 billion in 1977—just 4 years later. The economic problems of farmers are spreading to other agribusiness enterprises such as farm machinery and farm supply dealers and manufacturers—and it will spread further.

I am introducing a bill today to adjust target prices for grain and cotton. Under my bill, which I call the Flexible Parity Act of 1978:

An individual farmer can choose the target price he needs up to parity, but must scale down his production accordingly;

My bill will not interfere with exports;

It will not contribute to foreign production increases;

It will not encourage substitutes; and

Under my bill, costs would be reasonable since scaled down production should result in higher market prices, resulting in reasonable level of deficiency payments.

Now for the first time, farmers will have a mechanism under which they can collectively control their production and each individual may select the target level and set-aside that is best for his farm operation. With this legislation there will be no necessity for set-aside payments since farmers will be receiving target price incentives up to the parity level.

I have considered a similar approach on soybeans, rice, sugar, and peanuts and I may wish to apply this principle to these crops after producers have had an opportunity to testify at Agriculture Committee hearings scheduled to commence February 23, 1978.

Cost estimates are not easy to assess for this flexible parity approach because of the difficulty in anticipating farmers' response to the various target prices and set-aside options available to them. However, since substantial improvement in farm prices would likely occur as the effects of the set-aside are felt, I believe that budget exposure would be relatively modest. I will illustrate with an example for wheat, corn, and cotton:

WHEAT EXAMPLE

Assume farmers choose on the average a 35 percent set-aside in order to be assured of $4 per bushel target price, assume further that the 35 percent set-aside will actually cut production by 25 percent resulting in a 1.5-billion bushel crop instead of a 2-billion bushel crop.

If this production adjustment, coupled with a vigorous export market promotion program, raised market prices to $3.50 per bushel, the additional amount of exposure for deficiency payments would be $750 million (.50 per bushel × 1.5 million bushels).

CORN EXAMPLE

Assume farmers choose on the average a 35 percent set-aside in order to be assured of a $2.85 per bushel target price. Assume further that the 35 percent set-aside will actually cut production by 25 percent, resulting in a 4.5-billion-bushel corn crop instead of a 6-billion-bushel crop.

If this production adjustment coupled with a vigorous export market program raised market prices to $2.85 per bushel, the additional amount of budget exposure for deficiency payments would be zero.

COTTON EXAMPLE

Assume farmers choose on the average a 35 percent set-aside in order to be assured of a 69-cent-per-pound target price, assume further that the 35 percent setaside will actually cut production by 25 percent resulting in a 10,500,000-bale crop instead of a 14-million-bale crop.

If this production adjustment, coupled with a vigorous export market promotion program, raised market prices to 65 cents per pound, the additional amount of exposure for deficiency payments would be $210 million ($20 per bale × 10,500,000 bales).

Yesterday, Mr. TALMADGE, chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, scheduled hearings to explore ways of addressing the current farm situation.

My purpose in introducing my bill today is to give time for all interested individuals and groups to analyze it along with others prior to the hearing date of February 23, 1978.

Mr. President, farmers have been all over the Capitol in the past few weeks. They are frustrated; in some cases, they are desperate. They are in deep economic trouble at home. This comes not just from farmers, but from bankers and others who deal with farmers in my State, and I guess every rural State in America.

I have been discussing, as a member of the Agriculture Committee, possible legislative proposals that are responsible and still responsive to the farmer. After the comments today, I shall be introducing a bill that I call the Flexible Parity Act of 1978.

Let me say very quickly what this bill will do. It applies to wheat, feed grains, corn, and cotton. It says to that American farmer, whether he be in Kansas or Arkansas or New Mexico or South Carolina or Tennessee or Illinois, that he can choose the target price that he might need for parity, but if he does that, he has to scale down his production. Let me give a quick example of how that would apply to a wheat farmer in the State of Kansas or any other State.

Under the present program, if he sets aside 20 percent of his production, then the so-called target price is $3 a bushel. I want to state very quickly that that is not a Government payment. The target price is the target price. If the market price is $2.90, there is a payment of 10 cents. If the market price is $3, there is no payment at all.

The problem in America today is that there is too much supply. We have too much wheat, for example. It depresses market prices. In order to restore the marketplace competition, we have to reduce that supply. Farmers are willing to reduce that supply, but they would like to stay in business in the process so they can continue to produce for themselves, for American consumers, and for the hungry in the world and others who look to us for leadership in agriculture.

What I have done is try to devise a flexible parity concept which says that, if you reduce your production of wheat 25 percent, the target price is $3.25 a bushel; if you reduce your production 30 percent, the target price is $3.50 a bushel; on a 35 percent reduction, the target price goes to $4; on 40 percent, it goes to $4.25; 45 percent, it goes to $4.50; 50 percent, it goes to parity—$5.04 a bushel. The same is true for corn, for feed grains, or for cotton.

Let me make it very clear that before the farmer can receive that increased target price, that incentive, he has to cut production. He cannot have it both ways. He cannot have full production and high target prices.

It seems to me, after weeks of research and searching for some alternative, that we have come up with an idea and a program that is geared toward the marketplace.

Some have suggested that we ought to raise the loan rates up to parity. I do not believe that. All we do by raising loan rates up to parity or some higher figure than they are now, on wheat or corn or whatever, is to interfere with exports. If the farmer has any future in America, it is in exports.

In addition, this will not contribute to foreign production increases. We are not setting up some artificial price that will encourage every other wheat producer to plant fence-to-fence and destroy the market.

Also, I think it is going to cost a very small amount, because if you cut your production, you are going to have fewer bushels on which to pay a target price in the first place. In the second place, the market price is going to be strengthened and the target price concept will not go into effect.

Mr. President, I have worked on this bill with others of my colleagues, including the distinguished Senator from South Carolina (Mr. THURMOND), who was one of the principal cosponsors of this bill. We are looking at a similar approach as far as soybeans are concerned, and rice, sugar, and peanuts. It may be that we will apply this same principle to those crops but this applies to corn, wheat, cotton, and feed grains. I think it is a step in the right direction.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2481

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Flexible Parity Act of 1978".

TITLE I—WHEAT

SEC. 101. Section 107A of the Agricultural Act of 1949, as amended, is amended by adding at the end of subsection (b)(1)(B) the following new sentence:

"Notwithstanding any other provision of this Act, the established price for an individual producer for the 1978 crop of wheat shall be at a level related to the set-aside such producer voluntarily makes pursuant to this Act as follows:

If the set-aside is:

20 per centum, the established price shall be $3.00 per bushel;

25 per centum, the established price shall be $3.25 per bushel;

30 per centum, the established price shall be $3.50 per bushel;

35 per centum, the established price shall be $4.00 per bushel;

40 per centum, the established price shall be $4.25 per bushel;

45 per centum, the established price shall be $4.50 per bushel;

50 per centum, the established price shall be $5.04 per bushel."

TITLE II—FEED GRAINS

SEC. 201. Section 105A of the Agricultural Act of 1949, as amended, is amended by adding at the end of subsection (b)(1)(B) the following new sentence:

Notwithstanding any other provision of this Act, the established price for an individual producer for the 1978 crop of corn shall be at a level related to the set-aside such producer voluntarily makes pursuant to this Act as follows:

If the set-aside is:

10 per centum, the established price shall be $2.10 per bushel;

20 per centum, the established price shall be $2.25 per bushel;

25 per centum, the established price shall be $2.45 per bushel;

30 per centum, the established price shall be $2.65 per bushel;

35 per centum, the established price shall be $2.85 per bushel;

40 per centum, the established price shall be $3.05 per bushel;

45 per centum, the established price shall be $3.25 per bushel;

50 per centum, the established price shall be $3.45 per bushel;

and the established prices for grain sorghum and if designated by the Secretary, oats, and barley shall be at such levels as provided under subsection (b)(1)(D) of this Act."

TITLE III—UPLAND COTTON

SEC. 301. Section 103 of the Agricultural Act of 1949, as amended, is amended by adding at the end of subsection (f)(4) the following new sentence:

"Notwithstanding any other provision of this Act, the established price for an individual producer for the 1978 crop of upland cotton shall be at a level related to the set-aside such producer voluntarily makes pursuant to this Act as follows:

If the set-aside is:

20 per centum, the established price shall be 54 cents per pound;

25 per centum, the established price shall be 59 cents per pound;

30 per centum, the established price shall be 64 cents per pound;

35 per centum, the established price shall be 69 cents per pound;

40 per centum, the established price shall be 74 cents per pound;

45 per centum, the established price shall be 79 cents per pound;

50 per centum, the established price shall be 84 cents per pound."

TITLE IV—GRAIN RELEASE PRICES

SEC. 401. Effective for the period beginning with the enactment of this section and ending one year thereafter—

(a) Section 110(b)(5) of the Agricultural Act of 1949, as amended, is amended by striking out the phrase

"which is not less than 140 per centum nor more than 160 per centum of the then current level of price support for wheat or such appropriate level for feed grains, as determined by the Secretary"

and inserting in lieu thereof the phrase

"which is not less than the current parity price for wheat or feed grains"

(b) Section 110(b)(6) of the Agricultural Act of 1949, as amended, is amended by striking out the phrase

"is not less than 175 per centum of the then current level of price support for wheat or such appropriate level for feed grains as determined by the Secretary under this Act."

and inserting in lieu thereof the phrase

"is not less than 105 per centum of the current parity price for wheat or feed grains."

SEC. 402. Effective for the period beginning with the enactment of this section and ending one year thereafter, Section 110(d) of the Agricultural Act of 1949, as amended, is amended by striking out the phrase "150 per centum of the then current level of price support for such commodity" and inserting in lieu thereof the phrase "the parity price for such commodity".

SEC. 403. Effective for the period beginning with the enactment of this section and end-

ing one year thereafter, the third proviso following the third sentence of Section 407 of the Agricultural Act of 1949, as amended, is amended by striking out the words "115 per centum of the current national average loan rate" and inserting in lieu thereof the words "the current parity price".

Mr. DOLE. I yield to the distinguished Senator from South Carolina.

Mr. THURMOND. Mr. President, I am pleased to join with Senator DOLE in authoring the Flexible Parity Act of 1978. This bill provides a mechanism under which farmers can collectively control production and under which each individual farmer can select a target level and set-aside that best applies to his farm situation.

It will give the producers of wheat, feed grains, and cotton the opportunity to receive parity prices for their 1978 crops, and simultaneously contains a mechanism to correct the immediate imbalance in supply and demand for farm commodities. Under the proposed bill, the farmer may achieve parity without any corresponding price increase to the consumer and only a slight outlay of Federal money charged to the taxpayer.

Increasing surpluses of farm commodities have driven commodity prices to near record lows. At the same time, rampant inflation has driven farm production costs to alltime highs. The American farmer is experiencing a cost-price squeeze which threatens his survival. Not only is every farmer affected, but every citizen is threatened because farmers are the backbone of society in this great Nation. If this cost-price squeeze is allowed to remain unchecked, many farmers will be driven out of business. The inevitable result is that consumers will be forced to pay higher food prices and increasingly rely on food grown in other nations.

Mr. President, the bill we are cosponsoring today is merely one effort to seek a solution to the farm dilemma. It does not preclude other possibilities.

I might say if anyone else introduces a better bill, we shall be glad to join in such legislation. We feel, however, that this is one solution.

In fact, the Senate Agriculture Committee will be holding a hearing in Columbia, S.C., on this Saturday, February 4, in a further effort to search for the proper solution. The long-term income problem facing our American farmers, however, is a complex one for which there is no easy solution.

The total net income of U.S. farmers dropped below $20 billion in 1977, the lowest since 1972. This was 10 percent below the 1976 level. Declining farm product prices have led to renewed appeals for a return to 100 percent parity prices. At the present time farm prices are 66 percent of parity. The all-time low in the parity ratio was 57 percent in March 1933.

Mr. President, in order to illustrate the difference in market price and parity price, I ask unanimous consent that a table detailing each commodity be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Commodity	Parity price	1977 Dec. 15 price received	1977 Dec. 15 price as a percent of parity
Wheat (bushel)	$5.05	$2.47	49
Rice (hundredweight)	14.00	10.80	77
Corn (bushel)	3.46	1.98	57
Oats (bushel)	1.74	1.13	65
Barley (bushel)	3.00	1.77	59
Grain sorghum (hundredweight)	5.80	3.16	54
Cotton (pound)	.8410	.4880	58
Peanuts (pound)	.287	.204	71
Soybeans (bushel)	7.65	5.68	74
Flaxseed (bushel)	8.61	4.32	50
Beef cattle (hundredweight)	58.60	35.70	61
Hogs (hundredweight)	55.70	41.50	75
All milk (hundredweight)	13.00	10.20	75
Manufactured milk (hundredweight)	11.01	9.17	*83
Eggs (dozen)	.813	.536	57
Wool (pound)	1.37	.721	53

Mr. THURMOND. Mr. President, I commend the able and distinguished Senator from Kansas (Mr. DOLE), and feel that this bill is a step in the right direction.

Senator DOLE has been a leader here in this Senate in many matters, but especially on the Committee on Agriculture, upon which he is the ranking member. He has rendered tremendous service to our farmers and to our Nation.

I applaud him for those efforts and am pleased to join with him on this legislation.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. HART). The Senator from Kansas.

Mr. DOLE. Mr. President, I thank the distinguished Senator from South Carolina and say to those in the Chamber that on Saturday both the distinguished Senator from South Carolina and the Senator from Kansas will be in South Carolina to hold hearings on February 4.

Late last year, Senator THURMOND requested the committee to schedule these hearings when the severity of the American farm crisis became clear. Senator THURMOND feels, as I do, that good legislation made in Washington must spring from information obtained at the grass roots level. The purpose of the hearing this weekend is to find out how bad the farm situation is in the Southeast and what they need in the way of help. The hearing will begin at 4 p.m. in the State Senate Chamber in Columbia.

Anyone who may wish to participate, of course, is welcome to be there, and Senator THURMOND will be there.

Mr. President, it has been clear from the start that the worst thing we could do for the American farmer is proceed on some partisan basis on some farm legislation.

I am pleased to state that so far, and we will introduce the bill later this afternoon, the Senator from Kansas sponsored it along with the distinguished Senator from Texas (Mr. TOWER), the distinguished Senator from South Carolina (Mr. THURMOND), the distinguished Senator from Nebraska (Mr. ZORINSKY), the distinguished Senator from Alabama (Mr. ALLEN), the distinguished Senator from Nebraska (Mr. CURTIS), the distinguished Senator from California (Mr. HAYAKAWA), the distinguished Senator from New Mexico (Mr. DOMENICI), the distinguished Senator from Texas (Mr. BENTSEN), and the distinguished Senator from Connecticut (Mr. WEICKER).

It is bipartisan, some with urban orientation, some with rural, and if we are going to help the American farmer, it seems to me this is the right approach.

I said to some critics that it is not time to raise a voice against Secretary Bergland. He is doing a good job. He is doing the best he can under the circumstances. It is not all his problem. Some of it was there when he came.

But it is our problem, an American problem, not a Republican problem or a Democratic problem. It is our problem. It is a consumer problem. It is a producer problem.

My distinguished chairman (Mr. TALMADGE) scheduled hearings to begin February 23. I hope after 10 days of extensive and exhaustive hearings, we will come up with some proposal.

The Senator from Kansas has no pride of authorship, but that we will come up with some proposal to assist the American farmer soon, quickly, and in the end I think help the American consumers.

Mr. President, I only add that I will be offering initiatives throughout this week and next week. They will be cosponsored by Republicans and Democrats. They were designed to help the American farmer, whether it is carried under the Meat Import Act of 1964, whether it is increasing payments to farmers for storage rates, whether it is working out some Commodity Credit Corporation credit for the People's Republic of China and the Soviet Union, and whether it is a bill to create an economic disaster loan program for farmers, but they will be introduced for the sole purpose of exploring the possibilities of their passage.

They are not perfect. They are probably flawed in some cases, maybe in many cases. But I feel very strongly it is probably one of the gravest responsibilities we have as a Congress.

So I am pleased that the distinguished Senator from South Carolina has expressed himself in support of American agriculture, not so much in support of a proposal I introduced, but in support of American agriculture.

I just left 100 farmers from many States meeting now in the Senate. They are hopeful. They understand how the process works. They may not understand why it takes so long, but they are beginning to understand that they are making some progress because they have been patient and because they have been heard and Members of Congress and members of our staff and the appropriate committees have taken time to explain to them and they have taken time to explain to us just what their problems are.

Let me say finally to the American consumer, those who are worried about our commitment to the less fortunate overseas, the last thing we want to do as Americans is reduce our production to a point where we cannot help the less fortunate overseas.

But let us face a very fundamental fact, we cannot ask the American producer, whether he lives in Alabama, Georgia, Washington, Kansas, or wher-

ever, to produce and sell his product at less than cost of production.

So I hope there is an American awareness of the real problem. Farmers are not trying to get rich. Farmers are trying to survive. But if the farmer does not survive, the consumer will not survive at present prices.

Mr. President, I think it is significant that we are moving ahead. We are now in a third stage. The first stage was the American farmer, the tractor, the trailer, getting the attention of the American people. The second stage was coming to Washington, talking with Secretary Bergland, meeting with the press. The third stage is legislative action. That is the stage the Senator from Kansas believes we are in now.

So I am pleased to introduce the bill for this group of Senators and hope by the time we adjourn today there will be at least 10 additional Senators, Republicans and Democrats, willing to express their support and concern for the concept, not everything in the bill, but the concept, and express their support for American agriculture.

By Mr. DOLE (for himself, Mr. TOWER, Mr. THURMOND, Mr. ZORINSKY, Mr. ALLEN, Mr. CURTIS, Mr. HAYAKAWA, Mr. DOMENICI, Mr. BENTSEN, and Mr. SCHMITT):

S. 2482. A bill to amend the terms and conditions of the producer storage program for wheat and feed grains to provide incentives for participation by farmers; to the Committee on Agriculture, Nutrition, and Forestry.

INTEREST CHARGES ON COMMODITY LOANS

Mr. DOLE. Mr. President, as a continuing effort to strengthen farm prices I am introducing a bill that will provide an incentive to farmers to participate in the extended loan program for wheat and feed grains by increasing the storage payment to not less than 25 cents per bushel. I am told by farmers that present costs of storage is greater than the 20 cents per bushel presently offered by the USDA and thus constitutes a disincentive to farmers to participate.

This bill also requires the Secretary of Agriculture to lower interest charges to farmers on commodity loans to not more than the cost of money to the Commodity Credit Corporation from the U.S. Treasury.

Mr. President, this does not seem to me to be the time to profit from American farmers, when American farmers cannot even make enough money to pay their bills and are operating at a loss.

After consultation with many farmers and questioning the Secretary of Agriculture, who is looking at this problem, it seemed to me that one way to get farmers to participate in the so-called grain reserve program was at least to make certain they were not going to participate at a loss. If we at least pay what it costs them for storage, then I think the program that Secretary Bergland is very interested in would be more successful.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2482

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 110(b) of the Agricultural Act of 1949 is amended by—

(1) in the second sentence striking out "(2) payment to producers of such amounts as the Secretary determines appropriate to cover the cost of storing wheat and feed grains held under the program;" and inserting in lieu thereof "payment to producers of such amounts, not less than 25 cents per bushel annually, as the Secretary determines appropriate to cover the cost of storing wheat and feed grains under the program and to encourage producers to participate in the program;"; and

(2) in the second sentence striking out "(3) a rate of interest determined by the Secretary based upon the rate of interest charged the Commodity Credit Corporation by the United States Treasury, except that the Secretary may waive or adjust such interests;" and inserting in lieu thereof "(3) a rate of interest, not to exceed the rate of interest charged the Commodity Credit Corporation by the United States Treasury, determined by the Secretary, to be appropriate to encourage producers to participate in the program, to be adjusted at the beginning of each quarter of the fiscal year as necessary to reflect any change in the interest rate charged the Commodity Credit Corporation by the United States Treasury during the immediately preceding quarter, except that the Secretary may waive or adjust such interest;".

By Mr. DOLE (for himself, Mr. TOWER, Mr. THURMOND, Mr. ZORINSKY, Mr. ALLEN, Mr. CURTIS, Mr. HAYAKAWA, Mr. DOMENICI, Mr. BENTSEN, and Mr. SCHMITT):

S. 2483. A bill to direct the Secretary of Agriculture to increase financing for exports in fiscal year 1978 under title I of the Agricultural Trade Development and Assistance Act of 1954; to the Committee on Agriculture, Nutrition, and Forestry.

INCREASING OF TITLE I, PUBLIC LAW 480 FINANCING

Mr. DOLE. Mr. President, Public Law 480 or food for peace legislation was signed by President Eisenhower in 1954 with his strong endorsement. During the last 23 years, with bipartisan support, over $30 billion worth of farm commodities have been exported under its provisions. The great value of this program, in terms of lives saved and new markets developed, is impossible to comprehend. It is one of the great practical humanitarian steps of this or any other generation.

For fiscal year 1978, the Carter administration has made available $800 million for the financing of agricultural commodities to developing nations. These funds will provide only about 5 million tons of food for shipment to needy countries under title I this fiscal year.

This quantity will not adequately meet the food assistance needs of about 30 developing nations that have requested far more food than the present funding of $800 million will provide. Therefore, in order to achieve the twin objectives of helping the hungry and malnourished in developing nations while helping American farmers expand their exports, I am introducing a bill entitled "The More Adequate Title I, Public Law 480 Program Act of 1978."

This act will direct the Secretary of Agriculture to provide Commodity Credit Corporation financing for a minimum of $1 billion for the purchase of U.S. farm commodities under agreements to be entered into with developing nations under title I, Public Law 480 in fiscal year 1978.

I believe that Public Law 480, title I program countries could use considerably more food assistance in fiscal year 1978 than $1 billion will provide. Certainly our farmers need the markets and export supplies are more than adequate. I would be inclined to increase Public Law 480 programing beyond the amount in my bill if it were not for the fact that 4 months of fiscal year 1978 have passed. Consequently, $1 billion worth of farm commodities may be all that can be judiciously programed taking into account shipping, port facilities, and storage during the remainder of this fiscal year.

I solicit the support of my colleagues in increasing Public Law 480 financing as proposed in my bill. Mr. President, I ask unanimous consent that the bill be printed in the RECORD at this point.

Mr. President, there will be additional cosponsors of the legislation, whose names I will provide for the RECORD later today.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2483

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that this Act may be cited as the "More Adequate Title I, P.L. 480 Program Act of 1978."

INCREASE OF TITLE I FINANCING

SEC. 2. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof a new sentence as follows:

"Notwithstanding any other provision of this Act, the Secretary of Agriculture shall provide Commodity Credit Corporation financing for a minimum of $1 billion for the purchase of United States farm commodities under agreeents to be entered into with developing nations under Title I of this Act in fiscal year 1978.".

By Mr. BELLMON:

S. 2484. A bill to impose quotas on the importation of beef, including processed beef and beef quantities in the form of live cattle, when the domestic market price of cattle is less than 110 percent of parity and to impose custom duties on such articles when the domestic market price of cattle is less than 80 percent of parity; to the Committee on Finance.

BEEF IMPORT ACT OF 1978

Mr. BELLMON. Mr. President, America's cattle industry has been faced with an extended period of market depression for producers. Prices paid by producers compared to prices they receive has severely curtailed their buying power. This condition has forced many family farmers and ranchers into excessive debt to

maintain operations. Grain markets are experiencing low prices from surplus supplies. This condition has become compounded as cattlemen plow up pasture land and raise crops to meet expenses. A major cause of this adverse economic condition is the U.S. method of allowing meat imports into our domestic market.

Meat import levels are negotiated under voluntary restraints determined from the 1964 Meat Import Act (Public Law 88-482). Under this law, imports are increased as domestic production is increased. In addition, there exists a built-in growth factor guaranteeing importers at least a 7-percent share of our domestic market. Imported meat competes directly with cow/calf production in the ground beef market. Not all meat is covered by the law and consequently the law and its quotas are circumvented through live cattle shipments and various forms of processed meats.

Due to recent droughts and adverse economic conditions in the agricultural sector, cattle producers have excessively liquidated their herds to dangerously low levels. Even though we are at the end of a cattle cycle, herd rebuilding can not proceed without positive changes in market price conditions.

Reforming the 1964 Meat Import Act is in the best interests of producers, consumers, and international trade. Producers, especially cow/calf operators require relief from excessive foreign competition. Consumers need protection against escalated prices. International trade balances need assurance of stability and optimum resource allocation.

The concepts of this bill require study as it does bring an economic model into play to bring stability to our beef markets. Therefore, Mr. President, I ask unanimous consent that a narrative which has been prepared providing valuable background for this bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MODEL NARRATIVE

The model's fundamental implications are to:

(1) prevent extended periods of low market prices for producers;

(2) protect consumers from inflated meat prices; and

(3) assure foreign exporters access to our domestic meat market.

The model provides a formula which determines import quotas as a percentage of domestic production. The index used is a price received, price paid ratio. This index herein referred to as the production cost price index, triggers import levels. The equilibrium level is set at 80% on the index allowing 2% of domestic production in imports. As market prices rise increasing the index above 80%, imports are allowed to increase. At 100% on the index, imports are allowed 10% of domestic production. Whenever the index falls below 80%, imports are held at 2% of domestic production and a duty is attached to those imports.

DEFINITION OF TERMS

Imports.—All classification of beef and veal including beef covered under the 1964 Meat Import Law, all meat not covered under the 1964 law and all non-registered live cattle converted to product weight.

Domestic Production.—All U.S. production of meat as determined by USDA.

Prices Received.—As determined by USDA on national averages between cattle under and over 500 lbs.

Prices Paid.—As determined by USDA their prices paid index to include feed grains.

Duty.—An assessment against imported meat which is a percentage of the current average market prices.

The equilibrium level is set at 80% of the production cost price index because the cattle industry over the past two cow cycles has averaged 83% of parity. The 2% of domestic production allowed as imports would provide returns to producers within the 80–90% range on the index. Although that 2% is presently below the 1964 original quota level, it would function as a floor to stabilize equitable returns in the marketplace.

QUOTAS

Import quotas would be determined quarterly. Domestic production would be based on a 12-month sliding scale, while the price index would be determined from a six-month average. Quotas for April through June would be determined on January 1, thereby giving exporters a six-month time frame to operate in; i.e. January through March to fill quotas and April through June for what they would be allowed in future shipments.

Under this proposal's operations, consumers have protection from high meat prices. Imports would serve to adjust supply and stabilize prices. The fundamental concept of pure competition would come into play. As profits are realized more producers enter the market bringing the market prices back to an equilibrium level, around 80 percent of the price index.

Quotas would be allocated based on each country's present market share as a percentage of the total quarterly quota.

PROGRAM ADMINISTRATION

USDA would be responsible for maintaining the necessary data (all of which is presently compiled and published). They would then compute import quotas every three months. The state department would then have the responsibility of informing exporting countries of those quota levels. It is very possible that after a short period of market adjustments, annual import levels could be the same as at present and in some years of the cattle cycle even greater than allowed in by the 1964 Meat Import Law.

WHY PRICE?

Why advocate a price index rather than a supply ratio to determine imports? The answer lies in the models responsiveness to the industry through the market place. Immediate short run relief to the livestock industry would be realized which would bring up the grain sectors economic health. The long run implications are a stable and adequate meat supply, restraints on meat prices and access to our domestic market. Utilizing a price/parity type of index would allow foreign exporters liberal market access during periods of high prices whereby they could realize higher revenue returns from less meat. This condition, averaged over a 12-month period, would maintain sufficient trade balances on a dollar basis.

THE MODEL

Definition of the variables:

P_r equals prices received by producers as determined and reported on a national average by USDA.

P_c equals the price at which a quantity of beef can purchase the same quality of non-farm goods as in a specified earlier period. (USDA all cattle parity price.)

P_r/P_c equals the production cost price index which determines imports.

I equals that percentage of domestic production which will be allowed as meat imports. (This represents the volume of imports as a percentage of domestic production.)

D represents the rate of duty, expressed as a percentage, to be applied against all meat imports when prices are below a specified level and imports are held to 2 percent of domestic production.

The model:

Y axis—Production Cost Price Index.

X axis—Percent of Domestic Production (allowable volume of imports).

Constraints: When P_r/P_c is less than 80 percent then D takes effect on imports, held at 2 percent of domestic production. The supply schedule faced by foreign meat exporters to the U.S. is represented by the equation:

(1) Y equals .75 plus 2.5X

where

X equals allowable imports (I)

Y equals P_r/P_c

Equation (1) can be rewritten as:

(2) I equals P_r minus .75 $P_c/2.5P_c$

The demand curve faced by the foreign meat exported to the U.S. is represented as an infinitely elastic demand, the same as that faced by the individual producer in the meat industry.

The demand curve is represented by the equation:

(3) Y equals 80 percent

Equation (3) can be rewritten in the form:

(4) P_r/P_c equals 80 percent. This relationship is based on the constraint P_r/P_c less than 80 percent which triggers the duty.

Whenever the price ratio, P_r/P_c, falls below market equilibrium, the rate of duty formula becomes active. This is represented as:

(5) D equals .15 plus 2 (.02 minus I)

This can be expressed as:

(6) D equals .19 minus 2 I

The duty is triggered at P_r/P_c less than 80 percent and the initial rate at that point is a 15 percent duty. For each 1 percent downward change in the price index ($P_r/_c$) the duty increases by a multiple of 2, relative to the base of 2 percent of domestic production for allowable imports. The duty on the 2 percent of domestic production is increased as prices decrease, and that increase in the duty is determined by the two equations. This is represented in Table A.

The model incorporates a countercyclical tendency. Since high market prices would occur during periods of limited domestic supply, import would be allowed greater market access which in turn would create a downward pressure on price. Conversely when domestic supply is excessive, lower prices would prevail and imports would have limited market access. The duty would in effect lessen any competitive advantage imported meat might have. Domestic buyers would seek domestic meat at lower prices rather than imported meat at higher prices, as a result of the duty. As oversupply conditions lessen an upward pressure on price would move the market back to an equilibrium level.

USING THE MODEL

The five step procedure for applying the proposal is:

Step 1.—Accumulate necessary data;

Step 2.—Determine imports as a percent of domestic production;

Step 3.—Convert imports into product weight;

Step 4.—Determine quarterly quota of imports;

Step 5.—Determine each exporting countries share of allowable imports.

An additional step would include the application of a duty. This is demonstrated in example 2.

EXAMPLES OF THE MODEL'S APPLICATION

Example 1

Step 1:

Data (Jan. 1) 6-month average of all cattle (over and under 500 lbs.)—

P_r—$50.00 cwt.

P_c—$60.00 cwt.

Domestic Production (12-month sliding scale) equals 25 billion lbs.

Step 2:

Imports equals P_r minus .75 P_c/2.5 P_c equals 50.00 minus .75 (60.00)/2.5 (60.00) equals .033.

Imports equals .033 of domestic production of twelve months.

Step 3:

Imports (lbs.) equals .033 (25 billion lbs.) equals 825 million lbs.

Step 4:

Imports/quarter (3 months) equals 825 mil lbs./4 equals 206.25 mil lbs.

Step 5:

Quotas assessed—

Australia has 40 percent of the U.S. meat import market; therefore, the quota for the period April, May, and June would be: 0.4 (206.25 mil lbs) equals 82.5 mil lbs.

Example 2

Step 1:

Data (Jan. 1)—6-month Average Price of All Cattle—

P_r—$37.00 cwt.

P_c—$60.00 cwt.

Domestic production (12-month sliding scale) equals 25 billion lbs.

Step 2:

Imports equals P_r minus .75 P_c/2.5 P_c equals 37.00 minus .75 (60.00)/2.5 (60.00) equals minus .053 or minus 5.3 percent of domestic production.

Imports are held at 2 percent of domestic production since the production cost price index (P_r/P_c) is below 80 percent. The duty is then assigned to all imports for that quarter April through June.

Step 3:

Imports in product weight equals .02 (25 bil lbs) equals 500 million lbs/year.

Step 4:

Imports for quarter being considered equals 500 million lbs/4 equals 125 million lbs.

Step 5:

Quotas accessed—

Australia equals .4 (125 mil lbs) equals 50 mil lbs.

New Zealand equals .2 (125 mil lbs) equals 25 mil lbs.

Step 6:

Duty equals .19 minus 2(I) equals .19 minus 2 (minus .053) equals .296.

The duty then becomes 29.6 percent of the average market price or $10.95/cwt. ($37.00 times .296) The duty may be computed weekly or monthly pending market price fluctuations.

TABLE A.—*Duty schedule*

Percent D	Percent P_r/P_c	Percent I
----	1.10	Unlimited
----	1.00	.1
----	.95	.08
----	.90	.06
----	.85	.04
----	.80	.02
.158	.79	.016
.19	.75	.0
.23	.70	—.02
.27	.65	—.04
.31	.60	—.06
.35	.55	—.08
.39	.50	—.10
.43	.45	—.12
.47	.40	—.14

Mr. BELLMON. Mr. President, the current Meat Import Act allows more imports into this country when domestic supplies are high and fewer imports when domestic supplies are low. This provision has acted as a detriment to our domestic producers and to consumers. When prices are low, imports force them lower, and when prices rise, imports are decreased and, therefore, force prices even higher. Therefore, merely changing the law to a countercyclical approach would protect consumers to some extent, but would not be acceptable to many producers. The problem is not as simple as it seems as by the time supplies are determined, the problem already exists. The import quotas should be keyed to price to allow the quotas to be adjusted more quickly to abate low prices for producers and further to prevent exorbitantly high prices to consumers.

The Beef Import Act of 1978 does change the import quota provisions to a countercyclical approach keyed by price. In addition, the bill acts to remove the disasterously low troughs from the market cycle. Further, the exorbitantly high peaks will also be removed. This is achieved by an effort to maintain price between lows of 75 to 80 percent of parity (for all beef) and highs of 110 to 120 percent of parity. The price received will still be dependent on supply and demand signals from the market.

The bill operates through an economic model which determines the amount of imports necessary to achieve this stability. Imports will never be shut off and will be maintained at least as high as 2 percent of our domestic production. At other times the allowable imports will be considerably higher than present levels.

When the price of beef goes below 80 percent of parity, duties will be imposed on imports. These duties will act as discouragement to foreign exporters to flood our markets when prices are low. At no time, however, will their imports be "shut off." When the price rises above 80 percent of parity, the allowable imports will be increased accordingly, duty free. This increase in imports will continue to the point that if price reaches 110 percent of parity, all quotas will be suspended. The amounts of imports will be known to exporters in advance to allow for their future planning.

In this manner, the consumer will be protected from exorbitantly high prices (probably 120 percent of parity at most) and the producer will simultaneously be protected from low prices (probably not less than 75 percent of parity).

This bill is very important not only for producers but also consumers. As I stated previously, producers have overliquidated their herds. This condition can only result in higher prices which means herd numbers will be replenished. However, Congress cannot idly sit and watch the livestock producers of this country fall prey to the huge oversupplies which resulted in the bankruptcy of many producers over the last 3 years. This bill provides a fair alternative to producers and consumers.

By Mr. RIEGLE:

S. 2485. A bill to provide reemployment rights for workers who temporarily relinquish employment to pursue education or childcare, and for other purposes; to the Committee on Human Resources.

EDUCATION AND CHILDCARE REEMPLOYMENT RIGHTS ACT OF 1978

Mr. RIEGLE. Mr. President, I rise to introduce the Education and Childcare Reemployment Rights Act of 1978. This bill is designed to guarantee reemployment rights to long-term employees who temporarily leave their jobs to further their education or raise their children on a full-time basis.

During periods of labor market tightness, too many women and men are afraid that if they ever leave their jobs—even jobs for which they are overqualified—they will never be able to find any others. My proposal is designed to iron out these kinks in the labor market.

We are just beginning to focus attention on the waste of human potential inherent in forcing parents of young children to choose between abdicating the care of these children during most of their working hours or surrendering all the progress they have made in their careers. We are contributing to a new generation of displaced homemakers whose skills are lost to the economy. Guaranteeing employees that they will not lose ground by taking time out for childcare or education will avert this danger and, moreover, will encourage underutilized workers to improve their skills without fear of becoming chronically unemployed.

Many progressive employers already follow such policies, of course. Federal law also provides a precedent in the form of veterans' reemployment rights. Unlike inductees into the Armed Forces, however, employees under my proposal would not continue to gain seniority while they are away from work. Rather, they would reenter the job market where they left it.

The rights provided by this bill apply only for a limited time. Workers who have at least 5 years' seniority with a given employer would have reemployment rights with that employer provided they notify him before leaving that they intend to return after a limited period of education or childcare. Their reemployment rights, moreover, would terminate after 5 years. And even though they gain reemployment rights equivalent to their seniority at the time they leave work, they could be required to undergo a period of retraining if the employer believes it necessary.

Reemployment rights are an idea whose time has come. As a member of the Human Resources Committee's Subcommittee on Child and Human Development, I am participating with the House Select Subcommittee on Education in a joint hearing to consider the findings of the Carnegie Council on Children. Among the Carnegie Council's recommendations is a call for more flexible working schedules and reemployment rights for parents. My bill is designed to meet this need for families and for employees who need the opportunity to pursue activities outside of the workworld for a limited period without fear that they will never be able to get back in.

ADDITIONAL COSPONSORS

S. 2354

At the request of Mr. DOMENICI, the Senator from Arizona (Mr. DECONCINI), the Senator from Alaska (Mr. STEVENS),

the Senator from North Carolina (Mr. HELMS), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 2354, the equal access to the courts bill.

S. 2387

At the request of Mr. PELL, the Senator from West Virginia (Mr. RANDOLPH) and the Senator from New Mexico (Mr. DOMENICI) were added as cosponsors of S. 2387, a bill to extend for 1 year the authority of the Commissioner of Education to waive provisions of title I of the Elementary and Secondary Education Act for certain local educational agencies.

S. 2395

At the request of Mr. THURMOND, the Senator from Mississippi (Mr. EASTLAND), the Senator from Texas (Mr. TOWER), the Senator from Delaware (Mr. ROTH), and the Senator from Arkansas (Mr. HODGES) were added as cosponsors of S. 2395, a bill to place the foreign sovereign governments and the United States of America on the same level—a level of actual damages when either is injured in its business or property, and for other purposes.

S. 2461

At the request of Mr. HATHAWAY. the Senator from Iowa (Mr. CLARK) was added as a cosponsor of S. 2461, the Estate and Gift Tax Amendments of 1978.

SENATE JOINT RESOLUTION 101

At the request of Mr. DOMENICI, the Senator from Nebraska (Mr. ZORINSKY), the Senator from Florida (Mr. CHILES), the Senator from Delaware (Mr. ROTH), the Senator from Arkansas (Mr. BUMPERS), and the Senator from Alaska (Mr. GRAVEL) were added as cosponsors of Senate Joint Resolution 101, a joint resolution to authorize the President to issue a proclamation designating a memorial Sunday for firefighters who have been disabled or killed in the line of duty during the preceding year.

SENATE RESOLUTION 388—SUBMISSION OF A RESOLUTION TO REFER S. 2477 TO THE U.S. COURT OF CLAIMS

Mr. CRANSTON submitted the following resolution, which was referred to the Committee on the Judiciary:

S. RES. 388

Resolved, That the bill (S. 2477) entitled "A bill for the relief of John L. Shane and Beatrice Rosenus Oakland" now pending in the Senate, together with all the accompanying papers, is referred to the Chief Commissioner of the United States Court of Claims, and the Chief Commissioner shall proceed with the same in accordance with the provisions of sections 1492 and 2509 of title 28, United States Code, notwithstanding the bar of any statute of limitation, laches, or bar of sovereign immunity, and report thereon to the Senate, at the earliest practicable date, giving such findings of fact and conclusion thereon as shall be sufficient to inform the Congress of the nature and character of the demand of the claim, legal or equitable, against the United States, or a gratuity in the amount, if any, legally or equitably due from the United States to the claimants.

AMENDMENTS SUBMITTED FOR PRINTING

COMMUNITY ACTION AGENCY USE OF EXCESS PROPERTY—S. 2134

AMENDMENT NO. 1684

(Ordered to be printed and referred to the Committee on Governmental Affairs.)

Mr. MATHIAS submitted an amendment intended to be proposed by him to the bill (S. 2134) to amend the Federal Property and Administrative Services Act of 1949 with respect to excess personal property for use of community action agencies, and for other purposes.

NUCLEAR NONPROLIFERATION ACT—S. 897

AMENDMENT NO. 1685

(Ordered to be printed and to lie on the table.)

Mr. CHURCH (for himself and Mr. MCCLURE) submitted an amendment intended to be proposed by them, jointly, to the bill (S. 897) to strengthen the U.S. policies on export functions of the Federal Government to promote more efficient administration of such functions.

Mr. CHURCH. Mr. President, today I am introducing an amendment to S. 897, the Nuclear Non-Proliferation Act, which I believe will improve the effectiveness and enhance the workability of this bill. Further, I intend to support certain amendments to the bill introduced by my colleague from Idaho, Senator MCCLURE.

The Arab oil embargo of 1973, and the subsequent sixfold increase in the price of oil not only caused recession and financial instability, but also prompted oil importing countries throughout the world to seek alternate energy sources. The uncertainty of such alternate sources as geothermal or solar, wind or wave, spurred those countries lacking enough coal to a larger reliance on the other known and proven technology that could provide a reliable source of electrical power for a country's industrial base: nuclear energy. Countries throughout the world not only continued their light water reactor programs, they also increased work on the "back end" of the nuclear fuel cycle—reprocessing and the breeder reactor. They chose nuclear energy to reduce their dependence on foreign oil, and moved to reprocessing and the breeder to avoid exchanging their existing dependence upon imported oil for a new dependence upon imported uranium.

Given these circumstances, I am convinced that it is neither possible nor advisable to try to eliminate the backend of the nuclear fuel cycle. Rather, we must recognize the reality of its existence, and use our influence to construct a system of international safeguards which extend to all aspects of the nuclear fuel cycle, including the "backend."

As a result, I introduced amendments to S. 897 in both the Foreign Relations and Energy Committees, which were accepted. In the Foreign Relations Committee, in particular, I worked closely with Senators PELL, GLENN and PERCY, and I appreciated their cooperation.

However, since the time the bill was reported from the Foreign Relations Committee, a number of important events affecting S. 897 have occurred. The Nuclear Suppliers Conference in London issued a series of guidelines to provide a framework for nuclear exporters. The United States and Japan entered a trade agreement, which also covered exports of nuclear materials. Furthermore, numerous amendments to S. 897 were introduced late last fall, relating to the procedures proposed for licensing nuclear exports.

As a result, I undertook a review of S. 897 and asked the administration for its comments on a variety of matters relating to S. 897, including the relationship of the nuclear nonproliferation bill to the standards adopted at the Nuclear Suppliers Conference in London. I received a response last Friday, January 27, 1978, and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, D.C., January 26, 1978.

Hon. FRANK CHURCH,
Committee on Foreign Relations,
U.S. Senate.

DEAR SENATOR CHURCH: I am pleased to provide you with the information you requested in your letter to Dr. Nye of January 17, concerning S. 897, the Nuclear Non-Proliferation Act of 1977. The enclosures, which contain this material, were prepared in the Department of State and coordinated within the Executive Branch. These enclosures are also being provided to Senator Sparkman in response to a request from him.

Enclosure 1 presents the Administration's views on the amendments to S. 897 proposed by Senator McClure just prior to the end of the last session. Enclosure 2 compares the guidelines adopted by the London Suppliers Group to those of S. 897. Enclosure 3 discusses the procedures of S. 897 and their probable impact on US nuclear exports. Enclosure 4 deals with the question of the Administration's position on the advisability of requiring environmental impact statements for nuclear exports from the United States to foreign countries. Finally, Enclosure 5 proposes additional revisions to S. 897 (in addition to the changes of Enclosure 1 which the Administration believes would materially improve the bill).

In this regard, I call your attention to the Administration's proposed revision to the immediate criteria of S. 897 (Enclosure 5) to delete the retroactive feature of the criteria concerning the requirements for US consent rights for reprocessing and retransfer. A requirement for retroactive application would cause serious difficulties with regard to implementation of such controls in the only three agreements which currently do not provide for all of these controls: namely, our agreements with the European Communities, with the International Atomic Energy Agency and with Canada. The proposed deletion would make S. 897 consistent with similar provisions in H.R. 8638 as passed by the House of Representatives in September 1977, which do not provide for such retroactive application. We believe the above modification is essential to the implication of our non-proliferation objectives.

I am pleased that you anticipate early floor action on S. 897. I would like to reemphasize to you the importance that the President and the Secretary attach to early passage of S. 897. Passage of the non-proliferation legislation is central to the President's foreign policy objectives and the success of our non-proliferation efforts. Moreover, the legislation is important to restoring the United States position as a reliable supplier of nuclear material and equipment, and thus to fostering export activities consistent with our non-proliferation objectives. We believe action is truly urgent, and that the bill should be taken to the Senate floor promptly.

The Office of Management and Budget advises that from the standpoint of the Administration's program, there is no objection to the submission of this report.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

Enclosures.

COMMENTS ON AMENDMENTS PROPOSED TO S. 897

A number of proposed amendments to S. 897 appeared in the Congressional Record for November 2, 1977, at pages S 18484 through S 18487. Following are comments on those amendments, in the order in which they affect S. 897.

Amendment 1612.—This amendment would delete from the Statement of Policy in S. 897 a paragraph indicating that it is U.S. policy to cooperate with other nations in protecting the international environment from radioactive, chemical or thermal contamination arising from nuclear activity. A similar statement, however, would be inserted in Title 5 by amendment 1609. We understand that this amendment was proposed out of a concern that the language in S. 897 might be used to support the argument that environmental impact statements must be prepared for localized foreign impacts of U.S. nuclear export activities. We do not believe this particular language in the Statement of Policy was inserted to indicate such a congressional intention. On this basis, the Executive branch believes that the existing language should be retained, in the more general policy section of the bill, rather than relegated to Title 5.

Amendment 1582.—The Executive branch supports this amendment.

Amendment 1583.—This amendment would revise Section 104, dealing with the international nuclear fuel authority. The Executive branch can accept this revision, except for its continued concern regarding the use of the concurrent resolution procedure. The Executive branch opposes the use of the concurrent resolution legislative mechanism on constitutional and policy grounds, and favors instead joint resolution procedures. Subparagraph (f) is particularly troublesome in view of the fact that it requires concurrent resolution "approval" for particular United States agreements. We recommend a revision of subparagraph (f) along the following lines:

"(f) The President may not enter into any binding international understanding negotiated pursuant to subsection (a) which is not a treaty and may not enter into any sales arrangement pursuant to subsection (b) which is not a treaty, until such undertaking or arrangement has been submitted to the Congress for a period of sixty days of continuous session (as defined in subsection 130 (h) of the 1954 Act): *Provided*, that no such undertaking or arrangement shall become effective if during such sixty day period the Congress adopts a joint resolution stating in substance that the Congress does not favor the proposed undertaking or arrangement."

Amendment 1584.—The Administration supports this amendment.

Amendment 1585.—In view of the action taken by the House of Representatives on the identical issue, the Executive branch can accept this amendment.

Amendment 1587.—This amendment would modify the procedures in S. 897 by requiring that by-product material be exported in accordance with the procedures of Section 127 and 128 of the bill. We believe that this modification is unwarranted, and that the reference to by-product material which would accomplish this should be deleted. Thus, the proposed new subparagraph (b) should be revised by replacing "any special nuclear material, source material, or by-product material under Section 54, 64 or 82" with "any special nuclear material or source material under Section 54 or 64". Aside from this point, amendment 1587 restructures other provisions of the bill, without substantive change, and is acceptable.

Amendment 1586.—This amendment is acceptable.

Amendment 1588.—This amendment is acceptable.

Amendment 1589.—This amendment requires that the Department of Energy establish procedures for Part 810 approvals requiring at least the procedural detail and time limitations comparable to those in Executive Order 11902. The amendment further provides that the processing of subsequent arrangements proposed and filed as of October 3, 1977, shall not be delayed pending development of these procedures. The Executive branch has difficulties with referring to an Executive Order in a statute in the manner suggested. We understand the concern behind the amendment is to insure that other agencies respond to the Department of Energy within 30 days (as is the case for comments to the Department of State under Executive Order 11902). It would be preferable to so provide explicitly. Moreover, since Executive Orders may be changed without legislation, it is not advisable to pinpoint reference in this bill to the Executive Order as it existed on February 2, 1976. In addition, Executive Order 11902 has procedural provisions relating to the NSC Under Secretaries Committee, which is no longer in existence. The Executive branch recommends that the first sentence of the amendment be revised to read: "Such procedures shall include a requirement that Departments and Agencies consulted respond to the Department of Energy within thirty days of receipt of a copy of the proposed authorization".

As an additional matter, we note that the Department of Commerce should be consulted on such authorizations. To accomplish this, insert "Department of Commerce," after "Nuclear Regulatory Commission," on line 9 of page 115 of S. 897.

Amendment 1590.—This amendment is acceptable.

Amendment 1591.—This amendment is acceptable.

Amendment 1592.—This amendment is acceptable.

Amendment 1595.—This amendment provides that the Department of Energy determinations concerning subsequent arrangements are not subject to normal administrative procedures. These determinations are final unless found by a Court to be arbitrary, capricious, an abuse of discretion, not in accordance with law, contrary to the Constitution, in excess of statutory authority, or without observance of procedure required by law. The policy motivating this amendment is laudable. However, the amendment should cover findings under all sections by the various concerned Executive branch agencies. To accomplish these objectives, the proposal for page 116, beginning at line 13, could be instead inserted as a new paragraph (b) of section 406, as follows: "(b) To the extent any finding, determination or other action under this Act or under the amendments made by this Act to the 1954 Act are subject to judicial review, such review shall not be subject to subchapter II of Chapter 5 of Title 5 of the United States Code, but rather shall be subject to Chapter 7 of Title 5 of the United States Code: *Provided* that all such findings, determinations or other actions shall be final unless determined upon judicial review to be unlawful by the reviewing court pursuant to 5 USC (A) or (B). Alternatively, if this is not agreeable to the Congress, the Executive branch would prefer deletion of the amendment in order to avoid the implication that such other findings are subject to broader review, as might be argued based on the negative inference inherent in the amendment.

Amendment 1593.—This amendment is acceptable to the Executive branch.

Amendment 1594.—This amendment requires the Department of Energy to establish procedures, mutually agreeable to State, Department of Defense, the Arms Control and Disarmament Agency, and the Nuclear Regulatory Commission, for the consideration of subsequent arrangements. As indicated before with respect to Amendment 1589, the Executive branch has difficulty with the reference to Executive Order 11902. We suggest such procedural details as are necessary, if any, be set forth in the statute. The Executive branch, further, has difficulty with the time limits proposed for ACDA with respect to nonproliferation assessment statements and believes it would be desirable to set a more realistic time limit. Thus, it would be preferable to provide that ACDA, when responding to a Department of Energy proposed subsequent arrangement pursuant to paragraph (a)(1), shall indicate whether it intends to prepare a nuclear proliferation assessment statement. This would give ACDA thirty days to make the decision. It could further be provided that ACDA would have an additional period of thirty days to complete the statement, during which the Department of Energy would be precluded from completing the subsequent arrangement. This would give ACDA a total of sixty days from receipt of the proposal for completing a proliferation assessment statement; there still could be provision for Presidential waivers beyond that period.

To accomplish these changes, proposed subsection (c) should be revised to provide: "(c) The Secretary of Energy within not more than ninety days after the enactment of this section shall establish orderly and expeditious procedures which are mutually agreeable to the Secretary of State, the Secretary of Defense, the Director of the Arms Control and Disarmament Agency, and the Nuclear Regulatory Commission for making the determinations and notifications required by this section. Such procedures shall include a requirement that these Departments and Agencies respond to the Department of Energy within thirty days of receipt of a copy of the proposed subsequent arrangement. Further such procedures shall specify that if he intends to prepare a Nuclear Proliferation Assessment Statement, the Director shall so declare in his response to the Department of Energy. If the Director declares that he intends to prepare such a Statement, he shall do so within sixty days of his receipt of a copy of the proposed subsequent arrangement (during which time the subsequent arrangement shall not enter into effect), unless pursuant to the Director's request, the President waives the sixty day requirement and notifies the Committee on International Relations of the House of Representatives and the Committee on For-

eign Relations of the Senate of such waiver and the justification therefor.

Amendment 1596. This amendment is acceptable.

Amendment 1597.—This amendment requires State, within ninety days after enactment, to establish procedures for the preparation of the Executive branch judgment on export licenses. These procedures must be mutually agreeable to the Departments and Agencies concerned. The Executive branch again, as with amendments 1589 and 1594, has difficulty with the statutory reference to Executive Order 11902. Rather, we suggest that the relevant features of Executive Order 11902 be incorporated in the statute, and the requirement for the promulgation by the Department of State for additional procedures be dropped. Thus, we recommend that the language proposed in amendment 1597 be revised to read: "In formulating the Executive branch judgment, the Secretary of State shall consult with the Secretary of Energy, the Secretary of Defense, the Secretary of Commerce, and the Director of the Arms Control and Disarmament Agency, and the Head of any other Department or Agency which may have an interest therein in order to afford them the opportunity to express their views, if any, on whether the license should be issued or the exemption granted. These Departments and Agencies shall respond to the Secretary of State within thirty days of receipt of a copy of the license application, and any disagreements shall be resolved in accordance with the procedures of the National Security Council."

Amendment 1598.—This amendment is acceptable.

Amendment 1599.—This amendment is acceptable.

Amendment 1600.—This amendment is acceptable.

Amendment 1601.—This amendment relates to the procedures to be promulgated by the Nuclear Regulatory Commission for export licensing. It requires that to the extent feasible, the Commission process license applications while awaiting Executive branch comments. It permits the Commission to identify concerns and requests for information during this process, which the Executive branch shall address in its written communication with the Commission. Further, it requires that if the Commission has not completed action on an export license application within sixty days after receipt of the Executive branch judgment that the proposed export is not inimical to the common defense and security, the Commission must inform the applicant with an explanation of the need for further time, including a description of any remaining issues to be considered. The amendment further provides that if the Commission has not completed action within an additional sixty day period (120 days total) from the receipt of the Executive branch judgment), the President, upon a finding that further delay would be excessive, and upon the findings that would have otherwise been required of the Commission or would have been required to override the Commission, may by Executive Order declare that the application is approved, subject to the Congressional review procedures set forth in proposed Section 130.

While we do not think this amendment necessary in order to deal with the problem of delays and the licensing process, we have no difficulty with the first sixty days time limitation. However, with respect to the additional sixty day time limitation, there should be provision made to take into account the possibility of public participation, as separately provided for under Section 304 (b)(2) and the possible need of the Commission for additional information from the Executive branch. The following revision of the amendment would accomplish these objectives:

"(d) The procedures established pursuant to subsection (b) of this Section shall provide that the Commission shall immediately initiate review of any application for a license under this Section and to the maximum extent feasible shall expeditiously process the application concurrently with the Executive branch review, while awaiting the final Executive branch judgment. In initiating its review, the Commission may identify a set of concerns and requests for information associated with the projected issuance of such license and shall transmit such concerns and requests to the Executive branch which shall address such concerns and requests in its written communications with the Commission. Such procedures also shall provide that if the Commission has not completed action on the application within sixty days after receipt of an Executive branch judgment that the proposed export or exemption is not inimical to the common defense and security or that any export in the category to which the proposed export belongs would not be inimical to the common defense and security because it lacks significance for nuclear explosive purposes and, if action has not been completed by the end of the sixty days, the Commission shall inform the applicant in writing of the reason for delay and provide follow-up reports as appropriate. If the Commission has not completed action by the end of an additional sixty days (a total of 120 days from receipt of the Executive branch judgment), the President may authorize the proposed export by Executive Order, upon a finding that further delay would be excessive and upon making the findings required for such Presidential authorizations under subsection (b)(2) of the Section. However, if the Commission has commenced procedures for public participation regarding the proposed export under regulations promulgated pursuant to subsection (b) of this Section, or has—within sixty days after receipt of the Executive branch judgment on the proposed export—identified and transmitted to the Executive branch a set of additional concerns or requests for information, the President may not authorize the proposed export until sixty days after public proceedings are completed or a full Executive branch response to the Commission's additional concerns or requests has been made consistent with subsection (a)(1) of this Section. For purposes of this subsection, public proceedings shall be deemed completed on the final day of any hearings scheduled by the Commission or on the date provided in any Commission order for receipt of written views by the public."

Amendment 1602.—This amendment is acceptable.

Amendment 1603.—This amendment adds a new provision requiring the Department of State, in consultation with the Department of Energy, the Arms Control and Disarmament Agency, and the Commission, to promulgate guidelines for adequate physical security. These guidelines must be no less stringent than any guidelines contained in or promulgated pursuant to any international agreement, including an Agreement for Cooperation to which the United States is a party. While the Executive branch is sympathetic with the desire of the amendment to clarify the levels of physical security that will be considered adequate for purpose of application of the export licensing criteria, we are concerned that the language in the amendment does not reflect the terminology that has evolved internationally in the consideration of this issue. International "guidelines" establish "levels" of physical security; the concrete steps taken to implement these levels are called "measures." Moreover, it may be appropriate for more stringent measures to be applied in certain particular cases. A revision of amendment 1603 which the Executive branch would support is as follows:

"On page 126, after line 21, insert a new subsection to read as follows:

'(d) Within sixty days of the date of enactment of this Act, the Secretary of State shall, in consultation with the Secretary of Energy, Secretary of Defense, the Director and the Commission, notify the Commission of the levels of physical security which in his judgment are no less strict than those established by any international guidelines to which the United States subscribes and which will provide adequate protection for facilities and material referred to in paragraph (a)(3) of Section 127 of the 1954 Act. Such notification may be amended from time to time by the Secretary of State, in consultation with the Secretary of Energy, the Director and the Commission.'

"On page 127, after line 26, add a new sentence to read as follows:

'Following the effective date of any notification to the Commission pursuant to Section 304(d) of the Nuclear Non-Proliferation Act of 1978, physical security measures shall be deemed adequate if such measures provide a level of protection comparable to that required by the applicable notification.' "

Amendment 1604.—This amendment relates to Commission designations of component parts that are especially relevant from the standpoint of export control because of their significance for nuclear explosive purposes as production or utilization facilities, and thus being subject to the export licensing criteria. Under current law, the Nuclear Regulatory Commission could make such designations without any coordination with the Executive branch. The proposed amendment establishes a highly complicated procedure involving Executive branch concurrences, consultation, referral to the President, and referral to the Congress. In our view, a simpler consultative procedure would be wholly adequate. We therefore recommend that amendment 1604 be revised as follows:

"On page 139, line 23, strike 'The' and substitute in lieu thereof 'After consulting with the Secretaries of State, Energy and Commerce and the Director, the'."

Amendment 1605.—This amendment is acceptable. However, with respect to the paragraph that this amendment affects we should like to point out that a conforming change regarding the word "evidence" should be made to reflect the change proposed in amendment 1598.

Amendment 1606.—This amendment is acceptable.

Amendment 1607.—In substance, this amendment provides that if the President exempts a new or amended Agreement for Cooperation from the full-scope safeguards requirement, and if Congress does not override this Agreement, then the Nuclear Regulatory Commission need not apply the full-scope safeguards criterion to export license applications under that Agreement for an initial twelve month period. This amendment has caused the Executive branch to focus on a more serious problem. If the President waives a requirement for a new Agreement for Cooperation that is also an export licensing requirement under proposed Section 127, as the bill is currently written, it would be impossible for the Nuclear Regulatory Commission to license exports under the agreement even if the Congress does not object to the entry into force of that Agreement.

The Executive branch considers this could be a difficulty.

We suggest that amendment 1607 be replaced with the following:

"Insert after the word 'security.' on line one of page 147 of S. 897, the following new sentence: 'If any such exemption pertains to a requirement which is also an export licensing criterion under Section 127 or 128 of this Act, that criterion shall not, to the extent modified by the exemption, apply to exports under the proposed agreement upon its entry into force.' "

Amendments 1608, 1610 and 1611.—These amendments are acceptable.

THE NUCLEAR SUPPLIERS GUIDELINES AND S. 897

In January 1978, the export guidelines adopted by the London Nuclear Suppliers Group were for the first time officially made public. These guidelines establish minimum standards for safeguards and export controls to be applied by nuclear suppliers in transfers to any non-nuclear weapon state for peaceful purposes. The text of these guidelines was provided the Senate Foreign Relations Committee under cover of letters from Dr. Joseph S. Nye, of January 12, 1978.

As the Committee is aware, the major elements of these guidelines were developed in a series of confidential meetings in 1975 among seven major supplier nations. The original participating states in January 1976 informed each other of their intention to observe the guidelines in their national export policies. Several additional steps were necessary prior to official publication of the guidelines. First, several related documents had to be worked out: the trigger list, the annex to the trigger list containing additional clarifications, and the agreed levels of physical protection. Second, the group was enlarged from its original seven members to fifteen members. Third, several of the provisions in the guidelines were revised for technical reasons (e.g., to take into account the completion of work on the various annexes). Fourth, provisions in the guidelines were strengthened; thus, the provisions relating to "sanctions" in paragraph 14(c) were elaborated. Finally, procedures for publication were worked out. During this whole period, from the commencement of work on the guidelines, through the initial stages of adoption of the guidelines in confidence, the Executive Branch has periodically provided the Congressional Committees with confidential briefings on the progress of this work.

Since the main elements of the guidelines were established by the end of 1975, the work of the Executive Branch on non-proliferation legislation since then has taken into account the existence of this document. The positions taken by the Executive Branch in commenting on previous versions of the non-proliferation legislation, in proposing its own bill during this Administration (S. 1432), and in working out compromise provisions in S. 897 have been fully consistent with and supportive of the London Nuclear Supplier Group Guidelines.

It is the Executive Branch's judgment that the publication of the guidelines does not necessitate any revision in S. 897, as most recently reported to the Senate. In fact, consistent with our view that the guidelines provide a floor and not a ceiling on the non-proliferation controls and commitments appropriate to be sought by nuclear suppliers in their export dealings, S. 897 is considerably stronger in many ways than the guidelines.

U.S. law as it would be set forth in S. 897 is stronger in some respects than the guidelines. Countries purchasing from the U.S. will be asked to agree to somewhat stricter terms than those which may be sought by some other suppliers, but we do not believe that the U.S. should adopt a "lowest common denominator" approach. In developing our policy and our position on S. 897, we have had clearly in mind the need to avoid policies so restrictive as to damage our competitive commercial position, or our leverage in moving others toward adequate safeguards and controls. We believe that our present policy and S. 1432 strike the proper balance between these factors.

For the sake of comparison, the following discussion relates provisions in the guidelines to provisions in S. 897.

Paragraph 2 of the guidelines requires that suppliers, in their civil nuclear dealings explicitly exclude uses which would result in any nuclear explosive device. This is reflected in S. 897 in proposed section 127(2) and 123(a)(3) of the Atomic Energy Act.

Paragraph 3 of the guidelines requires adequate physical protection in the recipient country of nuclear materials and facilities. This is reflected in S. 897 in proposed sections 127(3) and 123(a)(6) of the Atomic Energy Act.

Paragraph 4 of the guidelines requires IAEA safeguards on exported items. This is reflected in S. 897 in proposed sections 127 (1) and 123(a)(1) of the Atomic Energy Act. In addition, S. 897 contains a more stringent provision, on which we have not yet succeeded in achieving consensus in the Nuclear Suppliers Group, which provides for full-scope safeguards (see proposed sections 128 and 123(a)(2) of the Atomic Energy Act). Paragraph 5 provides that suppliers will jointly reconsider their common safeguards requirements whenever appropriate. This provides the United States the opportunity to continue to press for full-scope safeguards, as well as to take initiatives in the Nuclear Suppliers Group in accordance with provisions contained in sections 104, 201, and 403.

Paragraph 6 of the suppliers guidelines requires that safeguards be triggered by the transfer of certain sensitive technology. This is reflected in S. 897 in proposed sections 127(6) and 123(a)(9) of the Atomic Energy Act. In addition, section 402(b) would require specific provision in any Agreement for Cooperation to permit any export of any major critical component of a sensitive nuclear facility.

Paragraph 7 of the guidelines calls for supplier restraint in the transfer of sensitive facilities, technology and weapons usable materials While this requirement in the suppliers guidelines lacks specificity, the United States, France and the Federal Republic of Germany have each publicly announced their intention not to export certain sensitive technology. President Carter in his April 7, 1977, nuclear policy announcement, indicated that "We will continue to embargo the export of equipment or technology that would permit uranium enrichment and chemical reprocessing." Further, with respect to weapons usable material, the White House announced a policy of restraint in Point 1 of its fact sheet of April 27, 1977 (see page 123 of "Nuclear Proliferation Fact Book." Joint Committee Print, 95th Congress, First Session, September 23, 1977). This policy of restraint is reflected in many places in S. 897, such as section 402(b).

Paragraph 8 of the guidelines requires that the recipient nation agree that any enrichment facility or any facility based on the technology to be exported will not be designed or operated for the production of greater than 20 percent enriched uranium without the consent of the supplier. This policy is reflected in section 402(b) of S. 897.

Paragraph 9 of the suppliers guidelines is non-mandatory. It indicates that suppliers recognize the importance of including controls on reprocessing, storage, alteration, use, transfer and retransfer in agreements for the supply of nuclear materials and facilities for production of weapon-usable material. Paragraph 10 of the guidelines requires retransfer controls on all export items and material derived through their use, as well as on major critical components. S. 897 is more stringent in some respects, and comparable in others. With respect to retransfers, S. 897 reflects the provisions in the suppliers guidelines in proposed sections 127(4) and 123(a)(5). With respect to reprocessing and alteration, S 897 goes further than the guidelines in the provisions of proposed sections 127(5) and 123(a) (7). With respect to storage, S. 897 reflects the provisions of the suppliers guidelines in section 123(a)(8). As indicated above, all the controls listed, including those on reprocessing, storage, alteration, transfer and retransfer, apply to sensitive nuclear facilities, major critical components, and material produced through their use.

Paragraphs 11–16 of the guidelines concern "supporting activities."

Paragraph 11 calls on suppliers to promote international cooperation in the field of physical security. A U.S. initiative on this matter is proposed in section 403(b)(2) of S. 897. It is consistent with this that the U.S. proposed internationally a Convention on the Physical Protection of Nuclear Materials, Equipment and Transports. A first meeting to negotiate this Convention was held in November 1977, with the next meeting scheduled for April 10–21, 1978.

Paragraph 12 calls for suppliers to make special efforts in support of effective implementation of IAEA safeguards. Section 201 of S. 897 deals with this subject matter and reflects the provisions of the suppliers guidelines, in somewhat greater detail.

Paragraph 13 of the guidelines calls on suppliers to encourage designers and makers of sensitive equipment to construct it in such a way as to facilitate the application of safeguards. The U.S. Government is undertaking studies related to this initiative.

Paragraph 14 of the guidelines deals with consultations among suppliers. Paragraph 14(c) deals particularly with the issue of sanctions. Even more stringent provisions are contained in S.897 in proposed section 129 of the Atomic Energy Act. Proposed section 123(a)(4) would also require that provisions on sanctions be in all new or amended agreements for Cooperation.

Paragraph 15 of the guidelines calls on suppliers to exercise prudence taking into account the circumstances of each case, including the risk that transfers of non-sensitive technology may lead to unsafeguarded nuclear material. Through the variety of licensing and opproval processes provided for in S. 897, all the agencies of the Executive Branch and the Nuclear Regulatory Commission will, as appropriate, have the opportunity to assess the risk of each particular nuclear export, so that exports which would, in the circumstances of a particular case create an undue risk, would be denied.

COMMENTS CONCERNING EXPORT PROCEDURES

The Executive Branch considers that the export procedures in S. 897 would not cause significant delays in licensing exports. Indeed, section 101 of S. 897 provides for timely authorization of exports when the applicable requirements are met. We know that objections have been raised by some to the procedures on the grounds that they are complicated, subject to challenge by interveners, and for the potential for delays. We consider, however, that in the normal case, the export procedures provided for in S. 897 will function smoothly. In the normal case, there is merely a requirement for prior coordination among concerned agencies, and then an approval process. Only in rare cases would the additional procedural steps contained in the bill—such as a Presidential review of negative NRC licensing decisions

and a possible Congressional review of the President's override—come into play. We expect that the current high level of cooperation between the Executive Branch and the Nuclear Regulatory Commission will, permit the procedures to function effectively.

However, we note that certain of the amendments introduced by Senator McClure are aimed at easing the export process, particularly by inserting time limitations and by limiting the possibility for challenges by interveners. The Executive Branch supports the thrust of these amendments in accordance with our discussion as set forth in Enclosure 1. We note that these amendments, with the modifications suggested by the Executive Branch, would further ease the export process.

In any event, we do not believe that the procedures in S. 897 would encourage purchasers to turn to nuclear suppliers other than the United States.

COMMENTS CONCERNING ENVIRONMENTAL IMPACT STATEMENTS

The Executive Branch currently has under review the policy and legal issues surrounding the question of applicability of the environmental impact statement process to the activities of U.S. agencies having environmental impacts abroad. Because this review has not been completed, the Executive Branch is not prepared at this time to state its position on the advisability of requiring environmental impact statements for nuclear exports from the United States to foreign countries.

RECOMMENDED REVISION TO S. 897, SECTION 305 CRITERIA GOVERNING UNITED STATES NUCLEAR EXPORTS

One issue has come to the attention of the Executive Branch that could cause serious difficulties. Under the proposed Section 127 of the Atomic Energy Act, several of the criteria are retroactive. In particular, under paragraphs (4) and (5), the Nuclear Regulatory Commission could not license the next export to any country if the U.S. did not obtain a reprocessing and retransfer consent rights retoractively applied to all previous U.S. transfers under the applicable agreement for Cooperation. It should be noted that all United States agreements except those with Canada, EURATOM and the IAEA already fully provide for approval rights concerning reprocessing and retransfer of materials that have been transferred under them. It is highly unlikely, if not impossible, that we would be able to apply all of these controls retroactively for each of these three exceptions. For example, in the case of new supply for an IAEA project under the U.S.–IAEA Cooperation Agreement to a country that accepts all the U.S. export conditions, S. 897, as currently written, would require that the U.S. obtain retransfer and reprocessing consent for all previous transfers made to any country under the IAEA agreement.

This problem does not arise under H.R. 8638 as passed by the House of Representatives on September 28, 1977. The immediate export criteria contained in proposed Section 127(a) (4) and (5) of that bill are not retroactive. The Executive Branch, therefore, considers it essential that the language in the immediate criteria of S. 897 to be modified to conform to the language in H.R. 8638. The proposed modification is given below.

In S. 897:

1. Page 128, lines 2 through 4, delete the words "no such materials or facilities previously exported and subject to the applicable agreement for cooperation"; and,

2. Page 128, lines 14 through 16, delete the words "or previously exported and subject to the applicable agreement for cooperation".

PROPOSED ADDITIONAL REVISION TO S. 897

As a technical matter, the Executive Branch would consider it desirable, in order to avoid any possible negative inferences or misunderstandings, to include a provision confirming the continued authority of the U.S. to incorporate arbitration provisions in agreements or other arrangements that may be concluded pursuant to an Agreement for Cooperation. To accomplish this, we recommend the addition of the following new subsection to section 405 of S. 897:

"Nothing in this Act shall affect the authority to include dispute settlement provisions, including arbitration, in any agreement made pursuant to an Agreement for Cooperation."

Mr. CHURCH. Now, Mr. President, I understand that the administration has changed, or at least modified, some of the positions set forth in the letter. All is flux.

At any rate, I wish to introduce at this time a further amendment. It would eliminate the retroactive application of some of the export licensing criteria contained in S. 897. As the bill now reads, section 305 makes certain crtieria—particularly, no retransfer of materials or reprocessing without prior approval—retroactive. Under that section, if the United States does not obtain reprocessing and retransfer consent rights retroactively applied to all previous U.S. transfers under an applicable agreement for cooperation, the NRC could not license a new export even if the country buying from us agreed to all our new conditions. Presently, U.S. agreements with Canada, Euratom and the International Atomic Energy Agency (IAEA) do not contain these requirements and, according to the administration, it is "highly unlikely, if not impossible" to obtain their revision. This means that, the United States would not be able to export to a country accepting all S. 897 conditions pursuant to the United States-IAA cooperation agreement, unless we first were able to obtain reprocessing and retransfer veto rights for all prior transfers made to that country and other countries under the IAEA agreement.

This retroactive provision is unworkable and would gravely damage the United States in the eyes of the world as a reliable supplier. Most importantly, it would help to frustrate our own nonproliferation goals.

The House bill, H.R. 8638, as passed last fall, does not contain these provisions.

My amendment would strike the offending language from S. 897, bringing it into conformity, in this respect, with the House bill. It has the administration's strong support.

NAVIGATION DEVELOPMENT ACT—H.R. 8309

AMENDMENT NO. 1686

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to amendment No. 1680 intended to be proposed to the bill (H.R. 8309) authorizing certain public works on rivers for navigation, and for other purposes.

AMENDMENT NO. 1687

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to amendment No. 1681 intended to be proposed to the bill (H.R. 8309), supra.

AMENDMENTS NOS. 1688 AND 1689

(Ordered to be printed and to lie on the table.)

Mr. GRAVEL submitted two amendments intended to be proposed by him to the bill (H.R. 8309), supra.

NOTICES OF HEARINGS

SUBCOMMITTEE ON HOUSING AND URBAN AFFAIRS

Mr. SPARKMAN. Mr. President, I should like to announce that the Subcommittee on Housing and Urban Affairs of the Committee on Banking, Housing, and Urban Affairs, will hold a 2-day hearing, on February 20 and 21, 1978, on fiscal year 1978 housing authorization legislation.

The hearing will begin at 10 each morning and will be held in room 5302, Dirksen Senate Office Building.

The subcommittee welcomes statements for inclusion in the record of hearings.

COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I wish to give notice that a public hearing has been scheduled for Thursday, February 9, 1978, at 10:30 a.m., in room 2228, Dirksen Senate Office Building, on the following nomination:

Paul A. Simmons, of Pennsylvania, to be U.S. district judge for the western district of Pennsylvania, vice Ralph R. Scalera, resigned.

Any persons desiring to offer testimony in regard to this nomination shall, not later than 24 hours prior to such hearing, file in writing with the committee a request to be heard and a statement of their proposed testimony.

This hearing will be before the full Judiciary Committee.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. RIBICOFF. Mr. President, I wish to announce that the hearings on the handling of discrimination complaints in the Senate (pursuant to rule 50 and section 310 of S. Res. 110), which were scheduled to be held tomorrow, February 3, 1978, have been postponed until next Thursday, February 9, at 10 a.m. in room 3302, Dirksen Senate Office Building.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. DOLE. Mr. President, I wish to announce that I will travel to Columbia, S.C., this Saturday, February 4, to hold hearings with Senator STROM THURMOND on behalf of the Senate Committee on Agriculture, Nutrition, and Forestry. Late last year, Senator THURMOND requested the committee to schedule these hearings when the severity of the American farm crisis became clear. Senator THURMOND feels, as I do, that good legislation made in Washington must spring from information obtained at the grassroots level. The purpose of the hearing

this weekend is to find out how bad the farm situation is in the Southeast and what they need in the way of help. The hearing will begin at 4 in the State senate chamber in Columbia. Anyone wishing further information should contact Denise Love, hearing clerk, room 322, Russell, Washington, D.C.

ADDITIONAL STATEMENTS

THE CIA AND THE PRESS

Mr. GOLDWATER. Mr. President, on December 27 Mr. John M. Maury appeared before the Permanent Select Committee on Intelligence of the House of Representatives. His statement is so important to the whole future of the collection of intelligence and the agencies which perform that task that I think it should be made available to all readers of the CONGRESSIONAL RECORD before it is printed in the permanent RECORD of the House. The point that Mr. Maury makes that I feel is the clearest is that American citizens, including newsmen, should be willing to help their country in the collection of intelligence. He points out in his statement that this has not been abused and points further that the only so-called abuses that the CIA has been guilty have been abuses put on them by various Presidents who ordered them to do things. Now I think the President has the right to do this in the interests of the country, and I do not believe that any of our Presidents have abused the intelligence agencies to such an extent that people should become overly exercised about it. We hear about the rights of American citizens being hurt or tampered with and, yet, just in the past 3 days we have seen the report of an American citizen caught spying for another country. I think the great, great majority of American citizens are perfectly safe, loyal, and honest Americans, but we have some that need watching, and I would dislike to see the bad ones get by with what they do under the guise of the protection of their rights. Mr. President, I ask unanimous consent that the statement of Mr. Maury be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF JOHN M. MAURY

My name is John M. Maury. My background includes law practice in Charlottesville, Virginia; service in World War II as a Marine officer assigned to Naval Intelligence and commanding the U.S. Military Mission to North Russia in Murmansk; 27 years in CIA, including assignments in Berlin, on the NSC staff, on a Presidential Task Force to review U.S. foreign policy, on a disarmament delegation in Geneva, eight years as chief of Soviet operations, six years as Chief of Station in Athens and five years in charge of CIA liaison with the Congress. After retirement from CIA I served two years, 1974–1976, as Assistant Secretary of Defense. In appearing here today I speak for myself alone.

Mr. Chairman, I welcome the opportunity to appear before your Subcommittee on a matter which I believe concerns us all. Never before has this country been in greater need of reliable information about what is going on in the tense and fragile world beyond our borders. Without such information we are, for all our military might, a blind giant stumbling through an unchartered minefield. For this information we must rely on both our intelligence services and our press. But to serve our purposes this information must not be only reliable. It must be credible.

I fear the credibility of both our chief intelligence service—the CIA—and our press has been badly damaged in recent years. I believe the credibility, and the effectiveness, of CIA has suffered because of a series of false allegations and irresponsible revelations by the press. I believe the credibility of the press, at least among those familiar with the facts, has equally suffered. Not all of the press has been a party to this irresponsible campaign to discredit the CIA. The wire services and the news weeklies have, in general, been more responsible. And I find nothing sinister in the basic hostility of the press toward any government agency which operates in secret. In our free society this is inevitable. But the record of some of the nation's leading dailies, and that of some of the fashionable periodicals, has been a shabby one. Their performance brings to mind the words of Mr. Jefferson when, in 1807, he wrote to his friend John Norvell that "nothing can now be believed which is seen in a newspaper. Truth itself becomes suspicious by being put into that polluted vessel".

A favorite theme of those who seek to discredit the CIA is that the Agency attempts to manipulate the news, and thus is a threat to the integrity of the American press. On the basis of the record, which I shall cite in a moment, one may ask, "What integrity?" One may also ask just how a press so jealous of its integrity could think its interest would be served by proclaiming to the world that it has been seduced and subverted by a sinister CIA. But in fact, Mr. Chairman, to the best of my knowledge there is no case where signficant news destined for American consumption has been falsified or corrupted due to CIA involvement.

Last year Mr. Carl Bernstein, a diligent investigative reporter who was working on this question, told me he had reached the same conclusion. Mr. Stuart Loory attacked this issue in the Columbia Journalism Review of September/October 1974, but the best he could come up with were two cases: One, where an unidentified informant told him of a hypothetical case in which the "United States Government, for example, might decide to float a story discrediting the Soviet Union as an irresponsible nuclear power"; and another where a scientist "while consulting for CIA, developed a scheme for misleading Soviet scientists by publishing articles containing false research results in American scientific journals"—a scheme which was ultimately vetoed by CIA Director Allen Dulles.

The Church Committee of the Senate, which investigated CIA media and other activities last year, registered considerable concern about the possibility of CIA supported "black" propaganda abroad producing "fallout" which might be picked up and unwittingly played back to American audiences by U.S. media. The Committee report mentioned books and articles, the publication of which was reported by CIA, usually without the knowledge of the author (who thus was hardly a CIA mouthpiece), but which sometimes were available in English and obtainable in the U.S. The Committee cited no cases where these had had a mischievous or misleading effect on American readers. The examples mentioned included a book about a student in a communist country. Interestingly enough this book happened to have been reviewed by Eric Severeid who, with no knowledge of the CIA role, commented that "our propaganda services would do worse than flood (foreign) university towns with this volume". Other examples cited by the committee were CIA-supported translations of Machiavelli's "Prince" into Swahili and T. S. Eliot into Russian. The Committee apparently found no evidence that these projects had produced any sinister results in the U.S.

I can appreciate the concern to protect the American reader from false information disseminated abroad. But the great bulk of CIA media operations has been aimed at disseminating the truth to areas where it is not otherwise available, as in the case of Radio Free Europe broadcasts to the truth-starved populations of Eastern Europe. If I may say so, it seems to me that by agitating this issue the press has taken aim at a non-existent target and succeeded only in shooting itself in the foot. News manipulation no doubt is a problem for a free press. Indeed news is manipulated every day by the reporters who file it and the editors who present it. News manipulation is both a common practice and a lucrative profession. Calculated news leaks, both true and otherwise, are a favored device of statesmen, bureaucrats, politicians, defense contractors, public relations experts and innumerable pressure groups. If our concern is really about manipulating the media, the CIA aspect of the problem seems to me hardly significant.

As to the related issue of the role of journalists in the collection of intelligence, I know of some who have served their country in this capacity willingly and well. I know of none where this service was at the expense of their obligation either to their employers or to their readers.

So much for what CIA has done to the integrity of the press. Now, since I believe we are all concerned about the integrity of CIA, let me explain why I believe the press has caused serious mischief in this regard. I recall hearing a former Soviet intelligence officer quoted as saying, "We were taught that our first task was to put out the eyes of our enemy by disrupting and discrediting his intelligence service." If so, Moscow must be pleased with some of the material appearing in the American press in recent years. For example:

Numerous stories have implied CIA involvement in Watergate. In fact there was no such involvement. When Helms learned that the White House was seeking CIA assistance for some unknown but suspicious purpose he ordered it stopped, and he later refused CIA assistance in the post-Watergate coverup.

Press stories have described CIA as an uncontrolled "rogue elephant," defying even Presidential direction. The fact as confirmed by both Church and Pike committees of the Congress, is that CIA in all significant respects has acted at White House direction.

Various stories have linked CIA to illegal drug traffic. The fact is that, as BNDD Director Ingersoll has certified, "CIA has for some time been this Bureau's strongest partner" in running down foreign illegal drug sources.

A few years ago there were stories about CIA's "illegal" and "unauthorized" war in Laos, conducted without Congressional knowledge. In fact, various Congressional committees and subcommittees were briefed on this operation in 359 occasions between 1959 and 1972.

One familiar trick has been misleading headlines, as where a leading daily headlined a Jack Anderson column "CIA Teaches Terrorism to Friends." In fact, the story said only that the teaching in question was how to counter terrorism. Another leading paper headlined a story "CIA Goal: Drug, Not Kill, Anderson." In fact the story said only that the White House had consulted a doctor who had formerly worked for CIA about such a possibility. Another headline proclaims

"Benefits From CIA Rated Low." The story merely quoted a speaker as saying, "very little good" had come out of congressional investigations of CIA.

One major daily has used falsely labelled photographs of CIA buildings to support the false charge that CIA is much larger now than it was in 1960.

Other outright falsehoods printed in the most influential dailies in the country include allegations that the CIA Station Chief in Athens tried to "kindle a war" in Lebanon; that the so-called Penkowskiy Papers, (material from a senior Soviet intelligence officer working for CIA) were "precisely the coarse fraud—Soviet authorities—claimed" (in fact, virtually every word in the papers attributed to Penkovskiy was his own); that the CIA was recruiting U.S. mercinaries for Zaire; and that CIA had introduced swine virus into Cuba.

One of the disservices of the media has been to reward and encourage that small handful of disgruntled former intelligence employees—Victor Marchetti, John Marks, John Stockwell, Frank Snepp and CIA's first defector to the Communists, Philip Agee—who, in violation of their secrecy agreements (which the courts have ruled are binding contracts) have betrayed their public trust by "telling all". Some of these media-created instant celebrities may have irreparably damaged the careers, and even endangered the lives, of former colleagues whom they have publicly identified. Just two years ago I was visiting my old friend Dick Welch, the CIA Station Chief in Athens—a position which I had once occupied. Welch's name had just prominently appeared in the Greek press, replaying revelations appearing in American publications. Welch commented to me that he was now a marked man. A few days later, back in the States, I learned that Welch had been assassinated in front of his Athens home as he returned from an Embassy Christmas party.

Agee, by the way, was reported in a column by Evans and Novak some months ago to be suspected of collaboration with the DGI, the Cuban intelligence service which is intimately associated with the KGB. (Indeed, Agee has admitted as much.) This column appeared in a number of papers, but not in a leading national daily that regularly carries the Evans and Novak column. Just three weeks before killing the Evans and Novak column this paper defended its disclosure of the highly sensitive covert support CIA was providing King Hussein of Jordan in an editorial which concluded with the following words: ". . . The real point is that newspapers cannot be true to their trust if they allow themselves to get in the position of managing the news, of picking and choosing—publishing or withholding—on the basis of anybody's hopes or fears of real (or fancied) consequences . . ."

Mr. Chairman, I do not claim that the squalid record I have cited is typical of most of the American press. It is based mainly on material I have noted appearing in the two or three dailies I see regularly. I have had an exchange of correspondence with top officials of one of them in which I have pointed out several serious distortions and falsehoods and proposed an article setting the record straight. I also asked that if any of my allegations were inaccurate or unfair I be so advised. The response did not address that point, but merely stated that my case was not "impressive". The reason I have not named names in this connection is that I do not feel this is the proper forum to pursue personal differences. If the committee so desires I will of course document the above points in detail. But I have felt it necessary to cite at least enough specific facts to demonstrate that some of the media have, through a series of distortions, created an image of a dangerous and irresponsible CIA which has little relation to reality. Unless these distortions are challenged, I fear widespread misconceptions will generate pressure for cures far worse than the disease—for legislative restrictions and public exposures which will damage the effectiveness of the Agency even more than it has been damaged by false allegations, public disclosures and clumsy personnel management to date. I see no harm in confidential collaboration in the interest of national security between consenting adults—even a journalist and an intelligence officer—so long as neither violates his professional obligations.

However, Mr. Chairman, I do not wish to leave the impression that intelligence penetration of our media is not a problem. A manual entitled, "The Practice of Recruiting Americans in the USA and Third Countries," published by The First Chief Directorate of the KGB, lists some dozen priority recruitment targets. First on the list are government employees with secret clearance. Second are members of the press. And what could be more logical? The Soviet intelligence agent operating under press cover in the United States has unique advantage. He can openly pry into the most sensitive secrets of the White House, the Pentagon and CIA without attracting suspicion. After all, that's what the other Washington correspondents apparently spend their time doing. Even if he does attract suspicion, he can rely on the currently fashionable interpretations of the First Amendment to block investigation. Moreover, an agent under press cover is, in fact, two agents. He is a well placed espionage agent, but he is also an ideally situated "agent of influence", available to disseminate through journalistic, political and academic channels information, and misinformation, in the service of his Soviet masters. In fact, one of the major departments of the KGB is Department A, whose sole mission is the dissemination of subversive and deception information abroad.

It has been some years since I have been privy to details regarding the involvement of members of the American media with foreign intelligence services, so I am in no position to cite currently active cases. I can say that such involvements in the past were of significance, and, based on both logic and experience, I must assume that this is true today. Let me explain the vulnerability of our national security to espionage conducted through media channels. Our basic espionage law (18 USC 793) makes it a crime to reveal classified information only if it is done "with intent, or reason to believe, that the information is to be used to the injury of the United States or to the advantage of any foreign nation." As any lawyer knows, intent is often quite impossible to prove. Thus if an American official passes secrets to a known foreign intelligence agent, he may be in trouble. But if he passes them to a member of the media, who then publishes them or passes them on to whomever he pleases, he is safe; he merely has to claim that his intent was only to let the American people know what their government is doing behind their backs.

The irony is that our Federal statutes provide clear-cut criminal penalties for the revelation of a wide variety of government information. For example: the unauthorized revelation of insecticide formulas, $1,000 and 1 year; Department of Agriculture information, $1,000 and 1 year; agriculture marketing agreement information, $1,000 and 1 year; Department of Commerce information, $5,000 and 5 years; names of persons on relief, for political purposes, $1,000 and 1 year; crop information, $10,000 and 10 years; confidential business information, $1,000 and 1 year; bank loan information by a bank examiner, $5,000 and 1 year; names of borrowers from land bank by examiners, $5,000 and 1 year; names of borrowers from National Agricultural Credit Corporation by examiner, $5,000 and 1 year; income tax information, $5,000 and 5 years; patent information, $10,000 and 2 years; tax return information by an employee of HEW; shipping information by an employee of a common carrier, $1,000; selective service records, $10,000 and 5 years; confidential information on export controls, $10,000 and 1 year; information for commodity speculation, $10,000 and 1 year. But the employees and former employees of our intelligence services, whether acting from spite or greed or secretly in the interest of a foreign power, apparently can reveal sensitive secrets with impunity unless we can prove their intent.

Mr. Chairman, if we are to have the reliable and timely intelligence which our executive and legislative leaders need to face the issues before them our intelligence services must be provided with the security protection without which no intelligence service can hope to operate effectively. It is a demonstrated fact that foreign agents and foreign intelligence services will not cooperate with an intelligence service that can't keep a secret, and today's fabulous and costly technical collection systems can survive and function only under tight security protection.

This is not to suggest anything as drastic as the British Official Secrets Act, or the security laws of most of the European democracies, under which any disclosure of classified material could bring severe criminal penalties. But under our present laws only communications intelligence appears to enjoy protection. In passing the National Security Act of 1947 the Congress recognized the unique sensitivity of information on intelligence sources and methods by specifically charging the Director of Central Intelligence with responsibility for protecting such information. However, the law did not provide him with the means to carry out this responsibility.

May I respectfully suggest, Mr. Chairman, that this Committee might render the nation a great service by examining the possibility of a law similar to that applying to "Restricted Data" under the Atomic Energy Act. It would cover only information specifically designated by the Director of Central Intelligence and the heads of the other intelligence agencies as relating to intelligence "sources and methods"—the identities of agents or the details of technical collection systems. It would have no application to other categories of classified material. And it would be binding only on those individuals who, by virtue of employment or a contractual relationship with an intelligence agency, voluntarily assumed, by sworn commitment, the obligation to protect source and method information.

In considering such legislation, it may be appropriate to recall the comment of Gen. Washington who, precisely 200 years ago, wrote in a letter to Col. Elias Dayton: "The necessity for procuring good intelligence is apparent and need not be further urged—all that remains for me to add is that you keep the whole matter as secret as possible. For upon secrecy, success depends in most enterprises of the kind and for want of it, they are generally defeated however well planned."

THE GREAT SHIPBUILDING BAILOUT—I

Mr. PROXMIRE. Mr. President, the three largest shipbuilding firms who build ships for the Navy—Newport News, Electric Boat and Litton—are all experiencing financial difficulties. Their difficulties stem, in part, from the large cost overruns they have incurred on Navy

ships. They are also faced with declining orders for new commercial ships.

$2.7 BILLION IN CLAIMS FILED AGAINST THE NAVY

In order to recoup their potential losses each of the big three shipbuilders have filed claims against the Navy alleging that the Government is responsible for the cost overruns. A total of about $2.7 billion in claims is now pending.

This is not only the largest amount of claims ever to be on file at one time, the total will probably grow.

PRESSURE TO SETTLE THE CLAIMS WITHOUT REGARD TO THEIR MERITS

For years the shipbuilders have exerted pressure on the Navy for favorable settlements. From time to time Pentagon and Navy officials have helped the shipbuilders to favorable settlements which could not be substantiated by the facts.

The game has been to force a settlement without regard to the merits of the claims. The most outrageous effort to do this was led by Deputy Secretary William Clements in 1976. At that time the claims totaled $1.4 billion. Mr. Clements asked Congress for approval of a plan to settle them all without a prior Government audit or assessment as to their true worth.

Congress wisely rejected the Clements plan for a massive bailout.

Now the Navy, at long last, is showing some signs that it is beginning to stand up to the shipbuilders.

But the Navy will backslide into a bailout approach to the problem unless it gets its act together and faces up to the charges of fraud.

NAVY ADMIRALS WARN OF POSSIBLE FRAUD

On December 29, 1977, I chaired hearings on shipbuilding claims and heard testimony from two Navy admirals both of whom warned that some of the claims may be based on fraud.

Assistant Secretary Edward Hidalgo also testified but I was not satisfied with many of his answers to my questions.

ELECTRIC BOAT CLAIMS TAKEN AWAY FROM NAVY CLAIMS SETTLEMENT BOARD

Among other things, Mr. Hidalgo said that he ordered the Electric Boat Co. claims taken away from the Navy Claims Settlement Board shortly before the Board was about to complete its year-long review of the claims.

SECRETARY CLAYTOR SAYS THERE WILL BE NO BAILOUT

On January 12, 1978, Navy Secretary W. Graham Claytor, Jr., and I met to discuss the Navy's shipbuilding claims problems.

In the meeting Secretary Claytor gave me his personal assurance that there will be no giveaway or bailout by the Navy in the resolution of claims disputes.

ELECTRIC BOAT CLAIMS RETURNED TO NAVY CLAIMS SETTLEMENT BOARD

The Secretary also told me that the Electric Boat Co. claims had been returned to the Navy Claims Settlement Board so that the Board can complete its review of the claims.

In a followup letter to me, Secretary Claytor states,

If reasonable settlements cannot be reached with the shipbuilders, we are quite prepared for litigation, and, indeed, three major claims are in various stages of trial at present.

Secretary Claytor assured me in his letter that Congress will be promptly notified of any Navy decision to request extra-contractual relief for a contractor.

Secretary Claytor also states in his letter that with regard to allegations of fraud, the Navy will do nothing "which would jeopardize the Government's position should any of the claims be found to merit formal referral to the Department of Justice."

Secretary Claytor's assurances and preliminary actions are a most welcome change from the days when former Deputy Secretary of Defense William Clements seemed to be doing everything in his power to weaken the Government's position in the claims disputes.

CLAIMS SETTLEMENT SHOULD BE BASED STRICTLY ON THE MERITS

The first principle in the handling of a claim against the Government should be that it will be fully evaluated and that an official determination will be made as to its worth.

It ought to follow that any claim settlement will be based strictly on the merits of the claim and that responsible allegations of fraud will be promptly referred to the Justice Department for investigation.

Justice will have to investigate if they are referred.

It is only delaying the Navy's decision to get Justice into the act at this point.

Why cannot the Navy do its own work with regard to the fraud charges?

I ask unanimous consent that copies of my recent correspondence with Secretary Claytor be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., December 30, 1977.

Hon. W. GRAHAM CLAYTOR,
Secretary of the Navy, Department of the Navy, Pentagon, Washington, D.C.

DEAR MR. SECRETARY: The hearings I conducted on Shipbuilding Claims, December 29, 1977, contain testimony that raises the most serious questions about the integrity of the Navy's claims review process.

I am writing to you directly because after questioning Assistant Secretary Edward Hidalgo I am convinced that he is not properly aware of the background of the claims issue nor does he understand the importance of assuring the taxpayers that their interests are being protected by the Government.

Mr. Hidalgo has already undermined the effectiveness of the Navy Claims Settlement Board. This Board was established in 1976 after it became apparent that such an entity, headed and staffed by career officers and civilian employees, was essential to achieve objectivity and impartiality in the review and negotiation of claims. Mr. Hidalgo's explanation for taking the Electric Boat Company claims out of the Board just before the Board was about to complete its review was unsatisfactory, and his statement during the hearing that he intended to involve himself personally in negotiations with Newport News was most unfortunate. One of the main reasons the Board was found to be necessary was so that the claims review process could be insulated from the kind of outside pressures and influences that seem to be emanating from Mr. Hidalgo's office.

I found Mr. Hidalgo to be evasive or non-responsive in many of his replies, and to be poorly informed and unprepared to discuss some of the more important issues. He seemed insensitive to the possibility that one or more of the pending claims may be based on fraud, as alleged by several career Navy officials. Mr. Hidalgo would not even assure me that the Navy would not take any action that constitutes a give-away or a bail-out to the shipbuilders.

I remain hopeful that an even-handed, objective approach to the claims problem is still possible and that the orderly claims review procedures put into effect a year and a half ago can be reestablished.

Before this matter gets out of hand I suggest that you and I discuss it together. If you think such a meeting can be useful I suggest having one in my office during the afternoon of January 11, 1978.

Sincerely,

WILLIAM PROXMIRE,
U.S.S.

JOINT ECONOMIC COMMITTEE,
Washington, D.C., January 13, 1978.

Hon. W. GRAHAM CLAYTOR, Jr.,
Secretary of the Navy, The Pentagon, Washington, D.C.

DEAR SECRETARY CLAYTOR: I was pleased that we had the opportunity to discuss the shipbuilding claims problem in an informal and candid way on January 12. As I mentioned at the close of our meeting I think it will be useful for me to summarize in this letter the areas of agreement and disagreement between us.

You stated there would be no giveaway or bailout by the Navy of the shipbuilders in the resolution of the claims disputes. I fully approve of this decision.

You stated that the Electric Boat claims have been returned to the Navy claims Settlement Board so that it can complete its review of the claims. I fully approve of this decision and I also understand that the Board will be permitted to carry out its responsibilities and exercise the authority granted to it when it was established in 1976. Please confirm my understanding.

I am hopeful that under your leadership claims against the Navy will be reviewed in accordance with the orderly procedures followed by the claims Settlement Board, and that new claims will be referred to the Board as was done when the Electric Boat claim was filed. Please let me know whether you plan to follow this approach.

I was also pleased to learn of your determination to act promptly to dispose of the allegations of fraud that have been made with respect to the Newport News and Electric Boat claims, and of any additional allegations that may be made, by referring them to the Justice Department unless they are found to be obviously frivolous. I understand that the fraud charges will be referred to Justice in the near future where they can be appropriately reviewed, regardless of the disposition of the claims themselves, and that neither you nor your subordinates will make any statements or take any actions that could jeopardize any possible justice investigation or prosecution. Please confirm my understanding concerning this matter.

I was disappointed with your statement that the Litton claim will not be reviewed in detail and that an "overall settlement" will be attempted. I suggested that the Litton claim, which now totals $1.1 billion, be referred to the Board. As the claim was revised upwards by over $300 million only last September, and as the Navy has only recently been provided with the full documentation for this claim, it would be appropriate for the claims Settlement Board to be given responsibility for the review.

If you decide not to refer the Litton claim to the Board, I request that you provide a detailed explanation for your decision including, but not limited to, the procedures

being followed to review the claim, how you plan to carry out the law directing the Navy not to pay any claim over $5 million unless it "has been thoroughly examined and evaluated by officials" responsible for doing so, the official presently responsible for the review and the names of each person involved in the review and his or her qualifications and experience in handling shipbuilding claims matters, the estimated time required to complete the review, and why the Litton claim seems to be receiving preferential treatment by not being referred to the claims Settlement Board.

I remain concerned about whether the Navy will vigorously protect the taxpayers' interests in the resolution of the claims disputes. As a lawyer and former businessman, you are aware of how important it is for the party against whom a claim is made to require the claimant to fully substantiate any claim. The burden should be on the shipbuilders to prove every element of their claims and to demonstrate the government's legal liability. The Navy should be prepared to take the matter to court, if necessary, should it become apparent that any shipbuilder is demanding more than it is entitled to. Frankly, I fail to detect that resolve so far.

If it appears necessary to provide extra-contractual relief, in the interests of national defense, that conclusion should be immediately transmitted to Congress so that it can approve or disapprove. I am pleased to learn that you intend to so notify Congress of any such conclusion on the Navy's part. Please confirm my understanding.

I believe you will agree that it is important to carefully distinguish between a settlement on the merits of a claim and a grant of extra-contractual relief. Government procurement will be irreparably damaged if extra-contractual relief is granted under the guise of a claims settlement. Please let me know whether you agree or disagree with this point.

The use of "litigative risk" as a factor in determining the value of a claim or making a settlement offer tends to confuse extra-contractual relief with a settlement on the merits. It is a highly subjective factor which could become a subterfuge for a bailout. Please explain the rules and criteria used for determining litigative risks, and how the determination can be quantified in view of the fact that the Navy has never litigated a major claim in a court of law.

You mentioned the fact that the Justice Department advised the Navy it could, under certain circumstances, appeal an adverse ruling from the Armed Services Board of Contract Appeals. I assume you refer to the Lockheed claim and that you are aware that the Board's ruling was not based on the merits of the claim but on a theory of equitable estoppel related to a public utterance made by a former Defense official. Please provide me with a copy of the Justice Department opinion and state whether the Navy plans to pursue its right to appeal the Board's decision.

I share your apprehensions about the prospects for any takeover of private shipyard facilities although I understand that such an action has not been ruled out in the event it becomes necessary for reasons of national security. Please confirm this understanding.

You are, of course, correct that studies showed Navy shipyard costs were higher than private shipyards during the period when the Navy was building its own major ships. However, it is also true that there were no significant claims problems during that period and it is obvious that cost overruns, when claims are taken into account, have skyrocketed in recent years. I recall that Secretary William Clements ordered a study in 1976 of how the Navy would satisfy its shipbuilding requirements in the event yards such as Newport News or Litton carried out their threats to stop building Navy ships. Please tell me the status of that study and provide me wth a copy if it has been completed.

I will appreciate your early response.

Sincerely,

WILLIAM PROXMIRE, *U.S.S.*

SECRETARY OF THE NAVY,
Washington, D.C., January 25, 1978.

Hon. WILLIAM PROXMIRE,
Joint Economic Committee, U.S. Senate, Washington, D.C.

DEAR SENATOR PROXMIRE: I enjoyed the opportunity we had on January 12 to discuss the subject of Navy shipbuilding claims and believe your letter of the following day summarizes some of the points we covered. I wish to elaborate on a few of them.

The Electric Boat claims were returned to the Navy Claims Settlement Board on January 9 for the purpose of completing their evaluation and providing recommendations to the Steering Group of Assistant Secretaries of the Navy Edward Hidalgo and George Peapples, as well as General Counsel Togo D. West, Jr., Vice Admiral Donald Davis, and Vice Admiral Vincent Lascara. The disposition of future shipbuilding claims will have to be determined as each case arises since, as you are aware, the Navy Claims Settlement Board was established with the hope that it would not have to be made a permanent organization and that the administration of shipbuilding contracts could eventually be returned to normal procedures.

From its origin over four years ago, the Litton LHA claim has been entrusted to a highly experienced team within the Naval Sea Systems Command, presently headed by Captain R. A. Jones, USN, an acknowledged expert on shipbuilding contracts, claims analysis and negotiation. His team presently numbers about 168 and its analysis of the claim is expected to be completed in April of this year. Assistant Secretary Hidalgo is personally overseeing this massive effort, and I share his opinion that it is being professionally conducted in the most efficient manner possible while still ensuring that the Government's interests are fully protected.

As I hope I made clear in our meeting in your office, I am totally committed to finding resolutions to these claims problems which sacrifice neither the interests of the American public nor the Navy in the name of expediency.

If reasonable settlements cannot be reached with the shipbuilders, we are quite prepared for litigation, and, indeed, three major claims are in various stages of trial at present. If extracontractual relief should prove to be necessary, Congress will promptly be notified as required by law, as it has been in the case of the interim LHA payment arrangement which I submitted to the House and Senate Armed Services Committees on January 19. Other alternatives, such as the "takeover of private shipyard facilities" which you mentioned, would likewise have to be considered on a case-by-case basis.

The allegations of fraud which have been raised in connection with current claims are being examined by the Office of the General Counsel, in coordination with Department of Justice attorneys, precisely to ensure that they are analyzed thoroughly and without influence of the claims settlement process. In the course of our efforts to resolve the claims problems, nothing is going to be done which would jeopardize the Government's position should any of the claims be found to merit formal referral to the Department of Justice. The Armed Services Board of Contract Appeals decision in the Lockheed case is another subject presently being discussed with the Justice Department, and may be one upon which we can give you a more definitive status report in the near future.

I note that a special concern mentioned in your letter is "litigative risk", one of a number of factors used by the Navy Claims Settlement Board in arriving at a figure for a proposed settlement. "Litigative risk" is always a factor in negotiating the settlement of any claim or other controversy which will go to litigation if not disposed of by agreement. It is based on an evaluation of a party's exposure to an outcome from litigation different from that which would result from a proposed settlement. I, as well as the other experienced Navy lawyers involved, am quite familiar with the concept and its application to contractual disputes. I will not allow it or any other factor to be utilized as a "subterfuge" for unjustified action.

I have been unable to identify the specific Clements 1976 Study on shipbuilding alternatives to which you refer in your letter.

I appreciate your continuing interest in the Navy's shipbuilding programs and hope we can count upon your support as we search for solutions to these problems of grave concern to all of us.

Sincerely,

W. GRAHAM CLAYTOR, JR.

MARCH OF DIMES

Mr. MATHIAS. Mr. President, the character of our country is never more evident than when we as individual citizens join our efforts to aid and protect children unable to defend themselves.

Because of its work, the National Foundation-March of Dimes is the embodiment of that character. The goal of the March of Dimes research and medical service programs is the prevention of birth defects and of any life-threatening condition in the newborn.

As we all know, President Franklin Delano Roosevelt founded the organization 40 years ago as the National Foundation for Infantile Paralysis.

The 1978 March of Dimes poster child for Frederick County, Md., is David William Shelton, a courageous boy who was born with paralysis and multiple birth defects that posed a threat to his very survival. But today, although he cannot move his eyes side to side, and although he cannot smile, David is, as a story in the Frederick Post relates—

. . . a sturdy, talkative youngster who compensates for the shortcomings of nature without giving his actions a thought.

His parents, Gary and Terry Shelton, consider themselves lucky to live within driving distance of the birth defects clinic and specialists at the Johns Hopkins Hospital. Medical research, genetic services, and other medical specialty service and equipment for combating, correcting, and relieving birth defects—such as that provided for David at Johns Hopkins—often are funded by the March of Dimes grants.

As President, FDR made an eloquent radio appeal in support of the work of the National Foundation 34 years ago. Today, that appeal remains a timely statement of why the March of Dimes continues to deserve our support.

In President Roosevelt's words:

The generous participation of the American people in this fight is a sign of the healthy condition of our nation. It is democracy in action. The unity of our people in helping those who are disabled, in protecting the welfare of our young, in preserving the eternal principle of kindliness—all of this is evidence of our fundamental strength.

Early in our history, we realized that the basic wealth of our land is in its healthy, enlightened children, trained to assume the responsibilities and enjoy the privileges of democracy. The well-being of our youth is indeed our foremost concern—their health and happiness our enduring responsibility. If any become handicapped from any cause, we are determined that they shall be properly cared for and guided to full and useful lives.

Mr. President, I request that the January 3, Frederick Post article about David Shelton and the March of Dimes campaign be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Frederick (Md.) Post, Jan. 3, 1978]

DAVID SHELTON, BRUNSWICK, IS LOCAL M–D POSTER CHILD

In all his four and a half years, David William Shelton has never smiled in pleasure, blinked his eyelids in wonder, nor rolled his eyes in delight. He probably never will.

David, who is Frederick County's 1978 March of Dimes Poster Child, was born with a rare birth defect called Moebius's Syndrome that has paralyzed his sixth, seventh and twelfth cranial nerves. He was born with a looped intestine, blocked bowel, club-feet, web-fingers, eyelids that do not blink, an unchanging expression, cross-eyedness, and the inability to move his eyes from side to side.

When delighted, as he often is with his life, the blond, blue-eyed youngster laughs heartily, but with no accompanying smile. When he is occasionally saddened, he may cover his eyes as tears creep down his cheeks. However, his emotions are masked by a facial expression that never changes.

This child who will, in 1978, represent locally the 250,000 children across the nation who will enter the world less-than-whole, was born at Frederick Memorial Hospital with multiple defects, and removed almost immediately to Johns Hopkins Hospital in Baltimore. When he was 36 hours old, David received what would be the first of seven operations to correct the many defects with which he was born.

Now, 4½ years later, David is a sturdy, talkative youngster who compensates for the shortcomings of nature without giving his actions a thought. Because he can move his eyes up and down, but not side to side, he must turn his head more than most of us to see the right and left. Because he cannot smile, he laughs loudly.

Surgically, his doctors have created fingers by using the bones that existed and skin grafted from other parts of his small body. Some of his cross-eyedness has been corrected, and orthopedists have corrected the club-feet, although he will forever have to wear his special shoes 24 hours a day.

His doctors say that the operation that removed substantial portions of his bowel and intestine is probably what will prevent him from becoming obese as do most Moebius's Syndrome patients, for David can neither eat nor retain much food at one time.

His parents, Teresa and Gary Shelton of Brunswick, said that David has also been examined by genetists at the Birth Defects Clinic of the John F. Kennedy Institute in Baltimore. His defect has been classified as "spontaneous mutation after conception," which means that the syndrome was not inherited and that his parents can produce other offspring, if they wish, without fearing another Moebius's Syndrome child.

Gary Shelton is a chemical technician at Eastalco in Buckeystown. A graduate of Frederick High School and a native of Frederick, he is now working toward a business degree at Frederick Community College on a part-time basis.

Theresa Shelton—Terry to her friends—is the former Teresa Fellers. Born in Germany where her father was stationed with the Air Force, she later moved to Frederick with her family. She is also a Frederick High School graduate, having served as president of the school's Student Council during her senior year.

Before David was born, Terry attended Frederick Community College, interrupted her studies at her son's birth, and recently returned to receive a degree in special education. She is now a substitute teacher for the Frederick County Board of Education while David attends the Rock Creek Center.

Neither Gary nor Terry can count the trips they have made to Baltimore since David's birth, but they are both aware how fortunate they have been to be located within driving distance of a birth defects clinic and the specalists at Johns Hopkins Hospital where David could be evaluated, his defects researched and treated by experts in the many medical and genetic areas that his case demanded.

Researchers working on grants funded by the March of Dimes, genetic services underwritten by the March of Dimes; physicians and surgeons whose expertise and equipment are often the result of March of Dimes grants, have all combined, in cases such as David's, to correct and relieve the birth defects, to learn why they occurred and whether they will reoccur in a specific family.

The March of Dimes is at work through the year to give newborns and the unborn the healthy start in life that each deserves—a start uncomplicated by birth defects.

Through its annual Mothers' March, mail programs, Walk-a-thon and other special events, the March of Dimes seeks contributions to continue its programs to prevent birth defects through education, research and medical services.

Chairman of the 1978 March of Dimes in Frederick County is John Francis of Thurmont. Mrs. William Rife of Woodsboro will serve as chairman of the Mothers' March. Eric Arnold of Jefferson is chairman of the Frederick County Chapter of The National Foundation-March of Dimes.

CONSUMER PROTECTION LEGISLATION

Mr. GLENN. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Connecticut (Mr. RIBICOFF).

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR RIBICOFF

COMMITTEE STUDY SHOWS NEED FOR CONSUMER PROTECTION LEGISLATION

President Carter repeated in his recent State of the Union Message that he was strongly committed to legislation creating a consumer protection office. The need for Congressional action on this long discussed measure is greater than ever.

Last year the Governmental Affairs Committee published a study of the extent of public participation in regulatory agency proceedings as Volume 3 of its Comprehensive Study of Federal Regulation. The facts discovered by the Committee in this study fully explain why there should be a consumer protection agency.

The Committee found that at agency after agency, participation by the regulated industry predominated—often overwhelmingly.

In more than half of the formal proceedings held by 8 agencies surveyed there was no public participation at all. At the Interstate Commerce Commission, for example, there was no evidence of any organized public participation in more than 60% of the rulemaking proceedings we examined.

Even in proceedings where public interest groups did participate, it typically amounted to no more than 10% of the amount of participation by members of the regulated industry.

The Committee found participation by non-regulated interests to be especially limited in formal, trial-type proceedings held by the agencies. There was no intervention by public interest groups in more than 50% of the Federal Power Commission dockets examined. And where there was participation, the ratio of industry to public participation was 66 to 1 in one case. In another case it was 38 to 1.

At the Federal Communications Commission, public interest parties participated in only 10% of the most recent broadcast application proceedings.

At the Nuclear Regulatory Commission, public interest group participation took place in only 40% of the proceedings examined.

One fundamental cause of this great imbalance is the great cost of hiring counsel to participate in the proceedings. Particularly in formal, trial-type proceedings, it is virtually impossible to participate effectively without counsel.

The Committee study found that the 11 trunk airlines spent nearly $3 million on outside counsel alone to represent them before proceedings of the Civil Aeronautics Board. The Aviation Consumer Action Group is the only public interest group involved in Civil Aeronautics Board proceedings. Yet it had a total annual budget of only $40,000. Only half of that, $20,000, was spent on Civil Aeronautics Board matters.

The second greatest cost of participation in a regulatory agency proceeding is the cost of technical assistance. For example, AT&T spent more than $1 million in one year on studies to support its position in a Federal Communications Commission inquiry. A public interest group which intervened in a Federal Communications Commission rulemaking proceeding on the fairness doctrine could spend a total of only $16,000.

Industry has estimated that the cost of participation in a typical licensing proceedings at the Nuclear Regulatory Commission runs betwen $500,000 and $1 million.

The Committee found that time after time, industry is able to spend 10 or 50 or 100 times as much money as public interest groups.

These findings were adopted by a unanimous vote of the Governmental Affairs Committee.

A consumer protection agency is essential. It is essential just to begin to remedy the tremendous imbalance which the Committee study shows exists between the ability of the consumer and industry to influence agency actions.

I submit for the RECORD the summary of findings from the committee's study, "Public Participation in Regulatory Agency Proceedings", which relate to the extent and cost of participation and also chapter 2 of the com-

mittee study, entitled "Extent and Cost of Participation."

(The attachment is as follows:)

SUMMARY OF FINDINGS

The following is a restatement of the major findings and conclusions of this report, listed by chapter.

EXTENT AND COST OF PARTICIPATION (CHAPTER 2)

(3) At agency after agency, participation by the regulated industry predominates—often overwhelmingly. Organized public interest representation accounts for a very small percentage of participation before Federal regulatory agencies. In more than half of the formal proceedings, there appears to be no such participation whatsoever, and virtually none at informal agency proceedings. In those proceedings where participation by public groups does take place, typically it is a small fraction of the participation by the regulated industry. One-tenth is not uncommon; sometimes it is even less than that. This pattern prevails in both rulemaking proceedings and adjudicatory proceedings, with an even greater imbalance occurring in adjudications than in rulemaking.

(4) The single greatest obstacle to active public participation in regulatory proceedings is the lack of financial resources by potential participants to meet the great costs of formal participation. Lack of funds has prevented public participation in many important proceedings.

(5) The regulated industry consistently outspends public participants by a wide margin in regulatory agency proceedings. In every case or agency reviewed, industry spent many times more on regulatory participation than their public interest counterparts. In some instances, industry committed as much as 50 to 100 times the resources budgeted by the public interest participants. For example, in 1976 the nation's 11 trunk airlines spent more than $2.8 million on outside counsel to represent them in regulatory proceedings before the CAB. By contrast, the Aviation Consumer Action Group, the principal representative for public interest organizations at CAB proceedings, had a total 1976 budget of $40,000, of which approximately half was spent on participation in CAB proceedings.

(6) Lack of resources has limited the amount of technical expertise that participant groups have been able to bring to bear in agency proceedings.

(7) Opportunities for citizen participation are hampered by significant administrative costs such as transcript fees and reproduction of required materials.

CHAPTER 2: EXTENT AND COST OF PARTICIPATION

At the outset of this study on public participation, we sought to determine the extent to which the public is curently participating in the regulatory process.

It is not possible, of course, to precisely calculate the extent of such participation. Even to estimate such a figure involves a large number of imponderables. What, for example, constitutes effective or meaningful participation? Can a simple letter from a nonregulated participant constitute effective public participation? Does the number of ages of formal submission make a difference? Does it matter if the presentation is written or oral? Is there a significant difference between participation by an organized public interest group, and participation by individuals that are not organized? Is there a significant difference if the participant is guided by professional counsel?

The answer to these questions is yes, to a degree. Generally, participation by an organized group tends to be more effective. It tends to be more effective when guided by professional counsel. It tends to be more effective when submissions are knowledgeable, relevant, and directed to the issue pending before the agency. And it is certainly more effective when there are adequate funds available.

We surveyed eight of the Federal regulatory agencies in an effort to estimate the extent of public participation in agency proceedings. We also sought to approximate the comparative resources that public participants and regulated industries commit to their participation efforts. Unfortunately, little data of a comprehensive nature is available. Each agency compiles its data differently, and in the case of several agencies, few figures were available at all. With respect to cost data, there are no across-the-board figures at all, and we were compelled to proceed on case-by-case basis.

Nevertheless, while any single set of data which we discuss in the following sections is less comprehensive than we would wish, we believe the sum total of this data provides a clear picture of the current extent of public participation in the regulatory process, and of the comparative resources which participants are able to commit to participation. On the whole, the data clearly shows that participation by public or nonregulated interests before Federal regulatory agencies is consistently exceeded by the participation of regulated industries, and often constitutes only a tiny fraction of such industry participation. This pattern holds for both rulemaking and adjudication, although the margin is not as great for rulemaking as it is for adjudication. The data also suggests that in all types of proceedings, regulated interests commit far greater resources to participate before regulatory agencies than their public interest counterparts.

EXTENT OF PARTICIPATION

We asked eight regulatory agencies—FCC, FPC, FTC, ICC, CAB, FDA, NRC, and SEC—to identify for us which 10 of the last 30 rulemakings and which 10 of the last 30 adjudicatory proceedings they considered the most significant. We examined the dockets in these cases to determine the extent of participation by regulated and non-regulated interests.

Participation in rulemaking proceedings

At the FPC, the agency cited eight dockets as their most significant rulemaking proceedings. These proceedings involved the enforcement of deliverability of natural gas under certificated arrangements; establishment of criteria for site selection and facility operation criteria for LNG importation and storage terminals; accounting changes for research and development of activities of regulated firms; corporate and financial reports for natural gas companies and electric utilities; establishment of just and reasonable rate of return for natural gas; and new rates for small producers.

We examined the dockets in these eight cases, and found that despite the clear consumer and public impact which these cases involved, there was no organized public participation of any kind in six of the eight proceedings. There was substantial participation, however, by the regulated industry: in one proceeding there were 47 industry participants; in another, there were 35; there were 30 in a third case, and 23 in the fourth.

In the two dockets where public interest group participation did take place, the ratio of regulated industry to public participation was large; 12 to 1 in one of the cases, 4 to 1 in the other.*

At the FDA, the rulemaking proceedings cited as most significant by the agency involved: public access to agency information (freedom of information); approval of food for certain dietary uses; establishment of effectiveness standards for certain classes of drugs (bioequivalence); establishment of conduct and conflict of interest standards; and modifications of certain administrative procedures. Again, although these proceedings involved considerable public impact, there was no public interest group participation in more than half of these proceedings. In those instances where we did find such participation, the ratio of industry to public interest representation was overwhelming: 122 participants to 4 in one matter, 29 to 1 in a second, 12 to 5 in a third, and 60 to 12 in a fourth.

At the ICC, we found no evidence of any organized public participation in more than 60 percent of the proceedings. In one rulemaking dealing with charges on lost or destroyed shipments of household goods there was no public interest group participation at all. Nor was there any in a rulemaking that proposed to require motor carriers to furnish performance reports to consumers on transportation of household goods. In those cases where public interest group participation did occur, the ratio of industry to public participants was 23 to 4 in one proceeding, 13 to 5 in another, and 3 to 1 in a third.

At the CAB, we found a somewhat better percentage of public interest group participation. CAB rulemaking proceedings addressed one-stop inclusive tour charter rules; environmental policy act regulations; protection of charter passengers from cancellations; requirements for carriers to publish summaries of various fares for consumers; establishment of new advance booking charters; regulations to implement the Sunshine Act; and restrictions on overbooking and oversales practices. We found public interest groups represented in 70 percent of these dockets. Still, even in these proceedings, participation by the regulated industry heavily predominated. In one proceeding, there were 130 industry participants and 26 public interest group participants; the ratio was 24 and 1 in a second proceeding; 11 and 2 in a third; 8 and 3 in a fourth; 33 and 5 in a fifth; 56 and

---

*It should be noted that in many of the proceedings at the FPC and elsewhere, a number of comments by individuals were received. (At the FPC, for example, individual comments were noted on six of the eight dockets we examined.) For our purposes, however, we did not treat these comments as falling into either the category of regulated or nonregulated interest submissions, since there was simply no way to determine what point of view they represented. Moreover, we were advised by many of the agencies that such individual comments are not usually accorded much weight because they frequently lack specific or technical knowledge. Accordingly, these comments were excluded from the ratios.

We should also note that at the FPC and other agencies, occasional comments or submissions were received from accounting firms, from banks, from other nonregulated businesses, and from State and local governments. These comments are equally difficult to categorize or pigeonhole, and in light of their occasional nature they have also been excluded from our ratios.

3 in a sixth. (In several of these CAB proceedings, however, there was a split within the airline industry, with the scheduled carriers on one side and the supplemental carriers on the other. The views of the supplemental carriers in these cases often correspond to the views of the public interest groups.)

At the FCC, only three rulemakings were cited by the agency as significant. They concerned the need for adequate television service in New Jersey; approval of certain entertainment formats; and approval of emergency hand language messages for the deaf on television. Public interest group participation occurred in all three proceedings, with ratios of industry to public interest groups of 64 to 14, 33 to 4 and 3 to 4 .

At the FTC, the recently enacted Magnuson-Moss Warranty–FTC Improvement Act appears to have helped in eliciting consumer comments in rulemaking proceedings, particularly from individuals. We found participation by consumers and consumer groups in all the FTC dockets that we studied. For example, in a trade regulation rule proceeding on the hearing aid industry, there were 843 submissions from industry and 130 submissions from consumer groups.[1] In a proceeding on warranty terms, there were 346 industry submissions, 77 trade association submissions, and 21 consumer group submissions. In a proceeding involving care labeling of textile products, the FTC received 172 industry submissions and 60 public interest group submissions. The Commission also received 545 individual submissions in the hearing aid proceeding, 242 individual submissions in the warranty proceeding, and 1,500 individual submissions in the care labeling proceeding. However, as we noted earlier, FTC staff familiar with these proceedings indicated that the impact of comments by individuals is often diminished because of their imprecise nature.

There is one category of agency activity in which the pattern outlined in this section does not consistently hold true—petitions for rulemaking. We found that at several of the agencies—the FTC, NRC, and CPSC—petitions for rulemaking submitted by the public approached or actually even exceeded those submitted by the regulated industry (see table 2.1). At the NRC, for example, 55 percent of petitions for rulemaking originated with consumer groups; only 25 percent came from regulated industry. At the FTC, it was a dead heat; 48.5 percent from consumer groups, 48.5 percent from industry. At the CPSC, 62 percent came from regulated industry, but a very sizable 34 percent were submitted by consumer groups.

The explanation may be in the mission of these agencies: The FTC, NRC and CPSC all have basic health and safety missions and a proposed rule by an agency with such a mission is more likely to tighten health and safety requirements rather than loosen them. In contrast, at the classic public utility regulatory agencies, rules are usually proposed in order to confer or expand a benefit for the regulated industry.

This is borne out by a quick check of several of the public utility regulated agencies—ICC, CAB, and FEA. Industry-sponsored rulemaking petitions accounted for 74 percent of all rulemaking petitions at the CAB, 75 percent at the ICC, and 90 percent at the FEA. By contrast, consumer-sponsored rulemaking petitions accounted for only 13 percent of all rulemaking petitions at the CAB, 8 percent at the ICC, and a mere 3 percent at the FEA. Thus, at these public utility regulatory agencies, the usual pattern prevails.

TABLE 2.2.—PETITIONS FOR RULEMAKING RECEIVED

	Total number	Petitioners: Regulated industry[1] (percent)	Governments (percent)	Consumer groups (percent)	Other (percent)
CAB	62	74.0	11	13.0	0.2
CPSC	242	62.0	3	34.0	.1
FCC[2]	117	59.0	5	[7] 35.0	1.0
FMC[3]	(4)	(4)	(4)	(4)	(4)
FPC[5]	(4)	(4)	(4)	(4)	(4)
FTC	33	48.5	3	48.5	0
ICC	24	75.0	13	8.0	4.0
NRC	20	25.0	15	55.0	5.0
SEC[6]	(4)	(4)	(4)	(4)	(4)
EPA[4]	(4)	(4)	(4)	(4)	(4)
FDA	68	77.0	3	21.0	0
FEA	29	90.0	3	3.0	3.0
OSHA	92	[8] 79.0	5	15.0	0

[1] Includes trade associations.
[2] Includes amateur radio operators.
[3] No action because of pending case (the only case).
[4] Agency reports it is unable to supply this information.
[5] Gives examples of a few petitions. Explains it is difficult to identify among the volumes of hearing records because there is a substantial number of petitions to amend the rules of the Commission which are filed during the course of adjudicatory proceedings.
[6] Volume of rulemaking petitions received by this Commission has not been large. Just gives examples.
[7] Cannot identify precisely the number of petitions received in the past two years. Estimates less than 15 total.
[8] Includes labor unions.

Participation in adjudicatory proceedings

In general, we found that participation in adjudicatory proceedings by nonregulated interests is even more limited than in rulemaking. This may reflect the fact that nonregulated interests commit their scarce resources more often to across-the-board proceedings where problems can be dealt with on a generic basis. It may also reflect the fact that public participation in adjudicatory proceedings has often been limited by questions of standing (see chapter 3), and by other procedural requirements imposed by the agencies themselves (see chapter 4).

At the FPC, the dockets we examined included several area rate and pipeline rate proceedings and one rate proceeding on the wholesale sale of electricity. Despite the economic impact involved in these cases, there was no intervention by interest groups in more than half of them. In those cases where such intervention did occur, the ratio of industry to public interest representation was 66 to 1 in one case, 38 to 1 in a second case, and 4 to 1 in a third. It should be noted, however, that there was intervention by State or local governments in these proceedings, and often the positions taken by such intervenors corresponded with those taken by public interest groups. Still, even with these intervenors included, industry participants accounted for more than 80 percent of the total.

Similar patterns prevailed elsewhere. For example—

At the FCC, the Commission indicated to us that public interest parties participate in only 3 of the 30 most recent adjudicatory proceedings (broadcast application proceedings).

At the CAB, public group participation occurred in two-thirds of the cases—cases that dealt with domestic common fares, an airline certification, interstate and intrastate fares for California and Texas, domestic air freight rates, transportation of live animals, and awarding a transatlantic route. However, in the cases where public participation occurred, the ratios of industry to public interest submissions were again very substantial: 122 to 1 in one case, 82 to 6 in a second case, 43 to 13 in a third, and 57 to 9 in a fourth.

At the NRC, public interest group participation took place in approximately 40 percent of the proceedings examined. State and local governments, often through Assistant or Deputy Attorneys General, participated in over 60 percent of the proceedings. The overall number of participants was generally small, and ratios between industry and public interest groups were generally low.

At the FDA, we found public interest group participation in less than 45 percent of the adjudicatory proceedings. The dockets included setting tolerance levels for certain chemicals, approval of a new drug application, permitting the use of certain growth promotants in animal feed, and sanctioning the use of methadone for particular drug treatment programs. The ratios of industry participation to public interest participation, where it did occur, were relatively low: for example, 6 to 5, 8 to 2, and 1 to 1.

In sum, we found that in agency after agency, participation by the regulated industry predominates—often overwhelmingly. Organized public interest representation accounts for a very small percentage of participation before Federal regulatory agencies. In more than half of the proceedings, there is no such participation whatsoever. In those proceedings where participation by public groups does take place, typically, it is a small fraction of the participation by the regulated industry. One-tenth is not uncommon; sometimes it is even less than that. This pattern prevails in both rulemaking proceedings and adjudicatory proceedings, with an even greater imbalance occurring in adjudications than in rulemaking.

EXPENDITURES ON PARTICIPATION

Generally, the same imbalance which we found with respect to the extent of participation holds true for expenditures. If anything, the imbalance is even greater on the expenditure side.

Clearly, several factors are responsible for this imbalance. Problems of standing, covered in chapter 3, account for part of it. Agency procedures are occasionally responsible, particularly if they discriminate against public interest groups; these procedures are discussed in chapter 4. But, the factor which is cited time and again as the chief obstacle to participation is the lack of funds, and the tremendous cost of participation. Repeatedly we heard stories of interventions begun and abandoned. We were told of funds running out. We were told of public interest lawyers billing half of what a private attorney would bill and then being unable to collect their fees. It should be noted here and throughout this volume that small businesses often have the same financial constraints as public interest groups.

An effort was made to determine how much the regulated industry spends to participate in regulatory proceedings, and to compare this with what public interest groups are spending. The problem of collecting cost data was similar to the problem of collecting the data on the extent of public participation. While precise data was not available for all the agencies, it was possible to compile a number of representative samples of the costs of participation. These clearly show that industry spends considerably more than public interest groups. In some cases, the comparisons were dramatic, with ratios of 50 to 1 or more. In all cases, industry spending on participation was many

[1] In these cases, the data provided by the FTC to the committee was somewhat different from that provided by the other agencies. We were supplied with the number of submissions rather than the number of participants.

times more than what public interest groups spent on participation.

A number of major public interest groups were contacted and asked to provide specific cost figures for their participation in both rulemaking and adjudicatory proceedings. These provided a number of examples from a diverse group of proceedings. In all, cost data was obtained from 15 public interest groups.

Industry representatives were asked for the same information. Cost data from 14 trade associations and corporations was obtained, and this provided a good cross-section of their expenses for regulatory proceedings.

In addition, a number of agencies maintain records of the costs of industry's participation in agency preceedings. The FCC, ICC and FPC require regulated companies to submit annual reports which contain schedules itemizing regulatory expenses over the subject year. The CAB annual report is compiled somewhat differently, since it lists expenses paid to outside sources but does not require regulatory expenses to be broken out. Therefore, in the case of the CAB, we also contacted the top legal officer at each airline to determine what portion of the airline's outside legal expenses were attributable to CAB proceedings.

We believe the cost figures obtained from these three sources—agencies, industry, and public interest groups—provide a sound basis for estimating comparative costs of participation.

The lion's share of these costs is the cost of legal counsel. Particularly in an adjudicatory preceeding, it is virtually impossible to participate effectively without counsel. For industry, legal expenses result from either in-house counsel or outside law firm billings. For public interest groups, representation is generally by public interest law firms. One Chicago lawyer we spoke to spends 40 percent of his time on public interest law and 60 percent on corporation law. After having spent many years devoting his practice exclusively to public interest law, he had lost so much money through unreimbursed legal fees and out-of-pocket expenses that he was forced to devise the current system, with the corporate law practice effectively paying for his public interest law practice.

The second largest expense of participating in a regulatory proceeding is the cost of technical assistance. This can be substantial. In one FCC proceeding, for example, A.T. & T. spent over $1,000,000 in 1 year to submit studies to the agency to support its position in an inquiry. Although that figure is certainly at the high end of the spectrum, it is not totally unrepresentative of the resources which industry is willing and able to commit to participate effectively in regulatory proceedings.

Finally, clerical costs imposed by the agencies can occasionally represent a substantial obstacle to effective participation. Costs such as transcript fees and reproduction of required materials, that are easily absorbed by private parties, often pose a real burden on public intervenors.

It is useful to compare these various types of expenditures on an agency-by-agency basis.

At the CAB, we found a tremendous disparity between industry and public interest group spending. CAB Form 41 requires all regulated airlines to file an annual report listing all outside expenses above $20,000, and to identify the name of the person or corporation paid, the amount paid, and the nature of the service rendered ("legal," "accounting," "advertising," or "investment management"). The top legal officer at each of the 11 trunk airlines advised us what portion of the airline's outside legal expenses were attributable to CAB proceedings. The figures that follow are the expenditures by the trunk airlines on outside legal expenses for the calendar year 1976 for proceedings before the Civil Aeronautics Board.

Airline	Amount billed for CAB work	Law firm
American	$200,000	Prather, Seeger & Doolittle.
Braniff	440,000	Arnold & Porter.
Continental	232,000	Hydeman, Mason & Goodell.
Delta	250,000	Hale, Russell & Stentzel.
Eastern	375,000	Wade & Associates.
National	50,000	Kirkland, Ellis & Rowe.
Northwest	240,000	Verner, Lipfert, Bernhard, McPherson & Alexander.
Pan American	650,000	Jones, Day, Reavis & Pogue.
TWA	400,000	Chadbourne, Park, Whiteside & Wolf.
United	14,000	Mayer, Brown & Platt.
Western	0	

The total for the 11 trunk airlines for 1976: $2,851,000. And this figure does not describe the complete story. Many of these airlines also maintain in-house counsel who do CAB work, and such costs are not included in the figure. When these are added in, the figure for legal costs for the major airlines for CAB proceedings last year clearly exceeds $3 million. And this does not include an additional $100,000 which the Air Transport Association incurred in CAB legal expenses in 1976.

Only one of the public interest groups surveyed engages in a substantial amount of CAB work. That organization is the Aviation Consumer Action Group, a firm which is loosely affiliated with Ralph Nader. The group's total budget for calendar year 1976 was $40,000, and only half of that, or $20,000, was spent on CAB matters. Even if this group receives pro bono litigation assistance from allied groups, its budget outlays represent less than 1 percent of the outlay for participation in CAB proceedings by the major trunk airlines.

ACAP was also able to provide an example of the burdens imposed by clerical costs. The example given was how much it costs to file an answer to a petition for reconsideration in what they term a "simple" rulemaking at the CAB. The costs broke down as follows:

Copying charges to reproduce 140 copies for the Board	$300
Postage	300
Envelopes	82
Clerical help to stuff envelopes, type labels and take to post office	20
Professional time—26 hours at $15 an hour	390
Senior professional time to review and edit, 2 hours at $75 an hour	150
Total	1,242

Thus, the clerical costs alone, on this one "simple" CAB rulemaking, consumed more than 6 percent of ACAP's total annual budget for all its CAB work.

At the NRC, a comparison of the costs of industry versus public interest groups also revealed a wide disparity. NRC costs of effective participation are particularly high, since Commission proceedings require not only adequate legal counsel, but also substantial reliance upon expert witnesses.

For example, the New England Coalition on Nuclear Pollution, a group based in Vermont, has intervened in the Vermont Yankee and Seabrook licensing proceedings. The Coalition depends entirely on contributions. The Vermont Yankee application for a license to build a nuclear powerplant, begun in 1971, has not yet been completed. To date, the coalition has spent $60,000 in legal fees on the Vermont Yankee proceeding.

Intervention by the coalition in the Seabrook proceeding dates back to 1973, although hearings were not begun until June 1975. To date on the Seabrook proceeding they have spent $58,000 in legal fees and out of pocket expenses. In addition, they have been able to spend only $2,500 on expert witnesses in the Vermont Yankee proceeding and $2,100 in the Seabrook proceedings. In the Seabrook case, the chairman of the economics department at Amherst College offered his services at no cost. But a Chicago economist whom they felt was essential to present a cost benefit analysis could not assist them for less than $4,000 and they could not afford to pay that.

A public interest lawyer described his role in the 1970 Palisades case before the AEC, a case he termed "landmark" since for the first time thermal pollution was recognized as an environmental element in nuclear powerplants. The attorney represented the Sierra Club, a group of fishermen and certain business and professional people. Legal expenses for 1 year of intervention ran $90,000—at an hourly billing rate of $60. None of the $90,000 was recovered.

The Union of Concerned Scientists, a public interest group in Cambridge, Mass., provided cost figures for participation in NRC rulemakings. They estimated for us that their legal fees in the emergency core cooling systems (ECCS) rulemaking ran $50,000 over 2 years. Out-of-pocket expenses for the same period were also $50,000. The Union was part of a coalition of 60 public interest groups organized under the name of the Consolidated National Intervenors. It was, however, the Union that led the effort. The coalition was primarily funded by small contributions, although it did receive some foundation support.

Although concise data for industry spending before the NRC was not available. Testimony presented to the Committee during its consideration of the Energy Reorganization Act provides a gauge of industry expenditures in nuclear licensing proceedings. George Freeman, an attorney who represents utilities in nuclear licensing cases, was not available, testimony presented to the Committee during its proceedings.

His answer:

"I would imagine the overall cost to the utility in terms of legal fees, in terms of technical staff review, staff backup, fees to consultants, plus the built-in price in the nuclear steam supply system of experts and fees to the architect engineer would run between $500,000 on the low side or $1 million on the high side."

Mr. Freeman's $500,000 to $1 million estimate represents a tenfold to twentyfold increase over the resources an average public interest group can commit if it wishes to contest a nuclear license.

It was also the Union of Concerned Scientists that provided the committee with the only example of studies commissioned by a public interest group. One, on energy alternatives, cost them $50,000, and a second came in at $80,000. It is not difficult to understand why public interest groups must put such activities on the back burner. With funds so limited and with legal counsel so crucial for effective participation, there is simply no way to afford the luxury of commissioning a study to support a position.

At the FCC, the two functions of the FCC with which the public is most familiar are the regulation of television broadcasting and the regulation of telephone systems (common carriers). Although we were not able to secure industry cost figures for the broad-

cast division, we were told by a leading public interest group, Media Access Project, of their expenses in FCC rulemaking proceedings. Media Access Project estimated that their participation in the FCC rulemaking on the fairness doctrine cost $15,000 in attorney's fees and $1,000 for out-of-pocket expenses. On the Commission's Sunshine Act rulemaking, they spent $500 in legal fees and $50 in out-of-pocket expenses. Furthermore, they have never been able to hire technical experts because of lack of funds.

Industry spending data was available for the common carrier division. Most illustrative are the expenditures of A.T. & T., the industry giant. A.T. & T.'s regulatory expenses are reported by the company on an annual basis in the FCC's schedule 39 of its form M.

For the year ending December 31, 1975, A.T. & T. reported over $2,225,000 in FCC expenses. Of this total, $1,800,000 was incurred in just three dockets.

One of these was FCC docket 20003, an inquiry into the "economic implications and interrelationships arising from policies and practices relating to customer interconnection, jurisdictional separations and rate structures." Thus, in docket 20003, the FCC was investigating the effects of competition in the telecommunications industry. A.T. & T. opposed the proposed increase in competition, arguing that if the FCC increased competition in the specialized common carrier and interconnect companies, A.T. & T. would be forced to raise the interstate telephone rates. A.T. & T. spent more than $1,000,000 trying to convince the FCC not to take further action.

The remaining $800,000 was spent on two related dockets, one started in 1970 and the other in 1975 that dealt with A.T. & T.'s request for an increase in its rate of return. As a result of the requests, the FCC began an investigation of the relationship of A.T. & T. with its associated companies: Bell Labs and Western Electric. Rate of return increases were granted—8½ to 9 percent for the first request (9½ percent was requested) and 9½ to 10 percent for the second request (10½ percent was requested). There was a total absence of any public interest representation in these proceedings. Henry Geller, a former General Council of the FCC and presently Chairman of the Board of the Citizens Communication Center, told the Committee that public interest intervention was "stymied totally". He mentioned "gigantic legal costs" and notably prolonged proceedings.

At the FPC, a similar pattern prevailed. The Committee was told by a public interest law firm whose clients include municipalities and public interest groups, that for an FPC proceeding expenditures typically run between $50,000 and $60,000, with half of that sum directed toward legal fees and the other half to expert testimony. The American Public Gas Association, in a proceeding that challenged the FPC's manner of setting rates, spent slightly more than $48,000. Their effort ended in the courts in June 1977 with a ruling against them.

Compare this with information reported by the pipeline companies on FPC Schedules 353 and 353A. Schedules 353 and 353A require a listing of "particulars of regulatory commission expenses, relating to formal cases before a regulatory body or cases in which such a body was a party." The statistics contained in these schedules reflect not only the total cost of a proceeding, which typically spans 2 or 3 years, but also the amounts spent on a proceeding for the subject year. The committee obtained copies of the reports for the year ending December 31, 1975, for the 34 major pipeline companies. These reports show that for a single rate proceeding begun in 1971, Northern Natural Gas has spent nearly $600,000 to date. On another proceeding, started in 1974, they have spent $350,000.

The Cities Service Gas Co. has spent almost $220,000 on a single rate proceeding begun in 1974 and over $220,000 on a certificate proceeding begun in 1967.

The United Gas Pipe Line Co., another of the major gas companies spent over $1,300,000 in 1975 alone, although this figure encompasses 16 rate proceedings and 19 certificate proceedings.

Schedules 353 and 353A are also required of companies selling wholesale electricity. The FPC was asked to identify the 10 largest electric companies filing Schedules 353 and 353A. We found that a very substantial portion of regulatory expenses for these companies was incurred because of State public service commissions and the charges attributable to FPC proceedings were somewhat less than they were for the pipeline companies. For example, the Pacific Gas & Electric Co. spent $75,000, almost entirely on filing fees.

The Duke Power Co. spent over $120,000 and all of it was on two rate proceedings. The Public Service Electric & Gas Co. also spent over $120,000, Detroit Edison over $190,000, and Southern California Edison over $130,000.

In all of the preceding examples, comparing public interest group costs to industry costs is like comparing David to Goliath. Effective participation in a regulatory proceeding does indeed depend on the quality and extent of one's legal counsel. It also depends upon the quality and extent of expert testimony and technical submissions. It requires ample administrative and clerical resources, costs which are frequently taken for granted. Yet time after time, industry is able to spend 10, or 50, or 100 times as much money on participation as public interest groups. The persistence and ingenuity of the public interest groups in their efforts to participate effectively is laudable, but their lack of resources to insure adequate representation is lamentable.

When these figures are considered alongside the data on extent of participation presented earlier in this chapter, we believe they make a convincing case that corrective steps—both legislative and administrative—are necessary to remedy this imbalance. These remedial steps are considered in the remaining chapter of this volume.

CONCERN FOR THE STEEL FASTENER INDUSTRY

Mr. PERCY. Mr. President, as we document the difficulties associated with unfair trade practices, particularly in the steel industry, we see the same conditions afflicting the steel fastener industry.

For some time now, this industry has been plagued by cheap imports, which continue to erode our own market despite vigorous efforts by the industry to modernize and seek the most efficient technology. There is strong evidence that imports continue to be "dumped," or sold in the United States below production costs in the home industry.

At this time, the import share of the U.S. market constitutes a whopping 46 percent, up from 23 percent—or double—in only 4 years, not permitting any chance for orderly adjustment by our own steel fastener industry. These imports, Mr. President, are underselling U.S. products by as much as 70 percent in the case of some steel fastener items.

Mr. President, this is a serious problem. To underscore just how serious it is, the International Trade Commission recently recommended import duties of 30 percent for the first and second year; 25 percent duties for the third year, and 20 percent for the fourth and fifth year. Because the call for these duties emphasizes the dilemma facing this country, I am confident that the upcoming decision to be made by the President on the recommendations of the ITC and his Special Trade Representative will have the best interest of the industry in mind.

The decision would be coming none too soon, since in my own State of Illinois, some 110 fastener businesses employing approximately 12,000 people would be affected by continued dumping on the U.S. market.

I have supported the principles of free trade for three decades as in the national interest, but have opposed at the same time unfair competition and support vigorous enforcement of our antidumping laws.

We know of the response that has already come from the concern that Congress has expressed with respect to the underselling of domestic steel products. No less concern should be shown where the steel fastener industry is concerned, particularly when it comes to national security.

The Defense Department is a major buyer of steel fasteners and it is imperative that the domestic market continue to be healthy and responsive to future requirements.

For these reasons, I have written to Special Trade Representative Robert S. Strauss to express my concern. Mr. President, I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Ambassador ROBERT S. STRAUSS,
Special Representative for Trade Negotiations, Office of Trade Negotiations, Washington, D.C.

DEAR AMBASSADOR STRAUSS: As you are aware, the steel fastener industry, producers of bolts, nuts and large screws, has been plagued in recent years by an ever growing volume of cheaper imports which have adversely affected the domestic industry.

In my own State of Illinois, for example, some 110 establishments involving over 12,000 employees have been under growing pressure from imports since 1972. Nationwide, some 495 steel fastener businesses employing over 45,000 employees stand to be affected.

It is my understanding that despite the construction of modern plants, improved technology and better efficiency, the U.S. steel fastener industry continues to find it difficult to compete. Already, many jobs in Illinois have been lost due to production cutbacks. More Illinois jobs are now in danger of being lost. In a recent statement, the Department of Labor concluded that "increased imports contributed importantly to the unemployment of significant numbers of workers" at the Lamson & Sessions (Chicago) and the ITT (Morton Grove) facilities at which some 160 employees of these companies were eligible to apply for trade adjustment assistance.

Indeed, the reason for the success of imported fasteners in the domestic market is that they are cheaper by a considerable mar-

gin. The prices at which imported fasteners are offered for sale in the United States are often at or below the cost of U.S. steel. As one steel fastener producer recently told me: "Whatever the exact price differential, it is sufficiently great that we cannot overcome it by technological improvements or increased production efficiency." The added implication by this executive was that there are increasing instances of "dumping" of steel fasteners onto the U.S. market.

I understand that you and the President will be considering the ITC's recommendations on steel fastener imports during the next few weeks. In addition, I would like to urge that you take whatever negotiating steps are possible to mitigate this problem and that you use your own offices to be certain that our anti-dumping laws are being strictly and promptly enforced.

Sincerely,

CHARLES H. PERCY,
U.S. Senator.

THE GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, from time to time matters of such great importance come before this body that they deserve the very closest attention of each Senator. The Genocide Convention, a treaty which would condemn the destruction of a national, ethnic, religious, or racial group as an international crime, is such a matter.

President Truman first submitted the treaty in 1949, and in the many years since then, there has been extensive debate on this issue. In the course of the many hearings which have been held, each side has been able to present its position concerning the treaty. I believe that the final verdict which should now be reached with regard to this treaty is that ratification has long been overdue.

Mr. President, for various reasons, there are several new Senators currently serving in this Chamber who have not voted on this issue in the past. I would like to take this opportunity to urge them to look closely at the provisions of the Genocide Convention, and to look closely at the hearings which have been held on it. With their help, we can make 1978 a year of which all Americans can be proud, for we can make 1978 the year in which the Genocide Convention is ratified. I call upon the Senate to pass the Genocide Convention as soon as possible.

THE PRESIDENT'S COMMISSION ON MENTAL HEALTH

Mr. DOMENICI. Mr. President, the President's Commission on Mental Health has been meeting monthly since last March with 22 task and subtask panels studying the mental health of various segments of our population. Mrs. Rosalynn Carter is the honorary Chairperson of the Commission and Dr. Thomas Bryant is Chairman. One of the task panels was concerned with the mental health of the elderly. Members of this task panel included Dr. Richard W. Besdine of the Hebrew Rehabilitation Center for the Aged in Roslindale, Mass.; Dr. Robert N. Butler, Director of the National Institute on Aging; Dr. Charles M. Gaitz of the Texas Research Institute of Mental Science; Maggie Kuhn, convenor of the Gray Panthers; and Carl Takamura, State representative from the State of Hawaii.

I would like to share with my colleagues comments made by Dr. Butler and Ms. Kuhn, and the conclusions of the task panel which were presented to the Commission at its meeting on January 16. Dr. Butler said:

> While the explosion in absolute numbers of the elderly population is a triumph for our society, this brings with it a crisis in everyday problems. Statistics show that the elderly receive less care than younger adults. Only four percent of the patients seen at public out-patient mental health clinics, and two percent of those seen in private psychiatric care are elderly. Emotional problems of the elderly have been underestimated due to the underutilization of our mental health resources.

According to Ms. Kuhn, the loss of jobs, spouses, and places of respect bring despair to many older people. Ms. Kuhn said:

> It is assumed that we will get ourselves to clinics for help but we don't, for this reason, there is need for outreach to the elderly in their homes and in nursing homes as well.
>
> In this age of liberation and self-determination, the older adult ought to have the right to remain at home and not be placed in an institution where we are deemed to be wrinkled babies and not treated as responsible adults. We are so casually treated by physicians who tell us we cannot expect to be well at our ages, and 80 percent of us are quite well indeed, that there is a great need for geriatric training in the medical schools in order that physicians more fully understand the changes which occur with age and that some diseases present themselves differently in the old.

The conclusions of the task panel on the elderly are as follows:

Outreach: The problem of accessibility can be ameliorated using an Outreach approach, with a coordinator integrating the various services available within the community. Continuing training at the community level of such Outreach and information workers is vital and is the foundation upon which services to the elderly within their communities must be based. Such training would enable those working with the elderly to recognize needs, respond appropriately, and, most important, to regularly follow up on the treatment plan.

Home care: Older people should not have to "serve time" in an institution just because they become ill unless such care is medically necessary or it is their own personal preference.

Home care must become an essential component of the continuum of mental and physical health care of the elderly. This is in agreement with the concept expressed in S. 2009. Such services will do much to enhance the quality of their lives and contain the rising costs of health care.

A major concern of the Panel is that in any home care program, there must be a built-in circuit breaker so that at the point where home care costs near institutional costs—indicating potentially greater need than can be coped with in the home setting—a physician will be required to reevaluate the treatment plan. This step would insure appropriate level of treatment in the home and would guard against excess usage and abuse.

Medicare: The discriminatory treatment of mental health services under the provisions of Medicare must be eliminated in order to reduce the financial barrier to mental health services. Without losing sight of the ultimate goal of removing all discriminatory language toward mental health reimbursement in the medicare law, the Panel recognizes that an acceptable short-range alternative is reduction of the beneficiary coinsurance from 50 to 20 percent—in line with standard medicare coverage—and increase of the maximum allowable reimbursement for mental conditions to $750 in any calendar year.

Geriatric training: First, each medical school which demonstrates sincere interest in incorporating training in geriatric training into its curriculum should receive up to $100,000 a year in support of this activity. Demonstration of this interest shall be constituted by the presence on the staff or immediate availability of an appropriately trained and committed person who shall hold full academic rank and have access to the school's decisionmaking body.

Second, there shall be made available to 25 graduate programs in clinical psychology, 25 graduate programs in social work, and 25 graduate programs in nursing $75,000 each in support of specialized clinical training for educators and practitioners in social gerontology, meeting similar criteria as outlined for medical school eligibility.

Research—Organic brain diseases: There must be a major national effort to promote and support accelerated research on the single most terrifying mental health problem of the elderly—organic brain diseases. Additional funds must be earmarked to intensify research in medical schools, hospitals, and research institutes on these dread diseases which are so costly in terms of human anguish and health care expenses. Further, the National Institute on Aging, the National Institute of Neurological and Communicative Disorders and Stroke, and the National Institute of Mental Health should be directed to conduct and support such research. This effort should be coordinated by the National Institute on Aging.

Allocation of research resources: The Secretary of Health, Education, and Welfare and the Office of Management and Budget should independently reexamine how existing Federal resources are being spent—with special attention to NIMH and NIA—and to increase or reallocate such resources available in research, training, and mental health services for the elderly proportionate with their current needs and the needs of the larger future populations of elderly.

Administration on aging—Revitalization: The position of the Administration on Aging must be reaffirmed to fulfill legislative intent and mandate. This will

enable the Administration on Aging to be a strong and highly visible advocate for older Americans as intended by Congress.

These conclusions will be considered by the Mental Health Commission as it prepares its final report for the President this April.

I am particularly pleased with the conclusions which emphasize the need for outreach and for home care, as I firmly believe these are necessary to the well-being of all older Americans. I concur wholeheartedly with the belief of this task panel that "practical attention given to the special problems and needs of today's older Americans ultimately will reduce the unnecessary and costly dependence of the elderly of the future."

EXPORT-IMPORT BANK FINANCING NOTIFICATION

Mr. PROXMIRE. Mr. President. I call to the attention of my colleagues a communication I have received from the Export-Import Bank pursuant to section 2(b)(3(iii) of the Export-Import Bank Act notifying the Congress of a proposed additional Eximbank loan to assist the construction of a nuclear powerplant in Brazil. Section 2(b)(3)(iii) of the act requires the Bank to notify the Congress of proposed loans or financial guarantees for nuclear-related exports at least 25 days of continuous session of the Congress prior to the date of final approval to the transaction unless the Congress dictates otherwise.

In this case, the Bank proposes to extend an additional loan in the amount of $23,400,000 to Brazil to assist in the purchase of U.S. goods and services to be used in the modification and completion of that country's first nuclear powerplant. Eximbank has previously made loans and guarantees totaling $163,920,000 in conjunction with this project. The new credit proposed by Eximbank will cover 60 percent of the total cost of additional U.S. goods and services for the project. The loan will bear interest at the rate of 8¾ percent per annum and will be repayable over a 12-year period commencing June 30, 1979.

Mr. President, I ask unanimous consent that the letter from Exim pertaining to this transaction be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXPORT-IMPORT BANK OF THE UNITED STATES,
Washington, D.C., January 19, 1978.

Hon. WALTER F. MONDALE,
President of the Senate,
U.S. Capitol, Washington, D.C.

DEAR MR. PRESIDENT: Pursuant to Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States Senate with respect to the following transaction:

A. DESCRIPTION OF TRANSACTION

1. Background and purpose

In late 1971, Eximbank authorized financial assistance of $138 million in the form of a credit of $69 million and a guarantee of commercial loans in an equal amount to Furnas Centrals Eletricas S.A. (FURNAS) to facilitate financing the U.S. costs for the Angra dos Reis Nuclear Power Plant, Brazil's first nuclear power plant, located on the coast between Rio de Janeiro and Sao Paulo. In May 1975, Eximbank increased the amount of its direct loan by $17.28 million and provided an additional guarantee of private bank loans of $8.64 million, for total Eximbank support of $163.92 million for this project. FURNAS has requested and Eximbank is prepared to provide an additional direct credit of $23.4 million.

FURNAS requires the additional financing for two primary reasons. First, in furtherance of the Government of Brazil's policy generally to conform to nuclear power plant guidelines recommended by the U.S. Nuclear Regulatory Commission (NRC), FURNAS has agreed to have its principal supplier, Westinghouse, revise its equipment supply and engineering services contract to allow for implementation of the latest NRC-recommended technical design criteria and safety standards. This policy is requiring ongoing reexamination and modification of the original designs of major plant components, together with the acquisition of additional plant-related equipment at a U.S. cost of approximately $16 million. These additional cost factors are common in current nuclear power plant projects as design technology of these plants continues to evolve. The equipment needed pursuant to plant modification includes components for upgraded piping systems, additional reactor components, a reactivity computer, additional controls, radiation protection equipment, laboratory equipment, security equipment and upgraded components included in many of the plant systems.

Second, FURNAS has requested Westinghouse to assume additional responsibilities in managing the project and coordinating the construction of the plant. FURNAS itself had performed this role but has now assigned it to Westinghouse, its major equipment and service contractor. These additional services will be performed by Westinghouse at a cost of approximately $14.2 million.

In addition, FURNAS needs $5.0 million for the purchase of additional spare parts, $1.1 million for additional construction inspection services and $2.7 million to cover price escalation of equipment.

Eximbank considers the reasons for and the amount of the increased U.S. costs to be reasonable and necessary to complete this plant which is now scheduled for 1979.

2. Executive branch approval

In accordance with established procedures, Eximbank requested through the Department of State the view of the Executive Branch on the proposed transaction. State's Bureau of Oceans and International Environmental and Scientific Affairs advised that the Executive Branch has no objection to Eximbank's proceeding with this transaction. According to State, on the basis of its review of the proposed loan, it was decided that "U.S. nonproliferation objectives would best be served by our continued cooperation with Brazil on the Angra I project" and therefore the Executive Branch "recommended to the Nuclear Regulatory Commission that the export license for the initial fuel core of Angra I be issued." State noted further that "these decisions are consistent with and reinforce our stated policy of seeking more stringent safeguards for nuclear energy without impairing the significant contribution nuclear projects such as Angra I will make toward meeting the urgent and legitimate energy needs of Brazil as well as other countries."

3. Identity of the parties

FURNAS is the largest subsidiary of Eletrobras, which is the Federal Government of Brazil's electric power holding company. Since 1973 FURNAS has held the status of a regional power company responsible for the supply of power to Brazil's southeastern region and for the construction of all power developments and high voltage transmission systems of regional interest. FURNAS sells its power under long-term contracts to private and government-owned utilities.

The Federative Republic of Brazil will issue to Eximbank an unconditional guarantee for repayment of the Eximbank direct credit.

B. EXPLANATION OF EXIMBANK FINANCING

1. Reasons

The Eximbank direct credit of $23.4 million will facilitate the export of $39 million of U.S. goods and services. Eximbank perceives no adverse impact on the U.S. economy from the export of these goods and services. This transaction will have a favorable impact on employment for substantial numbers of United States workers, as well as on the United States balance of trade. Westinghouse has advised Eximbank that this sale will result in 2,984,000 man-hours, which is equivalent to 1,435 man-years directly created. The majority of equipment and services will be supplied from Philadelphia, Pittsburgh and New York where the unemployment rates in September, 1977 were 6.9 percent, 6.1 percent and 8.5 percent, respectively. None of the goods to be exported are in short supply in the United States.

2. The Financing plan

The total cost of United States goods and services to be purchased by FURNAS is $39 million which will be financed as follows:

	Amount	Percent of U.S. costs
Cash	$ 5,850,000	15
Eximbank credit	23,400,000	60
Private loans not guaranteed by Eximbank	9,750,000	25
Total	39,000,000	100

(a) *Eximbank Charges.* The Eximbank Credit will bear interest at 8¾ percent per annum, payable semiannually. A commitment fee of 0.5 percent per annum will also be charged on the undisbursed portion of the Eximbank credit.

(b) The Eximbank credit and private loans, which total $33,150,000, will be repaid by the borrower in 24 semiannual installments beginning on June 30, 1979. Under this schedule, the first 7 installments and a portion of the 8th installment will be applied to repayment of the private loans and a portion of the 8th and all of the last 16 installments will be applied to repayment of the Eximbank direct credit.

Sincerely,

JOHN L. MOORE,
President and Chairman.

TRIBUTE TO SENATOR LEE METCALF

Mr. PACKWOOD. Mr. President, with the passing of Lee Metcalf, the U.S. Senate will be without one of its most distinguished Members and a very good friend. The long record of this outstanding Montanan speaks for itself. At a glance anyone can see Lee's life was spent in doing the public's work.

After completing his education and training in law, Lee served in the U.S. Army and took part in some of the Second World War's major campaigns. In civilian life, before and after his military service, he held a number of elective and judicial offices in his home State. The people of Montana became acquainted with this gifted man, took him to their hearts, and brought him to national attention. Since 1952, the voters sent and returned Lee Metcalf to Congress, both

as a U.S. Representative and beginning in 1960, as U.S. Senator. Other Members of Congres have served longer terms, but distinction is not earned by the sheer number of years one holds office. Lee accomplished it through hard work and a long-held belief in people.

As our careers came together in the Senate, I found what many already knew: That Lee Metcalf was a man committed to the people of his State and our Nation. He believed that Government could be a tool not to interfere with our lives, but to better them. His many contributions in the field of education, consumer protection, and governmental reforms demonstrate this belief over and over again.

As a westerner, he understood the urgency of conservation—the need to preserve for later generations our vast expanse of national wilderness and wildlife. He shared with many of us the enjoyment of vast mountain ranges, wild rivers, and forests long before the rest of the country jumped on the ecology bandwagon. We still owe him a debt in reminding us constantly how the family of man fits into the crucible of nature.

It would be tough to list here all of Lee Metcalf's accomplishments without giving due credit to each one. In all fairness, I am not going to try. I will remember Lee Metcalf as a strong and talented man, an able legislator, and an important ally on any issue. From both sides of the Senate aisle, I know he will be sorely missed. To Mrs. Metcalf and Jerry, I would like to express my deep sorrow at your loss and the Nation's. I would just like to add my gratitude, too, in having known, Lee as my colleague and friend.

JACKSONVILLE, ILL., POLICE CADET PROGRAM IS A SUCCESS

Mr. PERCY. Mr. President, local police departments throughout the country today face the serious challenges of recruiting effective new personnel and maintaining a favorable image with young people in their communities. The police department in Jacksonville, Ill., has responded imaginatively to these challenges with its police cadet program for local college students.

Wilbur E. Stafford, chief of police in Jacksonville, describes the program in the current issue of FBI Law Enforcement Bulletin. College students who apply for the program take tests and undergo interviews to determine their aptitude for police work. Those accepted are trained in all aspects of police work, including patrol duty. When they have gained sufficient expertise, the cadets perform all the normal duties of police work.

Typically, the Jacksonville police employ four college students in the program. The cadets work part time, while continuing their education. They are strongly encouraged to complete their 4 years of study; a cadet who leaves school before graduation is dropped from the program.

The program benefits the qualiy of law enforcement in several important ways. It adds needed personnel to the department, allowing more officers to be placed on street duty. It improves relations with local teenagers and college students. It gives able young people a unique opportunity to see firsthand the many important services offered by police to the community and to participate in the performance of responsible police work. Already, the Jacksonville police have obtained one highly qualified full-time police officer as a result of the program.

Mr. President, the cadet program is also extremely cost-effective. The program's cost for four cadets is less than the salary for one patrolman with 5 years seniority.

The police cadet program in Jacksonville is indeed a praiseworthy approach to a number of problems faced by law enforcement officials at the local level. I ask unanimous consent that Wilbur Stafford's article, "Advantages of a Viable Police Cadet Program," appearing in the January 1978 issue of FBI Law Enforcement Bulletin be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ADVANTAGES OF A VIABLE POLICE CADET PROGRAM

(By Wilbur E. Stafford)

During the late 1960's and early 1970's, the Jacksonville Police Department was experiencing problems with recruiting sworn personnel and maintaining a favorable image with local college students and young people in the community. Correcting these two problem areas was given a high priority by command personnel of the department.

At that time the Jacksonville Police Department consisted of 29 persons; i.e., 23 sworn police officers, three dispatchers, one secretary, and two meter maids. Assignment of personnel was as follows: The day shift consisted of the chief of police, two detectives, six sworn officers, one dispatcher, one secretary, and two meter maids; the afternoon and evening shifts each consisted of seven sworn officers and one dispatcher. Dispatchers worked a 5-day week and were relieved when sick, for holidays, vacations, and/or regular days off by sworn officers. This further reduced the number of officers available for street duty. Sworn members of the department also worked a 5-day week and received compensatory time for any overtime worked. Thus, it was not uncommon to find only two sworn officers on duty to answer calls on the evening and night shifts.

Among the several programs considered at that time a police cadet program with college students seemed to most nearly meet our needs. The city could draw from students at two local colleges.

Several factors favored a cadet program with college students. Financial considerations were important. Parttime employees are available when needed and are paid primarily for the special purpose or time needed. Thus, costs would be easier to adjust within budget constraints. Also, students are available during periods of greatest need; e.g., to work as dispatchers on weekends and/or evenings. They are also available during the summer, the time regular employees prefer to take their vacations and compensatory tme.

In the late 1960's and early 1970's, a major consideration was also establishing some favorable rapport and visibility on the college campuses. Further, the age for becoming a police officer was 21, the approximate age a college student would enter the job market. In addition, the Jacksonville Police Department wanted a positive recruitment program of young people. It seemed reasonable then, to aim the program at ultimately obtaining college graduates as sworn members of the department. If we later recruited a cadet as a member of the department, his department-wide training as a cadet would contribute to making him/her a better police officer.

Ten college students responded to the initial advertisement for cadets. Two of these applicants were female. Upon receiving applications from the two females, it was decided that this would be an excellent opportunity to see if a female officer would be beneficial to the department. The female applicants and department officials agreed that female cadets would not be assigned to patrol; however, they would be assigned to work with female juveniles.

The applicants were interviewed and the following rules were established:

Remaining in school and obtaining a B.A. or B.S. degree would be the cadet's goal, although the Illinois Law Enforcement Commission required only an associate degree.

If for any reason they left school prior to obtaining a B.A. or B.S., they would be dropped from the program.

A background investigation would be conducted similar to that conducted on police officer applicants.

Schooling would come first; should they have a test or other need to be off they would be given the necessary time off.

Local students would be given preference as they would be more likely to later join the department.

At that time minimum height requirements, etc., for police officers also applied to cadet applicants.

Four cadets were employed from this initial list of 10 applicants—3 males, and 1 female. Of these, the female dropped from the program after a couple of years and married, two of the male cadets joined the department after graduation, and the fourth male cadet entered law enforcement in another State. Of the two cadets who joined the department, one continued his education and obtained a master's degree. He left the department after 3 years to work for a regional office doing criminal justice planning. One of the original four cadets remains as a member of this department.

OPERATION

The program has remained relatively the same since its inception and implementation. Cadets are presently paid $3.25 per hour, are furnished uniforms, and receive a meal allowance when they work the night shift. Jacksonville's personnel policy gives nonsworn members of the department holidays off. As part-time employees, cadets are paid double time when they work on holidays.

The regular assignment for cadets during the school year is relief of the telephone/radio dispatchers. The three regular shifts of the patrol unit rotate every 28 days. Full-time dispatchers are assigned to a shift and rotate with the shift. Scheduling for the cadets gives them one of every four weekends off. With this schedule cadets work an average of at least 16 hours per week during the school year. Within limits they are permitted to work as many additional hours as they feel they can handle. These extra hours normally are worked during school holidays, such as at Christmas and during spring vacation. During the summer months, each of the four cadets works a 40-hour week and is assigned according to the needs of the department. However, there is ample time for the cadets to obtain departmentwide experience in areas of their preference.

Among the areas to which the cadets are routinely assigned is the investigative section, having the responsibility for followup

on unsolved crimes and consisting of four detectives and a secretary. The photoprocessing darkroom and evidence laboratory are within this unit. Cadets now do most of the darkroom work since this is usually something that can be done at any time. In addition, cadets assist in processing evidence, filing investigative records, and accompanying detectives on investigations.

With the rapidly growing volume of records and files confronting the police department today, cadets necessarily find themselves spending a large share of their time in records doing filing. They work, in all areas of records, particularly to reduce or eliminate any backlog which occurs.

The favorite assignment of all cadets is patrol. Cadets are now assigned throughout the department without regard to sex. No reluctance has been voiced by the officers on having a female cadet assigned them on patrol. This may be due in part to the alternative the officer has of riding by himself, but from comments it appears to be due to the female cadets having proven themselves to be 100 percent able and willing to help when needed.

Since implementation of the program the Jacksonville Police Department has employed four cadets with B.A. or B.S. degrees as officers, but still does not have a female police officer. The first female dropped from the program to get married and a second female cadet completed the program, but because of the lack of vacancies in the department was not offered employment until several months after graduation. By the time she had obtained other employment. The Jacksonville Board of Fire and Police Commissioners contracts with a nonprofit corporation for entrance and promotional examinations to insure the tests are validated and nondiscriminatory. Only the one female cadet to date has passed the tests. Thus, there are no female officers now in the Jacksonville Police Department, and as part of a self-imposed affirmative action program to obtain female officers, the department now employs two male and two female cadets.

As the need arises the department seeks to employ new cadets after they have completed their first year of college. This allows a consideration of their ability to do college work and provides the probability they will be in the training program as a cadet for about 3 years. Cadets must pass the merit board exam and place in the top three according to overall score. The merit board does allow cadets with 2 years' experience an extra five points in computing the cadets overall score.

EVALUATION

Costs of the program to the city for four cadets, each working approximately 1,100 hours per year, is slightly less than the salary for one patrolman with 5 years' seniority. Considering that cadets free a minimum of six sworn officer man-days per week just in communications, Jacksonville more than realizes the cost of the program by being able to return these officers to the street.

Areas the cadets are used in as relief are not confined to the telephone/dispatch center. Cadets fill in during the absence of the secretaries during periods they are on vacation or illness and fill in for the civic hostesses who handle parking enforcement as necessary.

Today the Jacksonville Police Department consists of 36 sworn police officers, 3 dispatchers, 4 secretaries, 2 civic hostesses (who enforce 2-hour parking restrictions), 1 animal control warden, 4 cadets (part time), and 7 school crossing guards (part time). Although the department has grown since 1970 when the program was implemented, cadets are still considered valuable members of the department and other programs would be reduced or eliminated if necessary to retain the cadet program. An outside evaluation of the cadet program after it had been in operation 16 months reported a consensus of the sworn officers that the department had received tremendous benefits from the cadet program. The benefits cited included: Putting more officers on the street, especially relieving younger officers from dispatching; bettering relations with teeenagers of the town and college students in the area; recruiting one highly qualified officer; relieving backlogs in the records department; creating added interest in police work; and improved attitudes concerning college education and increasing awareness of student problems. One officer stated: "I think we would only have to lose them to realize how much we benefitted from having them."

The improved morale of the department is one of the most beneficial assets of this program. Formerly, patrolmen were assigned to relieve the dispatchers and to aid those in the records division. Patrolmen tend to consider communications and records as nonpolice work; consequently, they prefer to be "on the street." A happy policeman is a more effective officer because his attitude and actions will tend to be less offensive to members of the public. Furthermore, young officers obtain more experience by being "on the street" than being at the dispatcher's desk. Thus, many of the young officers are more satisfied with their job as a result of the cadet program.

The feelings of the cadets and the noncadets indicated that the cadet program is valuable and should be maintained. Both groups cited the benefits of more officers on the street and relief for dispatchers, but the majority overlooked the advantage of recruitment. The funds needed for this program could purchase the services of two dispatchers or 1¼ beginning patrolmen; however, the recruitment advantages cannot be evaluated on a monetary basis. The quality of the department will be increased if recruits continue to come from the ranks of cadets. From this law enforcement exposure cadets should have a better understanding of situations and ultimately make better decisions. Since the beginning of the cadet program, one of the cadets was promoted to patrolman and it is generally felt that he has the potential of making an excellent officer. According to his own statement, he probably would not have applied to become a police officer if he had not had the cadet experience.

An evaluation of the program by an outside expert noted that cadets should have received a longer, more formal indoctrination. The recommendation was that the cadet experience should begin with a formal classroom experience of at least 20 hours to include the following: Organization of the police department; philosophy of the department; purposes and duties of each division in the department; role of the cadet; training in communications; techniques of counseling or working with juveniles; operation of the criminal justice system (courts, probation, police, etc.); functions of law enforcement in a community; rights and duties of a law enforcement officer and of a citizen; and crime prevention projects and methods.

The experience of the Jacksonville Police Department with the cadet program has been good. Those small departments now considering the addition of sworn or nonsworn personnel may wish to consider the alternative of establishing a cadet program.

JOHN SPARKMAN

Mr. HUDDLESTON. Mr. President, all of us were saddened to learn last Friday that our colleague the senior Senator from Alabama, Mr. SPARKMAN has decided to retire after his current term expires in January.

When he retires from the Senate, Senator SPARKMAN will have compiled an enviable record of 42 years in the Congress—10 in the House and 32 in the Senate—and a list of accomplishments few will be able to match.

I have only been privileged to serve with him for 5 years now, but I know that the name JOHN SPARKMAN is synonymous with small business, rural electrification, housing, banking, and a sound and reasoned foreign policy.

He was, of course, Adlai Stevenson's choice for a running mate in the 1952 presidential election, and while he never achieved the Vice Presidency, JOHN SPARKMAN will have more legislative monuments and accomplishments to his record than most Vice Presidents.

He will probably go down in history one day as the father of housing in this country. Long before it became popular, JOHN SPARKMAN was a leading force behind efforts to adopt a national housing policy that would provide a decent home in a decent environment for every American family. Because of his leadership many American families today have decent housing which they otherwise would not have.

I recently received a copy of an editorial about Senator SPARKMAN'S retirement that appeared in the Montgomery, Ala., Advertiser. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Montgomery Advertiser, Jan. 24, 1978]

JOHN SPARKMAN

Sen. John Sparkman's announcement that he is ending his political career comes as no surprise, but yet with a certain amount of sadness. After all, he has represented this state in Washington for more than four decades—one-fifth of our entire national existence—with such distinction that he has become as familiar as the Washington monument on the landscape of the nation's Capital.

Sparkman began his career in a time when the state was deeply divided into progressive and conservative factions. In contrast to many other Southern states, the progressives won out more often in Alabama, which led V. O. Key Jr., in his great mid-century study of Southern politics, to speak of "the robustness of Alabama political life" and to observe: "Clearly a state that produces a Senator (and Justice) Hugo Black, a Senator Lister Hill, a Senator John Sparkman scarcely merits application of the conventional stereotype of the South as a region of hidebound reaction."

No doubt regional considerations weighed heavily in Adlai Stevenson's choice of a Southerner for his running mate in the 1952 presidential election; it was no accident that the particular Southerner he chose was John Sparkman.

The progressive-conservative cleavage which existed at the time Sparkman first went to Washington in 1936 has largely been obliterated by the enfranchisement of the blacks, by the shift of the population from the rural areas to the cities, and by prosperity.

Amidst this change Sparkman has been a flexible man, and there is no greater evidence of the reliability of his political antennae than his stunning victories each time he offered for reelection.

Yet this flexibility does not bespeak an abandonment of basic principle, and even in

the twilight of his political career he is capable of the early populist fervor which swept him into office.

We well recall his reaction when he was asked, at a meeting of businessmen last year, whether he felt that cooperatives had "outlived their usefulness."

He might have given a waffling answer, because clearly the questioner and most of his colleagues at the gathering felt that coops ought to go. But instead of giving a popular answer, Sparkman's voice quivered with indignation as he related that he remembered a time people living in little shacks out on the mountainsides of North Alabama and the farms of South Alabama didn't even have electric lights or running water until the TVA and the REA brought these things to them. Little wonder that he would remember such houses; he grew up in one of them.

On the occasion of his retirement, about the highest tribute we can pay to John Sparkman is to offer the sincere conviction that even as he approaches the age of 80, had he chosen to run for relection, he could have taken on all comers—and won.

WATERWAY USER CHARGES: THE EDITORIALS SAY "DOMENICI'S AMENDMENT DESERVES SUPPORT

Mr. DOMENICI. Mr. President, two of our Nation's most influential and important newspapers this morning carried editorials endorsing my proposal to phase-in a fair and reasonable system of waterway user charges. These endorsements by the New York Times and the Washington Post follows on the heels of other recent editorials, such as those that appeared in highly respected and influential papers like the Chicago Sun-Times and the Miami Herald.

As one example, the Post argued that my proposal "has the weight of logic behind it." The Times said:

> Such charges make sense . . . Righting the balance (in transportation subsidies) would lower the total cost of hauling freight around the country.

In relation to the Post editorial, I would note that barge tonnages are expected to increase by at least 40 percent over the next decade, even with the most severe assumptions of my proposal.

In their conclusions, The Times urged a Senate vote for "substance instead of tokens," while The Post asked for "a change instead of a gesture."

It was the view of The Herald that "the free ride of the waterway users leads to unfair competition and unfair distribution of the Federal tax load," while the Sun-Times declared that "Domenici's amendment deserves support." I appreciate these words of strong support.

In addition, a smaller paper, the Gainesville (Fla.) Sun carried a similar endorsement of user charges. This editorial does not step lightly; it hammers hard. In fact, it hammers so hard that it makes a couple of errors. It implies, incorrectly, that railroad freight outside the Northeast has received a significant subsidy. It has not; the national total outside the ConRail area has been a total of just over $135 million during the past decade. And it erred, I hope, by referring to me as an "ultra-conservative," though I dare say that the bargers prefer to think me an ultra-revolutionary.

Mr. President, because I believe these editors represent sound evaluations of the issues, evaluations my colleagues will want to review, I ask unanimous consent that these editorials be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 2, 1978]

THE BARGE BILL

Under heavy pressure from the Carter administration, both houses of Congress agreed last year to abondon the old federal policy of paying the bills for the nation's inland waterways out of general tax revenue. The Senate did it in a way that would make a difference: The costs of the barge operators who use the waterways would go up sharply. The House acted in a way to keep the cost increases so low that its version appears more symbolic than real. When the Senate considers the matter again today, it should insist upon its version. A symbolic move won't end the waterway's constant drain on the Treasury.

The Senate bill rests on two premises. One is that the charges paid by each barge company should be related to the cost of the facilities it uses. The other is that the ever-present pressure to expand and improve the waterways will be reduced if those who want the improvements know that parts of the costs will be passed on directly to them. Thus, the bill sponsored by Sen. Pete Domenici (R-N.M.) would impose fees or tolls for the use of such things as locks.

The House bill rejects both premises and simply imposes a tax on the fuel used by barges. This has the advantage of spreading the cost across the barge industry. But it would have no effect at all in discouraging pressure for new facilities. In addition, Sen. Domenici's bill would generate enough revenue in the long run to cover most of the government's expenses, while the House bill would bring in less than 10 percent of what the government spends.

Sen. Domenici's version has the weight of logic behind it. It relates the charges each company would pay to the benefits it gains. And it removes part of the incentive for logrolling in Congress, which has kept the Corps of Engineers busy for decades building locks, dredging river bottoms and straightening channels.

It is probably true, as the barge companies contend, that his proposal would increase substantially the freight costs of some shippers and drive some freight from the waterways to the railroads. But that is fair enough. The federal subsidy down through the years has allowed the barge operators to skim off traffic that would otherwise have gone to the railroads, and this, in turn, has helped produce the present situation in which many railroads need federal help to survive. That arrangement must change if there is to be a rational federal transportation policy. Sen. Domenici's approach provides a change, instead of a gesture.

[From the New York Times, Feb. 2, 1978]

TIME TO STOP TOWING THE BARGES

The Federal Government spends about $400 million each year to maintain 15,000 miles of inland waterways and to build more of them. Yet barge operators who use the waterways ride for free. Now, barges may at last begin to pull their own weight. The Senate is about to vote on a bill, supported by the White House, that would levy charges on waterway users.

Such charges make sense. Free access to water routes gives an unfair advantage to the barge industry over competing rail lines: Washington pays about 29 percent of the cost of operating barges, but only 6 percent of railroad costs. As a result, much heavy freight travels by water even where railroads could do the same job for less. Righting the balance would lower the total cost of hauling freight around the country—and give a boost to financially distressed railroads in the Mississippi River Valley.

Equally important, requiring barges to pay their own way would dampen the operators' enthusiasm for costly new waterway improvements. Economically unjustifiable projects, like the $1.6-billion Tenn-Tom waterway linking the Tennessee River to Mobile, Ala., would probably never again be approved by Congress.

The President hopes to exact a user charge from the barge industry by withholding White House approval from new waterway construction until the system is reformed. Barge operators want a $432 million reconstruction of the locks and dams on the Mississippi River near Alton, Ill. The current facility is in fact so inadequate that grain traffic sometimes waits three or four days to use the locks. But the President has warned Congressional leaders that he will veto the Alton project unless the legislation also contains a new system for paying the waterways bill.

The barge operators have responded to the President's threat by supporting passage of a token six-cent-per-gallon tax on fuel sold on the waterways. This tax would offset only 10 to 15 percent of the annual cost of construction and operations. The Senate must now decide between the six-cent token and Senator Pete Domenici's proposal, backed by the White House to require fees along individual segments of the system equal to 50 percent of construction costs and 100 percent of operations costs. The Domenici plan would go a long way toward denying unjustifiable public subsidies to a very profitable private industry. It would also give the railroads a fair shot at the hundreds of millions of tons of coal, grain and chemicals that currently move by water. We hope the Senate votes for substance instead of tokens.

[From the Chicago Sun-Times, Feb. 1, 1978]

SUPPORT WATERWAY FEE PLAN

The controversy over Alton Lock and Dam 26 is expected to wash onto the Senate floor again this week. Solid arguments about how to finance waterway shipping shouldn't get lost in the flood of lobbying.

The fracas started when the Army Corps of Engineers proposed revamping the Alton locks despite several studies showing that major construction isn't warranted.

Foes of costly pork-barrel projects battled the plan—and lost. Then Sen. Pete V. Domenici (R-N.M.) proposed an amendment that would make funding of the project fairer, imposing user fees on commercial waterway traffic for the first time ever.

The idea caught on: President Carter said he wouldn't sign the bill unless an amendment like Domenici's is included. Even opponents of user fees began to turn around, though they proposed token fees that would not cover construction or maintenance costs.

Sen. Adlai E. Stevenson III (D-Ill.), Sen. Russell B. Long (D-La.) and barge-industry lobbyists have pushed for the token fees.

Sen. Charles H. Percy (R-Ill.) should be wiser, supporting meaningful user fees so barge lines—owned principally by large corporations—can pay a fair share of public projects that result in private gain. Imposition of meaningful fees could, indirectly, help Chicago rail workers save their jobs.

Domenici's amendment deserves support.

[From the Miami (Fla.) Herald, Jan. 26, 1978]

TIME TO UNPLUG WATERWAY REFORM

Despite objections from conservationists and some taxpayers, the Federal Government

continues to dig canals that are of questionable value and to straighten rivers that should be left crooked.

It does so at the urging of barge companies and other commercial marine interests that do not have to be concerned over the financial feasibility of the projects, because they will not have to pay for them. The cost is borne not by the waterway users but by all the taxpayers.

This makes waterway financing unique in transportation. All other modes are financed at least in part by user charges, through rates or special taxes. The free ride on the waterway explains why proposals to complete the Cross Florida Barge Canal and to deepen and channelize the Apalachicola River have managed to survive despite uncertain feasibility and projected high cost.

The urge to dig at somebody else's expense is a national affliction that reformers in Congress hope to cure. Encouraging progress was made last year. The Senate passed a bill that would require commercial waterway users to pay fees sufficient to cover operation and maintenance costs and one-half the construction costs of new facilities. But the movement ran aground in the House, where waterway interests were able to exert their considerable influence. The House substituted a weak bill providing only 10 percent cost recovery through a tax on barge fuel.

When the Senate takes up the House bill, it will have an opportunity to change it to conform to its original version. Sen. Pete V. Domenici says he will offer such an amendment. It has a chance because supporters of waterway user fees also have some power. They include the League of Women Voters, most conservation organizations, the railroad industry (for obvious reasons), taxpayer groups, and the Chamber of Commerce.

For some puzzling reason, however, the supporters do not include Florida's Sen. Richard Stone. He voted against the Senate bill even though it would have been a handy weapon for killing the Barge Canal. That the canal is not popular in Florida was further demonstrated last week when Gov. Askew replaced all members of the Canal Authority with members less sympathetic to the project.

User-fee proponents are waiting to see what the Senate leadership will do to bring the Domenici amendment to a vote. In our opinion, the proposed reform has been too long delayed. The free ride of the waterway users leads to unfair competition and unfair distribution of the Federal tax load.

[From the Gainesville (Fla.) Sun, Jan. 20, 1978]

FLOATING FREELOADERS

The nearest thing to immortality on this earth is the government freebie.

Witness the barge industry. Ever since George Washington left home for good, government has been digging ditches for the benefit of something called "inland navigation." The billions thus spent are so huge, so rooted in the crannies of history, that nobody can figure a total.

U.S. subsidies to transport industries are rather common. But the contrasts are startling. Computing 1976 subsidies as a percentage of revenues, the Congressional Budget Office figured air carriers and highway transport get 1 percent each, railway freight gets 3 percent, and the barge industry gets a whopping 41 percent. The barge industry does not even pay for operation and maintenance of its watery track.

It's as if Uncle Sam laid and maintained every railway roadbed since James Watts got steam out of a teapot.

Offer an industrial freebie like that, and eyes light up like King Kong's on his first glimpse of Fay Wray. The barge industry is eager. The U.S. Corps of Engineers has the shovels and appreciates the work. And virtually every congressman likes to cut a ribbon over a ditch.

So the digging goes on and on.

There is not one iota of evidence that the American consumer benefits from this freebie. Eighty percent of the barge traffic is unregulated and has not bothered to prove the freebie has lowered costs. But it is known that outfits like Exxon and U.S. Steel do a lot of barging. Although the barge industry claims annual profits of "only" $80 million a year, it is tossing cow chips. The Inland Waterway Services Division of a single outfit, the Texas Gas Transmission Co., claims an aftertax profit of $35 million. And it handles only 10 percent of the nation's barge business.

The barge freebie has a spinoff which further erodes the taxpayer dollar. Barges drove the nails into the coffins of the railroads—and now the rails must be propped up with federal money. Railroads get something like $2 billion a year from the U.S. treasury.

But it is the ditching of America which upsets the likes of Marjorie Carr, spokeswoman for the Gainesville-based Florida Defenders of the Environment. On her side are the Sierra Club, the Izaak Walton League and other environmental groups. They are upset as the clamshells inch their way across the continent, destroying natural waterways and otherwise upsetting the balance of nature.

Mrs. Carr makes the point that if the barge industry were made to pay its way, then a waterway would be viewed as any other business proposition. If it wouldn't pay off in profits, the industry would not want it. But since all waterways today are freebies, the industry wants it all. That's why it took so much sweat to fend off the diggers of the Cross Florida Barge Canal, a bankrupt deal from the first shovel load.

The U.S. Congress is critically close to doing something about the barge freebie. The Senate in June passed a bill which phased in users' fees. By 1990, the barge industry would be paying enough fees to cover 50 percent of construction costs and 100 percent of operation and maintenance costs.

Sen. Lawton Chiles of Florida, to his credit, voted for users' fees down the line. But Sen. Dick Stone of Florida treated the barge industry like a welfare mother. He voted against users' fees on two critical occasions.

Then in October, the barge freebie issue reached the U.S. House and a horrible thing happened. The House shivered and threw in a sop by enacting a petty phased-in fuel tax designed to cover 10 percent of the costs. Rep. Don Fuqua of the Second District supported this feeble effort—but it was the only thing before him and he may be willing to go the whole route if given the chance.

He should get that chance. You have to understand that every president starting with Franklin D. Roosevelt has sought to separate the barge industry from the public teat. President Jimmy Carter supports the Senate's user fee. So does the U.S. Chamber of Commerce, the League of Women Voters, multitudinous taxpayer groups and, of course, the barge-bitten railroads.

The U.S. Senate will be reconsidering this issue later this month, maybe as early as next Tuesday. U.S. Sen. Pete V. Domenici, an ultra-conservative from New Mexico, has been fighting the pork-laden barge industry for two years. And he will endeavor to reinstate the user fee—enough to finance 50 percent of construction, 100 percent of operation and maintenance.

In preparation for this endeavor, Sen. Chiles needs an encouraging pat on the back and Sen. Stone needs a wrist-slapping. Stone is a millionaire. How come he needs a lesson in capitalism?

SENATOR BENTSEN THE NEW VICE CHAIRMAN OF THE JOINT ECONOMIC COMMITTEE

Mr. PROXMIRE. Mr. President, it is my privilege to inform the Senate that our colleague, Senator LLOYD BENTSEN of Texas, has just been designated as the vice chairman of the Joint Economic Committee. Senator BENTSEN has been a member of the committee for a number of years, has chaired its subcommittees and has brought a great wealth of experience to the committee both because of his amazing achievements in private business and his service in the Congress.

In the regular course of events Senator BENSTEN will no doubt succeed to the chairmanship of the committee in the 96th Congress when the chairmanship once again reverts to the Senate.

The present chairman of the committee, Congressman RICHARD BOLLING has issued a statement about Senator BENTSEN and will no doubt make the announcement in the other body. However, it is my privilege to do so here and I ask unanimous consent that Chairman BOLLING's statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

BENTSEN NAMED VICE-CHAIRMAN OF THE JEC

Representative Richard Bolling (D-Mo.), Chairman of the Joint Economic Committee, announced today that Senator Lloyd Bentsen (D-Texas) has been designated Vice Chairman of the JEC.

"Senator Bentsen brings to the Vice-Chairmanship a wealth of experience in the public and private sector," said Bolling. "In addition to serving on two of the Senate's major standing Committees—The Finance Committee and The Environment and Public Works Committee—Senator Bentsen is particularly knowledgeable about the complex economic issues facing the private sector. The new Vice Chairman has had 16 years of experience as a very successful businessman in Houston, Texas."

Chairman Bolling complimented Senator Bentsen on his outstanding contribution to the Joint Economic Committee as Chairman of the Subcommittee on Economic Growth and Stabilization. He also noted Senator Bentsen's knowledge and concern about the economic problems facing rural America as well as those of small business.

One of the youngest men ever elected to the House of Representatives, at age 27 in 1948, Senator Bentsen was elected to the Senate in 1970. He became a Member of the Joint Economic Committee in 1971. He succeeds the late Senator Hubert H. Humphrey of Minnesota as Vice Chairman of the Committee.

TRIBUTE TO SENATOR HUBERT HUMPHREY

Mr. PACKWOOD. Mr. President, Will Rogers was fond of saying he never met a man he did not like. I have got a saying, too. I never met a man who did not like Hubert Humphrey. As we all quickly found out, you just could not help it. His death marks the passing of a true American success story. For each one of us, he was our close and dearly loved friend.

I was sworn into the Senate on January 3, 1969. The date is not hard to re-

member, because it was probably the most important day of my life thus far. But I remember that time for a very different reason, too. It marked the first administration or Congress in two decades without Hubert Humphrey. For 20 years, Hubert Humphrey had either served in the Senate or presided over this House as Vice President. In one of history's peculiar twists, the Presidential election in 1968 cost Hubert the place he fought for in national office and caused his brief exit from the Congress.

It is not easy to recall how we spent the next 2 years while Hubert Humphrey taught college students in Minnesota. Things somehow came to right themselves again in 1971 when Senator Humphrey was returned to his long-time seat by the people of Minnesota.

It would be pointless to talk here about the public Hubert Humphrey. That would obviously take volumes. The main thing is in knowing that he was the same man, whether in public or private. It would be impossible to overlook his zeal for living, his compassion, his belief in the human potential or the vast reservoirs of energy he possessed. At the age of 66, Hubert Humphrey had the knack of making the rest of us feel like genuine slowpokes.

We all know that Hubert loved to talk. He was not in love with the sound of his own voice by any means. Most of the answer is contained in the sheer enthusiasm with which he lived his life and enjoyed his work. He had too much of it to let matters rest. When the boat needed rocking, Hubert stood proudly abeam and hammered his message home. Whether it was civil rights, better housing, a decent wage, improved health care for the poor and the elderly, or a host of other issues, it made no difference. We could count on the fact that Hubert Humphrey stood for a fair shake for every man, woman, and child. If it took a hundred words to make a point that could be expressed in 10, Hubert took the hundred. It gave him more time to spend with his audience. They knew that and loved him for it.

The world does not need to have another essay on Hubert Humphrey to remind us of his goodness and decency. The facts are written in the law of the land and in the lasting memory we will keep of this man. My life is enriched by having known him, it is strengthened by his courage and nurtured by his optimism. He faced his death as he always lived, with the unrelenting belief that we are in control of our own destinies.

Among the proudest statements I can make is that I served in the U.S. Senate with Hubert Horatio Humphrey. I share with MURIEL and our Nation the deep sense of loss at his death.

TRIBUTE TO SENATOR LEE METCALF

Mr. MAGNUSON. Mr. President, over the short space of the last several months, the Senate has lost three very valuable members. Each has left their distinctive mark, yet all were not equally known to the public.

Senator Metcalf distinguished himself in the Senate, although he was seldom in the limelight. He worked quietly and diligently for the advancement of legislation to protect the consumer and the environment. A true Western Senator, he was keenly sensitive to the needs of that area of the country and became an outspoken and effective conservationist. He was the author of the first wilderness bill and a major force in the enactment of strip mining legislation. His interests and efforts were, nevertheless, very broad. Whether public interest conflicted with private interest, his influence was felt.

In the 17 years he served in the Senate, Lee Metcalf was known as a dedicated public servant and a man of utmost integrity. His smiling face revealed a warmth that endeared him to all his colleagues. He was most simply and, yet so accurately, described by President Carter in the state of the Union Address as a "good and honest" man. The Senate has been honored by his presence. I believe we would all be honored to be remembered for the same qualities of character he exhibited throughout his long career in public life.

AGRICULTURE AND BALANCED GROWTH

Mr. HANSEN. Mr. President, one of the participants at the recent White House Conference on Balanced National Growth and Economic Development was Mr. Herbert F. Manig, executive vice president of the Wyoming Farm Bureau Federation and chairman of the Old West Regional Commission's Natural Resources Advisory Committee.

The message Mr. Manig delivered to the conference was this:

There can be no balanced growth or economic development in the West until steps are taken to help the agricultural industry, which is an integral part of the Western economy. Farmers and ranchers in the West, and throughout our country, are experiencing the worst economic conditions since the depression of the 30's.

In his presentation to the White House conference, Mr. Manig outlined a series of steps that could be taken by the Federal Government to strengthen the agricultural industry. His recommendations make a great deal of sense and represent the kind of actions that would be beneficial without increasing Federal control over and involvement in the private sector. In fact, Mr. Manig suggests that in several instances, the most helpful thing Government could do would be to back off and refrain from meddling in the affairs of agriculture. A prominent example of the latter is the administration's proposed new water policy, which would intrude in areas of State authority.

Mr. President, I hope other Senators might find the time to read Mr. Manig's statement to the White House conference. Accordingly I ask unanimous consent that his testimony be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF HERBERT F. MANIG

My name is Herbert F. Manig. I am the Executive Vice President of the Wyoming Farm Bureau Federation, a general agricultural organization. I also serve as Chairman of the 15-member Agriculture and Natural Resources Advisory Committee of the Old West Regional Commission. The Old West Regional Commission, authorized by the Public Works and Economic Development Act of 1965 as amended, is a partnership between the Federal Government and the States of Montana, North Dakota, South Dakota, Nebraska and Wyoming. It is designed to solve regional economic problems and stimulate orderly economic growth.

Major private sector economic activities in this five-state area are mining, agriculture and tourism. The comparative health of these three industries is in direct contradiction to the theme of this White House Conference, i.e., it is in a state of imbalance.

The Federal Government might assist in strengthening local economies by helping to strengthen the weakest of these—agriculture—which is a renewable resource industry having a multiplier effect of probably 2.0 to 2.5 in the Old West Region. Here are some suggestions:

1. The Federal Government should recognize state water rights as inviolate. We felt threatened when the Interior Department's Water Resources Council published some comments in the July 15, 1977, Federal Register stating in part, "The Government could purchase rights to water and re-allocate them to the most socially desirable or economically productive use. Purchases could be through voluntary sales or through eminent domain procedures." I believe that control of water is equated to the control of economic growth in our region. The Federal Government should not have this control.

2. The Federal Government should encourage and assist development of water storage and distribution projects in the arid states, especially any which may already be under construction, or any which have already been planned and authorized.

3. The Federal Government should refrain from actions which accelerate the rate of inflation, a major factor in the agricultural cost-price squeeze.

4. The Federal Government should vigorously attempt to expand foreign markets for U.S. products and reverse recent decreases in foreign sales. This would not only strengthen commodity prices, it would assist in rectifying a negative U.S. balance of payments. Only in the case of a true emergency should our government block access to foreign markets.

5. The Congress should be urged to pass legislation which would require food processors and any other large purchasers or agricultural commodities to bargain in good faith with producer groups for price. The Federal Government should encourage formation and effective use of marketing and bargaining cooperatives so that higher prices to producers can be negotiated.

6. The Federal Government should support an increased level of both research and the utilization of resultant technology—including proper use of fertilizers, herbicides and pesticides—so that maximum agricultural yields may be obtained. With maximum yields, a minimum of land would be required for agricultural production allowing the remainder to be used for other purposes.

7. Much of the land in the Old West Region is ill-adapted for crop production. The grasses produced by these lands, however, are converted by grazing animals into a highly desirable form of animal protein. The Federal Government might continue to encourage intensive rangeland management, and make the consumer aware of the fact that grazing animals do not live their life consuming grain only.

8. The Federal Government should encourage, not discourage, intensive management of the lands it owns in the Old West Region. There is considerable indication that forage production of benefit to domestic animals and big game could be significantly increased on the Federal lands if proper management was undertaken. Pressure to remove livestock grazing from these lands, if successful, would cause many ranch operators to go out of business, lower the value of their deeded land, and subsequently depress the local economy.

9. Grazing fees on Federal lands should reflect the cost of production and the market value of livestock.

10. The Federal Government might reduce the importation of meat when domestic supplies are high. Contrary to its present position, the Federal Government should ensure that imported meat is of the same quality as domestic meat, and it should inform the consumer as to the country of origin.

11. Federal policies should recognize the economy of scale in agricultural operations. Tendencies to contain the size of these operations should be discouraged.

12. The Federal Government should develop additional emergency agricultural credit programs which will assist deserving farmers in meeting their current financial crisis.

With respect to the implementation of Federal assistance programs, there is increasing interest in the balance being achieved in the distribution of these funds. There are those who claim there is an imbalance, and that multi-state organizations should be created to aggressively seek additional Federal funding at the expense of other areas.

In reflecting this approach, I would recommend emphasis on multi-state organizations established for the purpose of assessing common need, establishing common objectives, and cooperating with the member states, other regional organizations and the Federal Government in attaining these objectives.

These organizations should be cast in the mold of the Regional Commissions which have been operational for over a decade. Rather than recite the personal experiences that lead me to say this, allow me to conclude with the findings of the National Governor's Association Task Force on National and Regional Development Policy in 1973. In his report, the Chairman, Georgia Governor Jimmy Carter, stated:

"The Title V Commissions provide a structure by which the democratic process ensures immediate and often innovative action on the problems facing our people, i.e., the system of Title V Commissions:

(a) Provides a unique Federal/state/local partnership that complements the traditional Federal/state/local methods of operation;

(b) provides a formal structure for the three levels of government to explore innovative approaches to problem solving;

(c) insures an upward flow of ideas (local to state to regional to nation) in the ultimate establishment of regional and national priorities;

(d) insures decision-sharing partnerships between state, local and Federal governments so that public resources are better matched to the needs of our people;

(e) encourages interstate planning, cooperation and information sharing on common problems;

(f) consolidates a myriad of disparate local problems, first at the state level and ultimately regionally, into clearly understood and recognizable priorities of need, thus serving as a barometer for channeling national priorities;

(g) is a proven workable management mechanism for returning power to the state and local governments;

(h) guarantees, through regional strength, that rural and urban problems are treated equitably; and

(i) allows the targeting of resources to specific regional needs which stimulate the economic development of that region.

Thank you for the opportunity to express my views.

PREVENTION OF SIGNIFICANT DETERIORATION

Mr. GRAVEL. Mr. President, last year this body approved comprehensive amendments to the Clean Air Act. One of the most difficult issues addressed in the amendments was prevention of significant deterioration (PSD) of pristine air. PSD has an interesting history. A recent case study of this issue has been written and I believe it is an important contribution to the literature in the air pollution control field. The study was conducted by Jerry Reinwand, Deputy Commissioner of the Alaska Department of Environmental Conservation. Mr. Reinwand has a long-standing interest in air pollution control matters and years of experience in implementing pollution control programs. He served as a policy advisor to me during Clean Air Act mark-ups which were conducted by the Committee on Environment and Public Works in 1976 and 1977. In addition, he served as the chief policy advisor to Alaska Gov. Jay S. Hammond on Clean Air Act matters. Mr. Reinwand also served as chairman of the staff advisory task force of the National Governors' Association, which provided policy analyses and recommendations to 15 Governors who served on NGA's Subcommittee on Clean Air Management.

I ask unanimous consent that this important case study be printed in the RECORD so that my colleagues—and other interested parties—may review it. I think the conclusions of the study are particularly significant and I direct your attention to them.

There being no objection, the case study was ordered to be printed in the RECORD, as follows:

THE SHAPING OF NATIONAL POLICY ON PREVENTION OF SIGNIFICANT DETERIORATION

(By Jerry Reinwand)

INTRODUCTION

The Clean Air Act Amendments of 1970 [1] (CAA) were passed when the environmental movement was at its crest. Environmental protection was at the forefront of the Congressional legislative agenda and on center stage in the public limelight. A relatively strong economy, the looming "wind-down" of the Vietnam war and deep public concern with environmental problems created a favorable legislative climate for the passage of tough environment-related legislation.[2] The CAA was undoubtedly one of the strongest environmental laws ever passed by Congress. At the time of its passage, Senator John Sherman Cooper, a ranking member of the Committee which had written the bill, stated that the legislation "may have a larger impact upon the social and economic life and health of this nation than any bill I have observed during my service in the Senate." [3]

In the CAA, Congress dramatically changed its past policy stance in regard to Federal-State relations. Senator Edmund S. Muskie, a driving force behind this nation's air quality laws, noted that previously-passed air pollution control legislation established a State-Federal partnership in which "protection of the public health and welfare" was the responsibility of state and local government, "with the Federal responsibility being exercised where there is transportation in interstate commerce." [4]

The CAA changed that long-standing concept by vesting far-reaching power with the U.S. Environmental Protection Agency (EPA), which was responsible for administering the law.[5] In fact, the State-Federal relationship was so substantially altered by the CAA, that one commentator noted the carry-over language from previous clean air laws, which stated that air pollution control "is the primary responsibility of state and local governments" had been rendered obsolete, making it simply a "vestigial remainder . . . and is now an anomaly vis-a-vis the nearly total Federal supervisory and approval authority contained in the Act as amended through 1970." [6]

However, this dramatic policy shift by Congress did not alleviate programmatic and policy problems. Bitter and lengthy disputes erupted between the states and EPA as implementation of the new law moved forward.

One of the most important and protracted policy battles arose over the issue of molding programs to protect the nation's pristine air. The focal point of the controversy was whether EPA had the authority under the CAA to require states to implement a program which had as its goal "prevention of significant deterioration" (PSD) of unpolluted air. The controversy was marked by years of administrative and legal struggles. The battle began with EPA's sudden abandonment of previously held administration policy on PSD. This policy shift triggered a round of successful lawsuits by the Sierra Club. Even after the Supreme Court had decided that the CAA mandated a national PSD policy, litigation continued over the substantive requirements of the regulations which EPA promulgated to carry out the courts' mandate. Eventually 23 states [7] joined in the litigation, as well as industry, which had at the forefront of its legal efforts petroleum and electric utility interests.[8] The continuing litigation turned EPA's prevention of significant deterioration regulations into a legal minefield, and caused most states to shun administration of the program.[9] The reluctance of the states to assume administration of the PSD program, and the uncertainty that accompanied the perpetual Sierra Club-EPA litigation, ultimately led to a rising clamor for Congress to be the final forum for establishing national plicy on the issue. After several years of study, debate and intense lobbying by industry groups and environmentalists alike, Congress—with the passage of the Clean Air Act Amendments of 1977 [10]—established national policy on PSD.

This note traces the origins of the concept of prevention of significant deterioration and the divergent policy decisions which were made by two executive branch agencies which ultimately led to the lengthy court battle. It also discusses the role the courts played in shaping PSD policy. Finally, this note discusses how the protracted litigation, and the virtual standstill in program implementation that accompanied the lawsuits, caused pressure to be placed on Congress to be the final policy arbiter of this important issue.

HISTORY OF THE CLEAN AIR ACTS

The nation's first national air polution control legislation was passed in 1955.[11] The prime thrust of the law was authorization of Federal research and technical assistance to

Footnotes at end of article.

the cities and states. Federal authority was broadened under the 1963 Clean Air Act [12] by a provision which created a Federal enforcement program for abatement of air pollution. In addition, funding was provided for additional research and technical assistance to state and municipal governments. In the 1955 Clean Air Act,[13] controls on vehicle-related pollutants were enacted. The Air quality Act of 1967 [14] consolidated existing air pollution control legislation and "provided a system for the establishment of air quality standards within air quality regions.[15] Although some progress in combating air pollution was made, most commentators agree that the 1955, 1963, 1965 and 1967 statutes were largely ineffective in solving the nation's growing air quality problems.[16] As a result of the shortcoming of the laws, and increasing Congressional frustration with the lack of progress by the states in controlling air pollution, the nation's lawmakers passed the Clean Air Act Amendments of 1970.

THE 1970 CLEAN AIR ACT: CONGRESS GETS TOUGH

In the CAA, Congress kept intact the basic purposes provision [17] which was contained in preceding legislation. This decision would play a key role in the PSD litigation. However, the remainder of the new law differed markedly from prior air pollution control laws. The CAA required EPA to establish national primary and secondary standards for the pollutants sulfur dioxide, total suspended particulate matter, carbon monoxide, photochemical oxidants, nitrogen dioxide and hydrocarbons. This requirement has been hailed as one of the key policy innovations of the CAA,[18] but this view is not universally held.[19]

The primary ambient standards establish a nationwide ceiling for pollutants and are health-related standards, designed to provide "an adequate margin of safety" [20] to protect the most susceptible groups in the nation's population—those suffering from respiratory ailments, those with cardio-vascular disease, as well as the very old and the very young. These groups total one-fifth of the nation's population.[21] Secondary standards are designed to protect the "public welfare," [22] and are generally more stringent than the primary standards. Secondary standards protect against adverse effects "on soils, water, vegetation, man-made materials, animals, wildlife, visibility, climate, and economic values." [23] The CAA mandated each state to submit an implementation plan which to submit an implementation plan primary and secondary standards would be attained and maintained.[24] Generally, the states which had areas with polluted air had until mid-1975 to attain the primary standard. The implementation plan also had to demonstrate how the state planned to attain the secondary standards, although the states were given a "reasonable time" to meet the the attainment date.[25] The implementation plan is the driving force behind the states' pollution control efforts, and it was recognized by Congress as perhaps the most important factor in meeting the goals of the CAA. In its report, the Senate Public Works Committee stated that it:

". . . recognizes that the implementation plan is the principal component of control efforts for pollution agents for which the national standards are established. It is this program which must be effective if the nation is to achieve the quality of air which the bill mandates in a relatively short period of time." [26]

To obtain the administrator's approval of the plan, states had to meet eight requirements.[27] Specifically, an approvable plan must:

1. provide for a deadline of not more than three years if meeting a national primary ambient air quality standard; specify a "reasonable" time if complying with a secondary standard;

2. include emission limitations, schedules, and time tables for compliance;

3. include provisions for the monitoring, compilation, and analysis of ambient air quality data and for dissemination of such data;

4. include a procedure for review of new sources;

5. contain adequate provision for intergovernmental cooperation;

6. provide adequately for personnel, funding, installation of monitoring equipment and periodic reports;

7. provide for periodic inspection and testing of motor vehicles to enforce emission standards;

8. provide procedures for review of the plan itself.[28]

There was no requirement for inclusion of a prevention of signficant deterioration provision. This legislative vacuum in the law would figure prominently in the argument of the anti-PSD forces that Congress had not mandated such a policy.

There were other key provisions in the law, but for purposes of this note the most important provisions center on ambient standards and the states' implementation plans. It is clear that the CAA required the states to substantially "upgrade" polluted air by mid-1975, or at the latest, by mid-1977. However, it soon became evident that a public policy no-man's-land existed in regard to so-called "clean air areas." The unanswered question was: does EPA have the authority to prevent a state which has air cleaner than secondary standards from polluting that pristine air "downward" to the level of the standards? Since "the majority of the land mass of the United States has air quality cleaner than these ambient standards," [29] and since "a large portion, if not the majority, of new development is occurring in such areas." [30] PSD quickly became one of the most controversial aspects of the law.

THE HEW-EPA-OMB POLICY SHUFFLE

The PSD controversy began with EPA's publication of proposed implementation plan guidelines [31] on April 7, 1971. The purpose of the guidelines was to provide a blueprint for the states to follow in preparing their implementation plans. After reviewing the more than 400 written comments received during the five-week comment period, Dr. John T. Middleton, Deputy Assistant Administrator for air programs, forwarded revised guidelines to Administrator William D. Ruckelshaus on June 28, 1971, for his review.[32] Comments received from environmental groups strongly urged EPA to include a PSD provision in the guidelines which would require states to address this issue in their implementation plans. Responding to the environmentalists' suggestions, the revised guidelines contained the following provision:

"Approval of a plan shall not be considered in any manner to allow significant deterioration of existing air quality in any portion of any state." [33]

At this juncture, the Executive Office of Management and Budget (OMB) entered the picture, causing EPA to delay final publication of the guidelines until other Federal agencies had an opportunity to review them.[34] OMB intrusion into the rulemaking process,[35] and its apparent impact on the final form of the guidelines, resulted in allegations that OMB had forced EPA to significantly weaken the final guidelines, which were published on August 14, 1971.[36] EPA's top officials strongly denied these changes. Administrator Ruckelhaus, testifying before the Senate Subcommittee on Air and Water Pollution, stated:

"OMB did not get an final crack at the regulations. OMB is nothing more than a conduit to insure that other Federal agencies who want to comment on any regulation that we might issue are given that right to comment. The final determination as to what ought to be in the guidelines is mine." [37]

For whatever reason, the final EPA guidelines dropped the requirement that states must include a PSD provision in their implementation plans. This decision would prove to be of crucial importance as it constituted a total retreat by EPA from prior policy stances taken by the U.S. Department of Health, Education and Welfare (HEW). HEW was originally given the authority by Congress to implement the CAA; but under President Nixon's 1970 reorganization plan [38] this authority was transferred to EPA. Statements by top-ranking HEW officials before Congressional committees committed the agency to a strong PSD policy. One of the strongest statements was made by Secretary Robert Finch, testifying before the Senate Subcommittee on Air and Water Pollution on pending clean air legislation, when he stated that:

"One of the express purposes of the Clean Air Act is 'to protect and enhance the quality of the Nation's air resources.' It will continue to be our view that implementation plans that would permit significant deterioration of air quality in any area would be in conflict with provisions of the act. We do not intend to condone 'backsliding.' If an area has air quality which is better than the national standard, they would be required to stay there and not pollute the air even further, even though they may be below national standards." [39]

This statement, and others by top HEW officials, would play a key role during the ensuing litigation in assisting the courts to decide that prevention of significant deterioration was mandated by the CAA.

PSD—CONGRESSIONAL MANDATE OR MIRAGE: THE COURTS SPEAK

EPA's decision to jettison the PSD requirement in state implementation plans, in effect, shifted the locus of the policy debate from the executive to the judicial branch of government. The Sierra Club and three other environmental groups, after determining that EPA's August, 1977, guidelines would allow states to deteriorate air quality to secondary standards, moved to block the agency's approval of any portion of a state's implementation plan which would allow such deterioration to occur. The lawsuit was filed on May 24, 1972—six days before EPA was required to approve or disapprove the states' implementation plans—against Administrator Ruckelhaus in the United States District Court for the District of Columbia.[40]

Administrator Ruckelshaus and EPA argued that the agency's hands were tied by Section 110 of the CAA: if the state submitted a plan which provided for "implementation, maintenance, and enforcement" of the primary and secondary standards and if the plan provided for attainment of the standards, EPA simply had no choice—it must approve the plan, even if it meant that significant deterioration of air quality could occur.

The Sierra Club, however, argued that EPA had the authority—indeed the duty—to prevent significant deterioration of air quality.[41] The Sierra Club claimed that the provision of EPA's guidelines which allowed deterioration of air quality to the level of the ambient standards violated the purposes provision of the CAA, making them invalid.[42] The Sierra Club vested its prime legal challenge on Section 101(b) of the law which stated that one of its purposes was to "protect and enhance the quality of the nation's air resources." The basis of the Sierra Club's argument was simple and straightforward:

Footnotes at end of article.

regardless of any other provision in the law, Section 101(b) prevented the administrator from approving any plan which would permit significant deterioration of air quality.

On May 30, the District Court ruled in favor of the Sierra Club, stating:

"Having considered the stated purpose of the Clean Air Act of 1970, the legislative history of the Act and its predecessors—it is our judgment that the Clean Air Act is based in important part on a policy of non-degradation of existing clean air and that . . . permitting the states to submit plans which allow pollution levels of clean air to rise to the secondary standard level of pollution, is contrary to the legislative policy of the Act and is, therefore, invalid." [43]

The court also granted the Sierra Club's request for a preliminary injunction. In addition, the court ordered the administrator to review all state implementation plans within four months, and to "approve any portion of a state plan which effectively prevents the significant deterioration of air quality in any portion of any state, and disapprove any portion of a state plan which fails to effectively prevent the significant deterioration of existing air quality in any portion of any state." [44] The court did not define what constituted "significant deterioration," thus setting EPA adrift on choppy policy seas without any direction regarding what amount of pollution might be considered "significant" in clean air regions.

EPA appealed to the Court of Appeals for the District of Columbia, but that court declined to reverse the lower court's decision.[45] EPA then appealed to the Supreme Court. In a nine word statement released on June 11, 1973, the Supreme Court affirmed the judgment of the Court of Appeals by tersely stating that: "The judgment is affirmed by an equally divided court." [46]

Although the courts had decided the CAA mandated EPA to define by regulation a national PSD policy, the agency faced substantial problems in sketching that policy. On one hand, the environmentalists—buoyed by the court's decisions—wanted a tough PSD program, while development interests did not. Nowhere is that fact better illustrated than in testimony of the opposing parties on this issue, which was presented to Senate Subcommittee on Air and Water Pollution on July 24, 1973. Stating the environmentalists' case was Laurence I. Moss, President of the Sierra Club:

"The large majority of the country—virtually all of the areas outside large cities and inner suburbs—has air quality which is better than the national secondary standards for one or more of the six pollutants. If EPA's policy of allowing and indeed encouraging significant deterioration had been permitted to stand, the air quality of this entire area could have deteriorated to secondary standards. This would mean, for example, that the level of sulfur oxides and particulates in the Rocky Mountains and the Blue Ridge could be allowed to increase to the level of Boston, Akron, Detroit and Pittsburgh. What we are discussing and what is at stake here is the 'graying' of America." [47]

The concerns of industry were presented by Carl E. Bagge, President of the National Coal Association, when he stated:

"The nondegradation decision has thrown the nation into an unforeseen, and we believe untended, Instant no-growth policy. The lack of a legal definition of what constitutes significant deterioration of air quality means that no industry can build any plant which emits any air pollutants whatever unless it is willing to gamble on the ultimate definition of significant—and there are no facts upon which to calculate the odds." [48]

EPA was caught in the middle of this philosophic crossfire. Following the Supreme Court's decision, EPA began drafting regulations to comply with the District Court's order. On July 16, 1973, the agency proposed four basic plans to implement a national PSD program and asked for public comments on them.[49] After receiving more than 300 written comments on the initial proposals, EPA issued revised regulations on August 24, 1974, in order to "properly explore all aspects of this issue and to focus more clearly on procedural and technical issues." [50] On December 5, 1974, after several months of legal badgering by the Sierra Club, EPA promulgated final PSD regulations.[51]

A new round of litigation followed promulgation of the final regulations; environmentalists and industry filed fifteen separate petitions for review in six Circuit Courts of Appeal.[52] The challenges were eventually consolidated before the District of Columbia Circuit Court. If EPA held hopes that the final PSD regulations would remove the legal cloud which had hovered over the agency for four years, they were dashed by the renewed legal challenges.

EPA'S REGULATIONS: FIRST CUT AT A NATIONAL POLICY

After the initial court order, it took EPA nearly two and one-half years to promulgate its final PSD regulations. The most important aspect of the regulations focused on a classification scheme for air which was cleaner than secondary standards. Three classes were established: in Class I areas, virtually any pollution would be "significant" and therefore prohibited; in Class II areas "moderate well-controlled growth" could be accommodated without causing "significant deterioration"; in Class III areas, deterioration to the secondary standards would be allowed.[53]

Two pollutants—sulfur dioxide and total suspended particulate matter—were to be used in the classification scheme as yardsticks by which deterioration would be measured. In effect, EPA's Class I and Class II increments were nothing more than new tertiary and quaternary standards. The increments were not to be exceeded, but areas could be redesignated to a different classification to accommodate more pollution. All "clean air areas" were initially designated Class II.[54]

An important feature of the regulations was a new source review process for eighteen point source categories.[55] Two criteria had to be met before the administrator, or the state if it had been delegated new source performance standard review by EPA, could approve construction or modification of a new source covered by the regulations. First, the source had to limit sulfur dioxide and particulate matter emissions by applying pollution control equipment which was equivalent to "best available control technology." Second, emissions from the new source could not cause the increments to be exceeded.

The regulations were generally attacked by environmentalists as violating the court's order for the following reasons: no Class I areas were mandated, the four vehicle-related pollutants were excluded from PSD review, the Class III designation would in effect permit "significant deterioration" by allowing pollution levels to rise to secondary standards, hazardous air pollutants were excluded from PSD review, and point sources other than the eighteen source categories in the regulations were not subject to preconstruction review. Industry generally attacked the regulations as being too stringent, and the power utilities were concerned that the Class I and Class II increments would pose a substantial hurdle to construction of coal-fired powerplants in clean air areas.

The problem of "intrusion" or "buffer zones" also surfaced in the regulations. In the preamble to the final PSD regulations, EPA described this potential problem by stating:

"Calculations have shown that because of the small air quality increments specified for Class I areas, these levels can be violated by a source located many miles inside an adjacent Class II or III area. For example, a power plant which must meet the Class II increment for SO_2 would, under some conditions, violate the Class I increment for SO_2 60 or more miles away. Under the regulations promulgated below, a source could not be allowed to construct if it would violate an air quality increment either in the area where the source is to be located, or in any neighboring area in the State. Therefore, wherever a Class I area adjoins a Class II or III area, the potential growth restriction, especially for power plant development, extends well beyond the Class I boundaries into the adjacent areas."

Although later studies demonstrated that large sources could be located closer than 60 miles to a Class I area without violating the sulfur dioxide and particulate matter increments, industry seized upon this statement, claiming development would be restricted by buffer zones surrounding Class I areas. Put simply, the buffer zone controversy became the policy "tar baby" of the regulations, and EPA's statement would haunt it throughout the ensuing debate.

On August 2, 1976, more than a year and one-half after EPA had promulgated the PSD regulations, the District of Columbia Circuit Court of Appeals ruled in favor of the agency by concluding:

"We find no ground on which to disturb the regulations under review, and we therefore affirm the EPA 'Prevention of Significant Air Quality Deterioration' Regulations. Our review of *Sierra Club v. Ruckelshaus* and subsequent events revealed no substantial reason for rejection of that decision, and we hold that the non-deterioration regulations promulgated pursuant to that decision are both rational and in accordance with law." [56]

However, by the time the Court had reached its decision, pressure had been building on Congress for nearly three years to take legislative actions to resolve this policy issue. In fact the Court's decision came at a time when a bill containing comprehensive amendments to the Clean Air Act was being debated on the Senate floor. Congress had received the message: after five years of acrimonious debate and litigation, the time had come for the nation's lawmakers to establish national PSD policy through legislative action. Throughout 1975 and 1976 pressure mounted on Congress to amend the CAA and address the issue by passing legislation which would carefully delineate a national PSD policy. The reason for the pressure was clear: by 1975 PSD had become a stepchild of the courts. Due to the quagmire of litigation, most states had adopted a "wait and see" attitude, shunning the option of implementing a program under EPA's regulations, waiting instead for Congress to pass legislation which would establish PSD policy.[57] By January 1976, a year after EPA's prevention of significant deterioration regulations had been promulgated, only four states—Washington, Nebraska, New York and Virginia—had requested EPA to delegate them authority to conduct a PSD program. By July 1, 1976, neither EPA nor the states had taken action to reclassify any Class II areas, which led the agency to conclude that "most states are waiting for explicit Congressional direction before they expend resources to take action." [58]

Senator Howard Baker, ranking Republican member of the Senate Public Works Committee, perhaps best summarized the situation facing Congress when he said:

". . . the Supreme Court affirmed the Judicial interpretation of an ambiguous policy statement in the Clean Air Act and created

Footnotes at end of article

the concept of significant deterioration. The Court's decision set in motion regulatory machinery at EPA and the situation has been in litigation and confusion ever since. In frustration environmentalists, industry and public officials turned to Congress demanding clarification of the situation." [59]

Although there was general agreement among Senate and House members that action was needed, there was sharp disagreement as to what that action should be. In addition, there were differences of opinion over the need for a national PSD policy. Also, members of Congress continued to hold varying interpretations of what the lawmakers had indeed mandated in the CAA. To Senator Muskie, chief legislative architect of the nation's air pollution control legislation, there was no question of Congress's intent regarding PSD:

"This policy was first articulated in the Federal Water Pollution Law in 1965 and was incorporated into the 1967 Air Quality Act. It was not altered in the 1970 clean air act amendments . . . the courts have upheld the intent of the act. Non-degradation is national policy." [60]

In the 1976 Senate report on the Clean Air Act amendments, Senators James L. Buckley and Robert T. Stafford echoed this viewpoint by stating:

"When the Congress established national ambient air quality standards in 1970, the Congress imposed the need to determine the impact of a new plant on the air quality in the area of the plant. The prevention of significant deterioration (provision) in this bill defines that direction. Significant deterioration is a definition, stated in concentrations of ambient pollutants. It is not a new approach or a new philosophy." [61]

However, two other fellow Republicans on the Senate Public Works Committee did not fully share their views. Senator Pete V. Domenici questioned whether the "protect and enhance" language of the law clearly established a national PSD policy, calling the phrase a "slender statutory reed" [62] upon which to base such a far-reaching program. However, in subcommittee and committee deliberations, Senator Domenici played a key role in writing the Public Works Committee's strong PSD provisions in the 1976 and 1977 clean air legislation.

To Senator James A. McClure, those who subscribed to the interpretation that PSD was mandated by the CAA were mistaken:

"The concept of 'significant deterioration' is not contained in the present (1970) Clean Air Act." [63]

Members of the House who participated in drafting the 1976 and 1977 bills had equally divergent views of the origins of and necessity for a national PSD policy.[64] It was against this backdrop of controversy, litigation and frustration that Congress began to mold new legislation to address the issue.

Congressional action on amendments to the CAA began in earnest when President Ford submitted his omnibus energy bill—the Energy Independence Act of 1975— to Congress on January 30, 1975. As part of that comprehensive energy proposal, the President recommended changes in the CAA, including deletion of the concept of prevention of significant deterioration from the law.[65] In addition to garnering support from industry for this amendment, the President's proposals were initially supported in spirit by the National Governors' Conference [66] and in substance by the State and Territorial Air Pollution Program Administrators.[67] Environmentalists opposed the President's PSD amendment—as did EPA—and they lobbied for a stringent provision to be included in the Senate and House bills.

During 1975, the Senate Subcommittee on Environmental Pollution held fourteen days of hearings on the CAA and began "marking-up" a bill in mid-June. After more than 20 mark-up sessions, the Subcommittee reported a bill to the Public Works Committee on November 3, 1975. The Committee completed its work on the bill, after 24 mark-up sessions, and reported it to the Senate on February 5, 1976. Six months later the Senate passed the 1976 Clean Air Act Amendments [68] by a 78–13 vote.

During March, 1975, the House Subcommittee on Health and the Environment held two weeks of hearings on the Clean Air Act Amendments. On October 23, 1975, the Subcommittee reported a "legislative proposal" and three days later the Subcommittee bill was referred to the Committee on Interstate and Foreign Commerce. On March 18, 1976, a bill was reported from the Committee to the House. However, it was not until September 15—two weeks before Congress was scheduled to recess—that the House version of the 1976 Clean Air Act Amendments [69] was passed by a 324 to 68 vote.

The Senate-House Conference Committee was faced with the monumental task of writing a compromise bill by October 1, the scheduled Congressional adjournment date. By putting some long hours, the Conference Committee was able to report a bill. However, before the Senate could vote on the conference report, a filibuster by Senators opposed to the PSD provision killed it.

Hoping to avoid another lengthy battle over the Clean Air Act Amendments in 1977, both the House and Senate move rapidly to pass legislation. With much of the legislative groundwork laid in 1975 and 1976, the bills moved rapidly through the House and Senate.

On June 10, 1977, the Senate passed a slightly modified version [70] of its 1976 bill by a 73 to 7 vote. The House passed its version of the 1977 Clean Air Act Amendments [71] on May 26, 1977, by a 326–49 vote. Under pressure from the auto industry (which needed statutory relief from the 1970 Clean Air Act auto emission standards before it could ship its 1978 model vehicles) and President Carter, a Senate-House Conference Committee reported a compromise bill which was approved by Congress on August 4, 1977. Three days later, President Carter signed the bill into law. Embodied in the bill is a PSD provision which was patterned after EPA regulations, except the Class III increment does not allow for deterioration of air quality to the secondary standards. Instead half that amount of pollution is allowed. Also, the six criteria pollutants are required to be included in the national PSD program, instead of just two as required by EPA's regulations. The national interest in "clean air areas" is protected by the mandatory Class I designation of large national parks, wilderness areas, memorial and international parks, and by prohibiting Class III designations for many Federal land categories. The states are given a much greater role in the PSD program than was permitted under EPA's regulations. The classification process, with certain limited exceptions, is controlled by the governor of each state. The governor's classification decision is not subject to a substantive review by EPA; the agency's role is limited only to a procedural review. In general, the new law's PSD provision represents a reasoned approach to balance the need for economic growth and the need for clean air and places responsibility for determining that balance with the governors.

CONCLUSION

This note has attempted to record the problems that are created by implementing a statute which is ambiguous and vague on key policy issues. It may be, as one commentator has suggested, that "perhaps the politics of making major change are such that more battles can be won by the significant use of silence and vagueness than by the explicit statement of intentions." [72] And it may be, as another writer has hinted, that in the CAA the Senate proponents of a strong PSD policy purposefully passed a vaguely-worded bill, but buttressed it with legislative history that could be interpreted by the courts as a Congressional mandate for a national PSD policy.[73] However, inherent in such an approach is the fact that vagueness in a statute gives the implementing agency wide-ranging authority to make administrative decisions which, in effect, set national policy. Such unfettered discretion, as one commentator has noted, allows the agency to make "essentially lawless" decisions on public policy questions.[74] In addition, statutory vagueness encourages litigation which ultimately results in the grinding halt of program implementation.

We have attempted to demonstrate in this note that in the CAA Congress either abdicated or simply overlooked its policymaking responsibilities on prevention of significant deterioration. Instead of addressing this issue in 1970, when public support for strong environmental laws was at its apex, Congress—for whatever reason—did not clearly speak to the issue and years later had to pick up the pieces of a national policy which had been patched together by the courts and EPA. No rational person would argue with the contention of Senators Buckley and Stafford that "under the Constitution, the Congress has the responsibility to define national policy." [75] Therefore, before it became a hostage of the courts, our nation's lawmakers should have spoken on the prevention of significant deterioration issue through timely legislative amendments. Such action would have allowed the states to implement the PSD program without fear of stagnation which accompanied the seemingly endless litigation.

Finally, now that Congress has established a national PSD policy, it will be incumbent upon local and State agencies and EPA to insure that it is implemented vigorously, but wisely.

[17] The prior major air pollution control legislation contained the same basic language as the Clean Air Act Amendments of 1970. Those purposes are:

(1) to protect and enhance the quality of the Nation's air resources so as to promote the public health and welfare and the productive capacity of its population;

(2) to initiate and accelerate a national research and development program to achieve the prevention and control of air pollution;

(3) to provide technical and financial assistance to State and local governments in connection with the development and execution of their air pollution prevention and control programs; and

(4) to encourage and assist the development and operation of regional air pollution control programs.

[35] On October 5, 1971, OMB established a "quality of life" review requirement, which subjected environmental regulations to detailed review by federal agencies. This requirement was unilaterally terminated by EPA on January 25, 1977. TRIBUTE TO SENATOR HUBERT HUMPHREY

Mr. MAGNUSON. Mr. President, I was deeply impressed with the tremendous outpouring of tribute around our Nation from those who have been affected by the death of Senator Hubert Humphrey. It is truly a fitting tribute to Hubert—who was never at a loss for words—that his fellow citizens—from President to newsman—have been moved to express their esteem for this most remarkable man in a profusion of eloquent statements and editorials. His many eulogizers have been able to express for all who are not so articulate what Hubert has meant to us.

I have in mind, in particular, an editorial by Robert E. Thompson, publisher of the Seattle Post-Intelligencer, which appeared in that newspaper on January 17, 1978. The editorial conveys a real insight into the man, his qualities and contributions to the Nation. Thompson writes:

If any single individual can become the symbol of a nation's heart, Humphrey was the symbol of America's heart.

Over the past 30 years of association, I have known Hubert as my friend, as well as my colleague. I will sorely miss him.

I recommend Mr. Thompson's touching commentary to my colleagues and I ask unanimous consent to have the editorial, "A Farewell to the Happy Warrior," printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A FAREWELL TO THE HAPPY WARRIOR

(By Robert E. Thompson)

Of all the memorable moments in America's farewell to Hubert Humphrey, none would have pleased Humphrey more than the fact that Richard Nixon emerged from three-and-a-half years of isolation to attend the final tribute to the Happy Warrior in the nation's Capitol.

For, as in life Humhprey's great humanitarian spirit reached out to millions upon millions of individuals around the world, in death it reached out to the lonely, brooding figure in San Clemente.

It was typical of Humphrey that as his own suffering intensified he would talk by telephone to Nixon and wish the former president happy birthday. It was fitting also that Nixon would journey for the first time since August, 1974, back across the Potomac to pay homage to the man he defeated in the 1968 presidential election.

That was the kind of human gesture that meant so much to Humphrey, who may have had more friends around the globe than any American of his generation.

Hubert Humphrey simply did not know how to hate. He did not know how to indulge himself in bitterness.

Humphrey could be hurt and he could be defeated. But he was so filled with optimism, enthusiasm and resiliency that any hurt and any defeat was only transitory.

Having covered Humphrey's career in the Senate, the vice presidency and on the presidential campaign trail, I knew him as a very warm and special person.

In fact when news of his death reached us Friday evening, my wife said, "Somehow I expected a miracle. I just thought something would happen and that he would live—that he would overcome this defeat as he had all others."

I concurred. For Humphrey's spirit, determination and love of life were such that no one who ever was associated with him could imagine him not being among us.

If any single individual can become the symbol of a nation's heart, Humphrey was the symbol of America's heart.

He could be critical of Nixon's conduct in office and share a nation's heartbreak over the shame Nixon brought upon the presidency. But his compassion was such that he also could feel sadness rather than hatred for Nixon; that he could weigh Nixon's triumphs against his tragedy, that he could understand that Nixon had done much good as well as much harm.

Anyone who ever knew Humphrey can just hear him saying to Muriel, "Well, doggone, I just think I'll wish Dick Nixon a happy birthday. He probably needs a little cheering up."

That was Hubert Humphrey. Talkative? Yes. Undisciplined? Yes. A dreamer? Yes. A big spender? Yes. But what a heart and what a soul and what a force for good in this nation and this world.

He may be gone. But his spirit lives on.

Where older people are living in dignity, where blacks are enjoying equality, where youngsters are getting the education they once were denied, where justice is extended to all citizens, where peace corps volunteers serve, where statesmen negotiate arms control, where decent housing is rising above urban rubble, where health care is provided the elderly and the needy, where the poor have hope, where the belief in America's future is boundless, that is where Hubert Humphrey's spirit is.

The blows to Humphrey's ebullience and his ego were tremendous during his more than 30 years in public life.

Adlai Stevenson promised him the Democratic vice presidential nomination in 1956 and then failed to deliver it. John Kennedy overwhelmed him with family money in the 1960 presidential primaries. Lyndon Johnson made him vice president and then sometimes humiliated him.

Liberal Democrats turned from him to Robert Kennedy, Eugene McCarthy and George McGovern in 1968 and 1972, although none of those men had championed the great humanitarian causes of the 20th Century with Humphrey's zeal and courage. When the popular vote of 78 million was tabulated in 1968, he lost to Nixon by a mere half million votes. As he toyed with a final run for the presidency in 1976, Jimmy Carter said he was over the hill, a man of the past.

But none of those defeats or rejections stopped Humphrey. He willingly worked with or for the men who had beaten him in the political arena because he knew that America was built by team spirit.

What those of us who knew him will best remember, however, is that he, more than any other major public figure of the last three decades, was a fun person. He practiced the politics of joy because he believed in the politics of joy.

Humphrey's interest in the affairs of man was catholic. His mind was one of the best this nation has known. His humor was infectious—for he knew how to laugh at himself as well as the world around him.

No tribute to him was more fitting than Carter's request that all who had gathered in the Capitol rotunda join in singing "America, the Beautiful." For that song contains words that might have been written especially for Hubert Humphrey . . . "God shed his grace on thee, and crown thy good with brotherhood from sea to shining sea."

NATIONAL BLACK CAUCUS RESOLUTIONS ON THE PANAMA CANAL TREATY

Mr. KENNEDY. Mr. President, I would like to introduce into the CONGRESSIONAL RECORD resolutions on the Panama Canal treaty adopted by the National Black Caucus of Local Elected Officials (NBC/LEO) and the National Black Caucus of State Legislators (NBC/SL).

The NBC/LEO, founded in December 1970, represents more than 2,000 black local elected officials in the United States. NBC/LEO has worked diligently to make positive change possible for black and disadvantaged people in this country.

The NBC/SL was formed in August 1977 to work toward the solution of many problems plaguing black and disadvantaged Americans. It is concerned about problems on a local, State, and national level, but recognizes the importance of responsible U.S. international leadership as well.

Both NBC/LEO and NBC/SL adopted their resolutions as an affirmation of the importance of the Panama Canal treaties to all Americans. I congratulate them on their leadership in moving these treaties forward.

At this point, I request unanimous consent that the resolutions, passed by the National Black Caucus of Local Elected Officials on December 6, 1977, and the National Black Caucus of State Legislators on November 20, 1977, be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

NATIONAL BLACK CAUCUS OF LOCAL ELECTED OFFICIALS

PANAMA CANAL TREATY

Whereas, our capability to defend the canal will be enhanced under the new treaty through cooperation with the government of Panama; and

Whereas, no country large or small should agree to another nation holding parts of its territory in perpetuity as we do under the 1903 Treaty; and

Whereas, these new treaties protect the vital commerce and security interest of the U.S.A.; and

Whereas, the 1903 Treaty represents a U.S.A. foreign policy philosophy of the early 1900's, not the 1970's; and

Whereas, the new treaties are in the national interest of the U.S.A. and consistent with the traditional U.S.A. support for self determination and respect for the dignity of all nations great and small; and

Whereas, the new treaties assure a peaceful, prosperous and secure international waterway for the commerce of all nations; and

Whereas, the new treaties are firmly sup-

ported by all the nations of the hemisphere; and

Whereas, approval of these treaties will say to the world that the U.S.A. is true to its word about dealing on a fair and equitable basis with all nations.

Now, therefore, be it resolved that the National Black Caucus of Local Elected Officials supports the President's proposed Panama Canal Treaties.

NATIONAL BLACK CAUCUS OF STATE LEGISLATORS

PANAMA CANAL TREATY

Whereas, our capability to defend the Panama canal will be enhanced under the new treaty through cooperation with the government of Panama; and

Whereas, no country large or small should agree to another nation holding parts of its territory in perpetuity as we do under the 1903 Treaty; and

Whereas, these new treaties protect the vital commerce and security interest of the U.S.A.; and

Whereas, the 1903 Treaty represents a U.S.A. foreign policy philosophy of the early 1900's, not the 1970's; and

Whereas, the new treaties are in the national interest of the U.S.A. and consistent with the traditional U.S.A. support for self determination and respect for the dignity of all nations great and small; and

Whereas, the new treaties assure a peaceful, prosperous and secure international waterway for the commerce of all nations; and

Whereas, the new treaties are firmly supported by all the nations of the hemisphere; and

Whereas, approval of these treaties will say to the world that the U.S.A. is true to its word about dealing on a fair and equitable basis with all nations.

Now, therefore, be it resolved that the National Black Caucus of State Legislators supports the President's proposed Panama Canal Treaties.

TRIBUTES TO SENATOR HUBERT H. HUMPHREY

Mr. ANDERSON. Mr. President, the death of Hubert H. Humphrey has been a time of reflection for all of us about the wonderful life and tremendous contributions of our departed friend and colleague. The tributes that were paid Hubert Humphrey both before and after his death on January 13 are testimony to the admiration and love that this Nation and society felt for Senator Humphrey.

I believe this Senate tribute to Hubert H. Humphrey would not be complete without including the words of reporters, editors, and columnists from across the country at the death of Senator Humphrey. The expressions of sympathy at his passing and admiration of his record of public service were widespread, as would be expected, in our home State of Minnesota.

Mr. President, I ask unanimous consent to have printed in the RECORD as part of this tribute the following articles from the Minnesota press following the death of Senator Humphrey:

Geri Joseph Column, Minneapolis Tribune, January 15.

Editorial, "Hubert Humphrey," Minneapolis Tribune, January 14.

Editorial, "The Sorrow and the Joy," Minneapolis Tribune, January 16.

Editorial, "Senator Hubert Humphrey," St. Paul Pioneer Press-Dispatch, January 14.

Editorial, "Hubert Horatio Humphrey," Minneapolis Star, January 16.

Editorial, "Hubert H. Humphrey: 1911–1978," Minneapolis Tribune, January 17.

Charles W Bailey Column, Minneapolis Tribune, January 15.

Editorial, "A Man of Spirit," Duluth News-Tribune, January 15.

Editorial, "Hail and Farewell," Mankato Free Press, January 14.

Editorial, "Hubert H. Humphrey," Albert Lea Tribune, January 16.

Editorial, "An Era, A Legend Dies," Fairmont Sentinel, January 16.

Editorial, "HHH Gone; but Forgotten, Never," Rochester Post-Bulletin, January 16.

Editorial. "HHH was there first," Austin Daily Herald, January 16.

Editorial, "HHH: 1911–1978," Marshall Independent, January 16.

Editorial, "HHH Is Gone," West Central Daily Tribune Willmar, January 16.

Editorial, "Minnesota at half mast," Princeton Union Eagle, January 19.

Editorial, "Humphrey Legacy With Us Forever," The Daily Journal, International Falls, January 16.

Editorial, "HHH: A Man for all Seasons," Stillwater Evening Gazette, January 16.

Editorial, "He walked with presidents and the common man," Mesabi Daily News, January 16.

Editorial, "Time to Mourn," The Journal, New Ulm, January 15.

Editorial, "Hubert H. Humphrey," Faribault Daily News, January 16.

Editorial, "Hubert," Brainerd Daily Dispatch, January 15.

Editorial, "Farewell Hubert!", Owatonna People's Press, January 15.

Ray Crippen, "Region Loses Familiar Friend, Revered Leader," Worthington Daily Globe, January 14.

Editorial, "Memories of a Friend," The Union Advocate, Minneapolis, January 23.

William F. White, "Some Humphrey Memories," Winona Daily News, January 16.

The Red Lake Tribal Council, "Hubert H. Humphrey: Chief Leading Feather," Bemidji Pioneer, January 17.

Walter T. Ridder, "Hubert greeted triumph, disaster equally," St. Paul Dispatch, January 15.

Robert J. O'Keeke, "They made HHH at Home on the Iron Range," St. Paul Dispatch, January 15.

John Carman, "The public man . . .", Minneapolis Star, January 16.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Minneapolis Tribune, Jan. 15, 1978]

HUBERT HUMPHREY

(By Geri Joseph)

We knew he was dying. In the last several months, the cameras which had been so much a part of his life now recorded unmercifully the last days of this "public man." But the heart has been known to resist the mind's message. And so to the last, we hoped and prayed for that miracle of inner vitality, of spirit and will, if not of medicine.

When the call came at 10 p.m., Friday the 13th, Skip Humphrey's voice was strained. "Dad is gone," he said. Quiet words and personal. Not the Senator or the former vice president or mayor of Minneapolis. Just Dad. So it is with those of us who worked with him and loved him: In these moments we are not thinking of his place in history but of the indelible place he has in personal memories.

The first time I saw Hubert Horatio Humphrey in action was in 1945. He was running for mayor of Minneapolis for the second time, and he had come striding into the office of the Minnesota Daily, the University of Minnesota's student newspaper. He wanted to give us a pat on the back for an editorial campaign we had been waging on the terrible state of student housing. He sat on a corner table and the words tumbled out. It took maybe two minutes for us to realize that he knew more facts and figures and horrible examples than we in months of digging, had been able to accumulate.

Students and professors crowded into the office and filled the corridor outside. When he had finished, we asked questions, so many questions, and not just on campus housing. He answered them all, as he was to do so many times on other campuses, and his knowledge and memory astounded us.

Years later, I asked him about the wisdom of answering every question. "People won't believe you know so much," I said. "They will think you're superficial. Wouldn't it be better to say occasionally that you don't know?" He looked at me intently and then shook his head. "You should be ashamed of me if I didn't try to learn as much as I can and then share it. A politician should be the best teacher there is."

During his 1964 vice presidential campaign, Humphrey had been on the road for several days in southern states. As usual, his schedule would have been mind-and-bone wearying for any ordinary mortal. But not Hubert Humphrey. Now he had finished speaking at a hot, dusty field in Little Rock, Ark. He was running late, as usual, and his staff nervously urged him to cut the words and hand-shaking. A middle-aged woman approached to ask if the senator would give her daughter an interview. The daughter, in her early 20's, worked for a small radio station. She was seated in a nearby station wagon, and as we approached, we saw her wheelchair and shriveled legs. Humphrey took one look and climbed in beside her. She was so excited her hands shook, and it took precious minutes to get the tape recorder working. Thirty minutes later, the interview was over. "Better check it," Humphrey suggested. To the young woman's tearful dismay, the tape was garbled. "Never mind," he said gently. "We'll do it again." And while advance men fretted and paced and bit their nails, the interview was retaped.

There are so many other memories:

Time magazine gave a big and elegant party for men and women who had appeared on its covers. Humphrey, who loved a good party, was among them, greeting old friends, bouncing from table to table and dancing. He liked to dance almost as much as he liked to talk, and he had been dancing up a storm with a slim, graceful woman. When he returned to his table, his face was puzzled. "By golly, she was a good dancer," he told his wife, Muriel. "One of the best. Do you know who she is?" asked this man whose political memory was a source of awe to those who knew him. "That," replied his wife, "was Ginger Rogers."

During the 1960 convention, he had supported Adlai Stevenson's last and too-late presidential bid and had led a floor demonstration for him. When some of us saw him later in his hotel suite, he was grim and preoccupied. What had happened? Bobby Kennedy, furious with Humphrey's action, had just left him. "He said they'd get me," Humphrey said. He was more shocked than angry since this kind of threat was sharply at odds with his own response to political disappointment and defeats. His advisers sometimes wished otherwise: "if only he would go for the jugular once in a while . . ." But it was not in him to be mean or vindictive. "I don't have time to waste energy on hating," he told us more than once.

When he was vice president, he and his wife asked a few of us to attend with them

the opening performance of the American Ballet Theater in New York City. Afterwards, in the lovely surroundings of the two-level presidential suite at the Carlyle Hotel, we talked for hours. I asked him abruptly what he admired in President Lyndon Johnson. His answer came back without hesitation. "His toughness," he said. "Oh, his toughness," and mixed with the admiration in his voice was longing.

In the end, Humphrey, too, was tough—and magnificent—in the most uneven battle he ever fought. None of us who had helped him in other battles could help him in this one. That makes these moments more painful. But there is comfort in knowing how fully he lived and in being able to say with so many others, "Well done, dear friend. Well done."

[From the Minneapolis Tribune, Jan. 14, 1978]

HUBERT HUMPHREY

(NOTE.—"I have enjoyed my life, its disappointments outweighed by its pleasures. I have loved my country in a way that some people consider sentimental and out of style. I still do, and I remain an optimist, with joy, without apology, about this country and the American experiment in democracy.")

Life. Love. Joy. Politics. They were Hubert Humphrey. Even in his fight against cancer those traits continued to characterize him.

All Americans, but particularly Minnesotans, were fortunate to have had him among our leaders. His record in Minnesota and his record in Washington are known to most: Minnesota politics. Civil rights. The Senate. Major legislation. The vice presidency. Candidate for president. Senior statesman.

We in Minnesota knew him best of all: From us he came, and to us he returned to die. We knew his strengths, and we knew his weaknesses. And adding them all up, we loved him—even if we didn't always agree with him, even if he sometimes talked too long. The tributes to him from across the nation in recent months showed how many others felt that way about him, too.

Each of us will have his or her own special memories. Hearing on radio that 1948 speech on human rights, perhaps. Or his tearful concession statement in 1968. Or a lecture in a college classroom. Or perhaps just bumping into him at the State Fair, where a Humphrey stroll would leave a trail of animation behind.

His whole life left a trail of accomplishment. Last year Humphrey wrote: "In life it isn't what you've lost, it's what you've got left that counts." So we have lost Hubert Humphrey. But what he left us is what counts.

[From the Minneapolis Tribune, Jan. 16, 1978]

THE SORROW AND THE JOY

Sorrow and joy. Those were emotions Americans shared Sunday. We mourned the death of Hubert Humphrey. We found joy in the memories of his life, his meaning for our own lives, his contributions to our country. We took strength from Muriel Humphrey.

"You can cut back on the funeral,' Humphrey had said, "because all the eulogies already have been delivered." But we couldn't. This giant of the Senate had meant too much to us.

"At critical times in our history," said President Carter, "the United States has been blessed by great people who just by being themselves give us a vision of what we are at our best and of what we might become. Hubert Humphrey was such a man." And he was.

"He taught us all," said Vice President Mondale, "how to hope and how to love, how to win and how to lose. He taught us how to live and, finally, how to die." And he did.

Humphrey told last year how he drew strength from the prayer of St. Francis of Assisi, particularly the part that says: "Where there is doubt, let me sow faith; where there is despair, hope; where there is darkness, light; and where there is sadness, joy." The prayer, part of yesterday's memorial service, reflected the essence of Humphrey himself.

The service was an affirmation of faith, hope, light and joy. The president said: "Even as we mourn his death, we celebrate because such a man as Hubert Humphrey was among us. The joy of his memory will last far longer than the pain and sorrow of his leaving." Mrs. Humphrey signaled that affirmation when she asked that Robert Merrill sing "America the Beautiful" again and that everyone join in.

Then Hubert Humphrey came home to Minnesota and to a people that loved him, his life an affirmation of the ideals of his country and his country better for it.

[From the Pioneer Press-Dispatch, Jan. 14, 1978]

SENATOR HUBERT HUMPHREY

He cared. Concern was the engine that drove his ambition, that informed his limitless energies, that directed his ego. He strove for high office that he might serve.

Our grief is for the passing of a man, our sadness for the end of a career that was long and distinguished but all too brief nonetheless, our regret that with him is gone an era and an aura we shall not experience again.

He was heir to the works and aspirations of generations of Midwestern Democrats—populists, if you prefer that word—and he took that inheritance and shaped it and infused it with his own fire and idealism and returned it to the people of his country in a vast body of legislation for which they shall never be out of his debt. He was a politician who gave his calling luster and respect.

Oh, he had his share of critics. More than his share. There were those who confused his volubility and enthusiasm with humbug, but long before his passing the substance of his achievements validated his sincerity. Admiration and affection replaced the sometimes snickering criticisms, and it is to the credit of his onetime detractors, and certainly testimony to his own nature, which was without rancor or malice, that when the tributes came—happily and so fortunately while he lived—they came from all sides and all shades of opinion.

His biographers will not overlook—indeed, can hardly minimize—his accomplishments, and if they are honest biographers they will not ignore his faults or his mistakes. But we do not have to wait for the biographies to appreciate the impact he had on his state and on his country.

In Minnesota, he created a whole new political movement, fusing a Farmer-Labor Party to which he had given fresh life (and from which he had scrubbed the taint of Communist infiltration) with a Democratic Party which had had a singularly ineffectual history in this state. He led this new party to secure power in the state and to heights of influence nationally. Minnesota the model political climate, Minnesota the font of presidential candidates, of Cabinet members and Supreme Court justices, the focus of admiring attention all out of proportion to its size—for all this he was mover and catalyst and proud sponsor.

For his country he did even more—much more. Where would civil rights be today without the impetus of his electrifying speech before the Democratic National Convention in 1948, before his election as senator, and without his sponsorship of and tireless push for the Civil Rights Act of 1964? Who can calculate the influence for good in the world, and the benefit to this nation's image, of his Peace Corps, of the Food for Peace program, of his championship of the Nuclear Test Ban treaty? How can we express the gratitude owed him for all the legislation, principally of his creation and all flowing from his boundless concern for people, that brought urban renewal, aid to education, help to the handicapped and to the underprivileged?

These are his legacy and his monuments and they need no marble shafts or words graven in granite on government buildings. The people know Hubert Humphrey cared, and that is enough.

[From the Minneapolis Star, January 16, 1978]

HUBERT HORATIO HUMPHREY

(NOTE.—Gladness of the heart is the life of a man, and the joyfulness of a man prolongeth his days.—The Apocrypha.)

Hubert Horatio Humphrey could have been composing his own epitaph when he wrote, in his autobiography, of his father:

"What he felt, he felt wholeheartedly, without trying to protect himself with reserve, suspicion, or emotional caution . . . He was a missionary with a sense of humor."

And Sen. Humphrey relished the same candor in those he counted as friends and followers. So, while one usually hesitates to dwell in an obituary on the final illness of the mighty dead, any tribute to this public man's courageous life must begin with a tribute to the extraordinary way he died. As his physical strength—but never his spirit—ebbed he lived each hour as he had always lived, with combative cheerfulness. The venerable affection he had won before was thereby multiplied many times. It's some consolation now that before the end he came to know firsthand just how much he was loved and how many the whole world over.

But if, in the full tide of life, Sen. Humphrey, who in 66 years never seemed to grow old, found sustenance in cheerful intellectual candor, he found even more in the rich rhetoric and persiflage of politics. In the torrent of tender messages, he must have appreciated most those from his political arena peers, past and present. Even, one might guess knowing Sen. Humphrey's forgiving heart, the one from Richard M. Nixon. Because for our mayor, senator, vice-president and presidential candidate, politics was more than a way to making a living. It was a passion. His life's blood to the last.

Unlike so many who reach the top in public life, Sen. Humphrey was free of stuffy self-deception. An idealistic realist, he was also, and by free choice, a master of political maneuver and necessary compromise. Social goals, he taught students and colleagues alike, are not often reached quickly or easily.

But reach them he did. His legacy of attainments in social and economic legislation and foreign affairs is unmatched in the Senate. Among his many accomplishments history may well mark highest his bold pioneering blow for national civil rights legislation at the 1948 National Democratic Convention and his subsequent superb Senate leadership that secured passage of the landmark 1964 civil rights bill.

From a national perspective, history will doubtless mark Sen. Humphrey's career as a living link to the Roosevelt New Deal. That Depression Era shaped the unshakable core of his basic philosophy, which in essence was that government could improve the condition of our people. From our perspective in Minnesota he personified, of course, not only the Democratic Farmer-Labor Party but also the best of Minnesota's special tradition of decent government by and for the people. A simple measure of his place in our history is that it is impossible to imagine what Minnesota would be today had there been no Hubert Humphrey. Above all, he was the warmest and friendliest of human beings.

But, if, in the words of the Litany, he was largely innocent of envy, hatred, malice and all uncharitableness, he was not without pride. Often in the form of folksy egoism that could be just plain gauche. Too, like all of us, he was guilty of occasional hypocrisy. But he was quick to admit his faults. Let's not forget how much we enjoyed it when he laughed at himself for his long-winded speeches and his propensity to ham it up. Let's not take that engaging combination of fierce pride and humility away from him. Indeed, we sorely miss Hubert not because he was even near perfect but because we, all of us, could identify with his flaws. And because we could do that we could forgive them.

In the words of Oliver Goldsmith:

"All his faults are such that one loves him still the better for them."

[From the Minneapolis Tribune, Jan. 17, 1978]

HUBERT H. HUMPHREY, 1911–1978

"My sword I give to him that shall succeed me in my pilgrimage, and my courage and skill to him that can get it. My marks and my scars I carry with me, to be a witness for me, that I have fought His battle who now will be my redeemer."

When the day that he must go hence was come, many accompanied him to the riverside, into which as he went he said: "Death, where is thy sting?" and as he went down deeper he said: "Grave, where is thy victory?" So he passed over, and all the trumpets sounded for him on the other side.

PILGRIM'S PROGRESS.

HUBERT H. HUMPHREY

(By Charles W. Bailey)

When all is said and done, there remains the central fact that Hubert Humphrey reflected—in his life and his career—the age in which he lived and worked.

He personified the triumphs as well as the troubles of his era: The fight for civil rights. The struggle over the Vietnam War. The belief that this was the American century, when this country would lead the rest of the world to peace and plenty. The frustration of the efforts to make that happen. The Cold War—and detente. Standing up to communism—and sitting down with Khrushchev. Building a huge nuclear arsenal—and negotiating treaties to control nuclear weapons.

But if he was the mirror of his time, he was also almost always just a little bit ahead of others in perceiving what that time needed. He thought up the Peace Corps a couple of years before John Kennedy decided it was a catchy idea. He was trying to enact a food-for-peace program when others were still worrying about getting rid of surplus grain.

Humphrey yielded to no man in his support for Israel, but he practised his own brand of Mideast shuttle diplomacy when Henry Kissinger was still lecturing at Harvard; he went to Cario before it was fashionable. He talked about human rights several decades before Jimmy Carter, and he kept nagging his party about them until it finally did what had to be done.

Ed Muskie, Humphrey's companion on the ill-fated campaign of 1968, mused Saturday about his friend's death: "Being Hubert, he made it seem so easy that he succeeded in covering up what must have been excruciating pain. Earlier in the week, I asked him how he was doing. He said: 'Oh, I'm feeling much better.' He gave you the feeling he would survive somehow . . . It was more than courage; it was faith as well—an unquenchable faith in the future, even the future that lies beyond the curtain."

For Minnesota newspaper people of a certain vintage, the last quarter-century is definable in terms of Humphrey.

To a newcomer, people at Minneapolis City Hall in the early '50s seemed a little out of breath. Humphrey had swept through the place, and even a couple of years after he went on to Washington the survivors still seemed a bit dazed.

Later, caught up in the whirlwind as a reporter, you began to understand the fatigue at city hall. The scenes tend to blur and run together: Humphrey making a speech at a union hall in Oregon, Humphrey making a speech at a village in India. Humphrey in his Washington office. Humphrey in Vietnam. Humphrey talking, explaining, urging, cajoling, forever trying to move people along with him—and cheer them up in the process

Once, in Italy, a protester threw a balloon filled with paint at him. It missed Humphrey but burst all over the ceremonial uniform of his official host. Humphrey looked at him for a long, silent moment—and then asked: "Does this happen to you often, Mr. Mayor?"

Humphrey took a lot of kidding, and a fair amount of abuse, for talking about "the politics of joy." It was the fate of this joyful man to run his most important race in a year when there was no joy in the country and no room for his kind of politics. He never changed his politics, and he never complained about his luck.

One thing is beyond argument: Whatever Humphrey was, whatever he stood for, had its roots in South Dakota's small towns and in the great depression. If he was ever angry about anything it was about poverty. He forgave almost anything—far more than was good for him politically—but he never forgave those who were callous about the poor.

He moved easily among the people and the politics of big cities, but you could look at him from a block away and tell that he came from somewhere beyond the city limits. Maybe that was one reason why there was so little sham in him; it's hard to fool people when everyone knows you.

He left on a gray January day, just a week before the ninth anniversary of what should have been his inauguration as president of the United States.

[From the Duluth News-Tribune, Jan. 15, 1978]

A MAN OF SPIRIT

Hubert H. Humphrey was a political phenomenon.

For his commitment to the underprivileged, his name will be remembered beside Franklin Roosevelt's, if not ahead of it.

For his powers as an orator, he will be remembered with Daniel Webster.

For his fight for civil rights, and especially to bring equal opportunities to the nation's blacks and other minorities, he will be remembered with Abraham Lincoln.

But for all of his similarities with several of this nation's great leaders, Humphrey in his final months of his life revealed a quality unique to himself: that man had spirit.

Gradually, as Humphrey's more obvious strengths began to slip away, we were able to see the underlying, brilliant core of spiritual commitment that gave him so much energy for work and exuberance for living.

As his body lost weight, his hair turned color and fell away, there remained on his face a smile, and in his eyes a sparkle. In Humphrey's eyes and mouth you could see a spirit not limited by its body or physical ailments.

In an ironical way, Humphrey seemed to come even more alive as he came closer to death. For all that he has done for the people of this nation, that example of spiritual resilience may be his greatest and most lasting gift.

For Humphrey was more than a politician. He was first a man, one filled with compassion for other people, and one blessed with both the mind and the diplomatic talents to write and pass laws which brought his compassion out of his heart into the real world where food and clothes, education and medical care, and civil rights were given to those who couldn't win them for themselves.

But his gifts as a politician, and his inclination to speak at length on any issue, have had a way of concealing his spiritual dimension, that intangible something that made him such a productive, almost inexhaustible member of Congress.

Last February, after his first body-destroying cancer treatments, Humphrey told James P. Gannon of the Wall Street Journal, "When someone comes along and says: 'Hey, you look like you're gonna die,' I just want to give him a big kick in the butt."

That's the Humphrey spirit. In his lifetime, and mostly during the end, he offered us exhilarating proof that we do not live by bread alone. Hubert Humphrey gave us reason to believe in a human spirit, and all that means.

[From the Mankato Free Press, Jan. 14, 1978]

HAIL AND FAREWELL

Hubert Humphrey never forgot a name; if he met you once, you were not only well met: You were remembered.

We'll remember Hubert Humphrey, too, as an entire nation. And that's because we think it's fair to say that Hubert Humphrey, to date and well into the foreseeable future, has had more impact on the nation than has any postwar president.

He wanted the presidency badly; but as close as he got to it was as Lyndon Johnson's Vice President, a position in which he was treated cavalierly, and in which he had to compromise some of his principles, particularly with regard to his views about the war in Vietnam.

Though he never got closer to residing in the White House than as Johnson's vice president, Hubert Humphrey had already made his mark. What, after all, was Johnson's Great Society but the anatomization of civil rights attitudes articulated by Humphrey, then mayor of Minneapolis, at the Democratic National Convention of 1948? Hubert had said it all—much earlier and much better.

Civil rights, obviously, would have had to have their day in the sun eventually; but it is telling about the man, Humphrey, that he stuck his neck out in a time when it was not fashionable—or safe—to be egalitarian. He ripped the '48 convention apart with his historic speech; the Dixiecrats walked out of the convention.

But isn't it also telling, about the man, that the most prominent of those Dixiecrats, Sen. Strom Thurmond of South Carolina, was one of the first people to come pay his respects to Humphrey when the condition of his illness worsened last year.

Enemies were convinced to be friends because Hubert endured, and kept on fighting, but most important, because he was right from the beginning.

A man of great compassion, his capacity for seeing things in human terms—things like unemployment, for instance, which to him meant real people's real problems, not just a list of statistics—was both his supreme asset and his sometime nemesis. More often than not it was the former.

Hubert Humphrey gave salutary dignity to the word 'politician' and hope to those who still believe in the virtues and human rewards of public service. His like will likely not be seen again, and we will all be the poorer for that.

[From the Albert Lea Tribune, Jan. 16, 1978]

HUBERT H. HUMPHREY

The last time Sen. Hubert H. Humphrey visited the Evening Tribune was on a Saturday morning in September 1976.

He was campaigning for re-election to another term in the senate even though he had only token opposition from the Republican Party.

It was a typical Humphrey visit. That is, he took over the place. He shook hands with every employee who was working that day and handed each one of his campaign cards with the Minnesota Vikings schedule printed on the back. After he left, everyone felt a glow from having talked to a man who was so obviously in love with people.

His ability to make the staff of a small city newspaper feel important was an example of one of the many talents of this same man who was vice president of the United States, who came within an eyelash of becoming President of the United States and who was recognized around the world as a great statesman.

And this newspaper had not endorsed his candidacy for the U.S. Senate in 1970. It corrected that oversight in 1976.

This attribute was one of the keys to Sen. Humphrey's greatness. Despite all his accomplishments and his honors, he never forgot the people. He recognized that he was serving at the pleasure of the people and he listened to them.

On many occasions he was taken to task by his critics for trying too hard to please everybody. But, he probably succeeded in pleasing more people than most.

While we are saddened by his passing Friday night, we feel good about being able to remember him as he was on that Saturday morning in September. He was happy. He was enthusiastic. He was Hubert Humphrey.

He was a great man.

[From the Sentinel-Fairmont, Jan. 16, 1978]

AN ERA, A LEGEND DIES

(By Terry Borchers)

Blinking back tears last Friday night, Vice President Walter Mondale said Hubert H. Humphrey would have us remember him in joy, not in mourning.

"He often said life is not to be endured but to be enjoyed," the Vice President said.

The Vice President and long-time personal friend of Mr. Humphrey could have said it no better. Mr. Humphrey left a legacy of hope, courage and dedication. The man who became a legend in his own time was dead at 63, after the most colorful and meaningful political career of modern times.

The presidency escaped him more than once. He once recalled the day after his loss to Richard Nixon in 1968 as "The longest day of my life." ". . . To lose to Nixon. Ye Gods. No warmth, no strength, no emotion, no spirit, no heart . . . We could have won it. We should have won it," he said in his autobiography.

It would have been the end of the road for a lesser man, but not for Mr. Humphrey. He did not wallow in self-pity. Rather he picked himself up, as he had after other lesser jousts in the political arena and came back to fight for the causes he believed in so deeply.

Humphrey was thought of as a liberal through most of his political career. That changed somewhat after the 1968 campaign, because he had stood steadfastly beside the sinking political status of Lyndon Johnson.

But political classifications never really bothered the Senator. He just continued his struggle, most often for those who had few supporters for their needs and causes other than Sen. Humphrey.

Humphrey was a man to be politically reckoned with. He did more to shape Minnesota politics and later national politics during his lifetime than any other man. He claimed credit for the merger of the Farmer-Labor and Democratic parties in Minnesota nearly 30 years ago.

His impact on state politics could be felt up until the day of his death and it will likely be felt for some time to come.

It is with some irony that the state and the people he represented for so many years, will now be represented in the Senate by two unelected representatives.

Mr. Humphrey was an emotional politician. He was a man often before his time, yet he probably saw more of his ideas and programs adopted than any other American politician in history.

He never made it to the top job in the land, but it goes without saying his historical niche will reveal he had a greater impact on America and its people over a period of time than any other politician in American history.

[From the Rochester Post-Bulletin, Jan. 16, 1978]

HHH GONE; BUT FORGOTTEN, NEVER

Pages and pages of newspaper coverage and numerous radio and television specials have gone into great detail about the life and accomplishments of Hubert H. Humphrey since his death last Friday. There is no need to try to repeat that kind of coverage in this space.

Of all the tributes made to the late, great senator, we thought the best came, not from one of Humphrey's longtime close colleagues, but from a rather recent friend, who now happens to be President of the United States.

Said President Carter: "From time to time, our nation is blessed by the presence of men and women who bear the mark of greatness, who help us see a better vision of what we can become. Hubert Humphrey was such a man."

Not flowery. Not a eulogy. Just the simple truth. The truth about an honest, decent man; a dynamo of a man whose intellect and foresight are deeply engraved on both the domesic and foreign policies of his beloved America.

There is an old saying about it being okay to disagree, but don't be disagreeable. Surely that was the story of Humphrey's life. His political causes and his political opponents were many, but he was never disagreeable. In turn, no one who knew him personally, even if a strong political foe, could dislike him.

And one of the most prevalent statements made by ordinary people in conversations or in interviews over the weekend was to the effect that "Even though I didn't know him, I feel a personal loss."

So "the Happy Warrior" is gone—but forgotten, never. All Americans, and especially we Minnesotans, have benefitted from his extraordinary career of public service.

[From the Austin Daily Herald, Jan. 16, 1978]

HHH WAS THERE FIRST

The least important thing that could be said about Hubert Horatio Humphrey is that he very nearly became a president of the United States.

In death, Humphrey joins a select company of American political figures who, like him, aspired to the nation's highest elective office yet are remembered not for that but rather for their valued services to their country in other capacities—as senators, cabinet members, ambassadors, elder statesmen. Daniel Webster, for example. Henry Clay, William Jennings Bryan, Adlai Stevenson.

Like them, we honor Hubert Humphrey not who what he might have been but for what he was.

What distinguishes a democracy from all other political systems is not merely the fact of individual liberty. It is also the opportunity it gives the talented and ambitious individual to play a role in shaping and directing the destiny of his fellows, an opportunity enjoyed by only the very few within the ruling power circle in the one-party, totalitarian state. Soviet history lists no Websters or Clays or Humphreys.

It is gratifying to be able to say that well before he succumbed to his final illness, Hubert Humphrey was given a preview by his colleagues and admirers of the eulogies that now attend his passing. At ceremonies in Washington last spring saluting his selection by the American Political Science Assn. as an Honorary Congressional Fellow, speaker after speaker recounted his accomplishments.

Elected reformist mayor of Minneapolis in 1945 and 1947, Humphrey secured enactment of the first municipal fair employment practices law in the country.

In 1948, as freshman senator and ebullient liberal from Minnesota, Humphrey's eloquence—some would call it his ability to wear down the opposition—put over the then controversial civil rights plank in that year's democratic platform. From that time on, he was a force to be reckoned with, both in his party and in the U.S. Senate, where he was elected majority whip in 1961.

Humphrey's first try for the presidency was in 1960, when he lost the Democratic nomination to John F. Kennedy. He won the nomination in 1968, having served as vice president under Lyndon B. Johnson, but narrowly lost the election to Richard M. Nixon—mainly, it is said, because of his refusal to condemn John's Vietnam policy.

Characteristically, even though visibly aged and weakened following a cancer operation in 1976. Humphrey did not rule out another try in 1980. He was the eternal optimist, not only about his personal career but about his country. He was a believer in the future, and in the ability of free men to shape that future to their own desires.

He never attained the grand prize of American politics, that pinnacle of power called the presidency. But few major pieces of social legislation of the past three decades do not bear the stamp of HHH—from federal aid to education to Medicare to child nutrition programs to conservation acts.

"Whatever the subject," says a former associate, "Hubert thought of it first. He was there decades before anybody else."

No man could ask for a better epitaph.

[From the Marshall Independent, Jan. 16, 1978]

HUBERT H. HUMPHREY—1911–1978

"I think it is useful, probably even important, to remind people of the obvious fact that no matter how high a man may rise in this democracy, he functions with the human emotions and limitations that we all share.

"I have enjoyed my life, its disappointments outweighed by its pleasures. I have loved my country in a way that some people consider sentimental and out of style. I still do, and I remain an optimist, with joy, without apology, about this country and about the American experiment in democracy."—From "The Education of a Public Man" by Hubert H. Humphrey.

[From the West Central (Minn.) Daily Tribune, Jan. 16, 1978]

HHH IS GONE

(By O. B. Augustson)

HHH is gone. Hubert Horatio Humphrey is gone. Some day special books will be published about this great Minnesotan who passed away last Friday evening and whose burial and last rites have been held during the ensuing days.

Yes so much will be written and published about this unusual individual and such are

needed to tell the full and complete story of this most extraordinary personality.

Editorially one is limited to some brief comments and some sentences to remind us about the unusual person who has left the scenes of this life.

Without question Humphrey had for years now been our greatest Minnesotan. Not only as a long tenure U.S. senator but a former vice president of these United States.

Humphrey has often been referred to as one of the country's greatest Americans. In fact President Carter referred to Humphrey as such just the other day—termed HHH as "a great American."

This great Minnesotan so often referred to that regardless what battles he has fought, bled and succumbed for, he has coming out smiling and became known as the "Happy Warrior."

Next one recalls how so many times most folks have expressed regrets that Humphrey did not finally attain the White House as president and the opinion was generally felt that he would have become one of our greatest presidents.

And just think of his national leadership in the Congress and particularly in the U.S. Senate. It has been stated many times that the vast majority of social legislation now become the law of the land can all be traced to the leadership given it by Hubert Humphrey.

And one third also list and mention in closing if a roll call were made as to the most beloved and cherished leaders in the public life of our land today—that the name of Hubert Horatio Humphrey would be found at the top of such a Roll Of Honor.

Thus HHH—Peace to your Blessed Memory.

You were an inspiration to all of us. Whenever your helping hand was needed at Washington you were ready to help and ready to assist and more than any other representative. They used to say—"The helping hand of Hubert Humphrey" and how true that was!

[From the Princeton Union-Eagle, Jan. 19, 1978]

MINNESOTA AT HALF MAST

Princeton residents, like thousands of people throughout the state, thought of Hubert Humphrey in personal terms. They identified with him and felt a sense of personal loss when he died even though there had been ample forewarning.

Larry and Sheryl Winter will treasure the picture with Hubert in their home. Marv and Claudette George remember with special poignancy the 1974 visit with their parents to the Waverly Humphrey home when Hubert not only showed them through the home, but took time to tell about his cars and the souvenirs of his political career.

From his first election to the Senate his office was characterized by prompt handling of mail and his personal encounters impressed people with his ability to remember names and the personal concern for everyone.

Terry Montgomery will surely remember the campaign effort by Humphrey, in Princeton, when Terry was a candidate for Congress.

When a new publisher came to Princeton to take over the Union-Eagle he received a letter from the Senator wishing him well in the new venture. And so it went. Although deeply involved in the most important national and international issues and negotiations he never lost touch with the people back home. They always had a sense that he was concerned with each one of them and their problems—and they never knew it better than when they realized he was gone. As one visitor to the capitol rotunda said, "I never knew how much I appreciated him until he was gone." He walked with the mighty, but he never lost the common touch.

[From the Daily Journal, Jan. 16, 1978]

HUMPHREY LEGACY WITH US FOREVER

We've listened and read for three days as the learned and powerful people in the world have tried to bring to words the greatness of Hubert Humphrey.

As his remains enter the grave today, it's as if an important part of the world has ceased to exist. None of us living today—and many yet unborn—will escape being battered in some way by his love for his nation.

Few of us can expect to meet anyone else in life who was loved by so many for so long.

People drew strength and hope from him—and he from them. It was possible to quarrel with his ideas, but never with his intense desire to help those who needed help.

It's a measure of his achievement that most adult Minnesotans have a personal memory of his greatness. Even when he wasn't running for office, he made himself available throughout the state.

We recall being sought out in a motel room. He came to talk about some points on which we differed on editorials. He was at that time a former vice-president and was soon to return to the U.S. Senate. As always, he was one of the best informed men of his time. And there he was, taking the time to try to mend fences with a small town editor.

Some will recall having a beer with him in the Woodworkers Union Hall here in 1974. It was an old-fashioned political love feast in the finest of DFL traditions, and Humphrey reveled in it.

We recall greatest tests. It came at the Stock Yards in Chicago when he delivered his acceptance speech for the 1968 campaign.

His party was tetering. Dissenters from the left created an atmosphere of chaos. His trip to the convention center was made through check points and barb wire.

He later wrote: "It tested every nerve in my body, and it tested my will, my courage, and my capacity to overcome crisis and difficulty . . .".

His answer was the prayer of St. Francis of Assisi:

"Where there is hatred, Let me so love;
"Where there is injury, pardon;
"Where there is doubt, faith;
"Where there is despair, hope;
"Where there is darkness, light."

Hubert Humphrey was a product of love, joy, freedom and democracy. His legacy is a path of accomplishment so clearly defined that mankind will never lose it completely from sight.

[From the Stillwater Evening Gazette, Jan. 16, 1978]

HUBERT H. HUMPHREY, 1911–1978, A MAN FOR ALL SEASONS

President Carter called him "The most beloved of all Americans." Vice President Mondale called him "a second father". The press for years has referred to him as the "Happy Warrior." His fellow Americans who lined up by thousands to view his casket called him "this good man."

Humphrey entered politics in 1945 at age 34. He was known for cleaning up the city of Minneapolis, championing civil rights, introducing bills to aid the senior citizens and the disadvantaged, and opening doors to improve international relations.

He will be remembered for his gift of speech, his tireless optimism, his unfailing loyalty.

He will be loved for his inspiring battle against cancer. Even though he had been given the verdict of "terminal," he continued to live fully, attending to his duties in Congress, enjoying friends and family, and constantly giving a message of hope for the future.

The services today which honor him are not a memorial to the death, but rather a celebration of the life of Hubert H. Humphrey.

We salute this great leader for giving himself to others. He has taught us to be our brothers' keeper. He has taught us to understand how much we need eath other. He has put dignity and value in all work recognizing that each person's job well done is the best way to serve others.

We will miss Hubert; however he has left so much of himself with each of us that he will always be here.

We are grateful that he took time from his very busy schedule to be our Grand Marshall of Lumberjack Days in the late 60's. Just two years ago he came to Drum Beauty and spoke to us in the rain.

God will bless this great humanitarian.

NORWIN "RED" SWAGER.

[From the Mesabi Daily News, Jan. 15, 1978]

HE WALKED WITH PRESIDENTS AND THE COMMON MAN

"Without a doubt he was the greatest Minnesotan . . . he will long be remembered for being a champion of the underdogs, minority groups, senior citizens and so forth . . . One thing that surprised me was his ability to remember names . . . it was phenomenal. He'd meet someone once and the next time he remembers. I don't know how he did it. And his speeches . . . he didn't use any card system or anything like that."

Elmer Kivimaki of Virginia was talking Saturday about his friend, Hubert H. Humphrey. They shared a common bond. Both had cancer.

"I wrote to him. I told him I admired his fight," said Kivimaki, who had cancer surgery four years ago. "I received a letter from him about three months ago. 'You've got to have faith,' he said."

Hubert Humphrey was that kind of man. He never forgot his friends. He always seemed to have time for everyone. He walked with Presidents and with the common man and treated them equally. Even after he became one of the most famous men in the world he made people feel at ease in his company.

Four years ago, a young wire service reporter in Minneapolis was told to call Humphrey to get his reaction to a new development on Richard Nixon. The reporter was hesitant, nervous, but he made his call to Waverly and got what was probably the best story of his career to that date. Afterwards he said, "What a guy! It was just like talking to my nextdoor neighbor."

During his campaign, Jimmy Carter was critical of Humphrey but later called on him for advice on many an occasion. Carter sent Humphrey a photograph of the two men standing by the President's desk in the Oval Office.

Written on the picture were the words: "To Hubert . . . This desk should have been yours."

It almost was. If the 1968 presidential campaign had lasted a few more days, Hubert Humphrey very likely would have defeated Nixon and think what THAT would have meant in light of the black chapter in American history that followed a few years later.

The least important thing that could be said of Humphrey is that he very nearly became President.

In death, he joins a select company of American political figures who, like him, aspired to the nation's highest office yet are remembered not for that but rather for their valued services to their country in other capacities—as senators, cabinet members, ambassadors, Daniel Webster, for example. Henry Clay, William Jennings Bryan, Adlai Stevenson.

Like them, we remember Hubert Hum-

phrey not for what he might have been but for what he was.

What distinguishes a democracy from all other political systems is not merely the fact of individual liberty. It is also the opportunity it gives the talented and ambitious individual to play a role in shaping and directing the destiny of his fellows, an opportunity enjoyed by only the very few within the ruling power circle in the one-party, totalitarian state. Soviet history lists no Websters, Clays or Humphreys.

It is gratifying to be able to say that well before he died, Hubert Humphrey was given a preview by his colleagues and admirers of the eulogies that now attend his passing. At ceremonies in Washington last spring, speaker after speaker recounted his accomplishments.

Elected reformist mayor of Minneapolis in 1945 and 1947, Humphrey secured enactment of the first municipal fair employment practices law in the country.

In 1948, as freshman senator and ebullient liberal from Minnesota, Humphrey's eloquence—some would call it his ability to wear down the opposition—put over the then controversial civil rights plank in that year's Democratic platform. From that time on, he was a force to be reckoned with, both in his party and in the U.S. Senate.

Humphrey never quit, right up to the end. Characteristically, even though visibly aged and weakened following his first cancer operation in 1976, he did not rule out another try for the presidency in 1980. He was an eternal optimist, not only about his personal career but about his country. He was a believer in the future, and in the ability of free men to shape that future to their own desires.

He never attained the grand prize of American politics, that pinnacle of power called the presidency. But few major pieces of social legislation of the past three decades do not bear the stamp of HHH—from federal aid to education to Medicare to child nutrition programs to conservation acts.

Humphrey had a wonderful sense of humor. Reporters and others kidded him about his machine-gun delivery and called him "Motor Mouth." His speaking speed once was described as "About 250 words a minute, up to 500 in gusts." No one laughed more than Humphrey at that one.

Accepting an honor from his Senate colleagues last year, Humphrey began his response with: "Incredible as it may seem, I am at a loss for words."

Humphrey's political foes admired and respected him as much as his fellow Democrats. One of the greatest tributes came from Republican Sen. Bob Dole who said, "It is uncommon in life to find a man of such courage and compassion, fortitude and decency, a man whose fighting spirit is surpassed only by his spirit of charity and justice."

Uncommon indeed. Thirty years ago he called on Americans to "walk out into the sunlight of human rights" and then proceeded to help make Minnesota a model of progressive politics and become one of the most brilliant statesmen the United States has ever seen.

He loved life. He loved people. And he loved his country.

Norman Sherman, editor of Humphrey's autobiography, said:

"Ultimately . . . the measure of Hubert Humphrey may not be in his own legislative accomplishments, his counsel to fellow Senators, or his counsel to Presidents of both parties.

"It may be in terms of the young men and women who have followed him into government and public service from the day he first announced for Mayor of Minneapolis . . .

"Humphrey proteges are as prominent as Walter Mondale . . . They are as anonymous as the thousands of precinct workers who were turned on to politics by his speeches, his spirit, his enthusiasms."

No man could ask for a better epitaph.

[From the Journal, Jan. 15, 1978]

TIME TO MOURN

(By Roger Matz)

The battle is over for our "Happy Warrior," Sen. Hubert Humphrey.

His death at 66, caused by inoperable cancer, snuffed out a political career that might have gone on for another two decades.

Although Humphrey was a life-long winner, his death Friday night represents the last of two major and painful losses. The first was his failure to defeat Richard Nixon for the presidency in 1968.

"If" is a big word in politics and history. "If" Humphrey had not loyally backed Lyndon Johnson on the Vietnam war for so long, he might have defeated Nixon. "If" Humphrey had become president in 1968, a painful era in our nation's history might have been less painful.

However, this is not a time to dwell on "if" or "might." This is a time to mourn for a man who rose from the Dakota plains to the second-highest office in our nation.

Humphrey literally built a political party in Minnesota. He served our state and nation for a lifetime, alienating some but warming the hearts of many.

He will be remembered and missed.

[From the Faribault Daily News, Jan. 16, 1978]

HUBERT H. HUMPHREY

Hubert, we'll miss you.

You made us laugh, made us cry. You forced us to see things we would have rather ignored; you criticized us then gave us hope; you taught us to look ahead, not back. When we listened to you, we felt good, even if we didn't agree with what you said.

We were amazed by your boundless energy, amused by your endless reservoir of humor, in awe of your seemingly limitless powers of speech.

We didn't mind when you went in public; it was refreshing to see a politician who shared the same emotions, the same human frailties, as the rest of us. You were a true "public servant," because you always had time for people.

You taught us to appreciate compromise, to understand that, no matter how dedicated to a cause one might be, halfway is better than no way.

But we Americans weren't the only ones who knew you. You were one of the United States' foremost world statesmen. You were respected, applauded, cheered in other nations, because you, often more than any other American, understood the problems of the Orient, of Europe, of the Third World.

From you we learned the gentle art of "bouncing back," of retaining one's self-respect despite defeat. And, recently, you gave us the best example we've seen of how to die with honor. You knew your cancer was terminal, yet you set about your daily tasks, you immersed yourself in your work, you never forgot your family and friends.

Many things will be said and done in your name. We may not agree with all of them, but that's not so terribly important. What's important is that you were—and are—an inspiration. An inspiration of what dedication, compassion, intelligence, hard work and humility can do.

We'll miss you, Hubert.

[From the Brainerd (Minn.) Daily Dispatch Jan. 15, 1978]

HUBERT

It is a sad day in our state and our nation today. Hubert H. Humphrey is dead. That strident voice that could go on and on with authority on innumerable subjects has been stilled by cancer.

The man who lead the fight for civil rights in our nation, and won against untold odds way back in the days of Harry Truman—the man who wanted to be president and sought it with a passion few of us can understand—the man who suffered the most crushing of defeats and never lost the faith—the man who learned he would die and used that knowledge to teach a nation how to live—the man who couldn't win the battle to be his nation's leader but captured its love in his final days—is dead.

From Brainerd to Miami, from Boston to Los Angeles and most of all in Washington, D.C., where he really made his mark in history as a United States Senator, there is sadness and reflection today. Everyone knew his death was imminent and yet his optimism, his courage and the infectious Humphrey personality pushed this aside and somehow we succumbed to the fantasy that the Happy Warrior would somehow win this battle.

But despite his exuberance and his optimism, Mr. Humphrey never lost sight of the real world. He knew he was dying just as surely as he knew a short time ago that his last hope for the presidency had gone winging away on the toothy smile of a man from Georgia. The important lesson he left us is that defeat is no excuse for despair. After he lost the battle for the presidency he bided his time until he could seek election once again to the Senate and campaigned with the same energy and fervor in his own state that had characterized his battle to become the nation's leader, and this time he won. And when he discovered that he was engaged in an uncompromising fight with cancer, he launched a battle to live and permitted unpublicized and unprecedented treatment for cure of the dread disease so that others might live. He may have helped to win that battle for others, but not for himself.

Perhaps, as he often intimated, he drew his strength, his courage and even his optimism from his humble roots in South Dakota. He knew the debilitating effects of poverty as a child who grew up in the dust bowl era and felt called as one of the nation's leaders to help alleviate proverty and suffering. His liberal programs in that direction brought him criticism from a number of us who felt that they were too liberal and too costly.

And yet, when we criticized these programs, we never criticized the man or his motives.

Perhaps all this makes him sound less political than he was. Perhaps, but then we firmly believe that in the person of Hubert Humphrey there had been a rare and perfect union of politician and humanitarian.

There can be only one way to sum it up and we are sure it is the way he would want to be remembered—Hubert H. Humphrey was a great American.

[From the Owatonna People's Press, Jan. 15, 1978]

FAREWELL HUBERT!

Hubert Horatio Humphrey. It is a name with curious alliteration, and even a certain pomposity about it that seemed appropriately suited to the long-winded Senator who bore it so proudly.

"Be careful what you say to the press," Humphrey once cautioned good naturedly. "You may be quoted accurately!"

Even though he was a towering figure on the Minnesota and national political scene for more than three decades, in many ways Hubert Horatio Humphrey was always the new kid on the block—poking around here and there, pugnacious and alert, ready to defend and protect, preserve and promote.

He was an idea man, frequently ahead of

his times, yet persistent to battle doggedly in the face of defeat; confident that tomorrow would be a better day. He was, well . . . Hubert.

He excelled at oratory. He could warm up a crowd and elicit responses to a degree very rare in our modern society. As so often happens with men of vision and persistence, he could attract hate and derision, too. He took the lumps in stride, however, including a traumatic razor-thin loss to Richard Nixon in 1968 in their battle for the presidency.

Minnesota has generated men of exceptional stature on the recent political scene. But Hubert Horatio Humphrey will surely be remembered as the outstanding Minnesota newsmaker of the 20th Century.

Now he, too, belongs to the ages.

REGION LOSES FAMILIAR FRIEND, REVERED LEADER—30 YEARS OF MEMORIES

(By Ray Crippen)

These are snapshots of Hubert Humphrey at Worthington and in the local area you might be interested to see. They have been accumulating through 30 years and the collection has become unmanageable. Nothing is in order.

This is a favorite. Humphrey at the Nobles county fair, 1970, running again for the Senate after four years as vice president and two years out of politics. That was a sunny day of triumph.

His opponent that year was on the fairgrounds long before HHH arrived, moving from person to person, shaking a hand wherever he could find one. Not too many were interested in another politician.

About 3 p.m. there was the noise of a chopper, a helicopter, circling the fairgrounds. Hubert H. Humphrey. In plain view and waving. Everyone was looking up, even the carnival people. Many began waving back.

The 'copter came down on the track in front of the grandstand and people flocked to get near it, squeezed through the gates, ran to get near Humphrey. Many wanted autographs.

"You can't beat that," a Republican of many years recognized and conceded.

HHH, in a soft blue dress shirt and tie, no coat, ran a comb through his hair twice and stepped from the aircraft, smiling, waving, greeting. He led the crowd to the midway. Everyone wanted to shake his hand; he would have needed six arms. He made a tour of the exhibits, talking first with one and then another about everything from farm economics to pollution controls to Russian attitudes.

There was a girl 12 or 13 years old with her hair in braids. She was wearing a white T-shirt with 4-H on the front and she had a bandage on her arm.

"Hi honey," said Humphrey and he placed a hand on either side of her head nad turned her face toward his. "You get that arm healed up now, you hear?" He took another hand which was pressed toward him. "4-H. That's a good group. I never belonged to it but I admire it. 3H was as far as I got."

That was a quarter-century after Humphrey's visit to Worthington in October, 1948. The first campaign for the Senate. Turkey day, of course, and a miserable day. Wet and cold. Bebe Schapp, Minnesota's Miss America was there.

The incumbent senator was Joseph Ball. He really wanted to be at Worthington, he said, but he just couldn't make it. Everyone understood that; it was miserable weather. In fact, Turkey Day had been scheduled the day before but the weather was so bad the event was postponed. Air travel was impossible. All travel was difficult.

But there was HHH. Beaming. Grinning. Standing in the rain and waving.

"We must always remember this is good for crops," he said. "And what is good for crops is good for us all," said the candidate who had lived through the drought in South Dakota in the 1930s.

Humphrey, slender, dark-eyed, black-haired mayor of Minneapolis, won his Senate seat the next month. Turkey day at Worthington was key to explaining how he defeated a popular incumbent in a Republican state. He was the first Democrat ever elected to the U.S. Senate from Minnesota.

Turkey Day 1959. Cold and gray as any Turkey Day has ever been. Humphrey was there; everyone said, "Of course." But that was not a usual HHH appearance.

Nikita Khrushchev was touring the United States. That very day—Turkey Day—the Russian premier was to meet with the U.S. Senate Foreign Relations committee at a Washington reception which had the attention of the world. Humphrey was the committee's second ranking Democrat.

At Worthington, the Turkey Day committee speakers' committee had struck out. One invitation after another was declined. Local Democrats appealed to Humphrey on the telephone. There was no one to give a speech.

HHH consented to make the trip, got to an airplane, flew to Worthington. There was nothing but a portable platform that year, set up on 10th Street in front of Hotel Thompson.

When Humphrey got up to speak there were snowflakes in the air. The crowd before him was thin. People were reluctant to give up curbside parade seats. Hubert did a performance as fine as any the region had ever seen.

"I would rather be here with the people of Minnesota than with the premier of the Soviet Union, any time," he called out shrilly. That raised cheers in the chill air.

Still, by determination and some extraordinary scheduling, HHH was back at Washington that evening in time to share in the spotlight with Khrushchev and the Senate committee.

It was campaign oratory at Worthington. Political gimmickry by a master but gimmickry nonetheless. HHH kept in mind always, if no one else did, that he could not be a leader, a statesman, a good senator—he could not be even a poor senator—if he did not win elections. The experience of Joe Ball at Worthington was convincing evidence that no one could win elections by pleading important work and bad weather, even when the work was important and the weather was foul.

Humphrey said he had a special feeling for Worthington and Turkey day. This was certain. There was no event in Minnesota he attended more faithfully through three decades. Some local residents believed it was a kind of superstition. Some said he had come to look upon Worthington as his hometown.

He often brought friends. Adlai Stevenson one year. Lyndon Johnson. Vice presidential candidate John Sparkman.

HHH introduced Congressman Eugene McCarthy from St. Paul to the Worthington Kiwanis club and told them he believed McCarthy would make an outstanding U.S. Senator. He came to Worthington with Walter Mondale and said there was no one more worthy of voter support. (It was an irony; the southwest counties gave more votes to McCarthy and Mondale than they did to Humphrey.)

One year Muriel brought Lady Bird Johnson, Abigail McCarthy, Jane Freeman.

Humphrey did not limit visits to Turkey Days:

Worthington Community College commencement, 1975. HHH was characteristically late. Not unseemly late. Just late enough to make a lone, dramatic appearance. None was ever more startling than on the evening. He came on the stage, smiling at the audience, smiling at himself in a gown of cardinal red with an outsized black cloth cap, academic apparel which had been bestowed on him when he was given an honorary doctorate by Georgetown University.

Turkey Day 1966. Bright orange autumn warm and vibrant. That was the Turkey Day of triumph for Humphrey and there were thousands who came to be with him. The committee always said 50,000 or 70,000 but if they were exaggerating in some years they weren't that time. Hubert Horatio Humphrey, Vice President of the United States of America, on the steps of the Nobles county courthouse. The first vice president ever from the state of Minnesota. Everyone present shared in a sense of an ultimate achievement.

On May 27, 1911, South Dakota was only 21 years away from territorial status; the state was not 25 years old. The last U.S. battle with Indians, at Wounded Knee, had occurred only 20 years before.

The population of Wallace, where Hubert Horatio Humphrey Jr. was born, was not 200. The population of nearby Doland, to which the Humphey family moved, was not 500.

There were no places in the Nation which was any more accurately characterized as "remote."

It seems unlikely that Mother Humphrey would ever have said—on that wind-blown, parched latter-day frontier—that this was America, the land where any boy might one day grow up to be president of the United States. That prospect for the second son in an impoverished family of a self-trained veterinarian-pharmacist was so unlikely it would have been mocking to suggest it.

At Wallace today the Humphrey birthplace is gone. The people have set up a fence around the vacant corner lot on the main street and made a park. They set up some playground equipment and they planted two trees but one died. There is a hand-lettered sign which announces, "Birthplace of Hubert H. Humphrey." There are not many people through the course of any year who see that site.

Doland remembers Humphrey well.

[From the Union Advocate, Jan. 23, 1978]

MEMORIES OF A FRIEND

(By Gordon Spielman)

Like so many other Minnesotans who were privileged to know Hubert Horatio Humphrey over a great many years, I confess to being emotionally drained, and at a loss for words on what to write or how to write it.

Since this is a very personal experience, I'm dropping the pretentious editorial writers' "we." Hubert would have liked that, since if he hated anything it was pretense.

I don't intend to write about Hubert Humphrey's great deeds, or even his great heart, others have written so much, and so much better, these past days.

Yes, the world, the nation, and Minnesota will remember him as the champion of the underdog, of the workers, and the farmers, the minorities, the young, and the old, the hungry, the sick and poor, no matter what part of this globe they lived in.

But, I remember the warm, gentle person, whom I met some 30 years ago, soon after moving to Minnesota.

I remember the young people he attracted. A young college student, Fritz Mondale who came into the office of the southern Minnesota newspaper I then edited, to ask how he could raise $100 (a massive sum in those days) to open a Humphrey campaign headquarters in the district.

There were the county fairs which Hubert loved, mingling with the people playing a darts game (run by a veterans organization) with blankets as prizes. He was usually among the last to leave after visiting with as many people as he could.

I was among the fortunate to accompany the Senator on a number of campaign tours. Driving at breakneck speed between speaking engagements, H.H.H. gently suggested, "Slow down, we'll both live longer."

Yes, there were the disappointments as in Wisconsin and West Virginia in 1960, when Kennedy money sealed the primary campaigns.

But, when John F. Kennedy received the presidential nomination Hubert Humphrey went out to campaign for Kennedy helping him win that small margin that put him in the White House.

If Hubert Humphrey had a fault, it was his loyalty to his party and his friends.

Again, in 1972, when George McGovern won the nomination and much of the labor movement was ready to sit out the election, and some few unions even supported Richard Nixon, Humphrey, the loyalist, again hit the campaign trail to try to convince the country that there was a choice that had to be made.

There were the moments of triumph.

Among them was at the 1964 Democratic National Convention at Atlantic City.

I was privileged not only to be there, but along with Bob Gomsrud, then Minneapolis Central Labor Union president; John Curtis, then of the Hotel and Restaurant Employees; and a Rochester man whose name escapes me; we were chosen as Hubert's bodyguards. (We were the tallest in the Minnesota delegation.)

Hubert kidded about needing "security" even as the running mate to President Lyndon Johnson, after we were sworn in as temporary Atlantic City police officers.

Hubert Humphrey's loyalty as vice president to a president committed to an unpopular war cost him the presidency in 1968.

It was the only time Hubert lost, that I saw him disturbed by the loss. Yet, even then, he seemed more concerned about the future of America under a Richard Nixon than he did about a personal defeat.

He made no bitter statements (as did Nixon a few years earlier about not "have a Richard Nixon to kick around any more"), but gave of himself as a teacher until the people of Minnesota called upon him once again in 1970.

I remember an appearance of the Senator at the Minnesota AFL-CIO Convention in 1971. (Hubert never missed a convention if he could help it and would speak to the delegates by telephone if no other way.)

In those days the Union Advocate was printed and mailed on Wednesdays for Thursday delivery, and I asked the Senator's office for an advance copy of his speech that was to be given Wednesday morning near the close of the convention.

We even had copies of the paper with the Humphrey "speech" rushed to the convention hall for the delegates to take home with them.

Well, Hubert Humphrey seldom stuck to the text of a prepared speech in his life. This time, Hubert not only spoke off the cuff, but didn't even cover any of the topics of the advance text.

He must have seen the anguish on my face. Just before closing his rousing address, he picked up the prepared copy and rattled off a few choice paragraphs, and the Advocate editor was saved!

He never left a friend in a lurch.

In closing these rather disjointed, rambling memories, I'd like to note that there was another dividend in knowing Hubert, and that was in getting to know Muriel, who often accompanied him and gave him great strength at times of trial.

The world has learned these past days, what we in Minnesota have known for years about this unique couple. I'm grateful to have known them both.

[From the Winona Daily News, Jan. 16, 1978]

SOME HUMPHREY MEMORIES

(By William F. White)

SATURDAY.—I just put on my high boots and waded through the snow out to our flag pole to put the flag at half staff for Senator Humphrey. The snow was a lot deeper than I thought it was and several layers of old crust made the walking tricky. There were new deer tracks since last night's dusting of snow.

Last night I was just putting the finishing touches on a column when I learned on television that Hubert H. Humphrey had died. The column I was writing was about Camp David, where President Carter had taken him for his first visit just before Christmas, and the article recalled how my wife, Dare, had been snowed in there as a guest thirty years ago.

Senator Humphrey's death made the timing of the column inappropriate, and I'll save that one for later.

Senator Humphrey had the marvelous faculty of making everyone he came into contact with feel that he was interested in them and was personally their friend. His memory for people, faces and past situations was phenomenal.

Early in our marriage, our politics were like explosives—it's a wonder we made it through the thick and thin. My family had a long history of Republicanism. Dare's father, Jack Lamberton, for a long time was the Winona County Democratic Party chairman, early in the New Deal her mother was Minnesota's Democratic National Committeewoman, and Dare's mother's family was split down the middle between the two parties. It made for a lot of fireworks.

The first time Dare and I met Senator Humphrey was at Dare's mother's newly constructed house in Glen Mary. There was a gathering of about 30 avid Democrats and miserable me, who at about the same time was involved in my only dabbing into politis—I had worked like fury to get elected to the state Republican Party Convention to support the candidacy of General Eisenhower over Taft.

I had the feeling everybody there knew I was in the enemy camp—except Senator Humphrey, and there was born in me on the spot the respect I always have had for him since.

Dare's Aunt Henet Leicht Kaufmann knew Senator Humphrey before anybody in the family did. She was head of the WPA in 1940 in Minneapolis when Humphrey, while a graduate student at the University of Minnesota, took a WPA job directing a worker's education program in the Twin Cities which provided the beginnings of his support by labor. She was his boss.

Many, many years later, I guess while he was Vice President, he spotted Henet and Mel Kaufmann's daughter, Holly, a student at USC, in a street crowd in California and went up and greeted her. The last time he had seen her she had been in pigtails and he had no way of knowing she was in California. His memory was at least as good as Jim Farley's.

Our children, too, were lucky to have had personal contacts with this great man. When our son, Angus, was 12, and his sister, Dana, was 10, their Grandmother Lamberton took them on a trip to Washington where they joined up with 12-year-old cousin Peter Lamberton from New York. Senator Humphrey took the group to the Senate restaurant for lunch. Angus wanted an autograph but didn't have a piece of paper, so the good senator autographed his tennis shoe.

Some years before that Dare, her mother and I had been his luncheon guests, and we remember having Senate Bean Soup at his suggestion. That was during the McCarthy hearings, which we watched part of.

One of the most electric moments I ever experienced was on that occasion. We were getting on the Senate elevator. The last person to enter was Senator McCarthy, himself—all smiles. The coldness of the silence prickled. It was clear where all on the elevator stood with respect to him, and feelings were running high.

Our youngest daughter, Andrea, who went to a school near Washington, worked in Senator Humphrey's office one day a week for a time. All the girls were assigned tasks on the Hill as part of their political science program.

Shortly after Mr. Humphrey was elected Vice President, Dare and I saw him in the lobby of the Sheraton-Ri z Hotel in Minneapolis. I was about to speak to him when the Secret Service whooshed him into the elevator so fast I lost my chance. I mentioned this in a letter to him about something else, and he wrote back urging us to do anything necessary to get his attention if the situation should occur again.

When he learned that the Casual Observer had suffered a stroke and was incapacitated, he sent her a ticket to President Johnson's Inaugural Ball, knowing that it would brighten her spirits, and his condolences at the time of her death were immediate and sincere.

The last time we saw him was in the Rochester airport last April. We were on our way to San Francisco, and he had been in Rochester to see his wife who had had surgery there. He was all alone, carrying a valet pack and seemed glad to see us. He had recovered from the effects of his earlier chemo-therapy treatments and looked chipper and full of energy. It's a nice way to remember him.

[From the Pioneer, Jan. 17, 1978]

HUBERT H. HUMPHREY—"O-GE-MA NAH-GUAN-E-GWON-ABE"

(By Chief Leading Father)

The Red Lake Band of Chippewa Indians pays tribute to our friend and brother, Hubert H. Humphrey. The sorrow of his death shall be locked away in our hearts but the memory and image of his active support and genuine friendship will be carried with us always.

The Happy Warrior always took the time from his busy schedule to stop in to say hello whenever he was in northern Minnesota, or to call to inquire about how we felt about certain legislation, or to personally acknowledge our correspondence, or to call just to find out how we were getting along.

In our determined struggle for the better life, the Happy Warrior gave us reassurance by his aggressive support; a renewal of courage by his own example; a revival of trust in our government; and, most of all, an edible inspiration to carry on in our battle for our hopes and aspirations.

Our lives will be better because of our chief, "Nah-Guan-E-Gwan-Abe".

May he find everlasting peace in the Happy Hunting Grounds.

HUBERT GREETED TRIUMPH, DISASTER EQUALLY

(By Walter T. Ridder)

Washington—For me, American politics will never be quite the same without Hubert Horatio Humphrey. He and I met in St. Paul in 1943 and our paths were entwined for the rest of his life.

Hubert and I ranged the whole world together—from the boardwalk at Atlantic City, to the demilitarized zone between North and South Korea. We criss-crossed the United States as he campaigned successfully for the vice-presidency and four years later saw the elusive holy grail of the presidency dangle tantalizingly out of his reach.

We were together at moments of his greatest triumphs and moments of his bitterest defeats. Kipling wrote: "If you can meet with triumph and disaster and treat those two imposters just the same . . ."

Hubert had an enormous ability to remain just as he was—himself. The glory of victory would soon wear off and the bitter dregs of defeat would soon be swallowed. Hubert would revert to his normal ebullient self and maintain the even tenor of his ways, that is

if one could use the phrase "even tenor" in regard to him.

If a man's worth is to be judged, as someone once said, by how he lived the life and passion of his time, Hubert's worth was very, very high. There was no facet of contemporary life in which he did not show an interest. He became an expert on such diverse affairs, economics and oceanography.

His great fault was that he dove with equal fervor and enthusiasm into every subject and embraced the smallest item with as much energy as the largest. He had in a way no sense of priorities nor an ability to cull the essential from the non-esential. For that reason, he was a lousy administrator.

Hubert had the fastest and the most retentive mind of any mind with whom I've ever dealt. He seemed to know everything and to forget nothing. I've seen him leave my home at three in the morning, excusing his early departure by stating that he had to bone up on something before going to bed. Later the same day, I'd hear him give a speech on the Senate floor, and you'd think he had been studying the subject all his life.

Hubert's oratorical gifts became legendary early in his political career. No one who heard it will ever forget his civil rights speech at the Democratic convention in 1948. Some years later, I was with him at the University of Washington during a presidential campaign. He gave a prepared address for the television cameras. When the little red light went off, Hubert turned to the students and said. "Let me add a few more things." He then proceeded to ad lib what all who listened considered the finest political speech they'd ever heard.

His oratorical eloquence was based upon superb choice of words, a remarkable ability to fashion a striking metaphor and a sense of humor which kept the speech bounding along.

Unfortunately, he often became so fascinated by his own oratory that he forgot to end the speech. Hubert and John F. Kennedy once debated at a Midwest campus. Later, Kennedy told me: "Hubert opened and for the first 10 minutes I thought 'God, I can never beat this.' After the second 10 minutes, I said, 'This is going to be tough.' After the third 10 minutes, I thought 'Maybe there's hope,' and after the fourth 10 minutes, I knew I had him."

Intellectually, Hubert knew of his propensity to talk overly long. He repeatedly promised his wife and anyone else in sight that he was going to reform, but the reform never came. His emotions simply swept aside his intelligence.

The old saying goes that "They don't make 'em like that anymore." If they don't make 'em like Hubert anymore, it is for the simple reason that they never made 'em like him in the first place.

He was, in the truest sense of the word, "unique." He was a man of enormous talents, enormous zest for life and enormous compassion. He started as a brash, street-fighting mayor of Minneapolis and ended up as the most respected elder statesman in the United States Senate.

He achieved every goal for which he strove, save the presidency. He danced through life, laughing mostly, crying sometimes, but always seeming to make people feel a little happier for having him around.

I was always proud that he called me friend.

THEY MADE HHH AT HOME ON IRON RANGE

(By Robert J. O'Keefe)

He was a young Hubert Humphrey, less than two years a U.S. senator, with the entire world of politics waiting for him.

The future vice president was already well known nationally, but on this fall afternoon he wasn't in Washington. He was in Hibbing, practicing the art which was his trademark—speaking.

It was my first contact with Humphrey, the first exposure to his speaking ability and friendliness.

Humphrey's charm and ability to communicate were two of his most notable characteristics. He had additional features, including the ability to endure when others might have fallen from exhaustion.

In Hibbing, in the closing months of 1950, the 39-year-old senator addressed the chamber of commerce, which met once a week at noon and made a practice of adjourning by 1:30 p.m.

But for one day at least, the businessmen in the Iron Range community had their schedule changed. Humphrey, who had taken office as Minnesota's first Democratic-Farmer-Labor senator the preceding year, spoke until 2:30 and nobody left.

Not only was it my first contact with Humphrey, but the first with anybody more important than the mayor of Hibbing, and it seemed that the safest approach was honesty.

So after the meeting, I approached Humphrey, explained that I had never written an article about a U.S. senator before—had never seen one in fact—and asked if he could explain which parts of his lengthy talk were new—that he hadn't said before.

Patiently, the future presidential nominee said that the most "newsy" part of his speech was probably the support he expressed for President Truman's foreign policy.

Later in the day, we met again along Howard Street, the main street of Hibbing. It is easy to still picture Humphrey, wearing a dark overcoat as he window-shopped in the dusk.

That afternoon and early evening in Hibbing displayed much of Humphrey, his speaking ability, friendliness, the joy he got just from walking along the sidewalk mingling with Minnesotans.

He could talk. Oh, how he could talk, just as he did to the Chamber of Commerce.

Almost without exception, his speeches were long. He used to joke that his wife told him speeches didn't have to be eternal to be immortal, but it didn't stop him.

He was friendly. It could be said that of course he was friendly with a reporter, because he liked to have his name in the newspaper. But there was more to it. One of the last times I talked to him was last August, in a call to his home in Waverly. Unknown to me, he was in pain at the time, but he still took time to talk about a judicial appointments bill under consideration in Congress. He didn't have to be courteous and patient over the phone, under the circumstances, but he was.

Since the speech he gave in Hibbing more than 25 years ago, there have been countless other opportunities to watch Humphrey in action.

The 1958 state DFL convention in Rochester where Eugene McCarthy was endorsed for the U.S. Senate . . . the 1960 campaign when he, John Kennedy, Orville Freeman and many other Democratic figures drew a record crowd to the Hibbing Memorial Building . . . the 1964 Democratic national convention, when he was nominated for the vice presidency . . . a news conference Humphrey held with Lt. Gov. A. M. Keith after the tumultuous state DFL convention in 1966 . . . the 1968 national convention which nominated him for the presidency.

His news conference in Waverly in 1970 when he announced he would run for the Senate again . . . the call he made to reporters in the state Capitol from his hospital bed in New York City where he was undergoing cancer treatment in 1976.

A prime example of Humphrey's endurance came in late 1959 and early 1960 when he was running against Kennedy in the Wisconsin presidential primary and at the same time had to keep his fences mended in Minnesota because his Senate term was ending here. If he didn't wind up as the Democratic presidential nominee, he wanted to run for another Senate term here.

Here is a two-day stretch of activity in Duluth and across the bridge in Superior, Wis.

At noon he was at a DFL event in Duluth, which included a news conference. In the afternoon, he was in Superior addressing college students. At night, he was back in Duluth, singing Christmas carols with Steelworkers in their Union hall until almost midnight.

The next morning he was in Ely. During the day, he was campaigning along the Iron Range with Lt. Gov. Karl Rolvaag. And in the evening he left by plane for Wisconsin.

There is also an example of his persuasiveness and speaking ability which stands out.

It occurred in the 1970 campaign when Humphrey was opposed in the DFL primary by Earl Craig of Minneapolis. The Republican for the Senate was Rep. Clark MacGregor.

Craig was the candidate of many liberals in the DFL who apparently still remembered Humphrey's involvement with President Lyndon Johnson and the Vietnam War.

At an appearance in Roseville, it was noticeable that most of the applause as the candidates were introduced went to Craig, with MacGregor second and Humphrey last.

Even though many of the people in the audience favored Craig, the applause at the end of the meeting favored Humphrey, with Craig second and MacGregor last. Humphrey had spoken strongly, responded to questions quickly and with authority, and persuaded the audience that he had the ability to again be a U.S. Senator.

There is also a memory indicating loneliness for Humphrey.

It occurred between 1968 and 1970, the two-year period when Humphrey was a private citizen between his four years as vice president and his return to the Senate.

President Nixon had made a major statement about the Vietnam War. Humphrey was living in St. Paul while teaching at Macalester College, and it seemed worthwhile to get his reaction to Nixon's position.

* * * souvenirs he had picked up in his travels throughout the world as a Senator and vice president. It was clear that Humphrey yearned to be back in political office. In private life, he was lonely.

One of Humphrey's last major appearances in Minnesota came in September of this year at the state AFL–CIO convention.

He spoke of the cancer striking at him, and said that when things were hard to take, whether it was the illness he was battling or the political opponents he had battled in the past, he sought out his friends.

"When I'd get down and out . . . I'd go over to a labor hall or I'd go up on the Iron Range," he said. "I'd see my friends and I'd get all pumped up again."

There were no friends who could get him "pumped up" enough to defeat his latest and most devastating opponent.

THE PUBLIC MAN . . .

(By John Carman)

Hubert Horatio Humphrey was born with the gift of gab and a sense that an imperfect world could be made better.

His torrent of words dazzled his classmates in high school, intrigued his professors in college, enthralled luncheon groups in Minneapolis and infuriated his adversaries in the Senate.

His reputation preceded him to Congress. Soon after he arrived in Washington in 1949, Senate veterans reminded him of a unwritten rule requiring six months of silence from newcomers.

But Humphrey was too mercurial for restraint. He paused only to tell an aide to

brief him on protocol, because "I'm liable to start sliding down the bannisters."

His high-velocity speech, brimming energy and heartfelt liberal convictions stung the Senate establishment. Some questioned his intellect while acknowledging his facile mind and quick tongue.

At one point, Lyndon Johnson depicted Humphrey as "a man who prepares for a solid, thought-provoking speech by taking a deep breath."

The restlessness of Humphrey's early Senate days yielded to a system of values that enabled him to be comfortable with compromise and even painstaking deliberation. His career would have been less prodigious otherwise.

He became a gregarious, ambitious workhorse. Yet, whatever mellowing process he experienced as his responsibilities grew, he remained a man who shared his emotions with the public.

His joy in campaigning, however corny the circumstances, was undisguised. He relished public life and loved people. The human qualities, and human faults, seemed always at the surface.

He was notorious for falling behind campaign schedules, surrendering to a compulsion to linger too long and talk too much. The public saw the tears well in his eyes when he would withdraw, painfully, from losing efforts.

He made enemies, but rarely for life. Many Americans who were repelled by Humphrey's politics were captivated by his personality; even when they tried, they could not bring themselves to hate the man.

Humphrey's success with his Minnesota constituency was easily understood. A phenomenal number of ordinary voters felt a personal bond with Humphrey, believed he would recognize them, know their names and neighborhoods, share a thought.

Humphrey kept faith with the system. He was among the last of the political greats spawned by the New Deal era. His brand of liberalism was classic in U.S. politics. People were good. The system was fundamentally sound. When problems and inequities arose, the federal government existed to deal with them.

With his death, Humphrey leaves behind a gallery of political figures, past and present, who at one time or another looked to him for instruction or inspiration: Orville Freeman, Arthur Naftalin, Eugene McCarthy, Walter Mondale, Wendell Anderson and others.

Humphrey was quintessentially a public man. Curiously, though, even some who were close to him wondered about the inner personality.

"The trouble with Humphrey is he never takes time out," a former aide once wrote. "He's never alone with himself. If the guy would only sit down with himself and say, 'What am I all about?' But he's afraid to ask himself that question."

The answer to what Hubert Humphrey Jr. was all about, Humphrey himself suspected, lay largely with Hubert Humphrey Sr.

It was his father who drilled the work ethic into Humphrey, provided his son with a small-town upbringing and the easy conviviality of the family pharmacy and soda fountain, and schooled him ardently in traditional Democratic politics.

It was his father's experiences that introduced Humphrey to hard times. As the Depression swept into South Dakota, the elder Humphrey had to sell the family home and take to the road peddling a hog serum.

Depression years on the prairie left a mark. South Dakota dust storms and financial distress left Humphrey so discouraged that he felt compelled to return in 1937 to the more refreshing academic life in Minneapolis with his bride, Muriel.

He carried into his political career the lesson, learned firsthand from his family and neighbors, that calamity doesn't discriminate. It could strike even the innocent, those who have labored honestly for lifetimes to avert it.

A biographer later wrote of Humphrey, "Beneath his buoyant optimism is a small but hard seed of fatalism. Under his ebullient confidence runs a streak of insecurity, a fear that forces outside his control might, at any moment, darken his world, destroy his achievements and depress his spirit."

Humphrey's compassion for the dispossessed became a mainstay of his liberalism, but it was tempered by his small-town, middle-class boyhood of the pre-Depression years.

Humphrey always distrusted radical politics and exotic lifestyles. In some respects, he suffered for clinging so tenaciously to the mainstream.

Early in his political career, and again when he was a presidential candidate, Humphrey was attacked from the left. Twenty years before Humphrey faced the opposition of the antiwar movement, he'd been denounced as a "threat to the common people" by the left wing of the fledgling Democratic-Farmer-Labor Party in Minnesota.

Humphrey's background, too, accounted for the curiously tough rhetoric he used in times of pique or in the heat of campaigns. One can hear his father's admonitions in Humphrey's words:

"I hear people say, 'I don't like that kind of work.' Well, who the hell does? I used to swab out the toilets when I went to college and we were caretakers for a fourplex.

"I repaired the roof, fixed the plumbing, cleaned the sewers, shoveled the snow, and, besides that, worked six hours a day in a drugstore for 20 cents an hour.

"So, when I hear people say, 'I don't like that kind of work,' I say, 'Well, isn't that too bad.' "

If Humphrey could grouse freely about "purists" on the left, he never could bring himself to renounce one form of purity—political loyalty.

He treasured loyalty among his aides and supporters and remained loyal to his own political benefactor, Lyndon Johnson. His unwavering service to Johnson became Humphrey's greatest political liability.

Humphrey revealed the brusque Johnson's hold over him most tellingly in his autobiography, "The Education of a Public Man." He described an incident at the LBJ ranch in Texas, when Johnson was president and Humphrey was in the Senate.

"Early one morning . . . we climbed into his Lincoln," Humhprey wrote, "and Johnson, guns at the ready, drove slam bang and lickety-split across the countryside until we spotted one of the many deer that grazed on his ranch. He slammed on the brakes, and in his commanding voice said, 'Hubert, there's one for you. Get it!'

"I am a fairly good shot and have hunted duck and pheasant and quail fairly frequently throughout my life. It was an easy and natural thing on the South Dakota prairies and wetlands. But I never liked to shoot four-legged creatures, deer particularly.

"Nevertheless, I got slowly from the car, lifted my rifle, set myself for its kick, and brought down the deer. I turned to Johnson with a mixture of satisfaction at having done so well what he wanted and revulsion at having killed the deer.

" 'Well,' he said, 'Bobby Kennedy got two of them. You're not going to let Bobby get the best of you, are you?' Before there was time for an answer, the car sped on its way again, until we spotted another deer. As he slammed on the brakes once again, Johnson said, 'Now's your chance. Hit that one.' I hit it, and the deer fell."

The spectacle of the obedient senator killing animals at Johnson's behest surely is not how most Americans will want to remember Hubert Humphrey.

Most are likely to remember instead a South Dakota pharmacist who worked hard and made good, a politician who talked forcefully about civil rights before it was fashionable to do so, an intensely human figure who believed in his nation and came within a hair of leading it, a man who welcomed life with cheer and optimism.

This was the Humphrey who sought the presidency while the nation was at war abroad and enduring assassination and upheaval at home. As his staff members fretted about the acceptance speech Humphrey would need at the 1968 Democratic National Convention, he wrote a memo for them.

He told them to remember above all that "there is a basic reservoir of good will and decency in America; if we can harness this reservoir and make it work, we can yet control our own destiny."

Mr. ANDERSON. Mr. President, the outpouring of admiration and respect for Senator Humphrey after his death extended across the country. Many of my colleagues have added to this tribute the editorials from newspapers from their own States. The situation was no different here in Washington, D.C. I ask unanimous consent to have printed in the RECORD as part of this tribute the following articles from the national press following the death of Hubert Humphrey:

HE HELPED A NATION FIND ITS CONSCIENCE

(By Lyle Denniston)

Hubert Horatio Humphrey helped a nation find its conscience, coaxed liberalism out of its gloom and taught politicians the blessings of joy.

Ultimately, there was only one ill that he would admit he could not conquer. It was cancer, and it claimed the "Happy Warrior" of American politics last night.

Told five months ago he was doomed by his illness, the Minnesota senator and former vice president had had to struggle to make his last days seem less than a surrender. For a man of innocent optimism, though it was not all a pose. "Deep down," he had said, "I believe in miracles."

He died a man of large triumphs, yet also a man of profound defeats. He always was convinced that he had profited from it all. His surest fame, though, came because he was as close to being a common man's hero as nearly two generations of politics could produce.

Bursting spectacularly—and noisily—upon the nation's stage nearly 30 years ago, Humphrey remained a central figure in that time but never got beyond the reach of the nation's working-class people.

When other politicians, including his old adversary Richard Nixon, pretended to have attracted away the "middle Americans," Humphrey held their most devoted allegiance.

Never a parlor liberal, he came out of the austerity of the Great Plains and the Great Depression a true believer in populism, the "little people," the work ethic, New Deal liberalism and the American Way. And, though he held all of those beliefs passionately, his true passion was the joy he spread evangelizing his beliefs.

Voluble to the point of exhaustion, and sometimes beyond, he nevertheless warmed, charmed and stirred literally legions of people who were, to him, the salt of the earth. His oratorical home was the union hall, but he would preach his gospel the same from any podium.

His style was clearly his own: He talked often in bromides, frequently in the plainest of homilies, usually in a cadence of parallel and repeated phrasing, regularly in a wide wash of ideas, always in a hurry, at length, and in a gush. He could listen generously—but not long. He never had a clue how to contain his enthusiasm or to limit his optimism.

So far as his listeners could tell, there was no cynicism in him and no pretense. He convinced them that he believed what he was saying as much or more than anyone there might have.

Humphrey never assumed that anyone in any of his audiences was capable of achieving less than he had. He could, and often did, bring himself to rapture and even to tears enthusing about the possibilities of Everyman.

For himself, the one consuming possibility was that he might be president of the United States. He was interested in that, acutely so, for nearly a quarter of a century. He almost made it. The repeated failures to do so seemed not to dilute his hope. His enthusiasm would never permit him to think it was beyond his grasp and, every four years, he would be back in the pursuit.

With the office always remaining elusive, Humphrey ultimately came to resent suggestions that he had been chasing after it. That, very likely, was his way of living with the disappointment of only having come close.

The final disappointment of his pursuit, though, was that over the years he had become the Establishment candidate—the supposed captive of the Democratic Right, of labor bosses, of the old Washington crowd. For a man who had started out as anything but an "insider," his conversion was widely assumed to be complete by the time he made his final run in 1976. A seemingly permanent fixture of Washington then, his last campaign role was to be drawn into a "stop Jimmy Carter" movement.

The liberals, who had adored him for 20 years after 1948, had almost totally abandoned his political cause. Even the blacks, who had always loved him and still did, found a need to take their loyalties elsewhere.

It was not, however, so much because Humphrey had changed. The political character of the nation had altered, and the fast-talking, hard-charging, glad-handing Hubert had become a caricature of the Democratic past.

His one chance as the Democrats' nominee—in 1968—was remembered mostly as a pathetic sideshow to the tragedy of Vietnam, and his faltering bid in 1972 had been mildly infected by the virus of Watergate. By 1976 he would be taken seriously only by the hardest core of his old blue-collar constituency.

He took his losses and his steady political decline in the best of humors. That was what the nation had come to expect of the effervescent senator for whom it still had the deepest affection; more importantly, perhaps, it was what Humphrey had always demanded of himself.

There was, of course, no way to smile away the feeling then that much of America seemed to think of him, not benignly, as the permanent candidate—always running, always available, nothing on his mind or agenda but another campaign.

But the muted last hurrahs would not be Hubert Humphrey's legacy.

He had long before created the more lasting impression that he had been a truly fresh and renewing spirit in American politics, had shown a more genuine compassion over the ills of the nation than just about anyone who had ever bested him in a campaign, and had given a good political name—and many solid gains—to the cause of advancing rights.

The articles of his public faith were simple: Politics did not have to be dull, and government need not be uncaring. He grew up in the political tradition of Will Rogers and the governmental tradition of Franklin D. Roosevelt. Never a clever humorist, he nonetheless was full of mirth and good cheer, and he could be funny in an unpracticed way. Always a New Dealer, he assumed that practically every social wrong could be righted—and the chances were that a government solution would be the best.

The objective of both his political and policy ambitions were people who needed at least a little help before they could help themselves—as Humphrey was sure they would, given the chance: minorities, the poor, the old, the sick, the jobless, the menially employed.

Before the Supreme Court taught most politicians how to act vigorously to protect civil rights, Humphrey was working that cause with boundless energy and getting results.

Before John Kennedy introduced Washington to the patrician liberalism of the New Frontier and before Lyndon Johnson rode into the Oval Office with the muscular liberalism of the Great Society, Humphrey had already educated the town to Midwestern progressivism.

He was a founder of organized liberalism in American politics, but never shared the dark moodiness and the grave sense of heavy adversity that kept so many other public liberals going on reform.

Liberalism finally outran Humphrey's ideas in only one field: foreign affairs and national defense. He never quite caught up to the notion that America was a meddler abroad and that it had sacrificed too many of its domestic values in the name of global security. He was, perhaps unwittingly, an apologist for Vietnam, and that probably made the entire difference in his strongest ambition. It surely cost him more than enough support in 1968 to put Richard Nixon in the White House.

In a way, that narrow defeat was part of an almost metaphysical phenomenon in Humphrey's life: Much of his career had been crossed by the life of Richard Nixon.

They began emerging together, their presidential ambitions reinforced each other, their policy preferences were seemingly always at total odds. The contrasts made them both seem more vividly themselves: Nixon, the complex, dour, defensive, cold, tough fighter for conservatism; Humphrey, the simple, open, naively hopeful, warm and eager pleader for liberalism.

Their dominant roles in the nation's public life began to recede at just about the same time. In the end, though, Hubert Humphrey was the one who would emerge the folk hero.

[From the Washington Star, Jan. 15, 1978]

HIS CANDOR WAS SECRET OF POPULARITY—THE PEOPLE'S POLITICIAN WASN'T COY ABOUT HOPES

(By Jack W. Germond)

CHICAGO.—It was snowing at O'Hare yesterday, and there was a long line of passengers waiting for the ministrations of George Washington Lane, a white-haired black man who makes what he calls "just a barely living" as a substitute shoeshine man. But George Washington Lane was too preoccupied with Hubert Humphrey to pay much attention to the growing queue.

"It's the only thing he wanted," he kept saying, snapping his cloth, slapping on the polish. "It's just too bad he never got it. It's just too bad."

That was the essence of Hubert Humphrey's remarkable hold on the American people—he was a politician who never made any secret about his questing for the presidency and for the voters' affection. There was never anything coy about Hubert Humphrey; he wore his heart on his sleeve.

It was, of course, a weakness as well as a strength. As Lyndon Johnson's vice president, Humphrey allowed his loyalty and ambition to draw him into enthusiastic support of a wrong-headed policy in Vietnam. And when he won his own nomination in

1968, he was too inclined to husband his support, too cautious about breaking free of Johnson because he feared it might cost him the one prize he really wanted.

Four years later that same ambition led him into a vain competition for the Democratic nomination, in which he first undermined Edmund Muskie, the other leading moderate in the field of candidates, and then did grievous harm to George McGovern in the final days of the California primary.

And four years after that, a still virulent ambition almost tempted him into a race in which he would have been certain to face harsh treatment from the press and from Jimmy Carter on the few blots on his records, illegal contributions and a campaign manager who had gone to jail.

But all of these things could be forgiven because Humphrey was never furtive about his lust for the presidency and this enthusiasm for the game—and, above all, the good opinion of his colleagues in politics and of the American people.

When he came back to the capital terminally ill a few months ago, he was that rare politician who could enjoy the lavish praise of his peers because he had always been unashamed about wanting their regard. If the cynics wondered about some of the speakers, Hubert Humphrey was not one to worry about the fine print.

As he had his shoes shined, Sol Stein of Long Island described this view of Humphrey: "I was talking to my children about him just the other night—they're married and gone, but they came to the house for supper—and I said he was too liberal for me, and my son, he's the smart one, said, 'He's not liberal enough for me.' But we could agree on one thing, we always knew where old Hubert stood on things. He didn't leave any doubt."

Equally as important, perhaps, was the high good humor with which Humphrey pursued his ambitions. Everyone who spent any time with him—friends, politicians, reporters—has a fund of memories of the quintessential Hubert Humphrey.

There are mind pictures of him as a vice presidential candidate in 1964, standing on the back of flatbed trucks at airport rallies and preaching the politics of optimism at stop after stop with no sign his enthusiasm could flag. There is a recollection of him baffled and hurt by the ugly anger of the anti-war protests against him in 1968. Couldn't they understand, he seemed to say, that Hubert Humphrey was a man of decency and good will and not deserving of that?

There is an image of him eating cheese and drinking beer and talking for three or four hours at a stretch about how Johnson had mistreated him as vice president—no longer so much in anger as in puzzlement.

There is the memory of the Humphrey of 1968 rushing into a kindergarten classroom to admire a project and then turning to the reporters to shout: "Isn't it keen?" And there is a picture of Humphrey, already ravaged by disease, at a party just a year ago whirling around the dance floor with Muriel and calling for more music.

Hubert Humphrey was always the natural man, words and all, and he was secure enough in his own person to let it all show, confident that when they balanced the books everything would come out all right. What other politician could ever have had the temerity to bound across a hotel room crowded with politicians and staff members to kiss his wife's image on the television screen?

Beyond that, however, Humphrey was a politician who enjoyed—even delighted in—what he was able to accomplish along the way. For one reporter, the single most vivid memory is a ride in a small helicopter one August Sunday afternoon over the lovely green country outside Minneapolis. The chopper would swoop down on one gathering after another—here a Knights of Columbus picnic on a church ground, there a covered-dish supper in a schoolyard—and at each stop, Humphrey would leap out to remind the folks of what he had done for them and to warm himself in their affection.

Flying along, he would point out every sight and his connection to it. "See that river?" he would say. "I got that river dredged a few years back, a great river." Then he would point again: "See that next little town up there? They had me as the speaker when they had the big celebration last year. I talked too long, but they know me there, you'll see."

That is what Hubert Humphrey gave the whole country, the feeling that Sol Stein and George Washington Lane and everyone else knew him well. There were never any secrets about what Hubert Humphrey wanted. He was the ultimate practitioner of open politics.

[From the Washington Star, Jan. 15, 1978]

"I HEARD HUBERT SINGING HAPPILY AT 2 IN THE MORNING"

(By George McGovern)

Once on a warm summer night I heard Hubert Humphrey, at the time my next-door neighbor, singing happily at 2 in the morning while he scrubbed the walls in his kitchen. On other occasions he burned up surplus energy by sweeping out his garage well after midnight.

The truth is he never seemed to be tired or depressed. He believed that work and politics and crowd reactions could cure any malady of mind or body.

I remember one time when he left his Washington home sick with the flu and running a fever of 102 degrees simply to be introduced for a wave to a waiting crowd he had been scheduled to address at a nearby hotel. Instead, he orated for 45 minutes to a wildly applauding crowd and proudly announced when it was all over that his fever was gone and he felt great.

I know of no one else who was quite like him. He was still exhorting us to be of good cheer when he died.

Hubert Humphrey's death has silenced the most vital and eloquent voice in American public life. He was the most creative lawmaker of his generation.

He was my friend and neighbor for 25 years. We loved him for his own inimitable love of life. He taught us not only how to live, but how to die.

We are comforted now in the knowledge that he crowded half a dozen careers into one all too brief a life.

Thirty years ago he called his fellow citizens to walk out in to the sunlight of human rights. He made Minnesota a model of progressive politics. His leadership energized the force of liberalism across the Midwest. He pioneered in the development of the Peace Corps, Food for Peace and the nuclear test ban. His name even now adorns a far-reaching proposal to put our nation's idle back to work.

Sometimes I have thought that Hubert Humphrey's life has been a testing ground for mine. Our lives have frequently moved along similar lines. We were both born and reared in Depression- and drought-scarred South Dakota. We both educated ourselves to become college professors. We both felt the lure of prairie politics and eventually emerged as the presidential nominee of our party—Hubert in 1968 and I in 1972.

Although we were divided over the war in Vietnam and became presidential rivals for a brief time, the bonds of personal friendship survived that division. It was not possible to hold a grudge against Hubert. He healed the wounds of political rivalry with humor and love.

During the decade 1956–1965 we were next-door neighbors in Chevy Chase, Md. Our children grew up together, our wives visited daily, and Hubert and I rode together to Capitol Hill.

As a freshman congressman in the 1950s, I was enriched by the warmth of this remarkable older neighbor and friend.

He helped us furnish our first Washington house with things he said his family no longer needed.

He knew the nickname of every child in the neighborhood. When he entered their sandlot baseball or touch football games, he did them the honor of trying to beat them, or at least making everybody laugh.

Always there was the joy of being alive, the love of his fellows and his passion for pubic service.

[From the Washington Star, Jan. 15, 1978]

THE COURAGE OF HUBERT HUMPHREY

"To those who say we are rushing this civil rights issue, I say we are 172 years late. The time has arrived in America for the Democratic Party to get out of the shadows of states' rights and to walk forthrightly into the bright sunshine of human rights."—Hubert H. Humphrey, Democratic National Convention, 1948.

"Roy Wilkins said there are two people who I would make saints, Father Hesburgh (president of Notre Dame University) and Hubert Humphrey. For a man in politics, Senator Humphrey was incredible. His vitality and inspiration carried over to a lot of people. (Vice President Walter Mondale is in many ways his ideological heir. He is a Humphrey protege. His example has been propagated by other people. His mark is there."—Clarence Mitchell, Washington representative, NAACP.

"I didn't make much of a speech, about ten minutes long. But I said a lot of things I wanted to say for a long time, things I've said again and again since then . . . While I was saying all that, my father was sitting right there in the hall. When so many people were trying to talk me out of making that speech, he was the one who urged me on. When I was a boy, he was the one who first taught me to judge people by what they are, not by what they looked like. He was the one who taught me never to pin labels on people. He was the one who read me the words of Lincoln and Jefferson and Wilson. And when it came to the final vote, how proud I was to hear my father's voice announce the eight votes of South Dakota in favor of my amendment. Our plank carried by 69 votes and it was a big, big day for us."—Sen. Humphrey, talking of 1948 in "A Man for All People," by Ralph G. Martin.

"I first met him when I was director of field services for the American Council on Race Relations in Chicago. I went up to Minneapolis for the council to get a feel for what was a virulent emergence of anti-semitism. There were few blacks there. I met Humphrey at a rally one evening. He asked what I was doing and said he wanted to talk to me about the status of the Negro. We started talking at 11 a.m. and talked until dinner. He was already concerned about the problem. When he became mayor (of Minneapolis) he asked me to be a consultant and we established the Mayor's Council on Human Relations and Fair Employment Practices. That was in 1945. He was way ahead of the rest of the country."—Howard Bennett, former Minneapolis Municipal Court Judge.

"I fought for the Civil Rights Bill for a long time and, very often, it was a lonely fight. Many times I'd be on the Senate floor talking about it, and there might be only one or two people supporting me. But I knew we were going to win that one, too . . . It wasn't a very popular cause in the beginning. A lot of people sneered at us . . . But a

few of us stayed with it, adjusted it, developed it, never let go and finally we felt we had built up enough strength so that we had a real chance to pass it."—Sen. Humphrey, in "A Man for All People."

"During the 1964 effort to get the Civil Rights Bill passed, some of us went to Lyndon B. Johnson to use his influence to get (Sen. Mike) Mansfield to let Humphrey be the floor leader. Humphrey was accessible. Mansfield was more aloof. One of the finest tributes that was paid to Humphrey came from (Sen.) Richard Russell of Georgia who was opposition leader. Russell said Humphrey was fair, 'We had a good fight.' Another evidence of the Southern position was that when we had technicalities that could have put us out of business, the Southerners cooperated with Humphrey on working them out. Their reaction showed the tremendous appeal he had to people. He had a basic sense of fairness and decency that got through to people. In the middle of that fight, his son, Mike, developed cancer. Joe Rauh and I rushed up to his office to congratulate each other. Humphrey was in tears and soon we were, too. Mike survived."—Clarence Mitchell.

"The day it passed was one of the landmarks of my life. But that was also the day—just before the final vote—when my wife called to tell me my son had cancer. I was torn between the pride of victory and the pain of tragedy."—Sen. Humphrey.

"The revolution of the realization on the part of whites of the rights of blacks to equality in this country is to a significant degree attributable to Humphrey's vigorous advocacy. There is absolutely no doubt in my mind about it. As a lieutenant for LBJ, he mobilized strategies for votes for the 1964 Civil Rights Act. When I was Department of Defense deputy assistant secretary for equal opportunity, Hubert Humphrey was a right arm to Jack Kennedy. Hubert Humphrey gave a tremendous lift to the movement by saying you couldn't give equality in pieces. He went right down the line: voting, jobs, housing, education, public accommodations. He had few white allies willing to be so publicly outspoken, particularly from the level of the politician who had to acquire voter support. He gave strength and courage to other politicians. They said, 'If this man from Minnesota can do this, then why aren't the senators and congressmen from key population centers of blacks willing to do the same?"—Judge Bennett.

HHH, FAREWELL AND HAIL

A public figure is always more than battles won, or even causes gallantly championed and lost. To be, as well as to do, is part of the job.

Everybody knows what a doer Sen. Hubert Humphrey was. The mayor who translated liberal pieties about civil rights into civic realities for the blacks and whites of Minneapolis. The senator who fought with so much impact not only for civil rights but for Medicaid, welfare, the minimum wage, federal action to provide jobs and any number of other government answers to individual distress.

But Hubert Humphrey may well have given more to his country and the world by what he was than by what he did in the lifetime just ended. It was as an exemplar of American possibility and human possibility that he was unparalleled.

He was the poor boy from the Midwestern heartland making it by self-help and zest. He was the give-and-take of democracy, winning and losing and trying again.

Sen. Humphrey was a man whose record makes the word "politician" sound like more than an epithet. He was the system proving it could work; a viewpoint pressing its claims, hard, but within the rules, yielding when the national mood changed, coming back.

His skills in parliamentary maneuver as a senator were no less notable than his constant interaction with the citizens whose needs and wishes he set himself to fulfill. For all the laughing at his volubility, the Humphrey speechmaking was part of an intense dialogue with a constituency as persistently local as it was ultimately national. Besides talking, he was listening.

And then there was the private character of Hubert Humphrey. The resilient spirit conquering disappointments big enough to pull down many people into bitterness. The courage before pain and death.

He illuminated the vitality of our institutions. He showed us something about any individual's potentialities for transforming and enjoying the human condition. There is much to pay tribute to in the Capitol Rotunda where his body lies in state, and where echoes of his ebullience continue to reverberate.

SENATE AND THE WHITE HOUSE LOSE A LEADER THEY HAD REDISCOVERED

(By Adam Clymer)

WASHINGTON, Jan. 4.—The death of Hubert H. Humphrey, the strongest bridge between the politics of the late 1970's and the New Deal era and a tireless believer that Government could make life better, deprived both the Senate and the Carter Administration of a leader that neither had really expected to need.

This city and his associates of more than 30 years around the country were engaged today in remembering the essential Democrat who rebounded from one setback after another to exert leadership—on civil rights, on disarmament, on the issue of the day and the issue of the days and years ahead.

"No one could articulate the principles of the Democratic Party better than Hubert Humphrey," said the House Speaker, Thomas P. O'Neill Jr., of Massachusetts, who had found Mr. Humphrey an exceptional Senate ally in enthusiastic support for the Carter Administration.

In his 1976 campaign, President Carter scorned Mr. Humphrey as past his time. But the President later found the Minnesota Senator a valued adviser. A top White House aide, Hamilton Jordan, sketched the growing mutual respect of Mr. Carter and Mr. Humphrey and said simply, "We'll be the worse for not having him here."

KEY VOICE ON TREATIES

The Senate, which welcomed Mr. Humphrey back personally in 1971 but was reluctant to accord him formal leadership, now will lack the de facto leadership he had assumed on the Foreign Relations Committee, a force that would have been a key voice in upcoming debates on the Panama Canal and strategic arms treaties.

Indeed, two days before he died, he was conferring with aides about a new foreign aid bill—a concept he stuck with when other liberals gave up on it, saving economic aid in 1973. The bill is at the printers, with his name on the draft, but he will not be there to introduce it.

In Minnesota, Charles W. Bailey 2d, editor of The Minneapolis Tribune, reflected on Mr. Humphrey's political roots. In that state, because of the Scandinavian influence, he said, Government was always thought of "as a force for helping people, as a benign force," and not thought of in the Jeffersonian, or even the Yankee sense, as the better the less it did.

James Loeb, first executive director of Americans for Democratic Action, who now lives in Hanover, N.H., recalled how Mr. Humphrey's optimism about Government and a sense that liberals had to clear their ranks of Communists had commended him to Eastern liberals in 1947, when Mr. Humphrey, then the young Mayor of Minneapolis, was asked to share the podium with Eleanor Roosevelt at the founding dinner of A.D.A.

He always believed that Democratic Presidents were better than Republican Presidents, and he worked with John F. Kennedy after his election as he did with Mr. Carter after the final disappointment of 1976, the last time he saw another Democrat win the nomination he wanted.

But his view was not totally partisan. President Ford got him to help on foreign policy issues even when they quarreled over domestic policy.

To get in a position to do that, though, he had to regain influence in the Senate, which he left for six years. In 1971, he had to start again near the bottom, perhaps because he was distrusted as a result of the Vietnam war and perhaps because Mike Mansfield, as majority leader, sought energetically to bring younger members along and not make them wait as he and Mr. Humphrey had had to do. But before long, he mattered again.

But for all his ties to the liberal community, ties that strained and broke when he backed the American involvement in the Vietnam war, Mr. Humphrey was always a party man, careful of working with the organization.

LIBERAL BACKED BY MACHINES

He was a liberal hero for the civil rights plank at the 1948 Democratic convention, but he told Ed Flynn, the Democratic boss from the Bronx, what he planned to do and got his support and that of other Democratic machines.

He overcame the distrust of the Senate's Southerners after he arrived in 1949, helped by the friendship of Russell B. Long, another freshman who won readier acceptance.

The declining Senate Foreign Relations Committee will miss his leadership on its particular issues, but the Senate as a whole will be without an elder with his range of concerns. As Senator Robert C. Byrd, who inflicted Mr. Humphrey's last political defeat when he won the majority leadership a year ago, said today, "The minorities, the elderly, the poor and the sick have lost their strongest voice."

[From the New York Times, Jan. 15, 1978]

UNFLAGGING DESPITE DISAPPOINTMENTS, HUBERT HUMPHREY CHAMPIONED LIBERALISM

(By Roy Reed)

"I'm a public man," Hubert Humphrey said once. That was a rare example of understatement in the record of this voluble, exuberant man.

He was a relentless pursuer of the Presidency for nearly two decades. He was one of the most active and visible Vice Presidents in the nation's history. He was a master legislator in the United States Senate during the turbulent aftermath of World War II and of Franklin D. Roosevelt's New Deal.

Above all, perhaps, he was a teacher and an advocate who regarded the entire nation as his classroom. He was involved in almost every postwar achievement of American liberalism, from Medicare to arms control, as a political campaigner, as a legislative tactician and as an incessant talker and persuader wherever he could get an audience of one or more.

He was a Democrat blended from the agrarian populists and small-town bourgeoisie of the Middle West. He became known around the world as a leader among what other nations call the democratic socialists. He was politically in sympathy with such leaders as Willy Brandt of West Germany, Harold Wilson of Britain and the various socialists who came to power after World

War II in most of the Western European nations.

Mr. Humphrey occasionally found himself supporting authoritarian regimes, most notably that of President Nguyen Van Thieu of South Vietnam during the 1960's.

He was an early and ardent advocate of the policy of American intervention in Vietnam. Along with his chief, President Lyndon B. Johnson, he argued that Communism had to be stopped in Vietnam to keep the menace from spreading.

Then, as the Democratic nominee for President in 1968, when Vietnam had become an albatross around the party's neck, Mr. Humphrey noticeably modified his position and began to call for more efforts to settle the war politically rather than militarily.

Some saw the shift as a compromise between loyalty to Mr. Johnson and the political requirements of the campaign. His campaign was marked by savage heckling, and in the end he narrowly lost the election to Richard M. Nixon, a man who was less easily identified with the conduct of the war.

In spite of deviations, the clear theme of Mr. Humphrey's advocacy during the middle years of the 20th century was liberalism. He sided with the poor against the rich, the small against the large, the family drugstore against the pharmaceutical corporation.

"I know from personal experience what it means to be the victim of depression, distress and natural disaster," he said years later as he recalled the great drought and economic depression that struck South Dakota while he was growing up. "I also know that it is precisely these Americans who lack the means, the power or the influence to fully control their own destiny who most need and yet lack a voice in the conduct of their government."

Mr. Humphrey was often called a man of the Senate. He was one of the giants of that institution during this century, and yet he was restless there. From the mid-1950s until 1976, he had his eye almost continuously on the Presidency.

Having made it as high as Vice President, he once, in 1968, came so close to being President that his friends feared the very narrowness of his defeat would break his heart.

His spirit held, though, and after nurturing it for a year in the cities and plains of Minnesota he went back to the Senate. He made another try for the Presidency in 1972, but it was an abortive effort that died before the partys nominating convention was held.

After that he re-entered the Senate's life in earnest. Some said he was almost as vigorous in those later years as he was when he first crossed the nation's vision in the aftermath of World War II.

He teetered on the brink of a Presidential declaration in the spring of 1976 but stuck by his resolve to stay out of the primaries. There was consolation in Jimmy Carter's selection of his protege, Walter F. Mondale, a fellow Minnesota Democrat, as the Vice Presidential nominee. Mr. Humphrey, basking in acclaim, nominated his younger colleague at the Democratic National Convention in July.

Two months later, after he learned that he had cancer and might have to undergo radical surgery, he said he had no regrets about his decision not to challenge Mr. Carter in the primaries, "especially now—imagine what the situation would have been now.

"It would have been nothing short of a disaster for the party. You'd literally have to step aside. It would have been a very difficult decision."

That October, doctors at the Sloan-Kettering Cancer Institute in New York City removed his bladder. It was his hope that, after a month or so to convalesce, he would have had two months left to campaign for Senate majority leader in the 95th Congress.

In January, only hours before a "showdown" vote for that post, Senator Humphrey withdrew, allowing Senator Robert C. Byrd of West Virginia to take the job uncontested. A top Democratic colleague said later that Mr. Humphrey would have been lucky to have received as many as a dozen votes.

But Senate Democrats, eager to show their special affection for the man from Minnesota, gave him a new title and a pay raise. Mr. Humphrey became Deputy President Pro Tem of the Senate, with a $7,500 salary boost and a chauffeur for his black Fleetwood Cadillac.

He was cleansed of political ambitions, he said, and he rededicated himself to an exhausting regimen of Senate work. To a reporter he said, "What I want more in life than anything else now is respect, which I think I'm beginning to earn."

"I don't want to be President. I don't want to be Vice President. I don't want to be Secretary of State or Majority Leader," said the Senator. "But what I do want is to be known in the history books as an effective man in government."

ADVISING THE PRESIDENT

Despite increasingly visible signs of physical weariness, Mr. Humphrey was Mr. Carter's breakfast guest each Tuesday morning with other Congressional leaders, for the express purpose of giving the President advice on matters ranging from foreign and domestic issues to more personal strategies for winning friends and gaining influence in the Senate.

He wrote 42 bills and coauthored 135 more, according to an aide. He introduced 11 resolutions and made 18 amendments on matters ranging from the Small Business Administration to solar energy and including such things as child nutrition, rural housing and a proposed national domestic development bank for the cities.

And, according to those who watched the ailing Senator, ravaged by pain and disease, there was always the irrepressible enthusiasm for life, a certain fluorescent style and personality that made him sparkle with younger upcoming party leaders.

He walked with a limp and his cheeks were drained of color, but, they said, his eyes twinkled with excitement when the subject of politics arose.

In August 1977, Mr. Humphrey was hospitalized in Minneapolis for removal of a bowel obstruction. In the course of the three-and-a-half-hour procedure, a more serious discovery was made.

Dr. John Najarian, leading a team of surgeons, determined that a tumor on Mr. Humphrey's pelvic bone was malignant. Dr. Najarian said surgery was not feasible for the cancer, which he described as "terminal," and he prescribed a treatment of chemotherapy.

Hubert Horatio Humphrey Jr. was born on May 27, 1911, in a room above the drugstore that his father, Hubert Horatio Humphrey Sr., ran in Wallace, S.D. His father's family had been farmers. His mother, Christine Sannes Humphrey, was the daughter of a Norwegian seafarer who had migrated with his family to a farm in the American Middle West.

Young Humphrey grew up in Doland, S.D., where his father established another drugstore when the boy was 4 years old. He graduated from Doland High School in 1929 as class valedictorian. For two years he attended the University of Minnesota, until a shortage of money forced him to return to work in the family business. He received a degree from the Denver College of Pharmacy in 1933.

The Humphreys by then had moved to another drugstore in another South Dakota town, Huron. There Hubert Humphrey met and married Muriel Buck in 1936. With his wife working to help support them, he returned to the University of Minnesota and took a degree in political science in 1939. Then they went to Baton Rouge and he earned a master's degree in political science from Louisiana State University in 1940.

As the family grew—the couple eventually had three sons and a daughter—Mr. Humphrey held a succession of jobs in Minnesota. He taught political science at the University of Minnesota. He was head of the Minnesota branch of the Federal War Production Administration. He was assistant regional director of the War Manpower Progress Commission in 1943, then taught in the Army Air Force training program at Macalester College in 1943 and 1944. He was Franklin D. Roosevelt's Minnesota campaign manager in the Presidential election of 1944.

Mr. Humphrey had entered elective politics in 1943 with an unsuccessful race for Mayor of Minneapolis. After that defeat, he helped put together the Democratic-Farmer-Labor Party that was to become a major influence in that state's politics for many years. Running on its ticket in 1945, he was elected Mayor and soon became nationally known for his crackdown on crime and for initiating the nation's first municipal fair employment practices commission for racial equality in jobs.

He entered the United States Senate in 1949 after defeating a Republican incumbent, Joseph Ball. During that campaign, in 1948, he went with the Minnesota delegation to the Democratic National Convention in Philadelphia and achieved his first real prominence by leading a successful fight for a strong civil rights plank in the party platform.

The platform committee had produced a minority report backing President Harry S. Truman's civil rights program. The 37-year-old Mayor of Minneapolis and his liberal friends had led the fight for that report, and they had angered the Southern Democrats.

In successfully urging the adoption of the minority report by the convention, Mr. Humphrey made one of the memorable speeches of his career and won instant fame as an orator and as a new star in the Democratic Party.

"There are those who say to you, 'We are rushing this issue of civil rights,'" he told the convention. "I say we are 172 years late. There are those who say, 'This issue of civil rights is an infringement on states' rights.' The time has arrived for the Democratic Party to get out of the shadow of states' rights and walk forthrightly into the bright sunshine of human rights. People—human beings—this is the issue of the 20th century."

AFFRONT TO INNER CIRCLE

In the Senate, Mr. Humphrey gained the respect of his colleagues after an initial period of discomfort on both sides. One of his first actions was an affront to the inner circle that controlled the Senate. He made a speech demanding that the Senate save money by abolishing the Senate-House Committee on Reduction of Nonessential Federal Expenditures.

That committee happened to be a pet project of Senator Harry F. Byrd, the Virginia patriarch who was one of the oldest members of the Senate's inner circle. The newcomer was immediately cut off from effective contact with the men who ran the institution.

He surmounted that obstacle in time and by the end of the 1950's he had become part of the Establishment himself. He achieved the zenith of his power in the Senate during the early 60's, becoming assistant majority leader, or whip, in a shift of leadership after the 1960 Presidential election. His old friend, Lyndon B. Johnson of Texas, became Vice President under another old friend and rival, President John F. Kennedy. Mr. Johnson's former job as majority leader of the Senate went to Senator Mike Mans-

field of Montana, and Mr. Humphrey filled Mr. Mansfield's former post of assistant.

Many of the programs that Mr. Humphrey had espoused since the 1940's became law during the years when he wielded power in the Senate.

Mr. Humphrey first began to be mentioned as a possible candidate for President or Vice President in 1952 after he had emerged as a Senate champion of civil rights and social welfare. He made a serious attempt to get his party's Vice Presidential nomination in 1956, but lost to a fellow liberal in the Senate, Estes Kefauver of Tennessee.

CONTENDER IN 1960

He first became a serious contender for the Presidential nomination in 1960. That year, however, was fated to be John F. Kennedy's.

Mr. Humphrey turned his ample energies to the Senate once again in the early 1960's. As assistant majority leader, he emerged as a shaker and mover in the style of his mentor, Lyndon Johnson. He curbed his ideology where he thought necessary. He wrought compromises.

Probably his greatest work as a legislator came in 1964. Working behind the scenes as floor manager, he shepherded to passage the most far-reaching civil rights bill of the decade. It banned racial discrimination in public accommodations and in state and local government facilities, established an equal employment opportunities commission, withheld Federal funds from discriminatory programs and authorized the Attorney General to intervene to enforce equal protection of the laws.

Debate on the bill went on for months. For the first time, the liberals of both parties were carefully organized. It was Mr. Humphrey, remembering the defeats of past liberal efforts and determined not to see them repeated, who was most responsible for that organization.

Mr. Johnson was President by then, having succeeded the assassinated Mr. Kennedy the previous fall. Many in Washington believed that Mr. Johnson was testing Mr. Humphrey for the Vice Presidency by entrusting the vital civil rights bill to his floor leadership.

In an interview in 1974, Mr. Humphrey recalled a conversation with Mr. Johnson in the White House at the beginning of the civil rights bill debate.

"He said, 'I just want you to know that this is going to be your test, your chance. But I predict now that you are going to lose.' And I said, 'well, we'll see.'"

TAPPED FOR THE TICKET

The bill passed in June. Mr. Humphrey's tenacity and his long friendship with Mr. Johnson were rewarded in August, when the President selected him to be his running mate. In November, the Johnson-Humphrey ticket captured 61 per cent of the vote to defeat the Republican ticket of Barry Goldwater and William E. Miller.

Mr. Humphrey was a busy Vice President. In addition to presiding over the Senate (indifferently, some said; he preferred talking to people in his office), he served as a member of the Cabinet and the National Security Council and as chairman of the National Aeronautics and Space Council, the Peace Corps Advisory Council, the President's Council on Youth Opportunity, the National Council on Marine Resources and Engineering Development, the President's Council on Physical Fitness and Sports, the National Council on Indian Opportunities and the President's Council on Recreation and Natural Beauty.

Vice President Humphrey was on a diplomatic trip to Mexico City for President Johnson in March 1968 when Mr. Johnson announced that he would not seek re-election. That gave Mr. Humphrey another and unexpected chance for the Presidency. He confessed later that year that he had never expected to seek the nomination again because he has assumed that Mr. Johnson and he would serve a normal two terms and retire from public life together in 1972.

Mr. Humphrey had to scramble to get the nomination in 1968. Two other strong candidates, Senators Robert F. Kennedy of New York and Eugene J. McCarthy of Minnesota, were already running hard on an anti-Johnson, anti-Vietnam-war platform. While Mr. Humphrey concentrated on gathering delegate votes from the party establishment, his two opponents dominated the headlines with a series of primary election contests.

The race was suddenly and dramatically altered in June with the assassination of Senator Kennedy. Mr. Humphrey picked up some of the delegates who would have voted for Mr. Kennedy.

He won the nomination at the convention in Chicago, but the violence between police and antiwar demonstrators—much of it on the part of the police—damaged Mr. Humphrey's candidacy before it really got under way. He already carried the burden of being closely identified with Mr. Johnson's unpopular war policy.

Mr. Humphrey edged away from the Johnson policy bit by bit, and finally on Sept. 30 at Salt Lake City he put distance between them by pledging a cease-fire, a conditional halt to the bombing of North Vietnam and a negotiated troop withdrawal.

"The policies of tomorrow need not be limited by the policies of yesterday," he said, in a prepared speech that was broadcast on nationwide television.

The polls showed Mr. Humphrey gaining steadily throughout the fall. But he did not gain enough to win. In spite of strong support from most of organized labor, from middle-aged liberals and even from the new moderate forces in the South who no longer disagreed with his civil rights views, Mr. Humphrey lost the election to Richard M. Nixon by 499,704 votes.

Some observers thought that if any one factor cost Mr. Humphrey the election it probably was the loyalty to President Johnson that prevented him from reasserting his own liberal identity early in the campaign. On the other hand, Mr. Humphrey was just as much a product as Mr. Johnson of the cold-war mentality that led to American involvement in Vietnam. Mr. Humphrey made perhaps hundreds of speeches attempting to justify the expansion of United States involvement. There was no reason to think that he did not actually believe in the cause.

When he was interviewed in the spring of 1974, Mr. Humphrey said that the delicate search for peace that restricted his freedom of action in 1968 was to blame for a major part of his election problem.

He told of a conversation with President Johnson when he was getting ready to make his Salt Lake City speech at the end of September. The speech had been scheduled three weeks earlier, he said, but Mr. Johnson persuaded him to delay it until he could get the North Vietnamese to the peace conference in Paris.

"IT'S BROKEN MY HEART"

He said that Mr. Johnson told him, "I've given up the Presidency, given up politics, to search for peace. No one worries more about this war than I do. It's broken my heart—in a way, broken my back. But I think I can get these people at the conference table if you will help."

Mr. Humphrey said that some of his advisers continued to urge him to break openly with the President in spite of that plea, but he refused.

"I tell you," he said, "I did what was right And I don't give a damn if I lost the election. I know that I would have been a scoundrel. I never would have felt good in my own heart had I broken with him."

The change in his attitude that began during the 1968 election year continued after he and the Johnson Administration left office. Looking back on the war in 1974, he said, "Like many things in our national life, we miscalculated. We overestimated our ability to control events, which is one of the great dangers of a great power. Power tends to be a substitute for judgment and wisdom."

The United States began to see itself "in almost godlike proportions" after World War II, he said.

"And the President of the United States obviously found himself affected by that," he said.

But he was still not certain that United States participation in the war was a mistake.

"What would it have been like had we not gone there?" he said. "As I look at it, our relations with China today are in part due to the fact that we were there. I think the Chinese undoubtedly would have overwhelmed that whole area with their ideological advances."

When the interviewer pointed out that Mr. Humphrey had consistently used the pronoun "we" in referring to Vietnam policy, he said, "I was a part of it. I told my most severe A.D.A. [Americans for Democratic Action] critics that I may have been stupid but I'm not a hypocrite."

Perhaps the main quality that separated Mr. Humphrey from some younger liberals of the 1960's and 70's was his lifelong distrust of Communism.

He was a founder of the Americans for Democratic Action in 1947. Its constitution barred membership by Fascists and Communists.

MOVE FOR AGREEMENTS

One of his hardest struggles in Minnesota politics was against Communists, who infiltrated the Democratic-Farmer-Labor party. He led a fight to throw them out in 1948.

The bitterness from that fight stayed with him. Through the early 1950's, during the time when Senator Joseph R. McCarthy of Wisconsin came to symbolize for some the excesses of anti-Communism, Mr. Humphrey was uncharacteristically quiet. He spoke against Mr. McCarthy occasionally on radio and television, but not in the Senate.

He sponsored a bill to outlaw the Communist Party in 1954. Many of his liberal friends accused him of being panicked by the McCarthy hysteria. In spite of his anti-Communist record, conservatives in Minnesota had tried to paint him as pro-Communist.

Winthrop Griffith, the author of "Humphrey: A Candid Biography," quotes an unnamed friend of Mr. Humphrey as saying after passage of the anti-Communist bill, "That was the only time I was ever ashamed of Hubert." Mr. Humphrey later referred to the legislation as "not one of the things I'm proudest of."

In spite of his distrust of Communists, Mr. Humphrey eventually became a leader in the move for agreements with the Communist nations on disarmament and the limiting of nuclear testing. As chairman of the Senate Disarmament subcommittee, he led the fight to suspend nuclear testing in 1958.

The same year, he made a famous trip to Moscow and spent eight consecutive hours talking with Nikita S. Krushchev. Many people were fascinated by this marathon by two of the world's most famous nonstop talkers.

Mr. Humphrey was urging contacts with Communist China years before Richard M. Nixon, as President, finally accomplished them. In 1959, he advocated a relaxation of the State Department's passport and visa policies to permit exchanges of medical formation.

But he never let his listeners forget that most of the world's Communist governments were totalitarian and that the United States Government was engaged in a grave competition with them.

"Make no mistake about it," he said after his long talk with Mr. Khrushchev, "they have declared war on us. Khrushchev may call it competition, but it is plain war." He was referring to economic war in that statement.

Of all his foibles, perhaps his best known was his weakness for talk. His speeches were notorious for their length. So were his conversations.

REPUTATION FOR GABBINESS

The penchant for unlimited talk earned him a reputation early for gabbiness. That, in turn, became translated eventually into a suspicion in some quarters that he was all talk and no substance. The suspicion was not well founded, but some thought that it might have cost him votes in his campaigns for the Presidency.

Mr. Humphrey was not especially introspective. When he said he was a public man, he meant it quite literally. Virtually all his thoughts seemed to be open to anyone who would listen.

He apparently never became comfortable with the idea of turning those thoughts inward—not, at least, until after he had made his 1972 try for the Presidency and had been stricken with a serious illness for the first time.

In 1966, he had had to have several benign, pinhead-sized tumors removed from his bladder. The tumors recurred and in 1973 his physician noted that one had penetrated the bladder's lining. It had "signs of malignancy," Mr. Humphrey told reporters, and the physicians treated it with heat X-ray.

The treatment caused great pain and threw his system out of balance. He told one old friend during the winter of 1974 that he had wished for death at one point during the aftermath of the treatment.

He soon recovered his familiar jocularity, however, and by the spring of 1974 he told a reporter, "I know that some people have said that, 'He is terminal,' and I know that some people have said, 'Well, he's had it,' and all of that sort of business. But I want you to know that if I have had it. I sure have had a nice little period to recover before they take me into the promised land."

He said he had become "quite philosophical" about the possibility that he might not be cured.

"What can be done by medicine, surgery or radiation, I'll have it," he said. "And if it can't be, then, I'll have had it, you know. And that's it. And I really don't worry about it, I say in my mind, 'To hell with it. I have something else to do.' "

Later tests that spring showed that the treatment had been successful, although the signs of malignancy later reappeared.

MILK-LOBBY CONTRIBUTIONS

Mr. Humphrey had other problems in 1974. One of the disclosures of the Watergate scandal was that President Nixon had received large, illegal campaign contributions in 1972 from dairy co-operatives, particularly from the Associated Milk Producers Inc. of San Antonio, Tex.

As part of the fallout from that investigation, it was revealed that Mr. Humphrey had received contributions from the same milk lobby over the years and that some of the contributions, especially some made during his 1968 Presidential race, were made from corporate funds and therefore were illegal. He freely acknowledged that he had received milk contributions for years, but said he had known of no illegal donations.

Mr. Humphrey's campaign manager in 1970 and 1972, Jack L. Chestnut, was sentenced in June 1975 to four months in prison and was fined $5,000 for accepting a $12,000 illegal campaign contribution from Associated Milk Producers and arranging to pay a campaign bill from a New York advertising firm with the money. The previous August, Norman Sherman, Mr. Humphrey's one-time press secretary, was fined $500 after pleading guilty to having improperly used funds from the cooperatives to buy campaign mailing lists.

SUIT BROUGHT BY MAHEU

Another troublesome allegation was made during a $17.3-million libel suit against the corporate interests of Howard R. Hughes. The suit was brought by a former employee, Robert A. Maheu, who said that he delivered a secret $50,000 cash contribution to Mr. Humphrey from Mr. Hughes during the 1968 campaign.

Mr. Humphrey said he might have received a contribution from the Hughes interests, but he denied that he had received it personally and in an attaché case, as Mr. Maheu said.

"I've been in public life since 1945 and a lot of people think I am foolish and screwed up and dumb," he told his interviewer in 1974. "But no one has ever accused me of being this kind of fellow—namely, running off with the funds. As a matter of fact, we were so damned broke in 1968 that if we would have gotten that kind of money from him, we would have said three Hail Marys and gone to mass."

Mr. Humphrey's interests in the Senate after his last Presidential bid in 1972 continued to be varied and weighted toward helping the poor.

One of his major legislative efforts in 1977 was the sponsoring of a bill, with Representative August F. Hawkins of California, that would have promised a job, at Government expense if necessary, to all Americans who wanted to work and that would have set a national goal of reducing the national adult unemployment rate to 3 percent within four years.

RETURN TO MINNESOTA

Mr. Humphrey and his wife, Muriel—a shy, soft-spoken woman who seemed to command intense devotion from him—returned to Minnesota after the 1968 election. He taught political science at the University of Minnesota and at Macalester College for a year, then won re-election to the Senate in 1970.

His return to university life seemed partly to restore his tattered relations with young people. One of the worst of the personal agonies for him during the Vietnam War was enduring the taunts and insults of thousands of young demonstrators as he toured the nation defending the war policy of the Johnson Administration. It tormented him to know that the young he so loved had turned against him. By 1970, there was evidence that he had regained much of the confidence of the young.

Back in the Senate, he resumed his old custom of leaving the Senate floor several times a week to speak to visiting youngsters and students.

He would always stress the need for education. Then he would tell them, "You're needed. Take personal pride in something you own—yourselves. You've had the experience of a new world. Share it."

Mr. Humphrey cried often in public, which some said was a sign of weakness and others said was a measure of his humanity. He cried, the day he bowed out of the contest for the Presidential nomination in 1972, as he read his statement in Miami Beach before the television camera:

"This has been a good fight," he said. "We've waged a good battle. We've done it within the rules of the game, and we bow out now with the spirit of friendship and of understanding, as a good Democrat, but above all, hopefully, as a good citizen and a good family."

[From the New York Times, Jan. 15, 1978]

THE HAPPY LEGACY OF HUBERT HUMPHREY

Hubert Humphrey and death seemed intrinsically incompatible. Few human beings have ever been in love with life or enjoyed life's challenge and variety more than he did. He gave unstintingly of his heart, mind, imagination and physical energy, and he left America a better country for his efforts.

Hubert Humphrey was pre-eminently a man of the United States Senate. He was an orator, a legislator, a conciliator. He was not an administrator or even an effective politician when his own larger ambitions were at stake; he too often put loyalty to others above single-minded self-interest and kindliness to subordinates ahead of the dictates of efficiency. Thus, he was not always successful, but he was always much loved.

Like other giants in the history of the Senate—Robert Taft, Robert LaFollette, Henry Clay, Daniel Webster, John Calhoun—Hubert Humphrey hungered for the Presidency and sought it repeatedly and in vain. He came close in 1968 when, after having served as Vice President under Lyndon Johnson, he became the Presidential nominee of his party. But the antagonisms stirred by the Vietnam War were too great for him to overcome. That he came so close to doing so—despite vilification from both ends of the political spectrum—was a tribute to Mr. Humphrey's courage and powers of persuasion.

It was deeply ironic that his association with President Johnson and the Vietnam debacle denied him the White House because so much of Mr. Humphrey's political life was devoted to the cause of peace. He played a large part in the legislation that led to the Peace Corps, the Arms Control and Disarmament Agency, the partial Nuclear Test Ban Treaty of 1963, and the Food for Peace program. When he returned to the Senate in 1971, he became the strong man of the Foreign Relations Committee where his abiding interests were strengthening economic assistance programs for the poorer countries and trying to avert famine and malnutrition. The fate of Israel was another cause that engaged his deep interest; he was first elected to the Senate in the same year that Israel achieved independence, was a frequent visitor to the young country and came to feel a profound affinity for its people.

Hubert Humphrey burst upon the national political scene at the 1948 Democratic National Convention when he delivered the principal speech for a strong civil rights plank. "There are those who say to you, 'We are rushing this issue of civil rights. I say we are 172 years late.' There are those who say, 'This issue of civil rights is an infringement of states' rights.' The time has arrived for the Democratic Party to get out of the shadow of states' rights and walk forthrightly into the bright sunshine of human rights. People—human beings—this is the issue of the 20th century." Probably his proudest accomplishment as a legislator was the comprehensive Civil Rights Act of 1964, which he led to final enactment through months of filibuster, parliamentary maneuver and public pressure.

His commitment to racial equality was central to the decent, humane liberalism that touched numerous other concerns, from conservation to health care and welfare reform. He sponsored the Wilderness Act, fought for Medicare and national health insurance, urged a program to assure a job for every American who seeks one, and showed as much concern for the nation's cities as for its marginal dairy farmers. Reared in a small town on the prairies, he was always an enemy of

provincialism and bigotry and an exemplar of American idealism.

The ordeal of his last months may have been eased by a cascade of public tributes, in the Senate and elsewhere; the headquarters building of the Department of Health, Education and Welfare was named for him. It is given to few to be so honored while yet alive, something he recognized with a characteristic twinkle a few days ago. "You can cut back on the funeral," he told an aide, "because all the eulogies already have been delivered."

In his ill-fated Presidential campaign in 1968, Humphrey was derided for his slogan, "The politics of happiness." But to those who knew him, the term was an accurate and sincere reflection of his personality. He was truly a cheerful, bouncy, warm-hearted man who wished good things for all God's children.

[From the Washington Post, Jan. 15, 1978]

THE LEGACY HE LEAVES US IS, SIMPLY, HOW TO LIVE

(By Haynes Johnson)

Of Hubert Humphrey it can be said that nothing became him more than the way in which he chose to play out his life. There was no hiding, no pretending, no note of falsity. He lived his life to the fullest until his last breath. And he lived it, as he wished, in public.

He was quite purposeful about this: he frankly wanted to be remembered and to set a public example. Of course, he did. The legacy he leaves is probably unlike that of any other public figure in our history. It is simply, how to live.

"I want to kind of set an example, if I can, of public service," he said during, a long conversation last spring. "Not that I'm any paragon of virtue, because I'm not. But I'd like people to think of me as a man that really gave himself to his country and did something in public service. To make public service an honorable profession. That's really what I'd like more than anything else. It's maybe the one thing that sustains me more than anything else."

He instructed his staff not to schedule him so tightly. When he walked the halls of Congress, he wanted to be able to spend as much time as possible with ordinary people. That was a conscious decision, too.

"I said to my staff, 'Let me tell you something: When I come back from the Senate over there I'm a walking historical object. I'm a piece of the history of this caiptal.' And it's a fact. Now I can rush by people or I can go by and be good and gentle, maybe say a little word to somebody and take a little time.

"And somebody always reaches out. They'll say, 'Well, I was with you in '68.' And they'll say: 'Don't you remember when you shook my hand at Battle Creek?' Or: 'I waited for you in Flint, Mich., until 11 o'clock at night.' And they'll tell me all these things. you know. And they've got their kids with them and the kids' eyes are kind of rolling around, wondering what's this all about. But I'm a part of the history of some of most turbulent years in this country. So as I tell the person who schedules me, 'Look, don't be worried if I'm a little late or something like that. I'm going to take some time to say hello, to some kids. So if I've got someone waiting for me, let 'em wait.' "

The way he viewed his illness was characteristic, and remarkable.

"I've got to be honest about it," he said. "I try not to think about my illness much, but I do have to recognize that cancer is, like my friend, a cancer specialist out at Rochester, said: 'Hubert, cancer it like a thief in the middle of the night. It can stab you in the back any time. You never know it.'

"So what is my theory, my philosophy? Not live it up, but live each day, do what you want to do with whatever you have. Get the most out of it. Look ahead as far as you can. Don't worry. There's not much I can do about it,

"As I told those doctors the other day, I said, 'Listen, if you let me die, it's going to cost you millions of dollars 'cause I can get you more money for your cancer research than you'd ever believe possible. Keep me alive.' So I joke with them about it.

"But in my own heart I know that you've got a time clock in you and sometime somebody speeds it up. I don't like self-pity. Let's put it frankly. I think people are bored with people who go around with that stuff. So I just do the best I can. And have a good time most of the time."

Few of our public figures suffered more personal humiliations than Hubert Humphrey. His vice presidency under Lyndon Johnson, was tormenting—what he described, kindly, as "difficult years, but learning years for me." It was a measure of his decency that he was able to look back on that time without bitterness. He was even able to laugh at it.

"If I made any little deviation from anything that he [LBJ] thought was the way it should be, he'd shoot it down. There wasn't this business of saying. Well, now he's entitled to his point of view or giving the kind of confidence you ought to have. He knew that I was extraordinarily loyal. But I knew the kind of man that he was, and I considered it a great honor to be Vice President.

"My vice presidency was a very active one during a very difficult period. As I have said to my wife and the close family, 'Many things that Dad did during that time will not be known simply because there was too much static.' But we opened up these Job Corps camps. We helped get through Congress a war on poverty. I was the co-sponsor. I coordinated a lot of that stuff. I was busier than a cat on a tin roof with a dose of castor oil in a windstorm trying to cover up.

"And, believe it or not I was in consultation many times with Johnson. He just didn't want a lot of people to know it. He didn't want anybody to upstage him, and he knew I had a national following. In fact, I had a bigger one than he had when he was Vice President, and also with the press. Believe me, he kept careful eye on me with the press. 'Who did you see?' he'd say. Every time there was a column by either you or Broder or Reston that was critical of him, or said something critical, he'd say: 'Did you see those fellows? You out with that Georgetown crowd?' "

But his real heartbreak came during his presidential race in 1968. As he said, "the big disappointment, of course, was the heartache of '68, because I never should have let Nixon be President. Never. And, of course, he lied to get to be President just like he did after he got in office. He pretended he was a new man, and a lot of people bought that nonsense because they were so angry with everything we'd gone through—three assassinations, the civil rights revolution in this country, the incredible bitterness over the war in Vietnam, and the kind of heavy-handedness of our administration.

"But we should have won. We never should have let Nixon become President, and let what happened to this country happen. That's the big disappointment I had in my life. And sometimes I just get tears in my eyes and say, "Why in the hell did we do that?' "

Without realizing it, in the course of that memorable conversation, Hubert Humphrey dictated his own epitaph. Here's how he put it:

"What I want more in life than anything else now is respect, which I think I'm beginning to earn and get. I don't want to be President, I don't want to be Vice President. Or Secretary of State. Or majority leader. I know that those things are not mine to be, and I have put them very neatly aside, without remorse.

"But what I do want to be known for in the history books—and I am interested in that—is that I was an effective man in government. That I was a decent man, and that I knew my job. That I knew how to get things done, and that I did important things in government."

Of that judgment, there is no doubt.

A personal note: On the day Hubert died, I was having lunch with a friend. He mentioned Humphrey, and said he had done an impulsive thing. "I get tired of writing letters to widows," he said. "It's so frustrating and inadequate; so I sat down and wrote Hubert a very personal letter. I told him I loved him."

I wish I had done that.

[From the Washington Post, Jan. 15, 1978]

HUBERT H. HUMPHREY: A HERO IS HONORED

(By Richard Cohen)

In a large, unmarked room off the Capitol Rotunda, the military honor guards were going about their business of death. They had practiced for this and they were going to practice again Saturday, but it had turned out to be the real thing. So now they were preening before the mirror and talking about their work as if it was just another job, part of the routine and all, until one of them said this one was different. "Hubert Humphrey was my hero," he said.

He was 20 years of age, Air Force for the last three years, and his name was David Welhouse—Airman David Welhouse of Appleton, Wis. He was in the room with the others, waiting for their turn to stand guard by the coffin for a half-hour. He had been one of those who had drifted out into the hallway for some water—not to drink, but to wet down their white dress gloves so the rifles would not slip from their hands.

"I've been here three years and this is the biggest," one of them said. "This might be the biggest since Johnson or Truman died." Welhouse, standing nearby, said nothing. One of them, a Navy man, talked about the Army and how it always got the best of the ceremonial occasions because it was the senior service. The Army even got umbrella duty at the White House, he said. This was the chance for the Navy and other services to show its stuff. Heads nodded all around.

Inside the room, a man was wrapping himself in tape, taking in his waist like a woman in a corset. He took the stuff around his waist a couple of times, the wide, while tape making loud ripping sounds as it parted from the roll. Cots had been set up in the room and the men who were lying on them rose on an elbow to watch the man tape himself up. Soon he would look like a toy soldier. Some of his colleagues laughed.

Out in the hallway a little group had gathered. "We all knew he was going to die," one of them said. "We practiced for this. We practice a lot. All of the honor guards get together periodically and we practice this. We knew Humphrey was going to die."

This was the talk of men who have to do a job. They went on in this vein until I asked about Humphrey himself, and then Welhouse spoke up. Humphrey was not just another job to him, he said. Humphrey was special. The others nodded and suddenly the cynicism was gone and they all said that they were honored to serve in Hubert Humphrey's honor guard.

It is always this way with Humphrey, always a reluctance to admit that the man has gotten to you. It is this way with me, standing out in the Rotunda asking others what they think of Hubert Humphrey, when a moment before I was near tears. He can do that to you and I can tell you only of a night with him, a campaign evening at a synagogue

in Baltimore. There he was up there on the dais, wearing a white yarmulke and out in the audience was a sea of white yarmulkes and we, the press, were against the back wall, laughing at it all.

Humphrey was talking about Israel and as usual he went on too long and as usual he was verbose and bombastic and unashamedly emotional. He was funny and I was laughing because you cannot touch me with Israel. I have scar tissue called Israel—years spent listening to appeals and going door-to-door as a kid with a canister, collecting money for Israel, and me, myself, saving money to plant trees in Israel. There is nothing—nothing—Hubert Humphrey could tell me about Israel. But all of a sudden I was not laughing and he was touching me, grabbing me where I thought I was dead. You can resent Hubert Humphrey for turning you into an emotional slob.

It happened all the time. It happened in black churches and it happened on stump speeches and it happened at formal affairs. He could turn you around and make you cry and he could do all that even though you knew that he was doing it—that he was not perfect and that he had crumbled to Lyndon Johnson on Vietnam. But he was a man who was not afraid to dream and he dreamed dreams that gave other men headaches.

So now on a cold, snowy afternoon, Hubert Humphrey is lying dead and a 20-year-old Air Force man, his hair so short it's almost nonexistent, is telling me about Humphrey. "Some guys like football," he said, "and some guys like basketball. But with me, it's politics. Hubert Humphrey was my idol. I've idolized Humphrey since I was a kid."

By now the unit of six men was nearly formed and by now the officer was at its head and Welhouse fell in. They moved off at a slow pace, their rifles at their sides, their heels hitting the the stone of the Capitol floor with a measured cadence. They moved past a statue of John Hanson and a bust of George Washington and a statute of Dennis Chavez and then they paused before the entrance of the Rotunda itself. You could see the lights and you could see the coffin and you could see the flag over it.

At 2:29 p.m. the officer in the lead clicked his heels and the unit moved into the Rotunda. It moved slowly, each man dropping off at an assigned position. Welhouse stood to the right of the casket as you faced the front and he stood stiff as could be, looking straight ahead but seeing nothing with his eyes.

You look at heroes with your heart.

[From the Washington Post, Jan. 15, 1978]

HUBERT HORATIO HUMPHREY

It is almost unimaginable—the political life of the nation without Hubert Humphrey. For more than 30 years, one full generation, Hubert Humphrey was there: in the presidential politics of his party; in its terrible turmoil over Vietnam and social and racial justice; in the combat between the parties and between the claims of the executive branch and those of Capitol Hill.

And we all have our mental snapshots . . . a young Mayor Humphrey brashly and unceremoniously refusing to let the 1948 Democratic convention ignore its civil-rights obligations . . . an outspent and out-maneuvered candidate Humphrey making his generous peace with the Kennedys after the West Virginia drubbing . . . an overwhelmed and humiliated Vice President Humphrey unable to find his true voice or strength in the Johnson years until it was politically too late . . . a bounced-back 1970s model Hubert Humphrey, in the Senate, in the middle of it again (naturally), being personally as decent and helpful as ever to those who had beaten him in his periodic quests for higher office.

Those quests became the object of some merriment after a time, and Mr. Humphrey himself joined in the fun, although there was no mistaking the hurt and disappointment he had endured. But, after-dinner jokes aside, we don't think Mr. Humphrey's unflagging political ambition deserved to be a source of either derision or embarrassment. That is because it is impossible to think of another national political figure who so successfully and benignly merged the personal drive necessary to acquire power with a concern for the impersonal public goals that such power is meant to achieve. Hubert Humphrey was ambitious to use national office well—and for the sake of other people. To our great national misfortune, some politicians transform the hardship they have experienced or witnessed early in life into a quest for personal vindication, clout and comfort via public office. Mr. Humphrey spent 30 years trying to translate that witness and experience into a better life for others. It was his obsession.

So we hail, first, the invincible political ambition of Hubert Humphrey, and move smartly along to another aspect of his career that provokes our admiration and wonder, even though it too has been a frequent source of complaints: Mr. Humphrey's political longevity. Thirty years near the center of power has a demonstrable way of bringing out the worst in people. A loss of principle, a growing insensitivity to new or different circumstances, an inability to remember why one is in office at all except to stay there and, eventually, a sclerotic incapacity to grow or learn—surely these are the occupational hazards of decades-long public service. And just as surely none of them ever got Hubert Humphrey. His public career was remarkable precisely because the process of political aging worked so well in his case. He remainded faithful to basic principles even as he responded to new social currents and needs; and his adaptation to the "system"—his eventual initiation into the Club itself—was put in the service of his public goals. It did not, as is so often the case, become a substitute way of life or an alternative to the pursuit of those goals.

It is, of course, true that many people, ourselves included, have newly come to doubt the wisdom and merit of much that is being put forth in the name of those liberal Democratic values Mr. Humphrey espoused. So the question needs to be addressed whether the legacy of Hubert Humphrey will decline in value as this perception of the limits of certain kinds of mainline liberal legislation with which he was identified become apparent. We think not. And that is because Mr. Humphrey, at the distance of historical remove, will be recognized not as a man who fiddled around with some of the tired-blood and preposterous interventions in the society and the economy of recent years, but rather as a driving force behind a public commitment to involve government in the creation of a more racially and socially just society—here and abroad.

In a way, he was a victim of his own success, a casualty of the what-have-you-done-for-me-lately? syndrome. So much is now taken for granted that Hubert Humphrey pioneered that we can afford the luxury of quibbling about the details. In questions of civil rights and economic security and decent standards of care for the poor, the aged, the ill, Hubert Humphrey was there when the territory was uncharted and the terrain indescribably bleak and lonely. And the same may be said of his early and enduring commitment to improving the life and lot of people abroad. He was a steadfast patron of aid and development and arms-control efforts long before these had gained ho-hum general acceptance and also a man tirelessly in search of ways to extend human freedoms and human rights overseas.

Even so, we will not describe him as a great man. That is because the idea of "greatness" at the top of American politics has become too much burdened with connotations of overreaching power, eccentricity and egocentricity and one-way rides to national disaster. It doesn't go with this man of joy and bounce and decency and kindness. For Hubert Humphrey we prefer a phrase that is somehow both more honorable and more fitting. He was a good man—a good man who did great things.

I REMEMBER HUBERT

We all have our memories of Hubert Humphrey. He was everybody's alltime favorite. These are but a few.

I worked in 1959 and 1960 as Humphrey's Wisconsin campaign coordinator, and I saw Hubert at very close range in those days. One thing I'll never forget. We had a meeting called for a Sunday morning at the Jewish Community Center in Milwaukee—just two days before the election. The national press was streaming into Wisconsin to catch the last few days of the campaign. The crowd was very thin. It was early in the morning on a Sunday. And there was a lot of ice and snow on the streets.

But Humphrey rose to the occasion in ways that completely turned that meeting around. "They say the Humphrey campaign is disorganized—but I want you to know that the most organized thing that ever happened almost destroyed civilization." Those cutting remarks were not lost on a meeting in the Jewish Community Center.

Humphrey lost Wisconsin and lost West Virginia a few weeks later. Jack Kennedy got the Democratic nomination, and went on to win. The Wisconsin campaign became a bitter battle, but when it was over I learned another lesson about Humphrey the Man. After the convention, Humphrey got word that a few of his supporters in Wisconsin were dragging their feet. He got on the phone and read the riot act. He wanted everybody to pitch in and win—and they all got the message.

Humphrey was a night person. He came alive at midnight and loved to hold strategy meetings in the wee hours. Plant gate appearances at dawn were not his cup of tea. And as he caromed around Wisconsin in the big campaign bus, he blamed all that bustle on Estes Kefauver.

Getting a good campaign picture was a special headache. "I've got a million pictures of myself—get one of those." But none of them suited.

The best picture had been taken by Time's Wally Bennett for use in a cover painting for Time magazine. With a little scouting, we got Time to give us the picture and it was used for years afterwards as an official Humphrey picture. It's the same portrait we have on page one this week.

I'll never forgive the networks for the way they lampooned the Humphrey bean feed during the 1960 campaign. Humphrey gave a serious talk on arms control, and the media rolled out tons of equipment to film the event in Wausau, Wisconsin. Not a word came forth about the content of that huge rally in the center of the state—just a lot of fluff about beans. So I know what Humphrey means when he said: "Where were you guys when I needed you?"

Back in 1976 at the AFL–CIO convention the word came back that Humphrey had given an absolutely sensational speech that took the convention by storm. It was the greatest speech of his life. And a few weeks later Humphrey got the transcript and put it in the Record. On paper the speech was all words, just another collection of Humphrey rhetoric. But when put to music—that was something else.

In Rochester, New York, I heard Humphrey debate Ken Keating, then a congressman from that part of the country. Harry Truman

was still President and Secretary of State Dean Acheson was everybody's whipping boy. Midway in Humphrey's speech he had that crowd cheering the name of Dean Acheson, mostly describing the perils of the world and America's role in dealing with the perils, and then dropping in Acheson's name. It was a fantastic performance. But the trendy media of those days used to laugh at Humphrey.

The moralistic Swedes used to give the U.S. a hard time during the Vietnam War, but they always loved Hubert Humphrey, even if he was mostly Norwegian. Humphrey had a feel for the problems of western Europe, and many Social Democrats in Europe felt that Humphrey was their spiirtual cousin back in the States. Indeed he was. Humphrey had a passionate feeling about the U.S., but he was truly a citizen of the world.

I think Humphrey was happiest when he was Senate Majority Whip during the Kennedy years. He had a small Senate hideaway. Norm Sherman called a group of labor writers together to chew the fat with Humphrey. We felt very inside of things, sitting there with our hero, getting the lowdown on the government. Humphrey always felt that a strong labor movement was vital to American democracy. How many political leaders still think that?

Another time I went to Moorehead, Minnesota, to take some pictures and do a story way back in the 1950's when Humphrey was up for re-election the first time. It was a long, tiring day and it was fun to see Humphrey in action among farmers. We caught a plane at midnight and I flopped down to take a nap. Humphrey gave a lecture to the hostess on the plane about the politics of the U.S. Senate. She could have written a prize-winning term paper by the time we got back to the Twin Cities.

The civil rights votes were his triumph, and he knew the importance of Sen. Dirksen to winning that battle. He used to laugh and say "We are going to build the biggest monument to Everett Dirksen" when this is over. I guess that really was why so many people loved him. He made politics fun. He cared deeply about the issues—and he always wanted to win—but he wanted to win in such a way that nobody went away mad.

The supreme irony is that in his death he brought Richard Nixon back into the public eye. Those of us who had a chance to work with him—if only for a few days or months—will never forget him.—F. W.

[From the New York Times, Jan. 16, 1978]

A BRIEF "KINSHIP OF PURPOSE"—CARTER LOSES HIS MOST VALUABLE SENATE ALLY WITH DEATH OF OUTSPOKEN MINNESOTA LIBERAL

(By Hedrick Smith)

WASHINGTON, January 15.—Behind Jimmy Carter's warm allusions this morning to his "kinship of purpose" with Hubert H. Humphrey lies the cold recognition in the White House that the President has just lost his most valuable ally in the Senate, where he has precious few friends and natural supporters.

The irony is that their unusual closeness and collaboration in recent months, symbolized not only by today's eulogy but also by Mr. Carter's generous gesture of inviting Mr. Humphrey to Camp David, developed from the prickly beginning—bordering at times on animosity—of the 1976 Presidential campaign.

What made them such unlikely allies is that Senator Humphrey the passionate practitioner of old-style politics, epitomized so much of what Jimmy Carter, the cool practitioner of the new, set out to defeat and demolish.

As an exuberantly outspoken ideological liberal, the senator from Minnesota personified both the Washington and the Democratic Party establishment against which Mr. Carter, the pragmatic and purposefully non-ideological outsider from the South ran his campaign.

SAW "DISGUISED" RACISM

"Candidates who make an attack on Washington are making an attack on Government programs, on the poor, on blacks, on minorities, on the cities," Senator Humphrey gibed to reporters one morning in March 1976. "It's a disguised new form of racism, a disguised new form of conservatism."

Mr. Carter, sensing correctly that the barb was directed at him and always fearful that Mr. Humphrey would become the rallying point for a stop-Carter movement, retorted that the Minnesota Democrat was a has-been and a loser whose brokered nomination at the 1968 convention had left the Democratic party in disarray.

When Mr. Humphrey ventured toward entering the Presidential race in the New Jersey primary and pulled back, the Carter partisans were disappointed. They had sought a head-on confrontation, confident that this would complete their rout of the veteran Washington political crowd.

But once Jimmy Carter was in the White House, the relations between the two men changed dramatically. "You know we hated this fellow," Hamilton Jordan, the President's highly partisan political lieutenant, told a close Humphrey confidant last spring. "Now we love him. This is the greatest man alive. We didn't know him."

Both the President and the former Vice President had risen from small town beginnings, one in Plains, Ga., and the other in Wallace, S.D. Both were idealists. Yet in large measure, it was Mr. Humphrey's warmth, his age and his willingness to forgive and forget that changed the political chemistry between them.

PRESIDENT SOUGHT ADVICE

With Senator Humphrey removed as a political rival and threat, Mr. Carter felt increasingly comfortable turning to him for advice and support on a variety of issues, and Mr. Humphrey, with his Presidential ambitions now firmly set aside for his lifetime, relished the confidence that the new President had in him.

The President's decision to choose former Senator Walter F. Mondale, one of Mr. Humphrey's Minnesota proteges, as his Vice President also mellowed the Humphrey-Carter relationship.

But their new warmth did not silence Mr. Humphrey's criticism of Mr. Carter. Along with House Speaker Thomas P. O'Neill Jr., he became one of a couple of Congressional leaders with a close enough relationship with the President to oppose him directly and forcefully.

WARNED CARTER OF DEFEAT

Last April, for example, he was influential in persuading President Carter to retract the $50 tax rebate that he had proposed, arguing that there were not enough votes for it to carry. In his rasping and ebullient voice, he telephoned Mr. Carter from Florida to say: "I have to tell you, Mr. President, I can't support you. You had better prepare your people for defeat."

At Congressional leadership breakfasts, Senator Humphrey objected in the early months to White House nervousness about Congressional spending and the dangers of inflation, arguing that private industry and rising international commodity prices were to blame. Largely as the result of Mr. Humphrey's pressures, Mr. Carter eventually acquiesced in farm price supports costing $3 billion more than originally proposed.

Repeatedly, the Happy Warrior, as Mr. Humphrey was known, did battle against Arthur Burns the conservation-minded chairman of the Federal Reserve Board.

"Every time you get the economy moving," Mr. Humphrey would tell the President, "Arthur Burns raises interest rates and slams on the brakes." His protests were ultimately an important factor in persuading Mr. Carter not to retain Dr. Burns as chairman.

PUSHED FOR FOREIGN AID

As Deputy President Pro Tem of the Senate, Mr. Humphrey also helped President Carter out of trouble with a great deal of legislation. In fact though not in title, he acted as chairman of the Foreign Relations Committee, pushing through foreign aid legislation when it was unpopular and embattled.

Now, both White House and Capitol Hill strategists comment on the loss to President Carter. "I don't know what Carter is going to do without Hubert Humphrey," said Representative Fred B. Rooney, a Pennsylvania Democrat. "Hubert got a lot of chores through Congress for the President."

The ultimate political irony is that even in death, Mr. Humphrey's liberal influence persists. He had a large hand in imposing upon the reluctant President the Humphrey-Hawkins bill setting a national goal of reducing unemployment to 4 percent, a legacy of the very New Deal economics and political philosophy that Mr. Carter has sought so carefully to sidestep.

With the current outpouring of affection for Mr. Humphrey, that legislation is likely to move more easily through Congress and Mr. Carter is likely to face even greater pressures than before to gravitate toward the politics of the man he so ardently opposed in the campaign and whose political "kinship" he espoused today.

HUMPHREY: SOME PERSONAL RECOLLECTIONS

(By Meg Greenfield)

Was there ever a politican whose televised, public, full-text-of-the-speech persona conveyed so little of the real man? I don't think so. Hubert Humphrey was Senate Democratic Whip when I first met him. I thought of him as a walking rightminded position paper. He was no one I was especially eager to meet, even though I dutifully admired what he stood for and said. In fact, when a friend told me he would be joining us for dinner the night I met him, I was a little disappointed: There went an easy, agreeable, relaxing evening. I figured—it would be do-good and uplift all the way.

Enter Hubert Humphrey—hilarious Hubert, reenacting the day's Senate debacles. Chief among these, as I recall, was the three-way encounter between himself, Senate Majority Leader Mansfield and Sen. Wayne Morse. Morse, as it happened, was very sore at Mansfield about something and wasn't speaking to him. Hubert played all three parts: Mike Mansfield sitting in the Senate chamber, pinch-faced angry, glaring straight ahead . . . Hubert sitting next to him awash in discomfort as Morse, standing, peered down at Hubert and boomed: "Will you tell the Majority Leader for me . . ."

HUBERT: "Why don't you tell him yourself he's right here."

MANSFIELD—motionless, face forward, nothing.

MORSE: "Please give him the following message . . ."

HUBERT: "Oh, God . . ."

And then the approach of Strom Thurmond, still a Democrat, intending to go golfing but wishing to be informed if anything happened—"Remember, Hubert, you're my leader, too."

Hubert Humphrey as Strom Thurmond's leader. Shades of 1948 . . . It was splendid, and he loved it. He made a pledge to Thurmond. "Nothing has happened around here for 25 years, but if it does, I promise you, Strom, I'll let you know."

"Thank you, Hubert. You're my leader, too."

Humphrey made himself look as ridiculous as the others when he did his impersonations, maybe even a little more so. He had that rarest of gifts: Humor that was sharp but never vicious or self-bolstering at the expense of others. It was the human condition with all its oddities and strengths and weaknesses and surprises that entertained him. We went to a rather no-account nearby restaurant that night where Humphrey had never been; but the headwaiter, overcome by a rare encounter with celebrity, boomed out in a voice no diner (for two blocks around) could miss: "Your usual table, senator?"

Humphrey loved it, and did everything he could to help. "Oh my, yes," he said, not knowing which way we were going to be led. When he had pondered the menu and placed his order, he remembered to add after whatever it was: "You know, my usual . . ."

We had become friends. It was the first spring of Lyndon Johnson's presidency, when no one seemed to have any criticisms more serious than that the President shouldn't be lifting his dog up by its ears. Hubert was honchoing the civil-rights bill through the Senate, and one day he committed some kind of indiscretion about what Johnson might or mightn't take in the way of compromise, and this went out over the wires. Hubert almost immediately called a press conference to say he had been utterly mistaken and was sorry if he had given any impression that Lyndon Johnson was even considering any compromise. To our insistent and repeated questioning he steadfastly replied: No, Lyndon Johnson hadn't called him or got angry or demanded this backdown . . . he, Hubert, was acting on his own to correct an error.

A few minutes later, when he had gone on to the Senate floor and I had repaired to the gallery, our eyes met, and I expect I gave him a disbelieving, skeptical stare. Humphrey, reached up with both hands, gave his own ears a terrible upward tug, very nearly lifting himself off the floor, grinned at me and turned back to his Senate business.

And now he was about to be Vice President. Somehow, it seemed to me of the candidates who had got a political reprieve by virtue of the tragedy that had struck the Kennedys, Hubert was the only one who could stay free of that aura of having profited from someone else's disaster. At the Atlantic City convention where he had been nominated—after a Johnsonian maneuver that the author Theodore White has likened to Caligula on "I've Got a Secret"—there was a big party for him. I stood on a table with some other press in the jam-packed room while the guitarist who had been the sad troubador of his 1960 presidential campaign played the old Hubert Humphrey songs and everyone cheered and some people wept a little. Things were so morbid and sinister at Atlantic City in 1964, there was so much worse about to come, and people seemed to sense as much. Hubert's stemwinding speech ("But *not* Barry Goldwater") was their last collectively happy moment for years.

You talk about forgiveness and toleration. It was the day of the Wisconsin primary in 1968, a few days after Johnson had announced he wouldn't run again, and Humphrey was in New York making himself scarce to the press, deciding how he was going to play it. I was in New York too and made an insupportable pest of myself, calling his press aide Norman Sherman every 10 minutes on the minute, importuning for a ride back on the vice-presidential plane during which I would be granted an interview. I wore them down: Be at the Waldorf Towers at 8 p.m.

I was there, coming straight from cocktails with the editor of the magazine I then worked for. I was shown up to a suite where Humphrey's aides, including then-Sen. Mondale but not Humphrey, were making phone calls and otherwise pursuing a variety of political chores. They offered me a drink. I accepted—several times. You know what is coming. Pretty soon Humphrey called down and invited me up to a suite where he and Dwayne Andreas had been watching the Wisconsin returns. He was in his usual good spirits. I, by then, was in much better spirits than usual. Another drink was proffered and received.

I can still remember the airborne "exclusive interview," but only in these respects. We sat facing each other on the small jet plane, and I would ask if he were going to run and each of his two, side-by-side faces, four eyes and all, would look very earnestly back at me, and he would say something—who knew what? I had to report to my office the following day that I had a good news/bad news story. The good news was that I had gotten the much-sought-after interview. The bad news was that I was bombed out of my head by the time it occurred and hadn't the vaguest idea what Humphrey had said. The only thing I remembered well was his amiable concern—he never let me forget it afterward—as he instructed the future Vice President of the United States upon our landing: "Fritz, make sure she gets home."

Well, he was going to run and everyone knew it. It was during that campaign that the old Reporter magazine, which I worked for, announced it would soon go out of business. Washington being Washington and all of us being the irredeemable smart alecks that we are, the exchanges I had with people over the prospective demise of the magazine were invariably either gossipy or "clever." Everyone, it seemed, had a witty remark or an unflattering psychological theory to offer for the occasion—but not Hubert Humphrey.

For the last issue of the magazine I was doing a piece on his campaign and was in a huge crowd of journalists and campaign supporters and just plain spectators one day when he came out of some hotel ballroom on his way to a motorcade. He spotted me. I nodded hello. But he stopped and then came over. He had just heard the magazine was going out of business, he said. I got ready with clever replies one, two and three and none-of-your-business four, though I should have known I wouldn't have need for any of them. Hubert Humphrey had only one reaction and concern: "Are you okay? Do you need a job? Can I help?" I said, No, it was okay, I had a new job. "Are you sure?" he worried. "Let me know if you're not okay."

And that, quintessentially, was Hubert. For the public figure and especially for the campaigner the crowd out there tends to be one glutinous mass of statistics and blurred presences, a heave and surge of faceless, nameless voters to be placated and wooed, above all else an undifferentiated, shapeless mob. Humphrey, looking into it, always and only saw people.

A Kind of Man Whose Memorial Even Nixon Could Attend

(By Mary McGrory)

Hubert Humphrey, dreamer and optimist that he was, could not have imagined how "comely and reviving" his memorial service would be.

The official honors that eluded him in life were rendered in full measure under the Capitol Dome: a guard of honor, the assembling as for a State of the Union address—the speech he ached so long to give—of the Congress, the Cabinet and the diplomatic corps.

The occasion brought out the best in everyone. Jimmy Carter, speaking from the heart, gave the best and best-delivered speech of his presidency, one in which he admitted error. Vice President Walter Mondale read a letter Humphrey wrote to his wife Muriel 40 years ago on first seeing Washington, and its innocent, rallying phrases brought him back. The Isaac Stern trio wreathed the words and the tears in exquisite music.

And Richard Nixon came out of exile to provide the edge of controversy that a great event requires and to give to the mourners needed distraction. Sen. Edmund Muskie, who had been weeping, stared wide-eyed as the specter strode by.

Even those who were most likely to think that Nixon was again imposing on Humphrey—"using the occasion to come out of the closet," one House member snorted—could not, remembering Humphrey, give rein to their spite. They knew that he would have welcomed Nixon.

Bruce Solomonson, Humphrey's son-in-law, his bag-carrier during the heartbreaking struggles for the presidency, spoke the unexpected verdict on Nixon's presence: "nice."

"You know what respect he had for that office. He forgave him a long time ago."

One inadvertent touch was almost too much. Senate Chaplain Edward Elson chose for his text the prayer of St. Francis, which was certainly appropriate for Hubert Humphrey, the most forgiving man in American politics. When he read, "It is in pardoning that we are pardoned," all heads which decently could swiveled around to Richard Nixon, who sat separated from his pardoner, Gerald Ford, only by Mrs. Ford. Both pardonee and pardoner stared straight ahead.

From the moment he entered the Rotunda, Nixon seemed not to know where to look. He did not turn his head. His eyes darted about. At one point, Mrs. Ford, who appeared exhausted, engaged him in chat. The ex-president looked inquiringly at Ford. But Ford was gazing resolutely at Humphrey's flag-draped coffin. He was the only person present determined not to know that Nixon was there.

Muriel Humphrey did her best, as always, for Hubert. Mondale said it was to be a celebration, and she tried not to cry. She broke down when Robert Merrill sang "Ave Maria." The president took her hand. She provided the final felicity. At her prompting, the president asked Merrill to sing "America the Beautiful" again, with everyone joining in.

The president said that Humphrey was a big man. He was big in his turn. He confessed to "harsh words of my own spoken under pressure and in haste."

Humphrey had the comfort in the end of being persuaded that he was, as Carter said, "the most beloved of all Americans." He discovered it when he was stricken with inoperable cancer and began to say goodbye. Ravaged by futile treatments, he dragged himself from event to event, to the eulogies in the Senate and the House, to the dedication of the Hubert Humphrey Building at HEW, to the long, noisy banquet for the launching of the Hubert Humphrey Institute at the University of Minnesota.

He died the way he wanted to, speaking, until his breath gave out, of what he had done and still wanted to do.

Ironically, it was his fate to divide the Democratic Party: the first time, in 1948, out of conviction on civil rights; the second, 20 years later, on Vietnam—his foes said out of fear of Lyndon Johnson, his friends said out of gratitude to Johnson, for having conferred on him the misery of the vice presidency.

His loss would have brought a special kind of bitterness to any other man. Added to the excruciatingly narrow margin was the knowledge that if he had signaled just three weeks earlier his intention to be his own man, he would have saved the country from Richard Nixon.

But he did not complain. He picked himself up. He went home and met the young protesters who had broken up his meetings, in the classroom. He ran for the Senate.

He came back and threw himself, with his usual zest, into making government do more for people. He lost, to another, lesser man, his last bid for higher office, the majority leadership. He and Robert Byrd became the best of friends. He gave up his dream of the White House, even though the office, for once, seemed to be seeking him. He feared derision.

The farewell of his peers, a class affair from start to finish, made it plain that they knew what he was all about. He was the kind of man to whose memorial service Richard Nixon could go. Even Nixon could not be suspected of hating Hubert Humphrey.

A grieving staff member said, "The senator has no enemies."

The memorial service confirmed that epitaph. Hubert Humphrey leaned on causes, not people.

[From the Washington Star, Jan. 16, 1978]

WHAT'S LEFT TO SAY—A LOSS FELT BY EVERYONE

(By Jack W. Germond and Jules Witcover)

What is there to say about Hubert Humphrey that has not already been said? The answer, of course, is nothing. And that in itself says a great deal about the man who, though failing in his greatest political ambition, came to be loved perhaps as no other presidential also-ran in the nation's history.

Nothing new can be said because in Hubert Humphrey what you saw was what you got. In his long public life, no one ever seriously wrote about the "new Humphrey" as opposed to the "old Humphrey" because there was always only the one—open and consistent in his unvarnished passion for politics and public service.

Memory goes back to 1960, when Humphrey ran against John F. Kennedy in the West Virginia presidential primary. He campaigned ferociously by bus through the hills of that rural state, literally from dawn to past midnight. He would jump out onto street corners and dash up "hollers" to shake all hands, shouting all the while his nonstop litany of the politics of joy. That was what made the nickname "the Happy Warrior" so fitting and so unavoidable.

Humphrey was forever telling folks that he was "pleased as punch" to be with them, and there was no doubt about it. To end a day's campaigning before midnight was to guarantee at least an hour or more of zestful political talk in his hotel room over a drink or two with whatever friends—political or press—happened to be at hand.

Above all else, Hubert Humphrey was a talker. What Charles Francis Adams wrote of William Jennings Bryan could surely have been written of Humphrey: "He is in one sense scripturally formidable, for he is unquestionably armed with the jawbone of an ass. He can talk longer, and say less, than any man in Christendom . . . A talking machine, he can set his mouth in action, and go away and leave it, sure that it will not stop until he returns."

Humphrey was forever being ribbed by his colleagues for his propensity for speaking interminably, and it was indeed the bane of his campaign aides. "Every time Hubert goes out there, I tell him to keep it short," one of them observed during his 1968 presidential bid, "and he promises me he will. But once he gets up there, something automatic in him takes over, and he just goes on and on." When he returned to Washington last fall after his doctors had told him his cancer was inoperable and terminal, and his colleagues paid him a touching tribute on the Senate floor, he said his weakened condition would not permit him to talk long. But he proceeded to prove that even terminal illness was no match for the mechanism in him that switched on whenever he had an audience.

There was nothing, though, mysterious about that mechanism. It was something called conviction and the determination to communicate it. Hubert Humphrey was accused of many things as a senator, a vice president and a presidential candidate, but never of not believing. When he believed in something, he believed in it up to his ear lobes, and he appointed himself as a one-man missionary to convey The Truth to everyone within earshot. In his earliest public years, as mayor of Minneapolis, he believed in civil rights and his fight for a bold statement on the subject at the 1948 Democratic National Convention remains one of the brightest lights in his long public record.

Sometimes he believed in the wrong things. Like his personal loyalty to Lyndon Johnson, the man who selected him to be his vice president and thus resurrected for a time his presidential chances. Though, like most rational men in the 1960s, Humphrey had his reservations about the war in Vietnam, he put his loyalty to Johnson first and not only abided by Johnson's war policy but, as was his style, spoke vigorously for it. Only later, late in his 1968 presidential campaign—too late to make a difference—did he succumb to the implorings of many of his aides and call for conciliatory steps toward the North Vietnamese that put him at variance with the Johnson policy.

Some said of Old Hubert—he was always that to everybody on Capitol Hill—that his "trouble" was that he had no low gear, that everthing he did, he did at top speed and top enthusiasm, in a world in which not everything called for either. In terms of his personal political success, that may have been true, for it is undeniable that his foes—conservative Republicans especially—always made hay by painting him as the Democrat's biggest "liberal," in the pejorative way they are able to make that word sound. Even when the liberalism of his party overtook him, and made Humphrey seem, at best, a middle-roader by comparison to the George McGoverns, the Republicans always were able to get a laugh or a jeer from their faithful by invoking his name as the last of the big-time spenders. His enthusiasm generated big notions to solve big problems, and he thought government could do anything if there was enough money and will.

But Humphrey could no more stem his enthusiasm than the sun can be kept from rising. Long before he demonstrated such courageous and open defiance of the cancer that killed him, his career was marked more than anything else by his remarkable resilience of spirit. Every time he got knocked down, there he was bouncing up again like one of those dolls with the round bottoms that never stays down. If there is any such thing as the American spirit, and we of course like to think there is, then Hubert Humphrey embodied it as no other American ever has.

All this, of course, has been said. Because there really *is* nothing left that hasn't been said at this time of his passing. And it is all so familiar because Hubert Humphrey lived his life so fully and so openly. He always let everybody in, and that's probably why everybody feels a personal loss now that he's gone.

[From the Los Angeles Times, Jan. 16, 1978]

AN UNCOMMON REPRESENTATIVE

Hubert H. Humphrey could speak with the rhetoric of drums and trumpets as he summoned his countrymen to share his visions of a better society. He had seen enough not to believe in human perfectibility, he had seen too much not to believe that compassion could find expression in national law. He never stopped examining the American promise to assess what remained unfulfilled. He never, to the last, held back from throwing his incredible energy into the effort to get things done.

His last months were heroic. His face white and drawn, his body weak, Humphrey employed all his energies to remain in touch with the American people. They, in turn, paid him tribute after tribute in what amounted to a national expression of gratitude.

Humphrey was very much a product of his time and place. In his father's house he learned the principles of Wilsonian democracy, in the small towns of South Dakota where he grew up he drew nourishment from the Populist tradition. The depression pushed him into political maturity, and sharpened a sense of moral indignation that he never was to lose. The New Deal confirmed his belief that social ills could be lessened by legislative remedies.

National prominence first came when he led the fight at the 1948 Democratic convention for a strong civil-rights platform plank. ("Who does that pip-squeak think he is?" asked one of the party elders.) Humphrey called for a statement guaranteeing equal political rights, equal-employment opportunity, security of person, equal treatment in the armed forces. You are rushing things, he was told by those fearful of splitting the then-solid South from the party. We are 172 years late, Humphrey answered.

Humphrey was elected to the Senate in 1948. Brash, feisty, contentious, he promptly offended the power structure with his disregard of the unwritten rules of the club, his readiness to do battle even with the patriarchs of the chamber. In time he learned to play the game, his effectiveness as a legislator steadily increasing as he became less doctrinaire and more tactful, as he brought his quick intelligence to bear on complicated issues, as he became adept at the necessary trade-offs and compromises that are essence of successful congressional politics.

He became, in short, a highly skilled politician, with all the virtues and faults that implies. He took care of his constituents by championing price supports for domestic agriculture and high tariffs on imported food. But broader human concerns were his preoccupation. The first bill he introduced in the Senate in 1949 was for a system of medical insurance for the aged through Social Security. As with his advocacy for strong civil-rights legislation, it would be another 15 years before the dream became reality. But Humphrey never stopped pushing.

He was the legislative initiator or key leader in such areas as expanded federal aid to education, the Peace Corps, conservation, the Arms Control and Disarmament Agency, food for peace programs, the limited nuclear test ban treaty. With legislative accomplishments came political advancement, to assistant Senate Democratic leader in 1961, finally to election as Vice President under Lyndon Johnson in 1964.

The vice presidential years were ones of increasing frustration and even humiliation as Humphrey, publicly loyal to his leader on the Vietnam issue, privately voiced his growing doubts until finally he was virtually barred by Johnson from his inner council. In 1968 came the chance that Humphrey had long coveted—nomination as his party's presidential candidate. In divisively painful circumstances, he ran a hard and brave campaign, his narrow loss giving him one of the few defeats in a long career.

Humphrey returned to the Senate in 1970 and was reelected overwhelmingly in 1976, even though he was too ill to campaign. The people of Minnesota knew that they had an uncommon representative in Washington. It was the good fortune of other Americans to be able to share in that representation.

Now the last courageous battle has been fought, the irrepressible flow of words has

stopped, and something special has slipped out of our political life. We shall miss Hubert Humphrey very much—his decency and wit, his ebullience and amiability, the honorable intensity he brought to political combat. We shall miss him for the joy that he took in his manifold accomplishments, and for the dreams that he was able to make real with pragmatic dedication.

[From the Washington Star, Jan. 1, 1978]

AN UNFORGETTABLE DAY WITH HUMPHREY ON CAMPAIGN

(By James R. Dickenson)

In his eulogy to Hubert Humphrey, Vice President Walter Mondale said that the late senator from Minnesota loved to campaign because it involved meeting people and Hubert H. Humphrey loved people.

This is one of the understatements of the 20th century. Hubert Humphrey loved people and people loved Hubert Humphrey. He was one of the few people political reporters actively looked forward to campaigning with and interviewing.

When he returned to Washington suffering from terminal cancer to begin his final session in the U.S. Senate, where he had served for nearly 30 years, Humphrey admitted that he was only at about 70 percent of physical capacity—but he allowed as how that was probably the equivalent of most normal people.

This was undoubtedly true, for no one in memory matched Hubert Humphrey's enthusiasm and incredible energy on the campaign trail, which is attributable to the long and deep love affair between him and the common people.

Hubert Humphrey's recognition factor around the country had to be about 135 percent. In airports in Dallas, Phoenix and Appleton everyone not only recognized him but gave him messages to relay to relatives in South Dakota and Minnesota.

President Carter, in his remarks at Humphrey's memorial services at the Capitol yesterday, apologized for his "harsh words spoken under pressure and in haste." This was an extraordinary step for any politician, particularly a president, but it was simply an affirmation of Carter's basic humanism.

Hubert Humphrey made us all feel good about ourselves. He epitomized the best in America, its optimism, compassion and confidence that problems could be solved and equality achieved. He let us believe that the American experiment in Democrary will work.

He made everyone he met feel like a million dollars. When he was running for the Senate again in 1970, two years after his shattering defeat in the 1968 presidential election, I introduced him to my niece and nephew in the Minneapolis airport as we were getting ready to embark on what for Humphrey was an average day's campaigning in Minnesota.

Humphrey had the marvelous gift of not talking down to anyone, including pre-teen children. He talked to them as adults, asked them how their concerns were going, talked to them as though they were the most important people in the world—which they like everyone else think they are—and made friends and admirers for life.

That campaign day should be bronzed and entered into the Smithsonian. Humphrey, his gracious and infinitely patient wife, Muriel, an aide and an unsuspecting reporter flew off on a small chartered airplane for Detroit Lakes, where he was to be marshal of the Labor Day parade that marks the end of the summer season. It was a campaign day that started at 8 a.m. and was scheduled to end back in the Twin Cities at 7 p.m.

A tornado had touched down and destroyed a number of homes in North Central Minnesota, that day, however, and there was nothing for it except that Hubert Humphrey would fly over to commiserate with the victims and promise them government support.

In the process of flying over his beloved state he talked incessantly about the wonder of the vision and energy of its settlers, of the claiming of the forests and the clearing of its fields, the miracle of towns, libraries, schools, churches, hospitals and the whole range of human aspirations and achievement.

After the tornado victims, the candidate visited a county fair at which he was recognized by everyone and treated like an old and beloved uncle. The barker at the American Legion bingo game announced that "here's good old Hubert, come on over and have a game Hubert!" and good old Hubert realized that there was nothing more that he wanted in the world than a bingo game.

He sat next to a young mother and her young son, who had his hand shaken, his head patted and a lecture to obey his mother. He took it as though it was what anyone would expect from a long-time United States senator.

Returning to Minneapolis, the candidate decided that he should go to a new shopping center and shake a few hands. Muriel looked up from her needlepoint as the airplane taxied to its parking place and gently suggested that he was already a couple of hours over schedule and that maybe he should give everyone, including himself, a rest.

Hubert Humphrey debated this reasonable point briefly and rejected it. As the clock moved on to midnight in the Humphreys' St. Paul home he was still going 120 miles an hour, backing the exhausted reporter up against the kitchen wall as his plans for more schools, more well-run old age homes, more hospitals, more jobs, more compassion for the nation's unfortunate spilled out one by one.

This was standard for a Humphrey campaign and whatever mistakes Hubert Humphrey made, his concern for the welfare of people and his willingness—his eagerness—to put his body on the line was the source of his extraordinary rapport with the common man.

He made his mistakes and they were crucial and not always admirable. He probably lost the presidency in 1968 because of his unwillingness or inability to separate himself from Lyndon Johnson on the issue of the Vietnam War. He did George McGovern's presidential campaign in 1972 considerable harm by trying to change the rules after the game had been played through his challenge to McGovern's winner-take-all primary victory in California.

Humphrey's mistakes hurt him most of all, although considering the fate of the Nixon administration it can be argued that they may have hurt the country as well.

There can be no question of the bitter anguish his 1968 defeat caused him. Years later he would talk about it and tears would come to his eyes as he recanted the terrible disappointment of that narrow, less than 1 percent, defeat, which was compounded by his realization that it was his liberal friends who had most turned against him.

But few were less able to forgive and look on the best side of people than Hubert Humphrey. Last weekend there were parties in Washington of his legion of workers and supporters.

Mondale quoted Shakespeare's words about how a good heart keeps its true course and how this applied to Hubert Humphrey.

On Saturday night a group of supporters recalled a campaign debate in 1968 as to whether Humphrey should appear at the Lincoln Memorial where there were demonstrators against the Vietnam War. He was finally advised to "do what your heart tells you to do."

Forty-five minutes later Humphrey departed for the monument. He seldom went wrong when he followed the dictates of his heart.

[From the Washington Star, Jan. 17, 1978]

A POLITICAL LEGACY

By the time Hubert H. Humphrey lost his gallant battle with incurable cancer, there had been ample time for homage. All his good causes had been duly noted—civil rights, full employment, arms control, health care for all. So had his foibles—the enthusiasm for government ("you don't have to be a sourpuss to run for President," he often insisted during the all too sour campaign of 1968), the talkativeness ("Hubert," teased his old adversary, Barry Goldwater, "has been clocked at 350 words per minute, with gusts up to 500.")

It was all very amiable but faintly patronizing. One might have thought that Hubert Humphrey was a Milquetoast figure who rarely said or did anything controversial, when in fact he had been at or near the center of every great controversy of the last 30 years. Among other things, he was one of those who redefined American liberalism in a way that was, and remains, controversial.

"The liberals," wrote Walter Lippmann in 1934, "believe that no rulers are wise enough to plan the destiny of mankind . . . They rely upon the initiative, the inventiveness, the endurance of individuals (and) hold that a wide distribution of responsibility is the surest foundation of a society, that self-reliant individuals will sustain the nation when its governors fail."

Liberalism thus defined sounds closer to the Liberty League than to the creed of Hubert Humphrey. Not that he doubted "the freedom of mankind," not that the South Dakota druggist's son was unschooled in self-reliance. Vice President Mondale read a poignant letter at Mr. Humphrey's services at the Capitol that might have been written by a Horatio Alger hero. It had been written by Mr. Humphrey as a young man who saw America as a land of limitless personal opportunity and Washington as the best place to realize that opportunity.

Yet Hubert Humphrey seems to have viewed the political values of which Walter Lippmann wrote as private, not political, ones. The Hubert Humphrey who had himself risen by self-reliance cherished, it seemed, a less arduous pathway to self-fulfillment for the rest of us: a pathway eased by government.

This was the paradox of Mr. Humphrey. No politician of his time seemed more quintessentially "American"; yet he departed in quite fundamental ways from the political values of the founding fathers. They had been 18th Century skeptics who feared majorities, and some of them—Madison and Hamilton come to mind—were deeply pessimistic about human nature and believed for that reason that any powers given to government should be jealously rationed. The "politics of joy" was not their style. Mr. Humphrey, for his part, was not bedeviled by doubts of popular wisdom, not reluctant to give broad powers to government, and far from pessimistic about the possibility of improving the human condition by legislation.

To the last, in fact, Hubert Humphrey swam against all tides of doubt. His last great legislative enthusiasm was a full-employment bill whose aims were as generous as, in the view of many, its economic and political foundations were shaky. These cavils he took in stride.

One could say, then, that in the death of Hubert Humphrey we not only mourn a large-spirited "public man," but acknowledge the limits of his political faith. Faith in the unfailing competence of government to solve human problems, and not compound them, was his trademark.

Of course, as a politician of large perspectives he no doubt understood that good causes pass and legislative monuments develop cracks at the foundation. He would probably have conceded that liberalism, to survive, must beware of the accretions of authoritarianism, rigidity, and faith in dubious remedies it has assumed since Walter Lippmann sought to define it 43 years ago. He himself was flexible as to means, experimental in approach to public problems, generous in his appreciation of differing perspectives and views. In that way he was exceptional among all political figures—especially so among political figures who shared his optimism about the power of government, the good purposes of people in the mass, and the benevolence of legislation.

What stood out, in the end, was not his program, important as it was. His program was rooted in a vision of splendid possibilities that comes to few of us, and fewer now than a few years ago. What stood out, rather, was his belief that politics itself is an important and honorable profession. It was not to be downgraded by slick anti-political posturing, nor cheapened by cynicism. Perhaps this is his most valuable legacy for us. Like the founding fathers, from whom he differed in so many ways, he believed that politics itself was a noble and necessary calling. It does not seem to be a universal view today, to our national peril.

HUMPHREY ALWAYS WAS AN OPTIMIST

(By Saul Pett)

He thought and he talked and he ran like the wind. In victory, he was ecstatic. In defeat, he bled but not for long. He had something inside, an inner gyro, a self-sealing mechanism which enabled him to look at the same set of facts and replace gloom with cheer.

He was almost never without momentum. He was always his own best cheerleader. History and the election returns might easily have made him a Hamlet. Instinct insisted on Ariel, an aging but blythe spirit.

He was the heir apparent of a liberal legacy that began with Franklin Roosevelt and stretched through Harry Truman, John Kennedy and Lyndon Johnson until, with Vietnam, there was almost nothing to inherit. He remained undaunted.

Other men ran for office. Hubert Horatio Humphrey flew, soared with what he called the joy of politics, the crowds, the cheers, the talent of a cold audience, the reaching hands of faithless strangers, the push and the pull, the whole mind-scrambling, bone-wearing, lunatic cacophony of a campaign.

"The bells are ringing and the battle is on," he said of the inner and outer man, eyes popping, fists pumping, adrenalin galloping, altogether corny and contagious.

And yet the same man was equally visceral and believable when he finally discovered early in 1976 the joys of not running for president after three tries. While all else around him on the Democratic side of the aisle seemed to be salivating for the job, Hubert Humphrey looked at the political realities and decided he had had it. He was turning nothing down, but he finally was not running, and in that he felt a new liberation.

"I am not a candidate," he exalted. "I don't want anything. I don't need anything. I feel better than ever, here in my heart, my mind, my body. I can speak very frankly. It's not difficult now to stand up to someone and say, 'I can't agree with you,' or 'I can't do that.'"

Free at last? Not quite.

In April 1976, just before the New Jersey primary, the polls looked promising, friends brought pressure, the experts agreed that this was the last chance to stop Jimmy Carter, and Hubert Humphrey wavered with the hunger of a lifetime.

"But then I got myself under control. I still had the desire, but I knew I shouldn't be in it, politically, emotionally and physically. If you've tried to climb the mountain before and didn't make it and now you're considerably older, maybe it's better if you just sit back and look at the mountain, yearn a little but not try to climb it."

Two weeks after the 1976 election, six weeks after a cancer operation, the unsinkable student of disappointment tried to console his old friend, Jerry Ford, on his defeat. He pointed out to the rejected president that he had restored public trust in the White House. Ford was only partially consoled. Humphrey tried again.

"Mr. President, you've had 2½ year in this house. I'd have given 10 years of my life to have had two days or two weeks here."

That did it. Ford was now smiling, and two of the most amiable losers in history laughed together.

Two months later, now terribly gaunt but still smiling. Hubert Humphrey was up there on the inaugural stand before the Capitol watching yet another man take the oath for the job he had coveted so long. How did he feel?

"I would have loved to have been president. It was the great heartache of my life that I didn't make it, because I think I would have done good for this country. I really believe that. But I was not destined to be."

Time and perspective had finally closed the old wound. He recalled a dinner with Averell Harriman, another giant of his time who never made it to the top.

"I came away from that evening thinking what he had meant to this country and what his life had been, and I realized you didn't have to be president to be a great man and be respected by your fellow citizens."

Twice the Senate of the United States came to its feet in standing ovations for Hubert Humphrey no one could forget. There was sustenance, too, in the corridors.

"I've had some marvelous consolation prizes," he said. "I just can't tell you how much it means to me. I notice when I walk around now in the Senate halls how considerate people are of me. They ask about me. They are concerned, and I know that. I'm part of the history of this place."

He recalled complaining to his father once about not getting enough sleep.

"Listen, son," his father said. "You don't need more sleep. You ought to learn to stay out of bed. People die there. Life is awareness, and if you're not aware you're not alive."

Hubert Humphrey smiled with the memory.

"So I was figuring it up the other day," he said. "I figure I've lived at least 100 years."

[From the Washington Post, Jan. 18, 1978]

THE MAN WHO WROUGHT VICTORY FROM DEFEAT

(By David S. Broder)

Few of the millions watching the memorial service for Hubert Humphrey in the Capitol Rotunda on Sunday probably understood President Carter's apology for the "harsh words" he spoke in the 1976 campaign about the Senator from Minnesota, but it was a gracious and honorable thing for him to do.

He had called Humphrey "a chronic loser," back then, when he expected the former Vice President to try once more for the party nomination. He regretted—and apologized for—the statement almost at once, but it was clear that it had been weighing on his conscience. For through the kindness of fate, as he said, Jimmy Carter had a year as President to learn—as many others had done before—what a forgiving and inspiring ally and teacher and friend Hubert Humphrey could be.

In reflecting on Humphrey's career, as all of us have been doing. I found myself recalling him, not in his moments of triumph, but in the hours of defeat. To tell the truth, there were many of them.

At the first convention I ever covered, in 1956, Humphrey lost the vice-presidential nomination—one he thought he had been promised by Adlai Stevenson—to Estes Kefauver. In West Virginia in 1960, he lost the presidential nomination to John Kennedy. And no one who ever read it will forget Mary McGroy's portrait of Humphrey that West Virginia primary night—first consoling the weeping folk singer who was strumming one last chorus of "I'm Gonna Vote for Hubert Humphrey," then, in turn, being embraced and comforted by Robert Kennedy, the doomed brother of that night's doomed winner.

In 1968 he lost the presidency to Richard Nixon—whose plaintive presence as the returned exile at Sunday's service added yet another note of irony to the saga of Humphrey's "defeats."

In 1972, he lost the nomination to George McGovern. Everyone who was with him will remember Humphrey on that long journey back to Washington the day after his California primary defeat ended what he knew was his last chance for the White House. Sleepless, exhausted, he roamed up and down the aisle, raising the spirits of everyone with his recollections of the foibles and fumbles of the previous six months of grueling effort.

He coaxed Michele Clark of CBS—who was soon to die tragically in an airplane crash—to play for the 50th time the treasured tape recording of the fast-tongued Humphrey getting hopelessly tangled in the words "Bedford-Stuyvesant" during the Florida primary. As he spluttered along like Donald Duck on the tape, Humphrey laughed until the tears rolled down his cheeks.

Long before he mastered the art of facing defeat in his pursuit of the presidency, Humphrey taught the Senate the importance of fighting a losing cause. As Nelson Polsby, one of the legion of political scientists who loved their colleague from Minnesota, has pointed out, Humphrey virtually invented the modern senator. It was he who linked the previously private world of the Senate club to the great forces of mass politics by using the Senate rituals—bill introductions, committee hearings and endless floor debate—as weapons for mobilizing national constituencies for civil rights, Medicare, nuclear disarmament and dozens of other causes. Those Humphrey bills were defeated session after session, but ultimately passed, monuments to the tenacity and skill of this "loser."

But his heritage is not just in laws. It is also in people and—it is important to say—in a political party. The Minnesota Democratic-Farmer-Labor Party, the DFL, has been for the last 30 years, largely through the inspiration of Hubert Humphrey, the nation's greatest resource of honest, effective and visionary political leadership. McCarthys and Mondales, Freemans and Frasers, Hellers and Hofstedes, Naftalins and Perpiches, Sabos and Spannauses, Blatniks and Rolvaags and Karths and, oh, so many Andersons—men and women, both—they are all, in their highly individual ways, extensions of their great teacher.

He built that party in the 1940s on the foundation of his own campaigns for mayor of Minneapolis, characteristically losing before he won. And then, late in his life, after he had been as close as a man can get to the top of American politics, he went back to Minnesota, in defeat, and rebuilt it again from the grass roots, healing the wounds of a bitter 1966 gubernatorial primary and his own divisive battle with Gene McCarthy in the 1968 precinct caucuses, and leading it to its greatest victory ever in 1970.

I remember Humphrey one night in that

1970 campaign, at a rally in Alexandria, Minn., for congressional candidates Bob Bergland (now Secretary of Agriculture) and Rick Nolan. It was the end of a long day, and after Humphrey and the others had spoken, Muriel Humphrey tried to get him out of the hall and onto the plane back to Minneapolis for a night's sleep.

But Humphrey was having none of it. Instead, he grabbed Wendell Anderson, then the candidate for governor and now the senior senator, and all the other candidates, and for more than an hour he kept them beside him in line, shaking hands and talking personally to every one of the 500 or 600 people who had come to the rally.

He was thinking, as usual, about others and about the future, especially the future of 26-year-old Rick Nolan. "Don't worry about me. My race is fine," Humphrey told each of the voters, affirming what they all knew to be true about his easy victory in that year's Senate campaign. "Help Wendell and Bob and Rick and the rest of these fellows."

Later, on the plane, he told me, "Rick Nolan may not make it this time, but he can win in 1972 if those people stick with him." As prophesied, Nolan lost in 1970 but won his House seat two years later. He is there now—in his third term, at 34, just half Humphrey's age and beginning to fulfill the hopes the DFL has for him—another part of the human heritage that ensures Hubert Humphrey, "the chronic loser," will have a larger place in history than many of those who defeated him along the way.

HUBERT REUNITED NATION

(By Nick Thimmesch)

WASHINGTON.—Much of what was good about Hubert Humphrey was expressed at the memorial services in the Capitol Rotunda last Sunday. Hubert in death, brought everybody together again, even Richard Nixon, whom Hubert never stigmatized for being in exile.

Several members of the so-called national press in low voice uttered malicious remarks about Nixon during the services calling him Tricky Dick and demeaning his motives for coming to the services. A little of this crept into the reporting the next day.

But people close to Humphrey, people who went through the heartbreaking 1968 campaign on hearing these reports just shook their heads and said that Hubert would have wanted Nixon here, that he and Nixon kept in touch, and Hubert always tried to reconcile everybody. "Anyone who makes remarks about Nixon being here," said a man close to Humphrey, "doesn't know what Hubert Humphrey is all about."

And so for the first time President Carter, Ford and Nixon got together, if only briefly and under such circumstances—meeting in Senate Minority Leader Howard Baker's offices in the Capitol. Moments before, the three men were also with Lady Bird Johnson, Betty Ford, Nelson and Happy Rockefeller, Henry and Nancy Kissinger and everybody asked about Pat Nixon's health.

Wow! That was my Uncle Elmer Swenson he was thanking. Elmer had been around Hubert when the Farmer-Labor Party merged with the Minnesota Democrats in 1944, which gave old HHH the vehicle he needed to build a political career.

In late summer, 1970, I went to Minnesota to cover Hubert's comeback campaign for the Senate. No sooner had I sat down to interview him than he put his hand on top of mine and said, "Well, I'm sorry that Elmer was laid away. He was such a good man." Uncle Elmer, born of immigrant parents, farmer, postmaster of Grove City, had died several weeks before.

Hubert remembered all the Uncle Elmers of his life, and while that served him politically it also endeared him to people. Hubert's love of people was authentic in a trade which can't always be authentic. That's why Howard Baker, who doesn't easily show show emotions, wept openly at the services.

During the last week of 1977, I visited Hubert at his Waverly house to do a magazine piece. The flesh was weak from that massive surgery, but the spirit was strong. He and Muriel reminisced for several hours. Humphrey, this fevered spirit, was one, long, human interest story.

He grew up on the innocence of rural South Dakota, filled with the sweet-sorrow of aspiration. He had to make it by golly. So he rasped his ebullience and identified with others who also felt they might make it someday. Hubert could be mean, but his meanness quickly flashed away. He didn't avoid sin or sinners, and this helped him develop a Christian tolerance for people.

He was deeply hurt by the power of Kennedy money in 1960 but dismissed his bitterness. "Jack Kennedy?" he said. "He was delightful. I got along with Jack Kennedy, after he became president, as well as any man in public life." As for the man who many thought sat on HHH too long. Hubert said, "I have warm feelings about LBJ. He could be exceedingly kind and rough, all in one conversation. But he was good to me. My liberal friends wanted me to tell him off every week, but you don't do that."

Shortly before President Ford left the White House, he had Hubert and Muriel to dinner. Hubert told Ford that nobody could take his time as president away from him. "I said gee, I would have given anything to be president two days, and you had two and a half years."

Oh, Hubert was not humble. His ego got him into some compromising situations. He was no saint. Hubert always had many campaign finance problems. One of his best men went to federal prison for it, and another aide narrowly escaped. Hubert understood the perils of politics, especially if you were a poor man—as he was—in the game.

He and Nixon related as two scarred gladiators. They could beat on each other and then embrace at the end. They were oddly close though remote in terms of distance, politics and personality.

Presidents, their senior assistants and their wives are usually at an age when health is a matter of large concern, and there is much asking about it. Muriel Humphrey recently had surgery. Betty Ford is not strong. Happy Rockefeller survived two breast operations. Pat Nixon recovers slowly from a stroke. Nancy Kissinger had half her stomach removed a few years back. The very special gathering in Howard Baker's office felt Hubert's ordeal.

Hubert brought them together, and the nation, too, not because he was some holy man, some Gandhi. Rather, Hubert's urges to do good were so obvious, as were his flaws and earnest optimism, that even nonbelievers were touched. Nobody could dislike Hubert Humphrey.

He remembered people. An old-timer would come, reminding him of an occasion of a generation ago, and Hubert would brighten the person's eyes by rasping out the details and maybe a "golly gee" or a "wasn't that great."

I remember Hubert in Atlantic City in 1964, when he was about to be dubbed vice president, pursued by well-wishers and eager newsmen. My meetings with him had been few, but he knew about my family, and surrounded by a thickness of people, he spotted me and called out, "You tell your Uncle Elmer that I sure enjoyed that smoked turkey he sent me!"

"Nixon was always respectful with me," Hubert said that December afternoon in 1976. "He went out of his way to be so. When we left Washington after his inauguration, he sent us home in the presidential plane and with our household goods aboard. And he phoned me with wishes to get well when I was recovering from my surgery."

Hubert phoned Nixon on Jan. 9 to wish him a happy birthday. Four days later Hubert died.

That afternoon in Waverly one year ago, after reciting all the tragedy and triumph, gaunt and gallant Hubert still bubbled with life. He and Muriel had no regrets. "Look at the fun we've had," he said, "and the people we've met. To come from Doland and Huron, S.D. How lucky I've been. I'm not mad at anybody."

WHY THEY TRIED TO GET HUMPHREY TO WEAR GLASSES

(By Max M. Kampelman)

WASHINGTON.—A few anecdotes from 30 years of close personal and political friendship with Hubert H. Humphrey.

Those days when Hubert was Mayor of Minnesota were full of excitement. I watched from a distance, but would occasionally be drawn into the picture. Hubert had met some of the civil rights experts from Fisk University. He was troubled by an article that Carey McWilliams had written that appeared at about the same time he became Mayor, calling Minneapolis the capital of anti-Semitism in America. There were very few blacks and not many Jews in our city, and there was a problem.

Fisk urged a community self-survey, with every part of our city looking at itself in the mirror.

Hubert explained: "If they like what they see in the mirror when they compare it to their American ideals, fine. If not, they will want to bring about the change." He was right.

Minneapolis became the first city to create a Fair Employment Practices Commission. It seemed as if everybody—trade unionists, academicians, bankers, industrialists, merchants—was involved in one or another committee.

One day when I went to City Hall there was a meeting of all the tavern owners in the city and many of their wives. Hubert wanted them to go to the city council and ask for pay increases for the police, the funds to come out of increased license fees that they would pay.

"I know you are paying off policemen now," he charged. "This must stop. Don't you wives want your husbands to be involved in a legitimate business that doesn't bribe policemen?"

He promised to clean up the city and the police force. He promised that he would end a police practice designed to entrap tavern owners into law violations. Miracle of miracles, they voted to cooperate!

I recall a train ride from Philadelphia to Washington after a speech. Hubert's father had just died. He was sad and troubled. "I could really never go seriously wrong," he explained, "because if I did and it appeared in the newspapers, Dad would be on the phone giving me hell. He was always watching what I was doing."

What concerned him was whether he would still be as true to his ideals now that his father was not there. About a year or so later, I reminded him of that conversation and asked him what he had found. "Dad is still looking over my shoulder," he responded.

One of Hubert's greatest irritations was constantly being reminded that he talked too much. He knew that. The way he handled the irritation was by poking fun at himself, but he never did fully understand the criticism or appreciate it.

Hubert grew up in the tradition where political speechmaking might possibly take up an entire afternoon in the town square. This was before television. It was not only

good entertainment, but it was also patriotic. How else, he felt, could there be understanding of issues by the electorate? The formula was simple: "You tell them what you're going to tell them; you then tell them; and then you tell them what you told them."

To understand Hubert Humphrey, you have to understand two pervasive characteristics. The first is faith. And that includes God and human brotherhood. What kind of God, what He looks like, where He is—that is unimportant. What is important is that there is a God and a set of values, and that we must all be brothers and sisters to one another in our personal relationships and in our societal relationships. This explains why Hubert was so forgiving of people who deserved less from him.

The second point to remember is that Hubert was a teacher. He had to explain so that everybody understood. Political democracy rests on informed awareness by the electorate, and that requires teaching. He knew that when he taught under the W.P.A. in Minnesota. He never stopped teaching, and that, of course, also means talking.

Is this old-fashioned? Of course it is, and he always knew it. There was a constant rebellion against turning himself into someone he was not, or into something he was not comfortable with, simply because it would be better television or better politics.

How often I heard the refrain of advisers, "Forget about the audience in front of you; think only about the TV cameras." But he could never forget the audience in front of him. They were there in the flesh, his friends, to be persuaded. These people he could see and the television audience he could not.

One day The New York Times caught a candid photograph of Hubert at a session of the Foreign Relations Committee. It was a great picture. He looked thoughtful and it was always so difficult to get a good picture of Hubert published that didn't have him talking. I looked carefully. He wore glasses in this photo. With the glasses, he looked studious. It's people who read and think who wear glasses. Here was a way to undercut the criticism that he talked too much. As a studious man, he had a great deal to say. Furthermore, audience attention could be drawn to the glasses and not to the protruding chin or to the small moving mouth.

I had it! Hubert was among the wisest and most truly profound of men, and yet the public did not know it. This was our solution. I quickly went to Humphrey. The idea made sense to him, but he remained skeptical. "It isn't as if you don't need glasses," I argued. "This is not artificial. You do need them. Why don't you wear them all the time instead of just when you are doing close work?" No promises from him, and no performance.

I didn't give up. In 1968, preparing for the Democratic Party convention, we got the assistance of Dr. Ernest Dichter, who volunteered and said he would like to help. This was the gifted man who made a good living telling toothpaste companies what color they should use on their packages to help their sales.

I presented the problem to him. He was skeptical, too, but agreed to make a survey. He used a photo of Hubert with glasses and one without. There was no name identification. "What kind of a man do you thing this is?" was the question. After some weeks, a surprised Dichter came in and said, "You were right." The man with the glasses elicited a much more positive response than the man without. Here was the proof!

We presented it to the Vice President. By now, he was using his glasses somewhat more frequently, but still not on television and not for photographs, why, I don't know why. But I think part of it was that it might appear to be manipulative and he would not be a party to such a manipulation for political gain. People would have to accept him for what he was or not at all.

MEMORIES OF HUBERT HUMPHREY: A SPIRIT OF HOPE AND THE ANGUISH OF DEFEAT

(By Isabelle Shelton)

The night Hubert Humphrey died, television reran some recent film of him standing at the podium of the House of Representatives, accepting plaudits at one of the many "We love Hubert" ceremonies that were held in the last few months before his death.

He was painfully gaunt and wasted, but his spirit was soaring, as always, as he joked about standing on the spot "where presidents delivered their State of the Union address," and said how much he had wanted to do just that.

It reminded me of the day that Humphrey, then a young, populist midwestern mayor, first burst upon the consciousness of Washington's hard-bitten cadre of national political reporters.

It was the first convention of the newly-formed Liberal Americans for Democratic Action. In Philadelphia, as I recall, I chanced to be there because, as a new bride, I had tagged along with my husband, who was one of the reporters.

Mayors, especially very junior mayors, usually do not make much of an impact with the media heavyweights, then or now.

But this time it was different. Hubert Humphrey caught their bemused attention with a speech in which he discussed the vice presidency of the United States as "only a heartbeat" from the presidency.

It was scarcely an original observation, but there was something about the fervor with which he uttered it that riveted the attention of everyone present, and made it perfectly apparent that this little-known "upstart" actually presumed to think of himself as vice president, even president. It was the talk of the convention.

A few months later, of course, the whole nation became aware of Hubert Humphrey when he led the dramatic civil rights fight at the Democratic National Convention, a watershed event after which the old Southern-dominated Democratic Party was never the same again.

And, in time, the whole world came to know that Hubert Humphrey did, indeed, yearn to be president. Lord knows he never made a secret of it.

But it was pretty startling that first time out, at the ADA convention, especially since the prevailing protocol of the time dictated that even someone with a more obvious claim on the presidency should back off like a shy schoolgirl when asked his intentions, figuratively pawing the earth and asking, "Who, me?" as he declaimed on the "awesome burden" of the office.

But not Hubert Humphrey. Then, and forever, he wore his heart on his sleeve. It was one of the things that endeared him even to his political enemies.

I remember the bitter tears Humphrey shed after he lost the West Virginia primary to John F. Kennedy in 1960. He was anything but a bitter, grudge-holding man. What other Democratic politician do you know who telephoned across the country last year to wish Richard Nixon a happy birthday?

But he really believed that primary was stolen from him, and even his larger-than-normal spirit of forgiveness found that impossible to bear graciously.

I asked him, not long ago, if he still was resentful about that election, and he said he didn't want to talk about it. "They're all gone now," he said sadly, meaning Jack and Bobby Kennedy. Then he stood silent for a long minute, lost in thought, perhaps reliving missed opportunities. Finally he said quietly, a little tight-lipped: "I haven't changed my mind."

Then the broad smile of the outgoing politician returned, as he swung around to shake hands with a group of waiting admirers, greeting each of them as warmly as if he needed that particular vote the next morning.

I remember the August night in 1964 when he and Muriel returned to their house on Coquelin Terrace in Chevy Chase after Lyndon Johnson had tapped him as a running mate.

The whole neighborhood had organized a welcome-home block party, with refreshments spread out in the look-alike house next door that belonged to South Dakota Senator and Mrs. George McGovern.

The scene on the Humphreys' front lawn, where everyone from the oldest grandmother to the newest babe in arms was gathered, looked like an old Saturday Evening Post cover of a Fourth of July picnic on the town square.

The Humphreys were late, as always, but everybody expected that. There was no hint of a busy schedule, or a demanding LBJ at the other end of the phone, as they slowly worked their way through the crowd. Humphrey knew them all, even the youngest, and he even knew their nicknames, and which ones liked to play baseball or race their bikes.

The grownups explained he knew their kids because he had spent so many weekend afternoons with them, scooping up everybody in sight to play ball or ordering ice cream cones all around.

Then I remember Chicago 1968, that awful Democratic convention, where barbed wire ringed the convention hall, tear gas permeated the big downtown hotels, and the streets were a bloody battleground between anti-Vietnam war demonstrators and Mayor Richard Daley's blue-helmeted police.

Lyndon Johnson had decided not to seek re-election and Humphrey was his heir-apparent for the nomination—for which Sen. Eugene McCarthy, hero of the anti-war forces, was also contending. Old neighbor McGovern was a last-minute entrant in the race, having been thrust forward by top strategists for the recently-assassinated Robert Kennedy, determined to somehow stop Humphrey.

The night of the presidential nomination and balloting, I was one of a pool of reporters who took turns in the Conrad Hilton Hotel suite where Humphrey sat watching the proceedings on television. Mrs. Humphrey had gone to the convention hall early in the evening, and the script called for Humphrey to join her after the balloting, the triumphal nominee.

He won the nomination all right, but by that time the scene outside the hotel was so out of control that the Secret Service insisted Humphrey not leave the premises. That was the occasion when he rushed across the reporter-crammed room to the television set, to kiss the image of Muriel, who was taking the plaudits in his place at the convention hall. The incident was jeered the next day, but at the time it seemed perfectly natural. Humphrey had been waiting all his life for this moment, and he wanted to share it with Muriel.

Still, it had not been a happy evening for the vice president. Much of the raging melee outside was visible from his suite, although it was about 20 stories below. I remember he insisted on leaning out the open window to get a better view of the battling cops and students, and the tear gas that floated in through the window engulfed us all. Humphrey stood shaking his head sadly, a look of incredulity on his face, saying over and over, "No, no, no."

One wonders if he didn't know, right then,

that the ferocity and poison of the conflict would sink his presidential hopes—which is just about what happened.

The decision of Sen. McCarthy to spend the campaign covering the World Series and sunning on the French Riviera was, of course, also a factor, because many of his followers took the cue from him. And that recalls another Humphrey vignette.

It had been a bad campaign, with the young and anti-war groups sitting on their hands, and Lyndon Johnson not helping much either.

One night about a week before the election Humphrey was making what his staff billed as a "triumphal" return to Washington from his latest campaign foray. One could only assume such a big event was being made out of this routine occurrence in order to bolster the candidate's morale, which certainly wasn't getting much support from unfolding events.

Nixon was riding high in the polls, and LBJ had all but written him off after HHH made a tentative move toward anti-war forces by declaring that, if elected, he would stop the bombing of North Vietnam.

I can't recall why we thought the airport rally was worth covering at all. It had all the earmarks of a disaster.

But it didn't turn out that way. Something of a miracle happened. The airport field was jammed with roaring, enthusiastic partisans. And even more important than their numbers was who they were. The troops were coming back: party workers who had elected Democratic presidents from Franklin Roosevelt through LBJ, and also some of the anti-war youths, whose faces I had come to know from countless White House marches.

I talked to a lot of them, and it must be said that Humphrey's half-turn on Vietnam was only part of the reason for their return. Perhaps equally important was their growing realization that by their non-participation they were about to hand the White House to Richard Nixon, and no peace dove he.

For whatever reason, the Humphrey campaign seemed to turn a corner that night, and the bone-weary candidate sensed it too, as he moved through the cheering throng spotting familiar faces he hadn't seen for months, if not years.

He very nearly carried it off, a week later but not quite. The respected columnist George Will said on a recent television show that sentiment was changing so fast at the end that Humphrey probably "came within hours" of turning it around.

But there weren't enough hours left, and I remember the night that Humphrey learned that, too.

Following tradition, the candidate awaited the outcome of the balloting on his home turf, in Minneapolis.

I was in a pool of reporters who accompanied him and Muriel from the headquarters hotel to their home in nearby Waverly, and then to a party of some of his supporters in a large suburban home. It was a biting cold, moonless night and the ground was covered with snow and ice.

It still was fairly early in the evening when the Humphreys emerged from the party to return to the hotel. Although the outcome of the election was not to be known officially for many more hours, Humphrey had learned something inside that house that he apparently felt sealed his doom. I think he had just heard it as he was leaving, because he had not had time to put his usual happy face back on.

I have never seen such a stricken face as his when he emerged into the cold night, to exploding flashbulbs. Happening to spot my familiar face, and never one who could easily conceal emotion, he called out, "Isabelle—where are the votes? I haven't got the votes!"

Although the official tally was not to come for hours, it seemed obvious that some politically savvy Humphrey aide had been able to project the outcome from examining the early votes in carefully chosen key precincts—a small skill that knowledgeable politicos possessed long before monster computers took over the world.

When Humphrey made his official concession speech the next day, he was pulled together and gracious. But I'll always believe he knew that he had lost it all on that bleak, winter night, long before most of the votes were counted.

HUMPHREY WITHOUT TEARS

(By George F. Will)

The enduring memory of a great politician's life should be of his voice, an echo of exhortations in the nation's ear. For most Americans, and especially for the postwar generation that has not known politics without him, the chorus of public life henceforth will seem incomplete without Hubert Humphrey's voice. It was a voice as flat as the prairie, flat as the political landscape seems with him cut down. But it was a carrying voice, vibrant with the energy of a man happy in his work.

Today it is difficult to summon a sense of Adlai Stevenson or Dwight Eisenhower addressing a crowd. But twenty years from now, those who heard Humphrey in full flight will remember his delight. It was of his overflowing affection for his audience, not just the pleasure most political men derive from seeing themselves reflected in an audience's eyes. Perhaps Humphrey exhausted more people than he persuaded, but in politics the effect can be the same. More notable than the amount of talking he did was the Gatling-gun pace at which he did it. He talked so fast he did not seem to be a calculating man, which warmed audiences. But he also did not seem to weigh his words, and friends urged him to affect a halting graveness. He refused. He could be quick without being rash because his purposes were fixed and clear and he saw no conflicts between them. He was, as someone said of Voltaire, a chaos of clear ideas.

BREAD-AND-BUTTER LIBERALISM

Postwar politics has been a long lesson in the incomptability of many of the worthy goals of Minnesota liberalism. Minnesota is a green and pleasant paradox, a liberal state full of conservative people. It believes in bread-and-butter liberalism. Its Scandinavian and rural elements, and perhaps its severe winters, incline it to a political ethic of collective provision, and in Humphrey it produced this century's only Presidential nominee who had been mayor of a large American city.

Bread-and-Butter liberalism was social security, TVA, rural electrifiication and scores of similar, if not similarly successful, programs of material amelioration. The decline of liberalism in Humphrey's lifetime is less the result of the excesses of such politics than of the transformation of liberalism into a doctrine of "administered enlightenment." The old liberalism delivered material advantages that were intended to enable people to live the lives they had chosen. The new liberalism, typified by forced busing and affirmative action and the explosive growth of regulation, administers "remedies" to what society's supervisors consider defects in the way people live.

POLITICS WAS PHARMACY

Humphrey was very much the son of a small-town druggist in the Midwest. Years ago the pharmacist, second only to the doctor, represented the practical use of knowledge against the distress of life. For Humphrey, politics was pharmacy practiced on society. The liberal temperament is exasperating because of its expansive belief in social pharmacy: there are no disagreeable conditions that must be endured, only problems that must be solved. In today's climate of disappointment with government, it is easy to caricature Humphrey's penchant for prescribing elixirs, and his inability to give anything his undivided neglect. But at the end of his life, he had the compensating certainty that he had fought on the winning side. When he entered politics it was an open question whether the U.S. would embrace welfare-state practices. Today that question is closed. Few persons see most of their youthful opinions become public policy; fewer still see that without a trace of embarrassment or regret. Humphrey did. In his party he was more than a political leader; he was a climate of opinion.

An extraordinary politician usually embodies a characteristic value of his culture. And Humphrey embodied the belief that to persist is to triumph. Yet he drank a full draft of defeat. In 1956, he was one of the first and most forceful supporters of Adlai Stevenson's renomination, and he wanted to be Stevenson's running mate. But Stevenson let the convention choose and it chose Estes Kefauver. And John Kennedy, not Humphrey, was second. In the 1960 West Virginia primary, Humphrey, the least synthetic of men, was beaten by Kennedy, the first thoroughly packaged candidate. At the 1968 convention, when he should have been able to savor a fulfillment long delayed, the smell of tear gas drifted into his room overlooking Chicago's Grant Park. That autumn, his personality energized a dramatic home-stretch drive, and at the end, votes were shifting his way so fast that if the election had been twelve hours later, he probably would have won.

In 1972, when he was considered worn goods, he came close to stopping George McGovern's drive for the nomination. In 1976, when he was beginning to be regarded as a classic deserving a comeback, like "South Pacific," he was too spent to face another disappointment.

Like Moses, Humphrey was discovered young, at the 1948 convention, and like Moses, he always was a bundle of opinions. He rose fast enough and lived long enough to see five men succeed to the Presidency after he first sought it in 1960, and he believed that he could have done the job better than each of them. Because he was cherubic, not lean, it was easy to underestimate how hungry he was, first for acceptance in the Senate, then for the great prize of American politics. Because he lost so many of life's close calls, and because liberalism often is a form of sentimentality, there is a tendency to patronize Humphrey while praising him. He did lack the *necessary* coldness of a national leader. A friendship tended to be a lifetime contract, so as he rolled through life he acquired a soiled snowball of political associates. Rarely does a man have such extraordinary dynamism and lack an instinct for the jugular.

A 30-YEAR PROFESSIONAL

But Humphrey also had a guileful side, as you would expect of one who learned about national political realities from the likes of Oklahoma's Sen. Robert Kerr, a sort of *rough* Lyndon Johnson whose ability to bend nature can be seen in the fact that Tulsa is a seaport. For 30 years, Humphrey was a professional. More than any man of his generation, he lived the political life as Plutarch described it:

"They are wrong who think that politics is like an ocean voyage or a military campaign, something to be done with some particular end in view, something which leaves off as soon as that end is reached. It is not a public chore, to be got over with. It is a way of life. It is the life of a domesticated

political and social creature who is born with a love for public life, with a desire for honor, with a feeling for his fellows . . . "

During the 1964 campaign, the paths of Barry Goldwater and Hubert Humphrey crossed in an airport, and they paused to chat. As they parted, one professional said to the other, "Well, keep punching, Hubert." He did.

"THAT WAS HUBERT"

(By Mel Elfin)

It was almost 4 a.m. on that tumultuous night in August 1968, and as I stood in the middle of a frenetic hotel ballroom in Chicago—tear gas wafting in the windows, police sirens wailing endlessly on Michigan Avenue below, chants of "Dump the Hump" cascading from Grant Park across the street—it seemed clear to all but his most devout acolytes that this was the end, not the beginning, of Hubert Humphrey's elusive quest for the Presidency.

But there on a small platform directly in front of me stood Hubert Humphrey, his ruddy face crisscrossed in smiles from the oversize forehead to the Bob Hope chin, preaching to the often disappointed faithful the politics of joy and the gospel of victory in November. Even for Humphrey, who could make Pollyanna look like a worrywart, the exuberance appeared ill-timed and out of place. Nudging one of Hubert's aides standing nearby, I asked: "Al, Hubert doesn't really mean all that stuff, does he?" The aide leaned over and whispered: "If you think that, then you don't know the man. Hubert always means it."

PASSION

In a sense, perhaps, this was why Humphrey became, and for so long remained, one of the compass points of our politics. In the age of the plastic statesman and in a city like Washington where phoniness has been raised to a high art and so many phonies to high office, Humphrey made his way without artifice or subterfuge. He could no more disguise his inner feelings than he could restrain his passion for life and his zest for the public life.

If he bubbled too much, if he wept too much, if he sprinkled so many "By gollys" and "Bless your hearts" through his conversation that he sometimes sounded like a short course in the American vernacular, well, then, "that was Hubert," as his friends explained. It was this openness of spirit that could move Humphrey from heights of quiet dignity, such as his extraordinarily graceful statement of concession to Nixon in 1968, to depths of embarrassing sentimentality, such as the moment he planted a wet smack on the televised image of Muriel shortly after winning the nomination in Chicago, exulting, "Mom, I wish you were here."

Unlike so many of his colleagues, Hubert had little talent for dissembling and none whatsoever for lying. And although he lived a life filled with humiliation, neither did Humphrey hold grudges, not against reporters who savaged him, friends who betrayed him, or even the President who teased him unmercifully and then, out of stubbornness, vanity or both, destroyed his best chance of becoming President in his own right.

Maybe he survived discouragement and dejection because he had such an enormous capacity to laugh and to make others laugh. I recall one hot summer day in 1967 when I flew to New York with Humphrey and a few of his aides in a small private plane. Ten minutes out of Washington, the air conditioning broke down. Hubert took off his tie. A little while later, he unbuttoned his shirt. Over Philadelphia, he took the shirt off entirely. By the time we were circling over La Guardia, the Vice President was still mopping his brow feverishly. An aide said: "Mr. Vice President, I trust that you don't plan to take anything else off before we land." "Why not?" shot back Humphrey. "I have nothing to hide from the press or the public."

Hubert's verbosity was the stuff of legend, and speechifying was the verbal expression of all the energy churning inside. It was always fascinating to watch him during the toasts at formal Washington parties. While the others spoke, he would shift nervously in his seat, but then, when it finally became his turn, Hubert would bound up like a coiled spring and would often begin talking even before he was halfway out of his chair.

He was indisputably the best orator of his generation, but he spoke in a voice that was a trifle too reedy and perhaps an ocative too high. It was a voice that seemed forever poised between the lachrymose and the eloquent, yet it was a voice that could electrify the most dispirited of audiences, never more so than at the 1948 Democratic convention when he threw down the gauntlet on the issue that was to become the true moral equivalent of war in our day—civil rights.

Still, it was in small gatherings that Hubert was often at his best. At meetings with reporters, he could bat out answers to the trickiest and most loaded of questions the way Reggie Jackson bats out home runs. He would move with ease from long but coherent discussions on issues of passion like civil rights and poverty to such arcane subjects as nuclear nonproliferation and international monetary policy. In between, he would stop along the way at farm policy, NATO and Minneapolis ward politics without losing a step.

Once, after a particularly virtuoso performance at a breakfast with reporters a few years ago, his audience was so awed they violated a prime percept of Washington journalism—they applauded vigorously.

Wounded: For the "cool" generation of the '60s, Humphrey's frenzied pace, his sentimentality and, above all, his support of Lyndon Johnson's war in Vietnam turned him into an object of derision. He became "The Hump," the war-monger who put loyalty to LBJ above loyalty to principle. Forgotten were his service to civil rights, his creation of the Peace Corps and his espousal of an agenda full of liberal causes. Humphrey was wounded terribly by the caricatures and the desertion of old friends, and he couldn't hide his deep disappointment.

Fortunately for Humphrey, he was able to live long enough to be judged by standards other than Vietnam, and many of those who turned against him in 1968 tried to assuage their guilt through an outpouring of affection and tribute. He was also able to live long enough so that Jimmy Carter, who had derided him as a "has-been" during the 1976 primaries, could understand that even as he waged a stubborn struggle for life, Hubert Humphrey could be a powerful ally, a wise counselor and a warm and forgiving friend.

Now in the chill of a Washington winter, Hubert Humphrey is gone. We have lost a voice that warmed, cheered, amused, consoled, inspired and spoke so often with so much compassion for the conscience of a whole nation. We have lost a giant who strode gently across our political landscape, a man whose greatness was rooted perhaps in his obvious human flaws and frailties.

But golly, Hubert, we're going to miss you, terribly. Bless your heart.

HUMPHREY'S HAPPINESS: A GOOD ANTIDOTE TO OUR OWN

(By Ellen Goodman)

BOSTON.—The eulogies are over, the obituaries written and the attention has turned—not hastily, but inevitably—from Hubert Humphrey's death to his wife's appointment.

But before we close the file on the man, one more thought about the word we heard the most in his memorials: happiness. Never before has a public man been so praised for his "happiness." Never before has the funeral of a man of political prominence focused on his pleasure and exuberance.

Walter Mondale described his friend and mentor, who was always labeled a Happy Warrior, as a man who believed that "life was not meant to be endured, but, rather, to be enjoyed." He remembered Humphrey saying again and again that this was the only country in the world that had "the pursuit of happiness" as a national goal.

In many ways, I thought it was remarkable to hear such a spirited description and defense of happiness. But perhaps it's true. The word seems to have become so controversial. I see happiness written more often as an epithet than an epitaph. It reads more often as a piece of psychobabble than as a part of political philosophy.

In the last several years, we have associated "the pursuit of happiness" with a kind of hedonism, the wildly indulgent behavior displayed by the succession of Roman emperors in "I, Claudius," and the false euphoria of the leisure-time activists. Happiness seems to be the goal of a disillusioned people who have retreated from social concerns to private ones, and are driven by a desire to feel good.

Pleasure is now a buzz words. "Pleasure seeksrs" are visualized as those people who quest exclusively after Big Sur and bigger orgasms.

A phrase like "enjoyment, not endurance," could be the motto of people justifying the most outrageous sort of irresponsible, hurtful behavior. It could also be the slogan for those who only go round once in life, and try to grab all the gusto for themselves.

There are, after all, many who believe that the pursuit of happiness is the pursuit of "their" happiness. And theirs alone.

But even those of us who are hardly hedonists increasingly conduct our "Search for Happiness"—like the characters in some soap opera—in our private lives. Our expectations are lowered in public and raised in private, but we still try to fill the quota.

Fewer and fewer look for pleasure in work or happiness in school. "Happy Hour," after all, takes place after work and in a social environment. Self-fulfillment is a weekend activity. Happiness, they say, is a warm puppy.

We seek great pleasure in a smaller and smaller area of our lives. We think of happiness as an individual pursuit.

At this moment then, Humphrey's "happiness" is a good antidote to our own. It is far closer to the original in the Declaration of Independence written by the same man, Thomas Jefferson, who said: "Our greatest happiness . . . is always the result of good conscience, good health, occupation and freedom in all just pursuits."

Humphrey found sheer, almost physical, pleasure in his work because he defined it as working for others. He believed that politics is ideally the business of pursuing the greatest amount of happiness for the greatest number of people. The pursuit of happiness was not a justification for self-centeredness. It was the source of pressure for social change.

The pursuit can't be just an individual one. It's ultimately as difficult to be a totally content person in an unjust society as it is to enjoy a banquet surrounded by starving people. In the end, selfishness demands a strong dose of selflessness.

Similarly, by pursuing pleasure only in private lives, we may miss it. Hawthorne once wrote: "Make it the object of pursuit and it leads to a wild-goose chase and is never attained. Follow some other object and very possibly we may find that we have caught happiness without dreaming of it."

Through his own sense of joy and mission,

Humphrey showed a genuine, selfish pleasure that comes not only from warm puppies but from a sense of generosity and public purpose.

[From Time magazine, Jan. 23, 1978]

HUMPHREY: WHAT A LUCKY GUY, WHAT A LIFE

It has been a crackerjack of a funeral, to borrow a term and an attitude from Hubert Humphrey's own exuberant life. How he would have loved it. Airplanes and military honors, the President and the pages, good old hymns badly but enthusiastically sung, organs booming and preachers praying mightily all across the country.

What a grand spectacle. Newspaper headlines and network specials, editors hammering their typewriters to new heights of deadline eloquence: everything being gloriously overdone—at least a little. Friends from far and near in their dark suits standing around telling stories—solemnly at first—about their days and journeys with Hubert, beginning to chuckle and then to laugh out loud, and then reaching for another bourbon to ease the long, low ache that comes from knowing a great man is gone. Had Hubert, like Tom Sawyer, been able to sneak under the back pews at his own services and witness proceedings (and, who knows, he might have—he sort of believed in those things), he would have swelled in the wonderment of tribute. But then he would have tiptoed around and bussed Muriel, winked at his friends and told everybody to wait a minute. A few tears, O.K., he appreciated that. But what a lucky guy he had been, what a life he had led. Every day a joy, every week an adventure. "Come on, let's celebrate," he would have said.

The problem was always how to organize a heart like Hubert's. It beats harder than anybody's, compelling its owner to laugh, shout and run off into every corner of America, bubbling with mirth and his special prairie exaltation. Too often he loitered along the political byroads of America, gabbing and shaking hands and studying individual faces as if each were from the easel of Michelangelo. Of course, he lost the big elections. And he danced with all the fat old ladies in the union halls after the speeches and the first beers. When asked why he squandered the time and the energy, he explained that fat old ladies needed the attention and appreciated it the most. Besides, he said, it was his policy to spend as little time as possible sleeping. More people died in bed than anywhere else.

Hubert's heart was big and it worked overtime, but it was more tender than any heart found among the men of power. It was easily pierced by the tragedy and misfortune of others, but it possessed marvelous powers of recuperation. When the world thunked him hard, as it did that night in West Virginia when he lost the critical presidential primary to John Kennedy, he was an open wound for a few minutes. But then he gathered himself up in that moth-eaten room of the old Ruffner Hotel, went over and fixed himself a salami sandwich from the table of things he had personally bought for the victory celebration. He began right then to climb out of defeat back to his sunny pinnacle, a journey that he would repeat and repeat.

Hubert had an immunity to humiliation. When Lyndon Johnson imperially summoned him to the White House to tell him that he was to be the Democratic vice-presidential candidate of 1964, L.B.J. let Humphrey just sit in the White House limousine on the drive for half an hour. Hubert did not get angry. He took a nap. When Johnson, carrying his lesson of authority further, left him waiting outside the door of the Oval Office, Hubert plucked a book from a shelf and read about Thomas Jefferson.

How a man who wore suits with Italian cuffs, openly enjoyed his snowmobile and once was in love with a big, garish Cadillac with fins could ever espouse such an encyclopedia of urban and rural compassion is yet one more marvel in the Humphrey legend. "I'm not against those things," he once explained. "I just want everybody to get a little." And he relished a celebration. "If you think Andy Jackson had an Inaugural party, just wait until I get there," he promised when presidential hope burned bright. He missed that one by a few votes. So it is right and fitting he should have a good funeral now. He would have loved it.

[From the New Times, Feb. 6, 1978]

FINAL TRIBUTE

(By GEORGE MCGOVERN)

Sitting in the family room of his comfortable home in Waverly, Minnesota, Hubert Humphrey would tell visiting friends: "This is the house that wind built." A visitor would laugh and at the same time experience a surge of affection. That statement told so much about Hubert. It recalled the countless hour-long speeches which he sometimes ended by saying, "Muriel has told me that I don't have to be eternal to be immortal." It recalled, too, his capacity to laugh at himself and to take note of the well-meant criticism of his friends, while he went right on being himself. It was also an earthy, unapologetic reference to the fact that Hubert Humphrey may have earned more honorariums making speeches than any other senator in American history.

Always he spoke with that crackling, extemporaneous style that is familiar to Americans in every hamlet across the land. He had a capacity to begin a speech after an exhausting day and somehow recharge his mental and emotional batteries with the electrical currents that flowed from his rhetoric and the delighted reaction of the crowd. Often when he hit on a choice phrase, it would remind him of another one, which in turn would call up a rapid fire, escalating series of references from biblical, constitutional or political lore.

I once heard Hubert speak on the nuclear test ban treaty for nearly two hours without a note. It was a brilliantly informed discourse, and he delivered it without a single awkward or trite phrase. After determining that neither he nor his staff had changed a word in the Congressional Record text of that speech, I read it the next day trying to detect a grammatical error, a clumsy phrase, or a weakness in sentence structure. There were none. Countless times my colleagues and I in the Senate witnessed similar spontaneous flights of eloquence. "He has the best coordination of mind and tongue of any member of the Senate," a Time magazine writer noted. I would revise that only to say he had the best coordination of mind and tongue and heart. He seldom separated the emotional currents that surged through his heart from the intellectual sharpness that characterized his mind. That constant mingling of emotion and intellect sometimes led him to questionable conclusions, but it also enabled him to manifest a blend of compassion and indignation, laughter and tears, that made him a rare human being.

During a heated debate with Senator John Stennis of Mississippi on the Civil Rights Act of 1964, Hubert turned to Senator Stennis, his eyes glistening with tears, and said: "I know the senator from Mississippi is a good and decent man. I know he is kind and loving in his personal relations with his black brothers. But I believe all of us, black and white, northerners and southerners, must not only love each other, we must provide every citizen the full protection of the law."

Hubert Humphrey and his family were our next-door neighbors in Washington for a decade. We were not only warm friends, but we shared the legacy of American liberalism. Then came Vietnam, and we drifted apart for a time. In 1972 I defeated my old friend and neighbor for the Democratic presidential nomination.

I well know the sadness of losing a presidential race. Yet, within a few months, Hubert and I went to South Dakota together, and he helped me launch a winning campaign for reelection to the Senate. He was even then undergoing radiation treatment for the illness that was to take his life four years later. During that campaign trip, we shared the platform in Huron, South Dakota—the town where the Humphrey Drug Store of Hubert's boyhood is still operating. That night all the scars of 1972 vanished. I rediscovered what I had already known deep in my being—that it was impossible either to hold a grudge or be on the receiving end of a grudge where Hubert was involved.

Years earlier during the bitter divisions over Vietnam, Hubert told me quietly one afternoon that he did not want me to think that he was supporting the war to please President Johnson. "I am an advocate of our Vietnam policy because I believe that policy is right," he said. I admired him for making it clear to me that he did not want his friends to blame his Vietnam views on the President who had selected him as his running mate. "I would rather be honestly wrong than to be a deliberate hypocrite," he said.

Hubert reminded us repeatedly that he was "not running for sainthood." He had limitations, as we all do. He seldom read a thoughtful book, and he was too much in awe of official briefers. But when it came to the great issues of social justice, Hubert's instincts were not only sure, they were enunciated with a passion, earthiness, wit and force that we are not likely to see exceeded in all the days of our lives.

[From the New Times, Feb. 6, 1978]

THE PUBLIC DYING OF HUBERT HUMPHREY

(By Peter Ross Range)

As the service proceeded, the clergyman drew such pictures of the graces, the winning ways, and the rare promise of the lost lads that every soul there, thinking he recognized these pictures, felt a pang in remembering that he had persistently blinded himself to them always before and had as persistently seen only faults and flaws in the poor boys. The minister related many a touching incident in the lives of the departed, too, which illustrated their sweet, generous natures, and the people could easily see, now, how noble and beautiful those episodes were . . . .

. . . There was a rustle in the gallery, which nobody noticed; a moment later the church door creaked; the minister raised his streaming eyes above his handkerchief, and stood transfixed: First one and then another pair of eyes followed the minister's, and then almost with one impulse the congregation rose and stared while the three dead boys came marching up the aisle, Tom in the lead, Joe next, and Huck, a ruin of drooping rags, sneaking sheepishly in the rear! They had been hid in the unused gallery listening to their own funeral sermon!

—The Adventures of Tom Sawyer.

Shortly before his death ten days ago, Hubert Humphrey told aides that he wanted his funeral kept simple. "I've had enough eulogies for two lifetimes," he said.

Indeed he had. When Humphrey finally was felled by pelvic cancer at his secluded ranch home in Waverly, Minnesota, the ceremonies that followed weren't merely anticlimactic; they were superfluous. Like Huck and Tom, he'd already attended his own funeral.

In 200 years, nothing quite like Hubert Horatio Humphrey had ever come bounding

across the American political landscape. And certainly there never has been anything to equal his dying—a star-studded, media-saturated, year-long happening, complete not only with pre-modern eulogies, but honors and memorials that would have done a President proud.

Humphrey's lingering on-stage exit was so complete and convincing, in fact, that some people tended to forget he was still alive. During a special session of the House of Representatives called in the senator's honor, Speaker Tip O'Neill slipped, then quickly recovered: "Now in your last term—as *you* say—in the Senate, my dear friend, Hubert. . . ." And although Humphrey pointedly had told one reporter, "Just don't be in a hurry on the obituary—don't print it too soon," *Newsweek* magazine nonetheless inadvertently sent his six-page obit to the printer several weeks before his death, managing to rescind it only at the last moment.

Normally, when the winds of a fatal disease begin sweeping the color and flesh from a man's body, he retreats into the privacy of his family, there to lick his wounds and confront his mortality. But Humphrey's gutsy struggle against the demon that killed him was fought, and celebrated, on page one. "It wouldn't be right for everybody," said his friend and colleague, Senator Gaylord Nelson. True. When Senate powerhouse John McClellan died last December after a long illness (and 30 years on the Hill), most people hadn't even known he was sick. Similarly, three-term Senator Lee Metcalf, who died just one day before Humphrey, had been hospitalized for several weeks; his decline was so private that it had gone unreported even in his hometown of Helena, Montana.

Of the many taboos connected with the American way of death, public acknowledgment of malignant cancer has long been high on the list; the mere word is so offputting that most obituary pages rarely mention it, even after the fact. But from the time last August that Humphrey permitted his doctors at the University of Minnesota Hospital to announce that his cancer was "inoperable . . . . terminal," the irrepressible former vice president—with the enthusiastic cooperation of the press and the Washington establishment—let it all hang out. If he couldn't lick the Big C a la John Wayne, he could—and did—give it a hell of a fight in the center ring.

Doctors first discovered small non-malignant growths on Humphrey's bladder almost a dozen years ago; in 1973, when one of these so-called "papillomas" showed evidence of malignancy, the senator underwent heat X-ray therapy. By 1976, however, the disease had spread, and that October doctors at New York's Sloan-Kettering Cancer Center were forced to remove the bladder. Upon his release from the hospital, Humphrey characteristically announced that he was "in unbelievably good shape," but photographs taken of him at the time belied that optimistic self-diagnosis; they revealed a ravaged, hollow-cheeked man who had aged a dozen years in as many weeks. They showed a man who had begun to die.

In 1977—as wire-service photos so persistently continued to remind us—Humphrey's condition steadily deteriorated; month by month, his body seemed to collapse in upon itself, and his dyed reddish-brown hair turned white and started falling out. Throughout the year, he received well-publicized radiation treatments as well as chemotherapy, a medical strategy Humphrey called "bottled death." When one doctor declared that, as a result of the chemotherapy, all the cancer had been removed "as far as we can tell," the handwriting was on the wall.

Last August 16, Humphrey entered the University of Minnesota Hospital with an intestinal blockage; it was after they had operated two days later that surgeons there pronounced their death sentence, revealing that the spreading pelvic tumor they had found could be neither removed nor stemmed by the ministrations of their art. "Inoperable." It was the beginning of the end.

But what an end! For it also was the beginning of a gaudy, heartfelt, only-in-America goodbye to the latter-day Happy Warrior. Hubert Humhprey, 66 going on 100, was not about to expire on the sidelines; rather, he stood dying in the bright strobelight of his golden months (no golden years now—no time for that), the cheers and tears swelling around him. In Washington, it was a listless season: the next election a year away, the Hill legislatively constipated, the White House neither inspiring nor insidious enough to provide the nation a Capital rush. There was, instead, the dying of HHH.

By October, the countdown was on. It started when Congress rammed through legislation renaming HEW's new headquarters for their not-yet-fallen colleague, the first time a federal building had ever been named for a living person. A week later, 3,000 politicians, academicians, athletes, show-biz folk and admirers from labor and business gathered for an "Evening in Honor of Hubert H. Humphrey," the first in a series of dinners to help raise $20 million to establish an HHH Institute of Public Affairs at his alma matter, the University of Minnesota.

The official dying gathered momentum on October 23 when Jimmy Carter, returning from Los Angeles, detoured Air Force One to give Humphrey a ceremonial lift from Minneapolis to Washington—an eleventh-hour realization of Humphrey's longtime dream to have the presidential wings loft him about the country. "I spent twenty years trying to get command of that plane," he said after the flight.

One of Humphrey's Minnesota doctors had told him, "Hubert, we've done about as much for you as we can for a while. Why don't you go back to Washington where you want to be?" And Humphrey had replied: "Doctor, that is good advice." So he returned "home" to the Senate to let his life pass before him in airbrushed glory.

The Senate sensed this was Humphrey's final return to the fold, so two days after Carter delivered him to Andrews Air Force Base, a special session was convened to welcome him back and to eulogize him. All but a few seats in the Senate chamber were filled on that graying autumn day when Humphrey walked in to a full five minutes of steady applause. ("I've been here through five Presidents," said one senator, "and I've never seen anything like that.")

They praised Humphrey's courage and vision and energetic good cheer; they told him he talked too much and swore that they loved him.

Even his old enemies were there: one-time segregationist Herman Talmadge, the original Georgia farmer-politician, wished him "Godspeed"; Howard Baker, the Republican minority leader, who would like to be our next southern President, welcomed him "back in harness"; Robert Dole, as partisan a Republican as Humphrey was a Democrat, said "the Senate just isn't the Senate without Hubert." In the face of the imminent demise of the last remnant of the New Deal liberalism that Humphrey personified, they all could kiss and make up.

From the rostrum, the Minnesotan admitted, "I am old enough and sufficiently wise to know that all you have said is not exactly according to facts, but I am sufficiently fragile and weak as to want to believe every single word."

The media crush after the Senate ceremony turned into a bittersweet circus; reporters were grinning and fighting tears and shaking the senator's hand. Caught up emotionally, CBS's Roger Mudd had to start his news clip over three times before his voice calmed down. As he was leaving the Capitol, and the lights, cameras and correspondents crowded in, Humphrey grinned, and the feisty old political tenor cracked out: "Where were you guys in 1968 when I could have used you?"

A week later, the House of Representatives broke 189 years of tradition by inviting a member of the Senate to a special session in his honor—a huge, official love feast. Dapper in a gray jacket and blood-red vest, Humphrey sat with his wife, Muriel, in the front row of the House chamber and listened to declarations of love and admiration from both sides of the aisle. Tip O'Neill, the rumpled Speaker from Massachusetts, was wiping back tears when he introduced the senator.

Speaking not from the well of the House but from the raised dais just below the audience with a vintage 21-minute ramble laced with self-deprecating jokes. Near the end, he asked: "Now where am I standing? I am standing where the President of the United States gives the State of the Union Address." He paused slightly, adjusted his coat proudly, broke into a wide grin, and gushed, "Myyyy goodness!"

When it was over, reporters who had heard Humphrey's voice grow stronger as he hit his stump stride and had seen him give the podium a light, ritualistic bang with his practiced fist, were shocked by the slow-motion agony he went through to raise a glass of water to his lips—an excruciating, trembling effort which finally afforded him only one small sip.

The following morning, the *Washington Post* paid its tribute on the front page: a historic, half-page photograph of Hubert Humphrey, his mouth agape in a great, hearty laugh, with Tip O'Neill gaveling for order behind him.

The House tribute rounded out the official leave-taking from the Big Three: the President, the Senate and the House. But the biggest, if not the best, was yet to come.

They were all there. Jimmy Carter missed the Cornish game hen and green beans, but arrived in time to say, "I'm proud to be President of a country that loves a man like Hubert Humphrey." Walter Mondale took the stage to declare that "each of you is telling Hubert in the inaudible language of the heart that you love him." Tip O'Neill lumbered through the jungle of round dinner tables loaded with carnations and mums to hug Humphrey on both sides, French-style. Alan King growled into the microphone that the senator's initials stod for "human, humble and honorable." Frank Sinatra sang one of Hubert's favorites, "The Lady Is a Tramp." Elizabeth Taylor, the new jewel of the Washington glitter set, kissed him on each of his sunken cheeks. The treasurer of the United States, a black woman named Azie Taylor Morton, got up and said, "Were it not for Hubert Humphrey, I might not be here tonight without an apron on."

For the 2,000 notables in black tie and decolletage who crowded into the Washington Hilton on a frigid night last December 2 (a date that governors of 40 states had set aside in his honor), it was Humphrey's last last hurrah. The $1,000-a-plate fund raiser for the HHH Institute of Public Affairs had the feel of Old Home Week: Kissinger was there; so was ex-CIA director William Colby, ex-senator John Tunney and ex-JFK friend Angie Dickinson.

But in the end it was Hubert Humphrey's night. Everyone there had seen pictures of his whitened hair and waxen face, of his shirt collars grown enormous. But few were prepared for the cautious shuffle with which he crossed the stage of the grand ballroom at 10:45 that night. Only a thin echo remained of his vibrant Midwestern voice as he

confessed that his most recent round of chemotherapy "just about threw me for a loop. . . . Even as I talk to you, my knees are shaking." Ever the optimist, however, he added that "the doctor's reports are encouraging," which provoked a shout from somewhere in the darkened hall: "You'll Live Forever, Hubert," at which the throng erupted into a great roar of applause.

"There was a lot of guilt at that dinner," said the *Washington Star's* Pulitzer Prize-winning Mary McCrory later. "Humphrey's guys were bitter, saying if there had been an outpouring like that in '68, he would have been President." Others believe that the applause that accompanied Humphrey's dying all year long was grounded in great part on guilt. "He had always been rather shabbily treated by Washington," says *New York Post* columnist Murray Kempton. "Like Nixon, he was continually snubbed. For years the Senate establishment ostracized him, Johnson continually abused him, and the young and the liberals turned on him in '68. As he was dying, he was on everybody's conscience. He hadn't gotten his due."

To some, there was a Christmas-in-July quality about the way Washington belatedly tried to give Humphrey that due. In his final weeks, there was a sense that the Capital—which had helped deny him the office for two decades—was now letting him play President, much the way high-school civics students are given a chance to be mayor-for-a-day.

One day at the White House, Carter positioned Humphrey at the presidential desk in the Oval Office and ordered their picture taken together. Later, he sent it to his former political foe with the inscription: "To H.H.H.—This is a desk that should have been yours." Publicly, Carter called Humphrey "the greatest American I know." Some saw these as gracious gestures from the President towards his most valued ally in the Senate, but others could not forget that 18 months earlier, when the two were fighting for the right to sit at that same desk, Carter had called Humphrey "a loser," "a hack," and "a has-been." ("Harsh words," recalled the President himself at a memorial service, "spoken under pressure and in haste.")

In mid-December, Carter capped his own hail-and-fairwell to the fast-failing senator by helicoptering him for a weekend visit to Camp David in the Maryland mountains, there to talk about "politics . . . pain . . . and the world" before a blazing fire. "That was," said Carter at Humphrey's funeral, "the greatest favor I ever did myself." (Lyndon Johnson, inordinately jealous of all the perks of his high office, had never once invited his meticulously loyal vice president to the presidential retreat.)

As year's end approached, several Washington pundits delivered themselves of farewell columns trumpeting Humphrey's grace and courage. And a week before Christmas, born-again pornographer Larry Flynt took out full-page ads in the *Washington Post* and the *New York Times* calling in 60-point type for a prayer vigil for the senator. ("YOU TAUGHT US NOT TO HIDE OUR FEELINGS.") But it was growing late for prayers. When Humphrey—frailer than ever now—left Washington for Minnesota on December 22 aboard Fritz Mondale's Air Force Two, it was apparent that never again would he return alive to the city where 30 years earlier he had begun his memorable career of national public service. He was going home to die, privately at last.

Well, almost privately. A week before his death, he granted a final bedside interview to columnist Irv Kupcinet of the *Chicago Sun-Times*. ("This is a column a reporter wishes he didn't have to write," wrote Kup, who certainly didn't have to. "It concerns a visit to a friend of 30 years whose days are numbered, down to a precious few.") Kupcinet was accompanied by the Reverend Jesse Jackson, who, before it was too late, wanted personally to thank Humphrey for his help in obtaining HEW funds for a Jackson program. The two visitors quickly discovered that if Humphrey's body was failing—"He was all but gone," said Kup later—his spirit was not. "Now you've got to get the labor people behind you," he urged Jackson in a feeble voice, his face wincing with pain. A few days later, he was on the phone assuring his '68 running mate, Ed Muskie, that he was feeling better and talked of returning soon to Washington. With his family and aides, he spoke of things he still had to do—strengthening his full-employment bill, revising the foreign aid program, helping the Arab-Israeli peace talks.

On Friday, the 13th of January—48 hours after his staff had advised the local Minnesota press to "get ready"—the 66-year-old senator died at home in a sleeplike coma, his wife and children at his side. As official Washington prepared to say goodbye yet again (Air Force One was dispatched to bear his body back to the Capital, and even that seemed redundant), many of those who had observed him over the years found themselves reflecting not only upon his overflowing life but upon its remarkable ending.

"How could he let himself be put on display like that during the last three months?" someone asked *Washington Post* executive editor Ben Bradlee the day after Humphrey died.

"How could he stop it?" said Bradlee, who had known Humphrey for 29 years.

"By staying in Minnesota and acting like a dying man."

"Yes," said Bradlee with a laugh, "but that's like asking Hubert to give a five-minute speech—he just couldn't do it."

If some people found Humphrey's lingering swan song unseemingly, even ghoulish—and some people did—Bradlee was not one of them. "I wasn't offended by it at all," he says. "He was special. He could write his own rules." Nor does Bradlee believe the media overplayed Humphrey's exit. "He wasn't a normal politician. You shift into higher gear for national heroes."

"Personally," says one of Humphrey's best-known Senate colleagues, himself a hero to some, "if I were dying of cancer, I would want to see my close friends, but, unlike Hubert, not in clumps of two or three thousand. Still, each to his own. The only reason a lot of people around here were complaining about all the publicity was because they were jealous; for most of us, no one would pay that much attention."

Many believe that Humphrey's up-front departure was a predictable reflection of his career and personality. "He could never be secretive, never keep his thoughts to himself," says Irv Kupcinet. "His dying was bound to be a public one—Hubert went public with everything."

Murray Kempton agrees. "He had no function off stage," says Kempton. "His entire life was as a campaigner, and a campaigner has no privacy. In that rough and tumble world, public torments are the rule."

In the end, most of those who knew him found the phenomenon of Hubert Humphrey's final days a fitting one. "At first I thought it was in poor taste," admits Mary McGrory, "but then it was so obvious that it was what he wanted. It meant a great deal to him, seeing the tears and hearing the applause, knowing that he was loved."

In his last months, Humphrey acknowledged as much: "The greatest gift in life," he tearfully told the Senate, "is the gift of friendship, and I have received it." During the effusive Senate session in his honor, Arkansas Senator Dale Bumpers, who was sitting beside him, leaned over and whispered, "This is just a little bit too much, isn't it, Hubert?" Replied Humphrey, "Hush, I like it."

"What I want more in life than anything else now is respect, which I think I'm beginning to earn," he said to one reporter. "When I come back from the Senate chamber to my office," he told another, "I'm a walking historical object." And one day near the end, he leaned into the crib of his infant granddaughter and declared: "I'm your grandfather and I'm worth remembering."

"Life," Humphrey liked to say, "was not meant to be endured, but enjoyed." As best he could, he tried to apply that to his own dying as well. "It was a glorious death," says his old friend James Reston. "He fought and lost and kept fighting. What could be more glorious than that?" Added Humphrey's protégé, Walter Mondale, at the Capitol memorial service, "He taught us all how to hope and how to love, how to live and, finally, how to die."

Three weeks before his death, after first checking with several friends as to its propriety, Humphrey taped a final farewell to the American people, leaving it up to Muriel whether to play it at his funeral, elsewhere, or never. "You know," he told Irv Kupcinet with a grin on his deathbed, "old Hubert always has the last word."

Mr. ANDERSON. Mr. President, I earlier submitted as part of this tribute to Senator Humphrey a transcript of the funeral service for the family of Senator Humphrey in the Capitol rotunda on January 14, conducted by the Chaplain of the Senate, Edward L. R. Elson. Senator BYRD has submitted a transcript of the memorial service for Senator Humphrey in the Capitol rotunda on January 15, including the eulogies by Vice President MONDALE and President Carter. Senator KENNEDY has submitted the eulogies to Senator Humphrey by the Vice President and President on January 16 at the funeral service at House of Hope Presbyterian Church in St. Paul. I ask unanimous consent to have printed in the RECORD as part of this tribute the program of the funeral service at House of Hope Presbyterian Church on January 16 and the opening prayer, invocation, meditation, and prayers by Rev. Calvin Whitefield Didier, pastor of the House of Hope Presbyterian Church at the funeral service. I ask unanimous consent to have printed in the RECORD the remarks of Dr. Robert Schuller at the funeral service.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FUNERAL SERVICE, HOUSE OF HOPE PRESBYTERIAN CHURCH, JANUARY 16, 1978

Organ Prelude, House of Hope Church organist, Sharon Kleckner.

Instrumental Prelude, Sonata Number 1 in G Major, Movement 1, Brahms, by Eugene Istomin, Isaac Stern.

Solo, Schubert's "Ave Maria," by Robert Merrill.

Invocation, Rev. Calvin Whitefield Didier, pastor, House of Hope Presbyterian Church.

Hymn, "A Mighty Fortress Is Our God," by congregation.

Old Testament Lesson, Psalm 8, Rabbi Max A. Shapiro, Senior Rabbi, Temple Israel, Minneapolis.

Spirituals, "He'll Understand, Well Done" and "I'm Going Up Yonder," Tom Tipton (soloist) and Sabathani Baptist Church of Minneapolis Choir.

Remarks, Dr. Robert Schuller.

Solo, "The Lord's Prayer," Robert Merrill.

New Testament Lesson, John 14, The Most

Rev. John R. Roach, Archbishop of the Archdiocese of St. Paul and Minneapolis.

Anthem, "Hallelujah," (Mount of Olives), Beethoven, by congregation.

Remarks, Vice President Mondale.

Remarks, President Carter.

Selection, Sonata Number 1 in G Major, Movement 2, Brahms, by Mr. Stern and Mr. Istomin.

Meditation, prayers, Rev. Didier.

Response, "Alleluia" and "America the Beautiful" Congregation.

Benediction, Rev. Didier.

Response, Hallelujah Chorus (Messiah), House of Hope Church Choir.

Postlude, Prelude and Fugue in C. Minor, Bach, by House of Hope Church Organist.

Interment, Lakewood Cemetery, 36th and Hennepin, Minneapolis.

OPENING

From the rising of the sun to the going down thereof, the Lord's name is to be praised.

For the earth is the Lord's and the fulness thereof. The World and they that dwell therein.

Therefore, whether we live, we live unto the Lord; or whether we die, we die unto the Lord; whether we live, therefore, or die, we are the Lord's.

And I am certain that neither death, nor life, nor angels, not principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor anything in creation shall be able to separate us from the love of God, which is in Christ Jesus our Lord.

INVOCATION

Eternal force that holds the spiraling galaxies in tension, hold us at attention.

If it is not too much to ask, attend our meaningless-without-you ceremonies in memory of Hubert Horatio Humphrey.

Storm maker, flake maker, maker of men in the image of God,

In the dead of winter blaze our hearths with circles of care around us to hold back the cold a little stronger.

Stay the sun in his brief circuit above us until we are able to finish our Ajalon.

Quicken our mornings with high expectations, and create an outlook of rare beauty on all our windowpanes that we may look upon the mighty works of the Lord and wonder that He is mindful of such a man as His servant, Hubert.

Through Jesus Christ our Lord.

MEDITATION

"Let there be no eulogy. I have had enough eulogy for two lives. Instead, let us have a celebration of life for me, for my family, and for the people of the little towns all over Minnesota. And let us have congregational singing, and music, and happiness! No sympathy for me . . . I've had a wonderful life."

With these simple words a few days ago, Hubert Horatio Humphrey instructed us how to commemorate these great times of our lives we have had together.

Now I want you to know that we are not accustomed to holding services of this length in House of Hope Church. In fact the last time a service was this long was when Hubert himself was the preacher.

It is the same spirit of celebration that peeked from out his frailing body several weeks ago when he came home to Minnesota. Asked if he were considering resignation, he snapped, "I'm not resigning anything. I might even join something."

Well, he has now joined that splendid congress of those to whom we dare address the words of our Lord, "Well done, thou good and faithful servant. Enter thou into the joy of thy Lord."

This audacious spirit in the face of adversity is imitative of our Lord's spirit when he called in his friends for one festive last supper together. And before they went out to his Gethsemane, they sang a hymn.

Now, true to the example of those earliest followers of our Lord, we have sung together for our friend at his request, "A Mighty Fortress Is Our God"—an expression of his Christian faith and life.

And he wanted his friends gathered about his memory to make music, and spoke hopefully that good friends Eugene Istomin and Isaac Stern and Robert Merrill and all the rest of us might come for old times' sake.

When Senator Humphrey asked us to celebrate with music, he was reminiscing about his own love for opera and symphony and recital and all the popular forms. And what music did for him he hoped it would do for others.

One day here when he was introducing Mr. Istomin, who was the key to our association at House of Hope, Senator Humphrey gave the congregation these lines:

How many of us ever stop to think of music
as a wondrous magic link
With God, taking sometimes the place of
prayer
When words have failed us 'neath the weight
of care.
Music, that knows no country, race, or creed,
But gives to each according to his need.

On my first acquaintance with the Senator, he pointed out to me, framed on the wall of his trophy room, one of his major themes in teaching at Macalester College and his own political philosophy:

"The saint may dream and the philosopher construct his ideal world, but the man who wields power must live in the pit of reality, doing the very best he can and ever reconciled to the limited and the partial."

Of these many skirmishes in that pit of reality, few move me so much as the Vice President's confrontation with Charles de Gaulle. At a time of strain, he threw away a speech that had been written for him citing our aid to France in two world wars. The Vice President felt that would be an insult. Instead, he spoke informally of visiting Yorktown and reading there the many names of French soldiers who died for us in our struggle for freedom. He said, "How can I as an American ever forget the debt we owe France for our independence. What binds us is our common belief in liberty. No disagreement between our countries today can possibly erase these immortal memories."

Tears welled in de Gaulle's eyes as our Vice President spoke. And de Gaulle said to our Ambassador, "Your Vice President is a scholar."

In that same way of thinking, Senator Humphrey did not want us to dwell today on what he has done for us, but, rather, to give his happy thanks for what the people have done for him.

I think back on that Father's Day when he had come to deliver a sermon here at House of Hope and heard the Beethoven "Hallelujah." As the choir finished, he leaned over to ask me, "Can we clap?"

Hubert Humphrey was a clapping kind of man. And how the world needs more clappers and fewer shouters and shooters and sad sacks!

And as we were talking about these things a few days ago, each of us sensing the turning of the tide, Muriel mused, "One is tempted to ask 'Why?', but I often think, wasn't even Mary at the foot of the cross asking the same question? And Mary probably never really knew in her lifetime what was taking place around her."

You are right, Muriel. Does any one of us ever understand the events of our lives as they unfold in the Providence of God? This was my communication to Hubert when he was confined to Sloan-Kettering last spring. I simply offered him the words spoken centuries ago to the wondering Esther when the threats were closing in.

"Who knows but that for such a time as this you were brought into the kingdom."

Was it at such a time as this that Hubert found in his distress his finest hour? Was it for such a time as this he spoke his message most eloquently? Was it in such a time as this he has been elevated to his highest role of human leadership?

Early in the 1972 Presidential campaign, Hubert Humphrey said,

"What I want, if you'll let me, is to bring this country together as a family."

Well, it didn't turn out that way then. And some of you didn't help enough. But he said, intuitively, when he lost, "Maybe we can make an even greater contribution."

And I was pondering these things a few days ago when he was pleased to tell me about his conversations during this Christmas season with our three Presidents. He said to them,

"If we do not show our love and forgiveness for one another in this season of the birth of our Lord, then what is the celebration all about?"

And, you see, what no American has been able to do in his life, Hubert Horatio Humphrey has done in his death—he has brought us together in a literal way to celebrate the life relationships we count most valuable in the gracious embrace of a nation we love most dearly.

And if he could speak to us once again as he spoke from this very pulpit—and speak Hubert would if he could—he would say:

"O America, O America the Beautiful . . . we must be one people, we can be one people, we are one people under God."

And Hubert, dear friend, Happy Warrior, we will not know rest until we *do* secure that liberty and justice and those human rights for all the world you so loved.

The only other time Hubert ever spoke to me about death was upon his return from the funeral of Walter and May Reuther.

He gave me then these lines from that event that deeply moved him:

I dreamed I saw Joe Hill last night alive
as you and me.
Says I, "But Joe, you're ten years dead."
"I never died," says he.
"I never died," says he.

And standing there as big as life and
smiling with his eyes,
Joe says, "What they forgot to kill
went on to organize,
went on to organize."

"Joe Hill ain't dead," he says to me
"Joe Hill ain't never died.
Where working men are out on strike
Joe Hill is at their side,
Joe Hill is at their side."

I Dreamed I saw Joe Hill last night
alive as you and me.
Says I, "But Joe, you're ten years dead."
"I never died," says he,
"I never died," says he.

PRAYER

O Lord, give us more of Hubert's kind to pump hands, and clap hands, and slap backs, and kiss babies, and cry a little, to make big promises and fulfill some of them, to harangue us into better behavior toward one another, and to remind us that no one can hear the words "well done" until the prescription of our Lord is fulfilled: "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me."

Sometimes, Lord, we thought Hubert had a hankering for the top that only heaven could satisfy. And since his reach always exceeded his grasp, he seemed heaven-bent from the start.

That brought many a heart-break, but never a broken spirit.

And so, Lord, unto thy safekeeping we commend the spirit of thy servant, Hubert Horatio Humphrey. If he seems loquacious,

be patient with him, Lord, as we have been, for he almost always has a good point.

Enfold him now in thine everlasting arms until we see no longer as through a glass, darkly, but face to face.

Through Jesus Christ our Lord.

REMARKS OF DR. ROBERT SCHULLER

"God loves you and so do I"

It's easy for me to say that sentence today.

My next sentence is not so easy, but I know he wants me to say it.

"This is the day the Lord has made, let us rejoice and be glad in it."

We can rejoice because Hubert Humphrey has just finished his last, his hardest, and his best campaign! He knew what victory celebrations were like. And he wanted this to be a victory celebration with the banners flying, "Hubert Humphrey wins by a landslide!" Yes, the last vote is in. And he is declared by the American people to be super successful? Success is building self-esteem into humanity. By that definition, Hubert Horatio Humphrey was a super success!

I suppose we could ask the question. "What was the secret of his success? Optimism? Yes.

Enthusiasm? Definitely.

Bounce-back ability? You bet.

Possibility thinking? For sure.

But to encapsulate it into one word, I would call it courage. He had the big "C." Yes, big courage.

I ask three questions: What is courage? Where does it come from? And why do we exalt it in him today?

Courage: What is it? It's not the absence of fear. There are people who have no fear but they are not courageous. They never dare to attempt to do something great for their fellow human beings. Hubert and I spent some time sharing favorite quotations and this is one we both liked: "I'd rather attempt to do something great and fail than attempt to do nothing and succeed!" That's courage! Being willing to commit your prestige to a great cause! Courage is being willing to fail in a great cause rather than to win in a demeaning alliance. Hubert had that kind of courage. His big "C" was evident in many ways. One of the obvious examples was in his courage to campaign. Every person in political office knows what courage that takes.

But think of this, he also had the *courage to love*. I'm often asked. "Why isn't there more love in the world today?" And I always answer the same way. "That's the wrong question. The right question is, 'Why isn't there more courage?' " It takes nerve to love. When you really love you get involved. You make risky commitments because you know it's the right thing to do! You make the right decisions even though the task seems impossible. You run the risk of failure and perhaps, even rejection. Boy, does it take courage to love! Some people gain fame for leadership in battle; other people gain fame for leadership in culture. In my mind, and I think in yours, Hubert Humphrey gained fame for his leadership in love.

His courage to love was authenticated by his courage to forgive. In all of life this is true: You won't love long if you can't forgive quickly. And it takes courage to forgive because you run the risk of receiving the rebuke, the insult, and the scorn of those whose scales of injustice weigh too heavily while their scales of mercy weigh too lightly. The big "C." What is it? The back side of love; that's what courage is! And love, in the final analysis, is my deciding to make your problem my problem. That definition of love explains a lot of Hubert Humphrey's public life, doesn't it?

II.

Where did his courage come from? We are not born with courage, that's for sure. Erik Erikson outlines his brilliant phases of human life and told us that for the first twelve months of life each person lacks trust. We are born as nontrusting creatures. Birth is itself a traumatic experience. So how do we become courageous?

Well, I suppose people draw courage from many different sources. And I'm close enough to know where Hubert Humphrey drew his courage. First, of course, from his father and his mother. And then, continually, through his family. From a wife like you, Muriel, and your children and grandchildren along with your friends. You know, all the eulogies and all of the accolades that have been offered to Hubert (and he deserved everyone), are, at a deeper level, really all subtle and unintentionally yet truthfully, compliments to his family and his marriage!

Courage! Where did he get it? I remember how a few hours before he went into surgery, at Sloan Kettering, he called me: "Thank you, Bob, thank you, thank you." "For what?" I asked. "For the words," he answered. "The words! The words! They are tremendous!" All I did was telegram him a Bible verse from Jeremiah 29:11:

"I have a plan for your life, it is a plan for good and not for evil, it is a plan to give you a future and a hope!"

He drew enormous courage from that!

Then last October I was with him in his apartment in Minneapolis. "I don't want to lay a heavy trip on you, Dr. Schuller," his aide Fred Gates said to me as he drove me to the senator's apartment. "But Mrs. Humphrey and I hope you can revive his spirits so he'll go back to Washington. He doesn't have long but it could be so stimulating for him if he went back." He really didn't want to go back to Washington then. But I shared these words with Hubert then from Isaiah 43:

"Fear not, for I have redeemed you! I know your name! You are mine!

"For when you go through the waters, they will not overwhelm you.

"When you go through the fire, it will not consume you.

"For I will be with you!"

How those words fired him up! "Great! Great!" he enthused. "I must remember that." So I know where he drew his courage; he drew it from the deeper wellspring of the word of God!

Then I will always remember how he said to me (one of the last things I remember him saying; it was a question actually) "Bob," he asked, "why is it that lately, every time the name or thought of Jesus comes into my mind, I want to shed tears of joy!?!"

He knew how to fight the battle. He had real courage! He found it in his family; the word of God; and in Jesus!

III.

Why do we exalt courage like he had? There are, after all, people who are inspired by courage, mismanaged and misdirected of course, who commit themselves to projects and dreams that turn out to be heartbreakers and to hopes that turn to ashes. Why do we exalt courage—the courage to dare to try the impossible or that makes a person willing to march into hell for a heavenly cause? Why do we exalt courage when you may come out scarred? Because courage alone uncovers the self-esteem building possibilities necessary to uplift the human race.

So the alternative to courage is unthinkable! Unthinkable! For at the bottom line, your life and mine, yes, our immortal souls will have to stand up before the judgment seat of God and answer this almighty question, "Did I inspire, in my living and dying, my fellow human beings to fight a better fight? Did I to some small or significant degree inspire someone to have greater faith in themselves?" Courage is what uncovers possibilities! And without that there is no salvation; there is no redemption; there is nothing creative in life!

It was Horace Mann who said: "Be embarrassed to die until you have scored a victory for humanity!" Hubert Humphrey scored his victories for humanity. No wonder he was not embarrassed to die. Yes, courage alone lifts the collective self-esteem in society. And when we do that you can be sure we are glorifying God and enjoying Him forever. Why do we exalt courage? Because it leads us to dare to believe in God!

There were some other words that he liked; he liked them and he lived them! I first passed them on to him when we first met five years ago. It's called the Possibility Thinkers Creed. I recall he cried as he read them that first time:

"When faced with a mountain I will not quit, I will keep on striving until I climb over, find a pass through, tunnel underneath or simply stay and turn the mountain into a gold mine with God's help."

This year, when Christmas came and Hubert and Muriel didn't know what to put on their Christmas card, they used these words: "God loves you and so do we!" That's the key to a Merry Christmas!

Scrawled alongside the Star of David in a basement in a shell-torn home in West Berlin were these words written by a nameless Jew:

"I believe in the sun even when it is not shining, I believe in love even when I do not have it, I believe in God even when He is silent!"

Take that kind of faith and you'll come to your end and discover that it's not *the end of the road, it's only a bend in the road!*

Let us be inspired by Hubert Humphrey's courage, to live lives that will uplift our fellow humans. Ask yourself these "bottom-line questions": Shall I resolve in living and dying to conduct myself that I shall inspire my fellow humans to aspire until they shall discover and develop their God-given possibilities? Shall I take my hurts, like he did, and turn my scars into stars? Shall I—in sickness and health, in labor and leisure, in laughter and tears, in winning and losing, in lying down and rising up—so live that I will add some measure of dignity to God's special creatures—these human beings—and hence lift the collective level of society's self respect?

Then for you too, it will be like it was for Hubert Humphrey on his last day, with pride behind you, love around you and hope ahead of you!

God bless you Muriel! God loves you and so do I!

Mr. ANDERSON. Mr. President, I also ask unanimous consent to have printed in the RECORD as part of the Senate tribute to Hubert H. Humphrey the remarks of Dr. Mark A. Siegel, Deputy Assistant for Policy Analysis to the President, at the Jewish memorial service for Hubert H. Humphrey at the Religious Action Center on January 19, 1978.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF MARK A. SIEGEL

Since there is no way to approach doing justice to Hubert Humphrey in 2 hours, no less 2 minutes, I will make some very personal comments, and let Hubert's record speak for itself, stand by itself, as his own greatest tribute.

He was my friend. I worked for him. I loved him.

There has never been anyone like him serving this Nation, and I'm certain there never will be anyone like him again. He loved all people, but had a very special, unique relationship with "Ahm Yisrael," the Jewish people, whom he served so very well through the years. In fact, the final favor I asked of Hubert Humphrey was to intervene on behalf of a Soviet Jewish family that had

been brought to my attenion in Israel by the Israeli Council for Soviet Jewry. I sent Hubert a short note, and enclosed photographs of the family. He called me when he received the note and said that when he looked at those children, he saw the faces of his own children. Three days later the family was granted an exit visa, after six years of persecution. There is a wonderful family of four people now living in Israel, living as human beings, and as Jews, because Hubert Humphrey cared enough, in his last days, to help them.

He told us he wanted his death to be a celebration of life, a time of joy. But I will be honest with you and with him. I feel no joy, just sadness, and an overpowering sense of loss.

The Senate's greatest expert on agriculture, on education, on welfare, on foreign policy, on disarmament—all embodied in one man, in a single man. This extraordinary congruence of commitment and expertise will not happen again, but we were very fortunate that it happened once.

Hubert Humphrey said over and over again that he was no saint. And many of the people in this room recognize that. Hubert Humphrey was no saint. He was a man. But he was the best man we have ever known, or will ever know. And each of us is significantly diminished by his death.

Hubert had no bitterness about the injustices in his own life, although he was bitter about injustice in the lives of others. He channeled that bitterness into commitment and service to improving the lives of people, ordinary people, little people, real people. He accepted the fact that he would never be president without bitterness. But many of us are not as good as Hubert was, we were and are bitter. Bitter for him, and bitter for ourselves, bitter for our nation, and for the world.

In 1968, some called him a fascist—I will never forget that. In 1972, he was vilified, and I remember being asked by a very prominent Democrat why I was working for a right wing candidate, the leader of the reactionaries. I will never forget that. I still feel the rage. But he forgot it, and forgave, and came to terms with his own life, and ultimately his own death.

My background is academic, I am a teacher, as was Hubert. And as a teacher, I look at the performance of the American public in 1968, and see a choice between Hubert Humphrey and Richard Nixon. As a nation, we flunked the ultimate test, we failed, we failed him and ourselves and our children. That is something we all have to live with, consequences we still see unfolding.

But Hubert passed the test with flying colors. In over thirty years of public service, the most extraordinary public career of anyone in our Nation's history, Hubert Humphrey gets an "A". He gets the "A", and with his death we retire the grade.

We will continue to serve, and be active in public life, and look for good leaders for our Nation. We will look for public servants who can earn the grade of "B" but there are no more "A's". Hubert Humphrey will be the model by which we measure all who come after him, but rest assured that we will not see the likes of our beloved Hubert again in our lifetimes.

RECOGNITION OF THE INDEPENDENCE AND NATIONAL DAY OF SRI LANKA

Mr. STONE. Mr. President, as chairman of the Near Eastern and South Asian Affairs Subcommittee of the Senate Foreign Relations Committee, it is my pleasure to insert into the RECORD remarks commemorating the 30th anniversary of the Independence and National Day of Sri Lanka, which is being celebrated this year on February 4.

It will also mark the assumption of the office of the country's first Executive President by the Prime Minister and, therefore, the day will be of special significance.

The seventh general election since independence was held in Sri Lanka on July 22, 1977. The United National Party led by Mr. J. R. Jayawardene was returned to power. He had been campaigning for the last 10 years for the establishment of a strong executive elected directly by the people, as opposed to the prevailing practice of the executive being chosen from among members of the majority party in the legislature under the British Parliamentary Conventions of Cabinet Government. His victory has therefore enunciated this constitutional change as one of its fundamental policies.

The Government is establishing a free trade zone in an area designated the Greater Colombo Economic Commission. This effort by the government of Sri Lanka should be complimented on the country's Independence and National Day.

The United States has played a major role in economic assistance to Sri Lanka. The new Government of Sri Lanka has allowed the exchange rate to float and has instituted a substantial degree of liberalization of the country's external trade. The policy shift is aimed clearly toward greater growth in order to accelerate development.

Additionally, I wish to add that Ambassador Neville Kanakaratne will be relinquishing his duties on February 28, 1978 and I wish to congratulate him on his fine service which he has provided his country.

ORDER FOR RECESS UNTIL 10:45 A.M. ON MONDAY, FEBRUARY 6, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10:30 a.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Later the following occurred.)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 10:45 a.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR A PERIOD FOR ROUTINE MORNING BUSINESS ON MONDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday, after the two leaders or their designees have been recognized under the standing order, there be a period for the transaction of routine morning business not to extend beyond the hour of 11 a.m., with statements limited therein to 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM MONDAY, FEBRUARY 6, 1978, TO TUESDAY AT 8 A.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on Monday it stand in recess until the hour of 9:45 a.m. on Tuesday.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on Monday it stand in recess until the hour of 8 a.m. on Tuesday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF VARIOUS SENATORS ON TUESDAY, FEBRUARY 7, 1978

Mr. ROBERT C. BYRD. Mr. President, may I ask the Chair if any order has been previously entered for the recognition of a Senator on Monday or Tuesday?

The PRESIDING OFFICER. There have been no orders.

Mr. BAKER. Mr. President, if the majority leader will yield to me, I take it the unusual convening hour is to accommodate the requests of eight Senators who are listed as wishing to be heard on the matter of world economic concern to be led by the distinguished Senator from New York (Mr. JAVITS)?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. That will take about 2 hours?

Mr. ROBERT C. BYRD. That will take about 2 hours. The distinguished minority leader mentioned this to me earlier, and I had temporarily, inadvertently, forgotten about it.

Mr. President, I ask unanimous consent that immediately after the disposition of the reading of the Journal on Tuesday, the distinguished Senator from New York (Mr. JAVITS), the equally distinguished Senator from Tennessee (Mr. BAKER, Mr. PERCY, Mr. GLENN, the junior Senator from West Virginia—a very junior Senator from West Virginia—Mr. ROBERT C. BYRD, Mr. HATCH, Mr. GARN, and Mr. MCCLURE each be recognized for not to exceed 15 minutes, not necessarily in the order named, but in an order that will meet the convenience of those Senators who wish to engage in that 2-hour colloquy.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF THE UNFINISHED BUSINESS ON TUESDAY NEXT

Mr. ROBERT C. BYRD. Now, Mr. President, I ask unanimous consent that at the end of the 2 hours or not later than 10 a.m. on Tuesday, in accordance with the order previously entered, the Senate will resume consideration of its unfinished business.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Do I understand that on Tuesday the standing order for leadership time would be abdicated?

Mr. ROBERT C. BYRD. It would be eliminated.

Mr. BAKER. I thank the Senator.

Mr. ROBERT C. BYRD. I thank the minority leader.

ORDER OF BUSINESS ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, did I get a period for the transaction of routine morning business on Monday?

The PRESIDING OFFICER. The Senator, the majority leader, did.

Mr. ROBERT C. BYRD. To close at what time, may I ask?

The PRESIDING OFFICER. To close at 11 o'clock.

Mr. ROBERT C. BYRD. I thank the Chair.

ORDER FOR THE RESUMPTION OF CONSIDERATION OF UNFINISHED BUSINESS ON MONDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at the conclusion of routine morning business or no later than 11 a.m. on Monday, the Senate resume its consideration of the unfinished business.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO HAVE UNTIL MIDNIGHT FRIDAY, FEBRUARY 3, 1978, TO FILE REPORTS

Mr. ROBERT C. BYRD. Mr. President, at this time I ask unanimous consent that committees may have until midnight tomorrow, Friday, February 3, 1978, to file reports.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield the floor.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. HART). The Chair, on behalf of the Vice President, appoints the following Senators to attend the International Conference on Tanker Safety and Pollution Prevention, to be held in London, England, February 6–17, 1978: The Senator from Washington (Mr. MAGNUSON); the Senator from South Carolina (Mr. HOLLINGS), as an alternate to attend the conference in the absence of Senator MAGNUSON; and the Senator from Alaska (Mr. STEVENS).

AUTHORIZATION FOR THE SECRETARY OF THE SENATE TO TAKE CERTAIN ACTION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, during the recess of the Senate over until Monday, the Secretary of the Senate be authorized to receive messages from the President of the United States and from the House of Representatives.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, AND THE ACTING PRESIDENT PRO TEMPORE TO TAKE CERTAIN ACTION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, during the recess of the Senate over until Monday, the Vice President of the United States, the President of the Senate pro tempore, and the Acting President pro tempore be authorized to sign all duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. On Monday the Senate will convene at 10:45 a.m. After the two leaders or their designees have been recognized under the standing order, there will be a period for the transaction of routine morning business not to extend beyond the hour of 11 a.m. with statements limited therein to 3 minutes each.

At the hour of 11 a.m. the Senate will resume its consideration of the unfinished business under a unanimous-consent agreement and rollcall votes will occur during the afternoon but not prior to the hour of 2 p.m.

Such rollcall votes may occur on amendments or motions in relation to the unfinished business, and the unanimous-consent agreement provides for control of time for debate on amendments, on the bill, and on debatable motions or appeals or points of order carrying through Tuesday on final passage of the bill.

RECESS UNTIL 10:45 A.M. MONDAY, FEBRUARY 6, 1978

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 10:45 a.m. Monday next.

The motion was agreed; and at 5:29 p.m., the Senate recessed, until Monday, February 6, 1978, at 10:45 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate February 2, 1978:

IN THE AIR FORCE

Rear Adm. William N. Small, U.S. Navy, having been designated for commands and other duties of great importance and responsibility determined by the President to be within the contemplation of title 10, United States Code, section 5231, for appointment to the grade of vice admiral while so serving.

IN THE AIR FORCE

Air Force nominations beginning Jack D. Abercombie, to be colonel, and ending James W. McBride, to be captain, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on January 20, 1978.

IN THE ARMY

Army nominations beginning James Bennett, to be colonel, and ending Luther J. McGaughy, to be lieutenant colonel, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on January 20, 1978.

IN THE NAVY

Navy nominations beginning Rodney A. Marcom, to be commander, and ending Paul F. Kruger, to be ensign, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on January 20, 1978.

IN THE NAVY

Navy nominations beginning Jimmy L. Aaron, to be ensign, and ending Harry R. Erichson, to be lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on January 20, 1978.

HOUSE OF REPRESENTATIVES—*Thursday, February 2, 1978*

The House met at 11 o'clock a.m.

The Reverend Julian Roger Cameron, superintendent, Camp Wesley Pines, Mississippi Conference, the United Methodist Church, Gallman, Miss., offered the following prayer:

Almighty God, we thank Thee that we are Thy children and that Thou doest love us.

We love Thee, because Thou didst first love us.

We know that Thou art able to look into our hearts and truly know us, our desires, intentions, and greatest ambitions.

Father, above all today we ask that Thou wouldst motivate each one of us to do our part, large or small, to make this a better world, one free from false pride, selfish desires, deceit, and hatred.

Take these whom we have chosen to lead us and use them in Thy great plan for all mankind. Help them to find the way to help bring the day of peace and understanding to all mankind. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Is there objection to the approval of the Journal?

Mr. BRADEMAS. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

The question is on the approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BRADEMAS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 368, nays 21, not voting 43, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9375) entitled "An act making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes."

And that the Senate agrees to the amendments of the House of Representatives to the amendments of the Senate numbered 1, 7, 16, 22, 23, 37, and 52 to the above-entitled bill.

The message further announced that the Senate further insists upon its amendment numbered 43 and requests a further conference with the House on the disagreeing votes of the two Houses thereon and appoints Mr. MAGNUSON, Mr. STENNIS, Mr. PROXMIRE, Mr. INOUYE, Mr. YOUNG, Mr. CASE, and Mr. STEVENS to be the conferees on the part of the Senate.

THE REVEREND JULIAN ROGER CAMERON

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, the gentleman delivering this morning's invocation has made outstanding contributions to the youth of my home State of Mississippi through his involvement in Methodist church camp work. The Reverend Julian Roger Cameron presently serves as superintendent of Camp Wesley Pines in Gallman, Miss., a position he has held since the creation of the camp 18 years ago. In fact, he supervised the construction of this fine facility, recognized to be the largest and best equipped church camp in our State.

Reverend Cameron was educated in the public schools of Meridian, Miss., and graduated from Lambuth College in Jackson, Tenn., in 1942. He has been affiliated with the Mississippi Conference of the United Methodist Church for some 35 years, serving 17 years on pastoral charges before becoming camp superintendent. I want to say, too, that he has been assisted in his ministry by his wife, Rosemary Cameron.

It would be hard to estimate how many young people Reverend and Mrs. Cameron have influenced toward the good during their ministry, but they number in the thousands. It is an honor for me to welcome you, Reverend Cameron, on behalf of my colleagues here in the U.S. House of Representatives.

PUNXSUTAWNEY PHIL REPORTS—WATCH OUT FOR 6 MORE WEEKS OF WINTER!

(Mr. MURTHA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MURTHA. Mr. Speaker, I can with complete confidence today advise my colleagues that the Northeast and Midwest can expect continuing winter weather, that the Southern and Southwest Congressmen can continue to expect a long tourist season, and that my Western colleagues can expect the rain to continue to end their drought problems.

I am certain because this morning, my most famous constituent—Punxsutawney Phil—emerged from the ground to see his shadow, thus insuring 6 more weeks of winter weather.

Last weekend after my congressional workshop I visited with Phil and Phyllis at their home in Punxsutawney. I can report that both seemed in good health. I urged Phil to wait for cloudy weather this morning so winter would end more quickly, but it goes to show that we can only react to the weather, not create it. Phil did his duty. Unfortunately, he saw his shadow.

For the information of the Members, I wish to insert into the RECORD the official proclamation from the weather capital of the world:

OFFICIAL GROUNDHOG PROCLAMATION

Hear Ye! Hear Ye! To all faithful followers assembled here on Gobbler's Knob,

And to all true believers around the world:

I, Charles M. Erhard, Jr., President of the Punxsutawney Groundhog Club, hereby proclaim that his Imperial Majesty—King Phillip, The Only True Weather Prophet—emerged from his snow covered burrow at 7:27 this morning. The King of all weather prognosticators braved the blasts of cold, wintry air,

Only long enough to cast a noticeably long, gray shadow.

Having made his annual forecast, Punxsutawney Phil scampered back into the warmth of his royal residence.

Thus, it is official! There will be six more weeks of winter weather,

But the worst is over!

Once again . . . the shadow knows! That's the word today from the weather capital of the world—Punxsutawney, Pennsylvania . . . The home of the only reliable weather forecasting groundhog!

BRAZEN DISREGARD FOR HUMAN RIGHTS IN SAUDI ARABIA

(Mr. VANIK asked and was given permission to address the House for 1 min-

ute and to revise and extend his remarks.)

Mr. VANIK. Mr. Speaker, all Americans should be angry and shocked at the revelation in today's newspapers of the crude and inhumane punishments inflicted last week in Saudi Arabia. The United States, as a leading advocate of human rights, simply cannot tolerate the brazen disregard for human rights and decency that are indicated by this situation. Our Government has a duty to find out precisely what has happened and inform the American people.

How long can we tolerate the differential in human rights standards among our trading partners. We pay billions of dollars in oil payments to Saudi Arabia. We have a right to demand some measure of human decency as a condition of our continued relationship.

In the area of human rights, there can be no Saudi Arabian exemption.

FEDERAL DISASTER ASSISTANCE ADMINISTRATION

(Mr. FITHIAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FITHIAN. Mr. Speaker, recently Mother Nature has seen fit to deposit on the great State of Indiana and on other Midwestern States a very considerable amount of snow. Frequently we hear from the grassroots the complaints against the Federal Government. I would like to take this happy opportunity to report to the House the tremendous response on the part of the Federal Disaster Assistance Administration, for not only did they respond to the Governor's and Senator BAYH's call, but they responded further to the call of the gentleman from Indiana (Mr. BRADEMAS) for flexibility in terms of the administration of that law. Those local units of government which are struggling now with the residue of that storm are among those who most appreciate the ability of the Federal Government and the State government to work together when we are confronted with this kind of serious calamity.

Mr. BRADEMAS. Mr. Speaker, will the gentleman yield?

Mr. FITHIAN. I am happy to yield to my distinguished colleague, the gentleman from Indiana.

Mr. BRADEMAS. Mr. Speaker, I want to thank my friend, the gentleman from Indiana (Mr. FITHIAN), for what he has had to say, and I would like to take this opportunity to express the appreciation that all of us whose communities were very hard hit by snow, as South Bend, Ind. was, with 40 inches in about 3 days, feel toward President Carter, toward Jack Watson, Secretary to the Cabinet and Assistant to the President for Intergovernmental Affairs, and toward Federal Disaster Assistance Administrator William Wilcox for their willingness to modify the disaster assistance program to provide that, for a period of 5 days from the point of declaration by the President of a state of emergency, the Federal Government will reimburse local units of Government for 75 percent of the cost of using private contractors to remove snow.

This action on the part of the President and his counselors represents a sensitivity to the needs of human beings which I think is highly commendable, and I want to reiterate my appreciation to the President, Mr. Watson, and Mr. Wilcox, and to my colleague, the gentleman from Indiana (Mr. FITHIAN), for what he has said on this matter.

Mr. FITHIAN. Mr. Speaker, I thank the gentleman for his remarks.

Mr. Speaker, I would only say that in these days when we are so prone to criticize the Federal Government, I thought it might be heartwarming to report to the House on an occasion in which the Federal Government has indeed responded in a humane fashion.

A PLAN TO PROVIDE FUNDS FOR EMPLOYING STUDENTS IN SNOW-REMOVAL DUTIES

(Mr. ROSTENKOWSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROSTENKOWSKI. Mr. Speaker, I wish to congratulate the majority whip, the gentleman from Indiana (Mr. BRADEMAS), on his statement.

I had lunch yesterday with the Secretary of Labor, and we had an interesting discussion. It seems to me that in our Midwestern cities we have an unusual situation with regard to snow removal. Arterial streets can easily be cleaned after a heavy snow, because we have good snow-removal equipment and because we have established snow routes. The real problems occur on the side streets of the inner cities, when there is an excess amount of snow. It obviously becomes very difficult for snow-removal equipment to enter these streets particularly when you consider the many cars that have become stranded.

I think it would be a wise idea for the Committee on Education and Labor to consider legislation that would permit the Secretary of Labor, without the mayors declaring disaster areas, to allocate funds so that we could engage young students in their after-school hours to manually shovel the snow from these nonarterial streets to further facilitate snow removal procedures.

I know that in Chicago during the last week we have really had a problem in trying to move our snow-removal equipment into the side streets, but if we could engage these young students immediately after school to manually shovel the snow against the various curbs, I think we could get these thoroughfares opened up.

Mr. BRADEMAS. Mr. Speaker, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman from Indiana.

Mr. BRADEMAS. Mr. Speaker, I thank the gentleman from Illinois (Mr. ROSTENKOWSKI) for what he has said, and I want to commend him for this very imaginative suggestion. I would like to work with him with an eye toward developing some appropriate legislation that might make possible, in the event it is not possible to do it under existing legislative authority, the granting of authority to carry out the kind of program in such situations that the gentleman has suggested.

Mr. ROSTENKOWSKI. Mr. Speaker, I think it is true that mayors are always apprehensive about requesting that a disaster area be recognized by the President. I really think we could use this money productively if we could engage young people for this purpose and at the same time give them some needed exercise.

Mr. SHARP. Mr. Speaker, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman from Indiana.

Mr. SHARP. Mr. Speaker, I just want to join with my fellow Hoosiers in thanking the President for his humane work and his good acts.

I also wish to extend praise to the gentleman from Indiana (Mr. BRADEMAS) for his leadership in bringing our entire delegation together and getting this cooperation. This is certainly helpful to our people who have just faced this tragedy.

PRESIDENT'S TALK ON PANAMA CANAL; GREATEST "SNOW JOB" OF THEM ALL

(Mr. BAUMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BAUMAN. Mr. Speaker, many parts of the United States have indeed suffered from severe snowfalls in recent weeks, but the biggest "snow job" I have seen this entire winter was the speech last night the President made about the Panama Canal Treaties. No amount of removal equipment could possibly clean up the total distortions that were presented to the American people. I would not even attempt in 1 minute to answer these gross misrepresentations.

I am quite sure that the fellow who wrote the President's speech was not the same one who wrote his campaign speeches last year in which the President said, "You can believe me," and "Trust me."

The President says we do not own the canal. We not only own the Panama Canal, but we paid for it four different times, much of it with fee simple deeds for every square foot. We are told that the treaties are not going to cost any more money, but on the same day the President made that statement the Comptroller General was testifying before a Senate committee that not only will the treaties fail to finance the cost of the agreement but the United States will have to be doling out hundreds of millions of taxpayers' dollars to finance this deal for the rest of the century.

Mr. Speaker, somebody had better write the President's speeches with a lot less "snow" and a lot more truth.

PRESIDENT CARTER SHOULD DECLARE THE STATE OF OHIO A DISASTER AREA

(Mr. LATTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LATTA. Mr. Speaker, I have listened with a great deal of interest to the statements lauding the work that has been done by the Federal Government to help the States and local governments in the Midwest during this disastrous snow storm. Much has been done but more needs to be done. We are still waiting in Ohio for action downtown on a request by the Governor of Ohio for the President to declare the State of Ohio a disaster area so that all of the disaster programs of the Federal Government can become operative.

Now, once again, Mr. Speaker, I ask the President, as I asked on Monday, Why not a disaster area declaration for the State of Ohio now? Why the delay?

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 9370, PROVIDING FOR DEVELOPMENT OF AQUACULTURE IN UNITED STATES

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 95–863) on the resolution (H. Res. 998) providing for the consideration of the bill (H.R. 9370) to provide for the development of aquaculture in the United States, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PERMISSION FOR SUBCOMMITTEES OF COMMITTEE ON SCIENCE AND TECHNOLOGY TO SIT TODAY IN THE MORNING AND AFTERNOON DURING THE 5-MINUTE RULE

Mr. HARKIN. Mr. Speaker, I ask unanimous consent that the Subcommittees of the Committee on Science and Technology may have permission to sit this morning and afternoon, Thursday, February 2, 1978, during the 5-minute rule, for the purpose of receiving testimony on the DOE, NASA, and fire authorizations for fiscal year 1979.

The SPEAKER pro tempore (Mr. GIAIMO). Is there objection to the request of the gentleman from Iowa?

There was no objection.

PRESIDENT CARTER SHOULD INVOKE TAFT-HARTLEY ACT IN UNITED MINE WORKERS STRIKE

(Mr. DEVINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEVINE. Mr. Speaker, President Carter still is a bit timid about invoking the provisions of the Taft-Hartley Act.

The United Mine Workers, in the event they did come to some type of agreement, would still have to submit it for ratification, which would take 10 days. Assuming they did ratify it, another 10 days would be needed for the mines to start up again. Therefore, we are talking about at least a 20-day delay from now, if the strike were settled.

Mr. Speaker, the President, rather than exercising leadership, is exercising, as I said the other day, timidity. He must be afraid of what the United Mine Workers might do at the polls.

The emergency in Ohio has reached a point where, in my city of Columbus, they have to turn out all the freeway lights, the street lights, and the mayor complains about the increase in crime, because the Federal Government is afraid to avail itself of existing remedies.

Another paradox is the fact President Carter's so-called energy program predicts coal production will double by 1985. How in the world can this happen if the President looks away while the coal miners sit idle?

Mr. Speaker, now is the time to act.

DO-IT-YOURSELF DIPLOMACY STRIKES AGAIN

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, President Carter's first year began with the curious diplomatic practices of Andy Young, whose shoot-from-the-lip diplomacy soon established the Carter administration as one in which anything can happen and usually does.

Now, as the President begins his second year, the Young tradition has been carried on by the U.S. envoy in Peking, Leonard Woodcock. According to reports, Woodcock, in what is described as "off-the-cuff" comments, told reporters the United States would "find the necessary courage" to withdraw recognition from Taiwan and establish full diplomatic ties with Communist China.

What do we have here, Mr. Speaker? Is it an Andy Young special in which the words are not supposed to be taken seriously? Or is President Carter testing the diplomatic waters? Is Woodcock engaging in do-it-yourself diplomacy or is the President using Woodcock to get the message out?

Communist China at this moment is the world's number one violator of human rights and civil liberties. Taiwan is—compared to Communist China—a bastion of freedom. What is the President doing? Or, does he know what he is doing? That is the question we hear more and more, every day.

U.S. DEPARTMENT OF AGRICULTURE REORGANIZATION

(Mr. GRASSLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRASSLEY. Mr. Speaker, when he was campaigning for the Presidency, Jimmy Carter promised to manage more efficiently and to bring it closer to the people. One of the agencies rumored at the time as a possible target of reorganization was the U.S. Department of Agriculture.

Today, that rumor is a reality—or at least a possibilty—unless the Congress acts to head it off. President Carter has proposed reorganizing the Government's so-called natural resources and environmental functions into one agency to be known as the Department of Natural Resources and Environment. Included in this new department would be the U.S. Forest Service and Soil Conservation Service—both now under the Department of Agriculture—as well as the present Department of the Interior and National Oceanic and Atmospheric Administration from the Commerce Department and the Civil Works Activities of the Army Corps of Engineers and the Water Resources Council.

At the same time, the President has proposed formation of a new Department of Agriculture and Renewable Resources which would be made up of farm-related activities of USDA and would include the management of public and private nonurban lands and related renewable resources now under USDA, Interior, and other agencies.

Mr. Speaker, I am not opposed to reorganization when I am convinced there is merit in consolidating certain agencies or in realigning bureaus of like-activity into one office. But I am unalterably opposed to breaking up the functions of a working department of Government such as USDA and subordinating its objectives to those of a new superagency. This is one campaign promise I hope Mr. Carter will not pursue.

OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1977

Mr. MURPHY of New York. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 1614) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. MURPHY).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 1614, with Mr. NATCHER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Wednesday, February 1, 1978, title II was under consideration and pending was an amendment offered by the gentleman from New York (Mr. MURPHY) and a substitute amendment offered by the gentleman from Ohio (Mr. WHALEN).

The gentleman from Ohio (Mr. WHALEN) is now recognized for 5 minutes in support of his substitute amendment.

Mr. WHALEN. Mr. Chairman, this amendment would delete section 31, which would require U.S. documentation, registry, and employment of U.S. nationals for OCS facilities and vessels. Although section 31 purports to maximize U.S. employment and use of American equipment in OCS operations, it would accomplish neither of these legitimate goals but could invite retaliation by other countries against U.S. nationals working overseas and against a major export market for American products. Mr. Chairman, I advocate deletion of section 31 for three reasons:

First, section 31 would not increase the number of Americans working on the OCS or the amount of U.S.-produced equipment used in OCS development. There is no evidence that large numbers of aliens are or will be employed in coastal drilling operations. Rather, economics and logistics dictate that while operating off U.S. coasts, the vast majority of crew members will be Americans or legally admitted aliens with proper work visas. Likewise, a prohibition against foreign-flag vessels and drilling units on the OCS is unnecessary. America currently produces approximately 80 to 90 percent of the world's oil and gas production equipment, and, thus, the predominance of equipment and vessels used on OCS lands will undoubtedly be American. According to Offshore Rig Data Services of Houston, Tex., of the 141 drilling units currently on the American OCS, 124 were built in the United States, 4 were built in U.S.-owned yards overseas, and only 13 were constructed in foreign facilities.

Second, Mr. Chairman, section 31 would serve to protect a market that needs no protection at the cost of inviting retaliation by other countries. The embassies of Great Britain, Norway, and the European Communities have protested the provisions of section 31 and have noted that their governments are under considerable pressure from labor and industry to institute similar "buy and hire national" restrictions in the North Sea oilfields. The Department of Commerce reports that 1977 U.S. exports of oil field machinery amounted to $2.7 billion, while imports of such products were insignificant. These factors lead me to believe that protective restrictions such as those contained in the provisions of section 31 cannot be justified on the basis of the needs of American industry or American workers, and in fact could lead to retaliatory measures by other nations to the detriment of an important U.S. export market.

Third, section 31 is contrary to current U.S. multilateral efforts to liberalize trade through a variety of international organizations, including the multilateral trade negotiations (GATT), the Organization for Economic Cooperation and Development, and the International Energy Agency. In addition, the United States is actively engaged in bilateral talks with individual countries to open foreign markets to our exporters to a much greater degree than present. Adopting the restrictive measures of section 31 while these negotiations are taking place would seriously hamper our efforts and would be viewed by other countries as a shift by America toward increased protectionism. As Charles L. Schultze, Chairman of the President's Council on Economic Advisers, warned recently in the Council's annual report to the President, the world and U.S. economies could be seriously harmed by protectionism and the resultant slump in international trade.

Section 31 is unnecessary and counterproductive. It is opposed by the administration, including the Department of State and the Department of the Interior. A similar proposal was rejected by the House during consideration of the OCS bill in 1976, and no "preference America" language is contained in the OCS legislation that was passed by the Senate last year. I strongly believe that section 31 is not in the best interests of the United States and I urge you to support my amendment to delete it from H.R. 1614.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. WHALEN. I yield to the gentleman from New York.

Mr. CONABLE. I thank the gentleman for yielding.

I strongly support the position the gentleman is taking. It seems to me this is absolutely the worst time to try to enact a measure of this sort. The measure would be anticonsumer, and in my view it would be cutting off our nose to spite our face. We have a tremendous stake in the export trade, particularly of the type of high technology items we are here considering.

(Mr. CONABLE asked and was given permission to revise and extend his remarks.)

The CHAIRMAN. The time of the gentleman has expired.

At the request of Mr. ZEFERETTI, and by unanimous consent, Mr. WHALEN was allowed to proceed for 2 additional minutes.)

Mr. ZEFERETTI. Mr. Chairman, will the gentleman yield?

Mr. WHALEN. I yield to the gentleman from New York.

Mr. ZEFERETTI. I thank the gentleman for yielding.

I have before me some offshore mobile drilling construction orders for the years 1978 through 1979, and in them there are some 12 rigs under construction that are being built by Finland, by Spain, by the Netherlands, by Nova Scotia, by Scotland, by Singapore, and by Japan. I also have before me an assessment of the impact on the maritime industry, an assessment of offshore industry and a paragraph which I would like to bring to the gentleman's attention. In it it says that—

> One of the most apparent changes has occurred in the offshore oil and gas industry where once the United State was virtually alone in technological development, rig and platform fabrication and offshore production . . . of 171 rigs constructed prior to 1970, 71 percent were built by yards in the United States, 16 percent were built in other parts of the world. Since 1970, 272 rigs have been delivered or are on order, and of this number the U.S. will have produced only 34 percent, Europe 28 percent, and the rest of the world 38 percent. With the growth in North Sea activity, Europe has assumed a place of leadership in semisubmersible construction and concrete structures.

For that reason I have to oppose the gentleman's striking that section.

Mr. WHALEN. I think that the fundamental issue was discussed last night when the gentleman from New York's (Mr. MURPHY) amendment was introduced. That is the effect that protection legislation of this kind will have in the long run. If we adopt protective legislation, certainly we are going to see retaliation by our trading partners abroad. What is going to happen is that even while we enjoy this lead, we are not going to be able to take advantage of it economically because we will be frozen out of these other areas. So for this reason I again would stress that section 31 be deleted from the bill.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. MURPHY of New York, and by unanimous consent, Mr. WHALEN was allowed to proceed for 1 additional minute.)

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. WHALEN. I yield to the gentleman from New York.

Mr. MURPHY of New York. I thank the gentleman for yielding. The long-range trend of dumping in the United States by different foreign countries is probably highlighted by Japan and the auto industry. I think as of now there are over 1,200,000 cars coming into the U.S. market, and I think we have put about 1,100 cars into the Japanese market. That is the type of reciprocity that we are dealing with on an international basis.

I think the gentleman from New York (Mr. ZEFERETTI), just pointed out that same trend is now established in the construction on our own Continental Shelf.

Mr. WHALEN. If I may just respond to the gentleman's comments, he has of course broadened the scope of my discussion. It seems to me that the negotiations that are taking place right now in the fora to which I previously have referred hopefully will resolve some of these protectionist attitudes on the part of Japan and other countries. But if we become involved ourselves in those very same practices it is very evident we are not going to ameliorate the problem to which I have referred.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(On request of Mr. DUNCAN of Oregon, and by unanimous consent, Mr. WHALEN was allowed to proceed for 1 additional minute.)

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. WHALEN. I yield to the gentleman from Oregon.

Mr. DUNCAN of Oregon. Mr. Chairman, I commend the gentleman from Ohio for his remarks and I must say philosophically I am in complete agreement with what the gentleman from Ohio has said. Also I am in accordance with the American building of these rigs but I am not in a position to support the gentleman 100 percent. I must emphasize to the House that this Nation is a trading nation and the opportunity we have at the present time to recover from the very unfavorable balance of trade depends on our continuing to be a trading nation.

The gentleman from New York, the chairman of the committee, raised the question of unfair trade practices, dumping, and the gentleman in the well I think correctly distinguishes between that situation and the one we are faced with here today in the OCS bill. I agree that foreign trade must be a two-way street and I have supported the administration's move to stop the unfair trade and the dumping of Japanese products in this country. I think this House has likewise generally been supportive of the efforts to have fair free trade in the textile industry, but that is not what we are talking about here.

American rigs are all over the world and what we can expect from the passage of the legislative change the chairman is endorsing from his own bill is reciprocity that will drive our rigs from the drilling sites all around the world, to the great deprivation and ultimate deprivation of labor in this country.

I thank the gentleman for yielding.

Mr. WHALEN. I thank the gentleman for his comments.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. WHALEN. I yield to the gentleman from Wisconsin (Mr. STEIGER).

Mr. STEIGER. Mr. Chairman, I appreciate very much my colleague, the gentleman from Ohio, yielding.

I would have to say I hope that the House does not make a decision on an issue of this kind by trying to follow the logic of our friend, the gentleman from New York (Mr. MURPHY).

So far as I know there has never been an accusation made that these are dumped rigs that are competing with American rigs in the Outer Continental Shelf, nor is this an issue with the automobile industry.

And, yes, the Japanese have a track record which indicates that they are less than willing to allow American products to come into Japan as we allow the Japanese products to come in, but that is no reason to adopt section 31 with the Murphy of New York amendment. It is one thing just to send Bob Strauss to see Minister Uishiba or to see people in Britain and Malaysia or Hong Kong or Taiwan or anywhere else and it is another thing when the House of Representatives acts up and decides to accept this kind of clearly protective measure. We cannot have it both ways and we cannot argue that we ought to be trying to tear down the unfair barriers that exist abroad when we are enacting barriers in the United States.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

(On request of Mr. FRENZEL, and by unanimous consent, Mr. WHALEN was allowed to proceed for 2 additional minutes.)

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. WHALEN. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, I will say that is the reason the Whalen amendment ought to be adopted. Then we have a fair shot at attempting to try to deal on a negotiated basis in a multinational setting; but it clouds the issue and is exceedingly shortsighted to adopt what is recommended by the committee.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. WHALEN. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, I want to congratulate the gentleman for making the amendment that I wanted to make myself. The gentleman has articulated correctly, and forcefully, that America is a trading nation. The combination of our exports and imports amount to now something over 12 percent of our gross national product.

Our ability to provide for the general welfare of our people in the future will depend on our ability to compete internationally. We are no longer an isolated country. If we lock up our markets to foreigners, that will simply lock up their markets to us.

Certainly in this field, drilling, we have more to lose than in most areas because we get the lion's share of the drilling contracts abroad. It will be a dreadful mistake to do anything other than pass the amendment of the gentleman from Ohio.

Mr. WHALEN. Mr. Chairman, I think the gentleman from Minnesota has effectively defined the issue.

Mr. MILLER of California. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, it is with some difficulty that I speak in opposition to the amendment, because I think many of the things people have said about this country being a trading nation and about this country depending on its trading partners is true; but one of the things I think is very troubling is that we have seen while the United States has resisted protective actions, we have seen a steady encroachment on jobs of American citizens.

I represent an area, the San Francisco Bay area, which is directly involved in the production of offshore oil rigs and let me tell you that the west coast steel industry is deeply concerned about our accelerated leasing program and the demand for rigs continues. The fact is that the Japanese are building these with Government supported steel and we cannot compete. We know they have a superior product, because they just built one of the largest rigs in the world now drilling off of Santa Barbara in excess of 800 to 1,000 feet of water.

I share the concern of the gentleman from Louisiana that some of the residents of the gentleman's State and the residents of the State of Texas may be called back from duty overseas; but the steelworkers in the west coast would like to share in this bountiful bill. The boilermakers would like to go to work. The carpenters would like to go to work. They have a possibility of doing that, not in my district, but at Mare Island and over in Oakland to work on these rigs, to assemble and build them.

We see policies by Norway and Britain that the goods and services be purchased in their respective countries. I do not see anything inconsistent in having Mr. Strauss go and negotiate with these things in mind.

I just think this is a rational statement that when we develop America's resources that American citizens, American jobholders, have a right to participate. It still sticks in the craw of the American people that Alaska oil was brought through our pipelines built with Japanese steel.

I think we have a right when we develop our resources to say that all the cross segments of our society will participate in the development, participate in the construction, participate in the manning, knowing they are working under proper safety regulations. I think that is what this amendment really does. There are exceptions to the amendment offered by the gentleman from New York (Mr. MURPHY) to see that if the goods are not available, if a specific good is not manufactured here, you can go elsewhere; if it will cause a delay, you can go elsewhere. If they are in short supply, you can go elsewhere; but where we have the capability to make steel in California and we have the capability to assemble it in California and we have the technology to man these rigs, let me say that our first priority ought to be to carry out that policy.

I think it is very clear that in the tours of this committee overseas we have heard time and again that the only game in town is American technology and management; so I do not think the adoption of the Murphy amendment will cause the adverse effects that have been mentioned. If they do we can come back and examine this policy. If the trade negotiators or Mr. Strauss tell us we are ineffective, we can come back and reexamine it.

But, why should we not make a statement of this Congress as to the ability of the American people to participate in what is supposed to be the bounty of this country, in the development of these resources for the good of this country, so that they can go to work and have jobs?

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield.

Mr. DUNCAN of Oregon. I cannot totally disagree, and the gentleman enunciates, I think, a very popular viewpoint that will have a great deal of appeal to the people of the country, including the working people. But, I would ask the gentleman to take a look at what

happened to American intercoastal shipping under the Jones Act, intended to protect American shipping and American seamen's jobs. The experience of this country and virtually every other country in the world that has experimented with sabotage laws of this sort, which are intended to protect and furnish jobs, has inevitably been one of failure.

I have personally tried to find intercoastal shipping on which to ship large cargoes from one coast to the other. It is just impossible. Intercoastal shipping, which has been protected by the Jones Act for years, just does not exist.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent Mr. MILLER of California was allowed to proceed for 2 additional minutes.)

Mr. MILLER of California. I am not an authority on the Jones Act, but I suspect that my chairman may very well be. If you had trouble with the Jones Act, let me tell the gentleman what happened in my district. Five hundred yards down the road from the existing Antioch Bridge, there is the American Bridge Co. They bid on a new highway bridge and lost the bid to Japanese steel. It was constructed and assembled in Japan; it was taken apart and shipped to Antioch, and is being assembled; and jobs were lost at American Bridge.

We have sat around, we have seen these things. We have asked them to please not do it, but we have not taken firm and tough actions to protect these jobs.

Mr. DUNCAN of Oregon. I agree with the gentleman on that problem he had with his bridge, and I think that situation prevails as a result of unfair trade dumping of Japanese steel. Our Government has moved to correct that. We may have to take even stronger action, but I suggest that that is a really different proposition than the one we are facing here today.

Mr. MILLER of California. I would respectfully disagree with the gentleman.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the chairman.

Mr. MURPHY of New York. On the question of the Jones Act, I frankly do not see its relevance in this debate. The Jones Act was one of the first laws passed by the original Congress for one specific purpose, which was to insure that there was a shipbuilding industrial base, as well as an American-flag merchant marine. Since the passage of that act we have seen development of the inland waterways of America; the railways of America; the land-bridge concept. We have seen a vast change in the Interstate Highway System and various competitive modes of transportation.

What the Jones Act does today—and it is just as viable as it ever was—is to insure that our intercoastal trade is done in American-flag ships, and done by ships built in America.

The CHAIRMAN. The time of the gentleman from California has again expired.

(On request of Mr. MURPHY of New York and by unanimous consent Mr. MILLER of California was allowed to proceed for 2 additional minutes.)

Mr. MURPHY of New York. The fact that we have a dynamic transportation industry, and the fact that cargoes do not move from New York to Miami by ship, but perhaps move by rail or by truck or some combination of modes, is not an indictment of the integrity and the intent of the Jones Act. The Jones Act is imperative to America's security as well as its shipbuilding and industrial bases.

What I think we are faced with here is a misunderstanding in the Congress as to the various—let us call it special interest areas. We have basically the opponents of build and buy American being agricultural interests. For some years, we have come, in this country, to the point where a vast amount of our overseas trade involves our agricultural products, and we are trying to offset with this amendment because of an in balance due to manufactured imports.

I frankly do not see the relevance of Smoot-Hawley in this argument today. The history of that act was that it was passed in 1930. There were amendments made in subsequent Congresses in which the President was given power to engage in reciprocal trade agreements to reduce tariffs on certain products and by 1939 America's trade balance was right back to the balance that it was at pre Smoot-Hawley. That act, I do not think, is relevant to this debate. It was a tariff act.

What we are doing here is plainly and simply stating that there is foreign competition; that we have seen other countries enact very specific and strict special preferences on constructing or manning and using, not only in their oil and gas industry, but also in their other industries.

What we are doing here is saying, "Let the U.S. industry build the equipment to be used on the U.S. Outer Continental Shelf. Let the Americans have the jobs in the construction on those platforms."

The CHAIRMAN. The time of the gentleman from New York (Mr. MURPHY) has expired.

(By unanimous consent, Mr. MURPHY was allowed to proceed for 1 additional minute.)

Mr. MURPHY of New York. Let the American men and women have the jobs that are vital on the Outer Continental Shelf.

In the amendment that we are trying to strike here, we have the safety valve that if items are scarce, we will go foreign for them. If there is a lack of competition, we can still go foreign. If there is a technology we do not have, we can still buy foreign. If some contingency in those areas develop, the safety valve is there. But let us not prejudice America's industry and America's working men and women.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we are not moving in a good direction if we fail to support the Whalen amendment. That is the right step for this House to take. We know where the protectionist road leads—we tried this before, as was said yesterday—right down the path to the Smoot-Hawley tariffs and all of the problems and dislocations of international trade that we experienced before.

Mr. Chairman, I will not take the time of this House because I think everybody has given their views, but I hope that we will seriously consider that we live in an interdependent world and we must compete successfully in world trade. America can do it if we determine to do it, and this Whalen amendment leads us in that direction.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have listened to this debate. It has been very interesting. It seems to me that the debate poses about three questions. To the opponents of the Whalen amendment, I would ask, cannot this administration deal with dumping under existing law; and, cannot this administration successfully negotiate in the negotiations that are being carried on and accomplish fair and free trade worldwide with all nations? If you answer those questions "yes," which I assume you would have to do, then it seems to me that the final question is, do you insist that our industry have a preference that we do not agree other nations should have?

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I yield to the gentleman from New York.

Mr. MURPHY of New York. I frankly do not see the relevancy of whether we are talking about this administration or other administrations. We had this same debate in the last Congress under a different administration. We heard the same arguments. I think they are relatively philosophical. The gentleman comes from a State which has been severely impacted by foreign imports, and the jobs of the men and women in his State are at stake. What we are discussing here is the philosophical question: Does the U.S. Congress move to protect America's industrial base, America's products, and America's jobs?

This administration is moving properly in the tariff areas. What we are doing here is to try to write rational regulations to protect America's manufacturers.

Mr. BROWN of Michigan. Mr. Chairman, I would suggest that the gentleman is rather myopic in his view of international trade. He is saying that if we take measures of this nature for the specific industry he wishes to protect that there will not be retaliation or if there is, the retaliation will be against someone else's constituent industries and, therefore, since the retaliation is against someone else, that is all right, just do not affect my industry.

I think that is about as myopic as one can be, and I think the gentleman's amendment is myopic.

I support the Whalen amendment.

Mr. SIMON. Mr. Chairman, I move to strike the requisite number of words.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, I may be myopic, but that myopia is probably heightened by the fact that I happened to look at the deficit passed on to this administration by the last administration, and those billions of dollars in deficit happen to be because of the imbalance in our trade and the advantage of our so-called trading partners and the advantage they have taken of the United States, and this is an effort to deliver a message in one particular industry as to how we can correct it and protect the United States.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield briefly.

Mr. BROWN of Michigan. Mr. Chairman, I trust the gentleman understands that approximately six reassessments have been made by this administration with respect to dumping, and I know of two during the previous administration and within the last few years.

Mr. MURPHY of New York. Mr. Chairman, if the gentleman will yield, this is a tool we can give Mr. Strauss to use in his visits to Japan in trying to correct the dumping problem. This would give Mr. Strauss a strong bargaining hand in those negotiations.

Mr. SIMON. Mr. Chairman, I rise in support of the Whalen amendment.

I do so, recognizing that my colleagues from the States of California and New York are dealing with a fundamental problem, but I do not think this is the way to deal with that fundamental problem.

Smoot-Hawley is relevant, in that in 1930 we also had a very serious problem of unemployment, and so Smoot-Hawley came along. The thinking was, of course, that we would protect American jobs in the process, but what we did was to hurt the employment opportunities in this Nation.

Let us just take a look at my own State, for example. Caterpillar, one of the major exporters in the United States, uses about 90 percent American steel. As these trade barriers rise, Caterpillar will be able to buy less and less American steel.

International Harvester and John Deere, manufacturers of major proportions in my State, face the same kind of situation.

I am concerned about the rising tide of protectionism that I sense here on the floor of Congress and out among the people of the Nation. I think a second factor has to be considered here, and that is this: Is the administration under the leadership of Bob Strauss doing an effective job?

My response is that from what I can see, he is doing a very effective job, and I do not think this strengthens his hand; this weakens his hand. I would prefer to leave this kind of thing in the hands of our negotiators.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I appreciate what the gentleman is saying. I think one of the things that should be set straight is the fact as to America's ability to compete.

For one thing, in 1976 only $23 billion of our exports were in agricultural products; we exported $105 billion worth of goods. We have a trade deficit, to be sure, at this point, but if we were not importing oil, we would have a $15 billion trade surplus.

So in terms of our ability to compete abroad, our ability to compete specifically in this field is well known, and our ability to compete abroad generally with respect to industrialized goods is also demonstrable by the statistics themselves.

Mr. SIMON. Mr. Chairman, if I may ask my colleague, the gentleman from New York (Mr. CONABLE) to remain at the microphone, I believe I am correct in this—the gentleman is on the Committee on Ways and Means and can verify this—in the last decade the number of American jobs dependent on exports has doubled; is that correct?

Mr. CONABLE. That is correct. Exports now account for about 8 percent of our gross national product. Ten years ago they accounted for a little less than 4 percent.

Mr. FORSYTHE. Mr. Chairman, I move to strike the requisite number of words.

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from Louisiana.

Mr. BREAUX. Mr. Chairman, I thank the gentleman for yielding.

I would just like to try and put this issue in perspective. I think it is very important for the Members to understand we are not talking about television sets and we are not talking about Hondas and Toyotas being imported into this country. We are talking about putting up a screen around ourselves, and it can only hurt.

About 90 percent of all the oil and gas equipment being used around the entire world is already American-made. Most of the men and women who are working in the offshore oil and gas industry are already Americans, not only off our own coast but all over the world.

Who do we think is the most populous Nation working in the North Sea? It is us. We have hundreds of thousands of men and women who are working, not only in our coastal areas already, but in the North Sea, off the coast of Indonesia, and off the coast of South America. We are already at every possible advantage in working world-wide in the oil and gas industry.

The only thing we are going to accomplish by passing this amendment is this: We would say to the members of Parliament in Great Britain and the members of other legislative bodies that "By golly, we are the only ones who can have the jobs," and then they will say that if Americans can say only Americans can work on those installations, then they are going to pass the same type of legislation. Then it would only be British citizens who would be working in the North Sea, and it would be only Norwegians who would be working in the Norwegian area of the North Sea.

Then they are going to retaliate and say they will have to have all Norwegian equipment used in the North Sea.

We are already way ahead in this area, and I say that by adopting this kind of legislation we are going to end up hurting ourselves. Right now we are way ahead, and we should not be taking this sort of step. I strongly support the amendment offered by the gentleman from Ohio (Mr. WHALEN).

I think it is a step in the right direction. I would be supportive of it if I thought it would help, but this is one area in which we do not need any help.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman for yielding.

I would like to endorse the statements made by the gentleman from Louisiana (Mr. BREAUX).

Mr. Chairman, I have a substantial offshore rig building industry in my district; and I know that at this time most of what they produce is going overseas. I think that industry in my particular district would be very adversely affected should the Whalen amendment not pass.

Mr. Chairman, I think that if we are concerned about what might happen in the future we should take another look at this matter later. But let's not put something in this bill that might have an adverse effect.

Therefore, Mr. Chairman, I urge the adoption of the Whalen amendment.

Mr. ZEFERETTI. Mr. Chairman, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from New York.

Mr. ZEFERETTI. Mr. Chairman, I thank the gentleman from New Jersey (Mr. FORSYTHE) for yielding.

In answer to the gentleman from Louisiana (Mr. BREAUX), we are not talking about televisions and appliances; but perhaps we should be talking about the loss of another industry which will be the steel industry if we do not take some cognizance of the fact that we need that kind of industry in this country.

Mr. Chairman, the people laid off throughout the country, who work in the steel industry, should be alerted to the fact that if we do stop building rigs here, the same thing could apply to that industry as happened to the shoe industry, the TV industry, and the like. I do draw an analogy, in considering this type of amendment, to the loss of those types of industries.

Mr. Chairman, I rise at this time to add my enthusiastic support to the amendment offered by my colleague from New York.

At the present time, there are no restrictions on the national origin of the equipment used on the Outer Continental Shelf and foreign-made rigs are free to operate—costing valuable jobs for American workers.

After spending the past few weeks in our home districts, most of us know that two of the biggest problems on the

minds of the American people are jobs and the economy. This amendment is directed at helping to alleviate both of those concerns: It would not only generate jobs for shoreside workers and assist U.S. maritime workers in gaining employment, but the work and payrolls generated by this activity would, no doubt, result in a "ripple effect" that would spur the entire American economy.

Many of us take it for granted that the United States almost totally dominates the offshore rig construction market. However, figures indicate that we are rapidly losing a large share of that market to foreign competitors. We need only look at the massive layoffs that have taken place in recent years in the rig construction industry, as well as the worsening condition of the steel industry and other related areas, to understand the inaccuracy of that notion.

Just 5 years ago the United States enjoyed nearly a 60-percent share of the offshore rig construction market. That figure has plummeted to merely a 29-percent share of world rig orders. The reason for this dramatic drop is clear: Foreign governments are providing massive subsidies to their national companies enabling them to "dump" their rigs and platforms on drilling companies at below cost prices.

What we are dealing with here is the future of a potential billion-dollar industry employing over 8,000 workers—one-fifth of these workers are minority group members. In addition, thousands of other jobs in supportive industries, many located in the inner city, are also at stake.

One of the major arguments used by opponents of Mr. MURPHY's amendment is that such a "build American" provision would lead to "retaliatory" tactics by foreign governments. In fact, this provision, which would be phased in over a period of time so as not to affect the operations of equipment already in operation off our coasts, is quite similar to laws already in effect around the globe. In the North Sea, for example, both Norway and Great Britain have such "build national" provisions for their offshore equipment.

While foreign nontariff barriers are carried out by Government edict or policy, the United States can only respond by passing a law. The U.S. trade system does not allow for unwritten policies or Government pressures to accomplish goals such as building offshore equipment in the United States.

As an example of the problem, at the multilateral trade talks, the United States has listed some 600 nontariff barriers in Europe. These devices effectively protect Europe's markets, particularly for agriculture goods.

Beyond these barriers, the governments of Europe also effectively pressure their industries to help each other. For example, British Government pressure is expected to be applied to the oil companies in the North Sea to build a large firefighting ship in British yards.

The United States does not have the same type of system and thus to accomplish the same result we must pass this "domestic preference" legislation.

Those who argue that the provision violates free trade ignore the European system of government pressure and policy that cannot be duplicated by our form of government. To say no such system exists abroad is to ignore foreign nontariff barriers which are more effective than any tariff or quota system.

We must also keep in mind the environmental impact of the "build American" amendment. At the present time, the rigs and platforms operating off our coasts represent a dangerous threat to our waters and marine life. The Murphy amendment would ease this environmental threat by compelling U.S.-built rigs and platforms to meet rigorous U.S. Coast Guard safety standards, greatly reducing the risk of leakage and blowouts.

For these reasons, I implore my colleagues to consider all of the factors involved in this complex issue. Opponents claim that the amendment smacks of protectionism. I say that the overall purpose of the Outer Continental Shelf legislation before us is to more fully exploit our own natural resources in the OCS. We should be certain that we maximize these benefits to our own economy rather than the economies of foreign governments. Therefore, I will vote in favor of the amendment and I ask my colleagues to do the same.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. WHALEN) as a substitute for the amendment offered by the gentleman from New York City (Mr. MURPHY).

The question was taken; and on a division (demanded by Mr. FRENZEL) there were—ayes 22, noes 21.

RECORDED VOTE

Mr. MURPHY of New York. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 118, noes 280, not voting 34, as follows:

[Roll No. 30]

Dent	Richmond	
Ford, Mich.	Risenhoover	

Messrs. FITHIAN, HORTON, ST GERMAIN, MOLLOHAN, UDALL, ABDNOR, NEAL, and MARLENEE changed their vote from "aye" to "no."

Messrs. YATES, EDWARDS of California, MEEDS, and HYDE changed their vote from "no" to "aye."

So the amendment offered as a substitute for the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. GIBBONS. Mr. Chairman, I rise in opposition to the amendment of the gentleman from New York (Mr. MURPHY).

Mr. Chairman, I am going to oppose the Murphy amendment. Now that we have had our emotional binge and we have gotten it out of our systems, let us talk about the real world for a while. Let us talk about what the facts are on this planet where we all live.

As you came through the door, most of you made up your minds on "Buy American" and, sure, that sounds patriotic. That is like motherhood and goodness and graciousness and everything else and I cannot oppose that.

Nobody can oppose that kind of appeal to emotionalism, but let us talk about reality; where we are today and what this actually means for America, for every American, not just a few Americans.

The facts are that we live in a world that is organized under treaties, and one of the treaties, one of the important treaties is the GATT treaty. If we erect this kind of barrier that Mr. MURPHY now wants to erect and will erect by his amendment, then every other nation in the world that is a party to that treaty can retaliate against America, against American jobs, and they are not stupid; they are not altruistic. They will, and it will cost your constituents jobs because they will zero in on those jobs.

Now, that is what Mr. MURPHY's amendment means, and that is what we are about to vote on, to give a license to all those people on the other side of the shore to come in here and singleshot against jobs that are now in existence in our society. They may be jobs on a farm; they may be jobs in a factory; they may be in an aerospace factory; they may be jobs in any kind of factory in this country.

If we adopt the Murphy amendment, that is what we are doing. As I say, we have had our binge, our emotionalism, our coming through the door and just voting because somebody said to us a code word such as "buy American." Now, we have got to deal with the real facts, as to what they are.

The other day when the man who I think probably knows more about what he is talking about than anybody else in the steel industry talked to the Ways and Means Committee—I am talking about the president of United States Steel now, a fellow whose company has got more at stake in all this—he did not ask for anything like this. He said that the American laws we now have on the books are sufficient to meet the problem. All he wanted was honest, fair enforcement of those laws, and he is entitled to that. He did not advocate anything like this, and his company has been impacted by trade.

Nobody who understands the international trade situation believes that this is a sound and reasonable and rational amendment. It could be disastrous for us.

Mr. VANIK. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield.

Mr. VANIK. Mr. Chairman, I want to compliment the gentleman in the well on his statement, I agree with his position on this issue. The Department of Commerce projects a $3.1 billion export business in drilling equipment. This is a big business in this country. It involves American jobs in the making of the steel, the fabrication of it, the development of the technological tools that have become uniquely an American achievement.

We have so much more to lose in a restraint on these tremendous export sales. I certainly hope that the members of this committee will not let this happen. We cannot let this amendment prevent the tremendous export business in this very important segment of the American economy.

Mr. GIBBONS. Well, Mr. Chairman, I repeat that I am in favor of the building up of American industry. I think we ought to build it up. There are proper ways in which to do it. I want to follow all those proper ways.

We are trying to do that through the international negotiations we are carrying on now, but what Mr. MURPHY has proposed here now, and what he is asking us to approve here now, is a reckless and dangerous way of destroying our system which we have for a long time built up in this country. It could take away good jobs in good paying industries, on good farms, and in good manufacturing industry, and destroy all of that. If Members vote down the Murphy amendment as it is now proposed, they will still have the American manning of these platforms, and the American manning of these jobs.

We will still have the Coast Guard licensing, and all of that. We will have those safety regulations. But we will not cut off America from participating with the rest of the nations. Any time we have done that, it has led to economic disaster. We will be preserving better jobs for America if we defeat the Murphy amendment.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. The gentleman was very active on the Committee on Ways and Means in 1974, when we passed the 1974–75 Trade Act. He and I had a debate at that time. I asked him whether or not the legislation at that time was sufficient in the nontariff barrier area, and the gentleman suggested it was sufficient.

I informally informed the gentleman of the GAO report, which, on the very point, stated that the nontariff barrier legislation did not exist.

Mr. GIBBONS. Will the gentleman allow me to answer the question? I will be glad to answer the question.

Mr. GAYDOS. The GAO very plainly, clearly, and specifically points out that the legislation was remis in not properly identifying nontariff barriers.

I want to close by asking the gentleman this question: How long do we have to stand for a $30-billion trade deficit?

We have been practicing restraint as the gentleman preaches for the last 10 years, and have suffered for doing so.

The CHAIRMAN. The time of the gentleman from Florida (Mr. GIBBONS) has expired.

(By unanimous consent, Mr. GIBBONS was allowed to proceed for 2 additional minutes.)

Mr. GIBBONS. Mr. Chairman, we cannot legislate some other foreign country's nontariff barriers away. You have to negotiate them away. We are in the process of doing that. We are meeting in Geneva right now, negotiating with all of the other nations. It cannot do us any good to change our laws unless other nations change their laws, because we cannot control what goes on inside their country. We are negotiating those tariff barriers away. Obviously, the GAO report was wrong, and the gentleman just did not understand what nontariff barriers were. That is one of the problems. The reason for our big trade deficit, if it were not for the fact that we have to import $45 billion worth of oil a year, we would have a tremendous surplus of other trade. In fact, we do have a tremendous surplus of other trade when you take out of the calculation the rapid and artificial increase in oil prices.

Mr. GAYDOS. Mr. Chairman, would the gentleman yield further?

Mr. GIBBONS. I will be glad to answer any more of the gentleman's questions.

Mr. GAYDOS. How can the gentleman justify the differential between the trade balance of Japan and this country? Everybody knows that the increase in oil import prices is a factor. But nobody is addressing themselves to the real point, and the point of the matter is that we are selling our products overseas at additional prices. It is balancing out. The oil differential has nothing to do with balance of trade.

Mr. GIBBONS. Mr. Chairman, I do not know of any other person in the United States who agrees with the gentleman on that question.

The CHAIRMAN. The time of the gentleman from Florida (Mr. GIBBONS) has again expired.

(On request of Mr. BROWN of Michigan and by unanimous consent, Mr. GIBBONS was allowed to proceed for 1 additional minute.)

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. I thank the gentleman for yielding.

Mr. Chairman, I first of all wish to commend the gentleman for his remarks, and I also wish to commend the gentleman from Ohio (Mr. VANIK) for his remarks. What we probably ought to do, if we want to improve our trade balance, is have a "buy America oil amendment." Then we would be in great shape.

Mr. GIBBONS. There would be about as many problems with that as there are with this.

Mr. BROWN of Michigan. When the bill comes up, we ought to have a "buy America oil amendments," and then we can meet the problems of those who say we should have a balance of trade.

Mr. GAYDOS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment offered by the gentleman from New York (Mr. MURPHY).

Mr. Chairman, I would like to point out to our colleagues that the genesis of the trade problem we are discussing is not a difficult matter. Everybody tries to make it very, very difficult. Sometimes I wonder who is representing who in this House.

When we start raising questions, it is assumed that it is only this country that is going to be responsible for a trade war and it is only going to be this country that will set a policy which will result in some kind of retaliatory reactions worldwide. Nobody points a finger at any other country. Be it England, France, Italy, or Japan, nobody points an accusing finger at those people and asks the question: What are they doing internationally, for instance, to keep the International Monetary Fund stable and make sure that free trade and fair trade exists? It always comes back to this country, the biggest market in the world and the country with the biggest trade deficit.

Let me make what I think are proper observations. I know they are factual, and they are substantiated by the General Accounting Office report.

No. 1, this report, which was asked for and issued after the 1975 Trade Act, says specifically and unqualifiedly that the act of 1974 and 1975 did not sufficiently identify what we call nontrade barriers.

Some may ask the question: What is a nontrade barrier? Where does it fit in this picture?

A nontrade barrier results from practices of many, many different colors and kinds throughout the whole world which for all intents and purposes set up a series of trade barriers against the free flow of trade.

Under the 1974 act, the GATT amendment of 1962, all that it said, sans all the fancy language, was that there be a general agreement among countries, that said, "Look, we are going to try and envision a free trade environment." That is how simple it is. It said that we are going to have a set of tariffs on certain items and everybody is going to follow them. That was to be the end of it. That is what the General Agreement on Tariffs and Trade was; that is the GATT arrangement. It is nothing more complicated than that.

What we did in 1974 and 1975 was this: We passed a new act, and the new act of 1974 and 1975 actually prolonged it and made some enlargements, and in that particular act we made some changes. But in short, we failed to identify what we call these nontariff barriers.

What are they? They take many, many different forms. We call one an equalization tax, we call another a border tax.

For instance, when a product leaves France in the Common Market and travels across Luxembourg into West Germany, they will put a tax on it. That is called a border tax, and that border tax is not in the trade agreement internationally; that is a local tax. That is what they call a nontariff barrier. That results in a higher price for that product. It then cannot be sold in competition by the manufacturers in West Germany. That is what we are talking about.

It takes the form of an equalization tax in instances where we send some machinery from Westinghouse over to Italy, for instance. The Italian Government will put on that machinery—say it is a generator or a water wheel or paddle wheel generator—what they call an equalization tax. The increase in the cost of that generator would be on a par with what the generator would cost in Rome.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, I want to commend the gentleman on his keen analysis of the problem.

In last night's debate I pointed out that in Norway not only do they require building, buying, and manning, but they require that any company doing business must move its whole staff and management to Norway.

We know from the General Accounting Office study that the gentleman just referred to that Great Britain has substantially the same practices.

But in this amendment we have provided exceptions that are clearly defined to take care of the problems that were pointed out by our colleague, the gentleman from Florida (Mr. GIBBONS).

For instance, if compliance will unreasonably delay completion of any vessel or structure beyond its contracted delivery date, then this is not in effect. If the requirements will result in costs that are unreasonable, then it is not in effect. If the articles, materials, or supplies of the class or kind to be used in the building or rebuilding are not produced or manufactured in the United States in sufficient and usually available commercial quantities and of a satisfactory quality, then this would not be in effect.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. GAYDOS) has expired.

(On request of Mr. MURPHY of New York and by unanimous consent, Mr. GAYDOS was allowed to proceed for 1 additional minute.)

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield further?

Mr. GAYDOS. I yield to the gentleman from New York.

Mr. MURPHY of New York. So, Mr. Chairman, we have those exceptions very clearly set down.

As far as the export business of oil field technology is concerned, we know that the United States is the leader in that field. However, with respect to where the 5,000 tons of steel which go into every offshore platform come from, that steel is not going to come from the United States. That comes from other areas; but where we have drill bits and other specialized equipment, the U.S. manufacturers, because of our technological lead and because of the continued rate of advance of that lead and because of the competitiveness of the United States, will have that export business.

Mr. GAYDOS. Mr. Chairman, if the gentleman will yield further, is it not true that what the gentleman suggests in his amendment is no different, no more and no less than what every other country in this world of ours is practicing today?

Mr. MURPHY of New York. It is much less.

Mr. GAYDOS. Mr. Chairman, I urge support for the amendment.

Mr. POAGE. Mr. Chairman, I move to strike the last five words.

Mr. Chairman, I had not anticipated taking part in this discussion. I do not live on the coast. It is not a matter on which I am any expert, but, I am old enough to remember the story of the dog that had secured a choice bone which he was carrying with him over a log on a creek. He looked down and saw a reflection in the water of a dog with a bone in his mouth, so he dropped the bone he had and jumped into the creek to try to capture the bone the supposed other dog had.

Mr. Chairman, it seems to me that we in the United States are in very much that same situation. We have the overwhelming market for drilling equipment. We make the major part of it, for all the world. I believe the gentleman from New York said that there was quite a large percentage of it produced abroad, but we make something like four-fifths of it. We have the overwhelming majority of the market.

Mr. Chairman, we have the bone in our mouth now, so to speak. Yet, we suffer from the illusion that we can take something away from somebody else.

Mr. Chairman, are we going to drop what we have and invite competition that does not exist today? Are we going to invite retaliation in all of the areas of the world where they may be needing drilling equipment?

It seems to me that we would be most shortsighted to do that sort of thing. Every one of us, as the gentleman from Florida has so eloquently stated, wants to buy American. We want to develop our own country. We want to provide jobs for Americans. We are providing them now; we are providing four times as many jobs as the rest of the world is providing.

Again, Mr. Chairman, are we going to jeopardize the fine situation that we now enjoy in the production of drilling equipment on the chance of trying to keep somebody else from developing their resources?

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Texas.

Mr. ECKHARDT. Mr. Chairman, I thank the gentleman for yielding.

I wish to compliment the gentleman in the well, the gentleman from Texas (Mr. POAGE), for his excellent statement and analogy.

I recall an article in the Washington Post—I think it was last Sunday—describing my area of Houston as developing a great amount of the equipment used all over the world.

Mr. Chairman, I think we are the dog with the bone, and we had better not drop that bone to get something else.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, what the gentleman from Texas (Mr. POAGE) has said was true in the past; but as we pointed out in last night's debate, with respect to current orders for platforms on the U.S. Continental Shelf, only 29 percent of them are being built in the United States. Therefore, what we are dealing with is this trend and the fact that the foreign countries have already enacted these restrictive practices far more than this amendment would require.

Mr. Chairman, we are protecting the Houston-based industry and its technology, with the exceptions that clearly say that if there is a quality product some place else, the waivers are there. Nonetheless, we do say, Let us protect American jobs and American industry.

Mr. POAGE. Mr. Chairman, if, in fact, there is a smaller percentage being used on the Atlantic seaboard, I would point out that there has never been but three or four wells drilled there, whereas there have been hundreds and hundreds of wells drilled off the coast of Louisiana and off the coast of Texas. Furthermore, they have been drilled, almost 100 percent, with American equipment.

If we are going to develop the OCS and actually go to drilling, we are going to be using American equipment because these are our Texas and Louisiana people who are drilling the offshore wells, and they have been, are, and will continue to be drilling with American equipment.

I do not know what they are drilling with off Long Island. I never have heard about the drilling there, so they may very well have 100 percent foreign drilling equipment because they do not have any percentage of wells or equipment to begin with.

Mr. ZEFERETTI. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I will not take the 5 minutes.

However, let me say that just 5 years ago we enjoyed some 60 percent of the construction market. I imagine this figure has been cited over and over again. But presently we now enjoy some 29 percent of the world's market.

Mr. Chairman, we are talking about a $1 billion industry, and we are talking about retaliation by foreign governments.

I think retaliation by foreign governments has already started long before the amendment to this legislation was ever thought of by virtue of foreign governments dumping their rigs and platforms on our Outer Continental Shelves at below cost prices. I think it is incumbent on us to talk about some 8,000 jobs that can be realized and the ripple effect of those 8,000 jobs to the economy of our country.

Further, Mr. Chairman, I believe that we have reached a point in this debate when we should take a vote because I think all of the arguments have been made. If we are patriotic in our "buy American" attitudes, then it is about time that we accomplish that.

Mr. EVANS of Colorado. Mr. Chairman, if the gentleman will yield, I think we are about ready to vote on this, but I would like to make one comment that I think will be agreed to by all of my colleagues and that is that I do not think there is a person here who approves of these restrictive trade policies that other nations have invoked against us. There is not a person here who agrees with them. In view of that, for Heaven's sake, let us not compete with them by retaliating ourselves. Let us use the law we have at the bargaining table rather than legislating this issue to a point from which we cannot retreat.

Mr. ZEFERETTI. Mr. Chairman, I do not think we are retaliating, I think we are just asking for a fair share of the market.

Mr. CONABLE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to express my appreciation for the point that was raised by the gentleman from Colorado (Mr. EVANS). It seems to me that this is a particularly bad time for us to be establishing this type of nontariff barrier—that is what we are doing if we adopt these particularly restrictive "buy American" amendments—with regard to this important part of our market and economy.

We have had a difficult time with trade over the last couple of years. The 1974 Trade Reform Act was designed to try to get the trading patterns in the world back under control again. There is not any doubt there has been a rise of protectionism throughout the world and it is equally clear that we have seen a rise of protectionism in this country as a result of the feeling that we somehow or other have lost control over our international economic destiny.

The purpose of the international trade negotiations, the so-called MTN in Geneva, which came about after authorization to the President to continue to negotiate the position of this country in the international economic situation so as to try to get that international economic trade situation back under control again, has not been notoriously successful. For the first year of those negotiations we had, as everyone knows, a pending election. The Ford administration did the best it could but, of course, the Congress had the ultimate control and we just simply waited to see what kind of a trade mandate our head negotiator could get from the election.

Since the new administration has come in, there has been some delay but finally the appointment of a very strong and fine negotiator in the person of Bob Strauss. I hope that he is going to be successful in getting those trade negotiations underway. He needs our help, not undercutting with buy-American amendments. Unless we see these trade negotiations move, there will be a further deterioration of the world trade scene. If we see that deterioration we can be sure that nations no longer will be helping each other in digging out of their economic difficulties and we will break down into trading blocks and economic units that will be somewhat similar to the situation we had after the Smoot-Hawley tariff bill was adopted back in the early thirties that prolonged the depression far beyond anything that was necessary.

Quite frankly, if we enact legislation of this sort, we deprive the United States of the kind of leadership it needs if it is going to get the trade situation back under control, get more sense of movement, get some sort of perception again that we are capable of controlling our own destinies through understanding and through cooperation rather than through a pattern of attempted isolation.

It is a bad time to be doing this, it is a bad thing to be doing, and it is a particularly bad area in which to be doing it because quite frankly this is an area where we can compete effectively. I would be the first to acknowledge that we have competitive problems in some of our economic areas, but in a highly technological and highly skilled field of this sort the United States is preeminent.

It may be that the trend is against us, as the gentleman from New York (Mr. MURPHY) says, but our Government statistics do not prove that.

Quite frankly, as my friend, the gentleman from Texas (Mr. POAGE), says, we have the lion's share, and we should not risk it by trying to go for an unfair competitive advantage relative to the particular part of the oil scene that is so close to America's shores that we have already a built-in staggering advantage.

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Florida.

Mr. GIBBONS. Mr. Chairman, I think the gentleman has put his finger on a good point. The President has sent out Bob Strauss to negotiate these matters. We are negotiating very actively in this field. If we vote for the Murphy of New York amendment we pull the rug out from under Mr. Strauss.

President Carter is opposed to the Murphy amendment. The Secretary of the Interior Mr. Andrus is opposed to the Murphy amendment. The Secretary of State is opposed to the Murphy amendment. We have heard from the American steel industry. None of them espouse the Murphy amendment. Frankly, I do not

know where the support comes from except that it is an emotional appeal.

Mr. STANTON. Mr. Chairman, I rise in opposition to the amendment and I move to strike the requisite number of words.

Mr. Chairman, I think we have heard in the last 15 or 20 minutes, and certainly yesterday and the day before from those Members who have commented concerning this Buy American amendment.

I think if we take time to stop to think for a couple of minutes, I think the proponents of the amendment, as far as I remember, gave this logic: Norway does it. Great Britain does it.

I would say to the Members, in all truth and honesty, that if we want the economic future of this country, a country that has been built from California to New York on the strength of exports to the world, and now we want to be like Norway or Great Britain, let us vote for the Murphy of New York amendment. But if we are not going to stand up for American pride and American workmen, and stand up and say to them that they cannot compete around the world, that they need the help of their American Government to stop all imports from abroad, then vote for the Murphy of New York amendment.

But I am telling the Members in all truth and honesty, what we have to do to the American worker is to give him a fair shake, to enforce the laws we now have on the books to receive fairness in our trade negotiations, and we will have the business overseas that will help them and the American economy. Let us not forget that we built this country into the greatest export business the world has ever known, and we did it on a free trade and a free enterprise operation. We did it because American workers produced the best products in the world at the best price.

Let me say further that when we really look at this amendment, as other speakers have said, we come to the realization that was stated just a few minutes ago is not true. I come from a district surrounding the greatest steel-producing district in the world. What do the steel companies say? They say not to give them more protection but please, please enforce the laws that are already on the books. I say to the Members, that is the answer. Let us enforce the laws we have.

I say further that when the Eximbank comes up, let us give this bank the tools with which to compete with the rest of the world. But in all truth and honesty, I say to my friend from Ohio, who is certainly right, and to the gentleman from New York who just preceded me in the well, and to the gentleman from Florida who made such an eloquent argument on open trade, that to go in this particular way at this particular time would not be in America's best interests.

Mr. VANIK. Mr. Chairman, will the gentleman yield?

Mr. STANTON. I yield to the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Chairman, I commend my friend and neighbor, the gentleman from Ohio, for his forthright position.

I think there may be a proper place for the Buy America law. Certainly I might have some serious reservations about the prospects of the building of bridges over the Mississippi River with steel that is made and fabricated in foreign countries.

However, I just cannot understand how we can embark on the folly of going to "Buy American" on an item in which most of the world's production is in the United States. We are the world providers of most of the drilling equipment and most of the accessories.

Certainly where we have the technical advantage and we have the know-how and we have the skills and we are recogized by the world as the foremost producer of this item, what kind of sense does it make to ask for the retaliation of our trading partners in an area in which we do not need protection? We can agressively meet the rest of the world on any kind of market terms.

I hope the amendment will be defeated.

Mr. CARNEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will only speak briefly. I hear this fine oratory. I want to tell you something. The American worker wants protection. Last year we had roughly a $30 billion trade deficit. It cannot be such a great country. If it was not for our great agricultural industry, we would have had a balance of payments even worse.

No longer is the United States the leader in manufacturing and trade. I want to tell you, the AFL–CIO came out strongly for this. Despite all the previous speakers have said, most of the steel industry leaders that talk to me want a strong "Buy American" and we had better think of the American workers and the American people.

We are going down hill. We have high unemployment. We have a terrible balance of trade. Far better to do something now.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. CARNEY. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. Mr. Chairman, I want to respond to my friend, the gentleman from Ohio. People are not very particular how they throw facts around. This is a fact. I am going to read it from a factfinding sheet. The fact is of the 40 rigs being constructed today around the country, of the 40 rigs, 34 are being built overseas.

Now, yes, I understand, we do not want to start or precipitate some kind of trade war. Fair trade or free trade is debatable, but cool minds should prevail. We should be international. Everyone knows, however, we should start doing something to protect ourselves. This might seem insignificant, these 34 rigs, but it is an indication of what has been going on in every area of construction in the whole country.

Mr. CARNEY. Mr. Chairman, I want to say this, that there is not a TV set made in the United States; there is not a radio made in the United States. They take a little bit at a time. We have a continual deficit in the balance of trade. We have a continuing problem.

Mr. STANTON. Mr. Chairman, will the gentleman yield?

Mr. CARNEY. I yield to the gentleman from Ohio.

Mr. STANTON. Mr. Chairman, our colleague, the gentleman from Ohio, mentioned the foreign steel bridges over the Mississippi. I want in all fairness to ask my colleague, the gentleman from Ohio, if this occurred because of something American or "Buy American" or non-American, or did this really occur because both the Democratic and Republican administrations did not enforce the antidumping laws on steel? The answer is obvious.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. CARNEY. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. Mr. Chairman, this has occurred because this country has been in a trade war for 20 years and nobody wants to admit it. All the facts indicate that we cannot continue with an imbalance of trade.

Why do you think we have devalued the American currency two times, in 1971 and 1973? Where do you think that came from? We better start taking a look at these things.

Mr. VANIK. Mr. Chairman, will the gentleman yield?

Mr. CARNEY. I yield to the gentleman from Ohio.

Mr. VANIK. Mr. Chairman, all I want to say is that when you move to establish trade restraints in a sector where we do not need this kind of protection, you are jeopardizing the real fight. I am ready to fight on steel and steel products. I am ready to fight on electronics, on televisions, and micro-ovens which unfairly overwhelm our markets. We may soon have to address the problem of mounting automobile imports, but I think we are going off on an unnecessary tangent here that discredits the whole cause of fair trade.

Mr. CARNEY. Mr. Chairman, I want to fight on every front. I want to stop losing American jobs. That is why I am up here.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. MURPHY).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 44, noes 59.

RECORDED VOTE

Mr. MURPHY of New York. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 201, noes 208, not voting 23, as follows:

[Roll No. 31]

NOT VOTING—23

Armstrong	Krueger	Ruppe
Bingham	Lehman	Stockman
Broomfield	Mitchell, N.Y.	Teague
Brown, Ohio	Moss	Thone
Dent	Panetta	Tucker
Dickinson	Richmond	Wilson, Bob
Diggs	Risenhoover	Wright
Jones, Tenn.	Roncalio	

The Clerk announced the following pairs:

On this vote:

Mr. Lehman for, with Mr. Jones of Tennessee against.

Mr. Risenhoover for, with Mr. Bingham against.

Mr. Dent for, with Mr. Broomfield against.

Mr. Richmond for, with Mr. Brown of Ohio against.

Mr. Mitchell of New York for, with Mr. Thone against.

Mr. Diggs for, with Mr. Teague against.

Mr. MARRIOTT and Mrs. HECKLER changed their vote from "aye" to "no."

Mr. WAXMAN changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENTS OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Chairman, I offer three amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. MURPHY of New York:

(To incorporate the Federal consistency provision of the Coastal Zone Management Act into new Section 11 of OCSLA—at the exploration stage.)

On page 174, after line 21, insert the following new paragraph and redesignate the succeeding paragraphs accordingly:

"(2) The Secretary shall not grant any license or permit for any activity described in detail in an exploration plan and affecting any land use or water use in the coastal zone of a state with a coastal zone management program approved pursuant to Section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455), unless the state concurs or is conclusively presumed to concur with the consistency certification accompanying such plan pursuant to subsections 307(c)(3)(B)(i) or (ii) of such Act, or the Secretary of Commerce makes the finding authorized by subsection 307(c)(3)(B)(iii) of such Act."

(To delete the obligation on the Secretary to make the five year leasing program consistent or coordinated with coastal zone management programs and to provide only for consideration of such program.)

At page 181, delete lines 16 through 18 and renumber subsequent subparagraphs accordingly.

At page 186, delete lines 16 through 22 and substitute in lieu thereof, the following:

"(5) Consideration of the coastal zone management program being developed or administered by an affected coastal State pursuant to section 305 or section 306 respectively of the Coastal Zone Management Act of 1972 (16 U.S.C. 1454, 1455)."

(To incorporate the language of the federal consistency provision of the Coastal Zone Management Act (CZMA) into the new oil and gas development and production section of OCSLA, to remove inappropriate and unnecessary CZMA language in the present provision on modification of plans, and to conform the language of the plan disapproval provision with existing CZMA federal consistency section.)

At page 207, after line 14, insert the following new subsection and renumber the subsequent subsections accordingly:

"(d) The Secretary shall not grant any license or permit for any activity described in detail in a plan and affecting any land use or water use in the coastal zone of a state with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455), unless the state concurs or is conclusively presumed to concur with the consistency certification accompanying such plan pursuant to subsections 307(c)(3)(B)(i) or (ii) of such Act, or the Secretary of Commerce makes the finding authorized by subsection 307(c)(3)(B)(iii) of such Act."

At page 209, line 7, strike "Any mod-" and all that follows through "Act." on line 14.

At page 209, strike lines 21 through 25; at page 210, strike lines 1 through 3; and substitute in lieu thereof the following:

"(B) if any of the activities described in detail therein for which a federal license or permit is required and which affects any land use or water use in the coastal zone of a state with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455), do not receive concurrence by such state with respect to the consistency certification accompanying such plan pursuant to subsections 307(c)(3)(B)(i) or (ii) of such Act and the Secretary of Commerce does not make the finding authorized by section 307(c)(3)(B)(iii) of such Act;"

Mr. MURPHY of New York (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

(Mr. MURPHY of New York asked and was given permission to revise and extend his remarks.)

Mr. MURPHY of New York. Mr. Chairman, these amendments deal with the Federal consistency provision of the Coastal Zone Management Act and the protection of that provision in the procedures of the Outer Continental Shelf Lands Act. I would like to discuss them separately, but I believe they are all corelated. I want to assure my colleagues that we are simply making sure that the provisions of the 1976 Coastal Zone Management Act consistency amendments

will continue to operate in these revised OCS procedures. No additional time is added to the OCS development by these amendments.

I have discussed these three amendments with the minority and I hope that we will have support for them from that side of the aisle.

Mr. TREEN. Mr. Chairman, if the gentleman will yield, we on this side have reviewed these three amendments. We think that they make an improvement to the bill. They are acceptable to the minority side.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New York (Mr. MURPHY).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. FORSYTHE

Mr. FORSYTHE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FORSYTHE: Page 193, line 7, strike the comma after "operating" and all that follows through the end of line 14, and insert in lieu thereof the following: "shall establish standards for operations on the outer Continental Shelf to insure that such operations will be conducted in a safe manner by well trained personnel using technology, precautions, and techniques to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstructions to other users of the waters and seabed, or other occurrences which could cause damage to the environment or to property, or endanger life or health. In establishing such standards, each such Secretary shall require, on all new drilling and production operations; and, whenever practicable, on existing operations, the use of technology which he determines is economically achievable after taking into account the incremental costs and benefits of available technology. Each such Secretary shall permit the use of any equpment or technique which he determines meets or exceeds such standards, and the reliability of which has been demonstrated to his satisfaction.".

Mr. FORSYTHE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. FORSYTHE. Mr. Chairman, we have heard a lot of talk these last few days in our discussion of this bill about anticompetitive operations on the Outer Continental Shelf. In my view, the language in the bill in this area is very anticompetitive because it mandates that the Secretary establish what is the safest and best technology so far as all of the operations on the shelf are concerned. It is pretty difficult when something is safe to say that somebody is going to select the safest. In my view, that becomes a very, very anticompetitive situation in that the Secretary will review all of the technology and then say, "This is the safest," thereby really ruling out many other similar products that may well be safe.

It actually has to cost substantial amounts of money and it has to cost time in their processing, to go through these decisionmaking processes. I believe it will be very harmful to the speedy exploration and development of the Outer Continental Shelf.

Now I know it can be said how can one be against the safest? That is not the issue. I do not believe that really is relevant because, when it is safe, that is what we are seeking and we are, in our substitute language here, providing for safe technology. If we are to try and mandate throughout all of the operations on the Outer Continental Shelf, the best or safest technology we are going to perhaps add very substantially to the cost and delay. It seems to me to be one area where we can increase competition in this whole field and also maintain the highest standards of safety that are required, which we all support.

So, Mr. Chairman, I urge an aye vote for my amendment.

Mr. MURPHY of New York. Mr. Chairman, I rise in strong opposition to the amendment offered by the gentleman from New Jersey (Mr. FORSYTHE).

Mr. Chairman, I must strongly oppose the gentleman's amendment. The OCS bill would insure that the best available and safest technology be used in OCS operations. The gentleman's amendment would eliminate that requirement, and only provide for technology that is "economically achievable." A general statement that such operations are to be "conducted in a safe manner" is also added.

Much concern has been raised in our hearings about the need to insure safe operations. Our provision is very limited. It provides for the use of the best available and safety technology which the Secretary determines to be economically achievable. Any reduction in that standard could only mean higher risk of injury. This amendment must be defeated.

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, it seems to me the gentleman from New Jersey has got a very good point here. He is not striking the section having to do with the respective responsibilities of the Coast Guard and the Secretary under this act, but instead gives us language which I think will contribute to removing the elements of delay which the committee bill currently contains. For example, the gentleman from New Jersey states that the purpose is—

To insure that such operations will be conducted in a safe manner by well-trained personnel using technology, precautions, and techniques to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstructions . . .

All very clear mandates to the appropriate authorities.

What would happen if this is not adopted and the Secretary is mandated to use the best available and safest technology? First of all, we do not know what best available and safest technology means in relationship to carrying out our national policy goals, as stated in the act; that is, that the operations on the Outer Continental Shelf should be conducted in a safe manner by well trained personnel using technology, precautions, and techniques sufficient to prevent or minimize.

It would seem to me that we are going to have delays in implementing this standard of best and safest. For example, once a decision is made that a certain machine is the best and safest machine and the only one, therefore, permissible on new operations, I think we can foresee lawsuits being brought by manufacturers of competitive devices, whether they argue that they indeed have the best and the safest or that the Secretary's decision was arbitrary and capricious.

I think that also there will be just delays in forcing the Secretary to try to make a determination that a given technology is the best, absolutely the best and absolutely the safest at any given time, and with the rapid development and changes in technology and particularly as we accelerate the development of exploration and development and production on the Outer Continental Shelf we are bound to have new techniques.

In fact, this was the subject of testimony before another committee that I serve on, the Committee on Science and Technology, which went into the details of the fact that there is a need for new technology in oil exploration and a great field for future advances.

I think that the present law is adequate as a mandate for the responsible official to be safe without telling him that he cannot go ahead on decisions today because of the delays inherent, that they will be facing lawsuits, and many other possible dangers that once again are inherent throughout this bill, that will simply lead to further delays in getting about the business of discovering and producing oil and gas on the OCS.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, any law that requires an administrator to select the best and the safest is inherently irrational. Only one technology is best; but in determining which as between competing processes is the best is inherently subjective, lending itself, I might say, to corruption and, indeed, to a concentation in our marketplace which is undesirable.

What if we were to mandate upon the Secretary of Transportation that he only buys the safest automobile? Now, what if we were to do that for use in the Federal Establishment? Who would win out? The safest would require that just one would be a winner and that is not right at all.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. FISH was allowed to proceed for an additional 3 minutes.)

Mr. FISH. Mr. Chairman, I am glad the gentleman brought this up, as it is a very important point. There is indeed

a very strong possibility that this term could lead to monopolies.

Mr. FORSYTHE. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the author of the amendment.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, the thing that concerns me about the bill and why I think this amendment should be adopted is that not only the monopoly situation, the possibility of monopoly that the gentleman from California (Mr. WIGGINS) pointed out, but also, I think we could have a situation where one process or system is approved by the Secretary and, thereby, it reduces competition to develop better systems in the future. What would be the point of doing that if one is already picked?

Mr. FISH. Mr. Chairman, I applaud the gentleman.

Mr. Chairman, as I said, in my other jurisdiction in the Committee on Science and Technology this is a matter of great concern in the area of energy technology. It puts people in doubt where such possibilities are not cut off. This would not be the case where we assume that the decision on the part of the Secretary is correct that this and only this is the safest technology. You are not going to have the response we need for active competition on the part of industry. It would be an inhibiting factor.

Mr. LAGOMARSINO. To say nothing about what is the proper technology in the Atlantic region might not be the proper one on the gulf.

Mr. FISH. Exactly, or the fragile environment in Alaska.

Mr. KETCHUM. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from California.

Mr. KETCHUM. Mr. Chairman, I thank my colleague for yielding.

I think my colleague resides in an area where we had the biggest blowout in history. It really bears out what the gentleman is saying, that we do not want regulations prescribing the greatest number of drill strings to be used.

The State of California required much more stringent regulation. The blowout would never have occurred if the Federal regulations had complied with the State regulations; that is, maybe in one area four strings should be used and maybe in another two strings are only required. It would leave us with one option that might not be safe. I concur in the gentleman's remarks.

Mr. FISH. Mr. Chairman, I ask for an aye vote on the amendment.

Mr. HUGHES. Mr. Chairman, I move to strike the requisite number of words.

I will try not to take the 5 minutes. I hesitate to rise and differ with my colleague from New Jersey. In fact, we have differed on a number of provisions of the bill, but on this one I just cannot sit here and say nothing. He is just dead wrong.

The present Secretary of the Interior utilizes this particular language. It is language that we consider to be works of art. We debated it, I think very thoroughly, both in the 94th and 95th Congress. It is modified by language which indicates that such available and safest technology must still be economically achievable.

We cannot just sit here at this point and argue about the meaning of "the safest." The Secretary has to make that determination. The Secretary has to make a lot of determinations or value judgments. I think people that are going to be experiencing the tremendous onshore impact from offshore development in frontier waters must have the assurance that we are going to utilize the best available and safest technology.

I would urge my colleagues to defeat the amendment.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I will be happy to yield.

Mr. FISH. I thank the gentleman. I appreciate his pointing out the qualifying language in the committee bill, "that the Secretary determines to be economically achievable," but I would point that this does not reach the arguments that I was making that this still could lead to monopoly and still generate lawsuits by the firms that are disappointed.

Mr. HUGHES. If I can recapture my time, the gentleman takes it, I think, to the ultimate. Anything can occur, but it is not within the realm of reasonable probabilities.

The Secretary of the Interior is already utilizing this language presently, and I do not see how it can be suggested that the Secretary cannot arrive at the kind of value judgments we are calling for. We are asking the Secretary to make a number of value judgments. Even in my colleague's amendment the Secretary has to make some value judgments, and I think it is kind of absurd to argue that it is going to lead perhaps to some monopoly. I thought that we had addressed the antitrust problems yesterday.

Mr. FISH. I do not think we decided on the principle. This is an effort to guide the authorities. The trouble is that the committee bill has inserted this language: "Best available and safest technology," which really is at odds with our own statement of purpose, as outlined in the bill and which the gentleman from New Jersey (Mr. FORSYTHE) tracks in his amendment. It says that operations on the Outer Continental Shelf should be conducted in a safe manner, by well-trained personnel, using technologies so as to prevent or minimize the likelihood of blowouts, to control fires, and so forth.

This is the language of the pending amendment, which I think is more in keeping with the policy purposes of the bill and avoids all these other issues, this new language of best technology and safest.

Mr. HUGHES. I do not think that the language does violence to any of the policy considerations set forth in the bill.

I would yield back the balance of my time.

Mr. GARY A. MYERS. Mr. Chairman, I move to strike the last word.

I would like to address a question to the gentleman from New Jersey. It seems to me that the section of the bill addresses all the possible technologies that will be utilized at any stage of development, drilling, production, exploration, and so forth. So, is what we are doing here, is saying that there will be one grand scheme which will be approved from the point of departure to the point of delivery of a product to shore; that each step in each portion of that scheme of development or equipment deployment can meet only one design criteria?

Mr. HUGHES. No. Of course not. I do not think it is at all suggested in the bill, and that would be an absurd interpretation. The language in the bill are words of art that suggest to the Secretary of the Interior that as we develop our Outer Continental Shelf, the Secretary should make every effort to insure that what we do is utilizing the best and safest available technology. I think that frontier areas, where the infrastructure is often fragile areas, such as in my district, where we have a multi-billion-dollar tourist economy, deserve no less than the best and safest available technology.

Mr. GARY A. MYERS. I can agree that it deserves to have the assurances of a safe level of operation.

Let me give the gentleman another example that might be a parallel to it. I know of no restriction of alternative designs on light water nuclear reactors. There are a number of designs which are accepted as safe. If there is an area in which the general public ought to be concerned about the safest design, this is such an area that is open for this sort of temptation. It would seem to me that, even under that risky technology, that probably has as many potential hazards to environment and personal safety. Certainly the Government has been able to develop a set of regulations in which it assures a safe level of operation but, under that umbrella, allows a number of different types of technologies to grow.

Mr. HUGHES. Mr. Chairman, if the gentleman will yield further, the gentleman makes a good point. And it is not suggested in any way in this language that it has to be one particular technology. The Secretary has the flexibility to determine under the circumstances which is the best and safest general technology available to the industry. I do not think there is any suggestion that there has to be one technique.

Mr. GARY A. MYERS. I may have been not hearing things correctly, but it was my interpretation of the gentleman's remarks and the remarks of other individuals who have spoken previously that that was the intent, for the Secretary to guarantee that the safest technology is utilized. And if we read the section of the bill, it talks about all of the technologies in regard to the exploration, development, drilling, and so forth. But one could conceive that the Secretary is going to have to design the technical scheme from the point where we embark offshore until the oil and gas comes onshore.

Mr. HUGHES. I do not think that is a concern, but if in fact the gentleman is concerned about it, we certainly have developed enough legislative history that that is not the intent.

Mr. FORSYTHE. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from New Jersey.

Mr. FORSYTHE. I thank the gentleman for yielding.

Mr. Chairman, I think I understand the gentleman to say that for south Jersey we should have the best and safest. Are we going to say something else for somebody else?

Mr. HUGHES. Of course not. In the area.

Mr. FORSYTHE. We want it all safe. That is what we want. I just believe that when we say "best and safest," we cannot say there is a whole range of best and safest.

Mr. HUGHES. I want the best and safest for all areas.

Mr. FORSYTHE. The gentleman is playing with words and trying to strive for something that is not there.

Mr. EMERY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, it seems to me that what we are really doing is arguing about different ways to accomplish the same thing. I am certainly in favor of using the safest available technology, but that technology may not be always the same. We may find improvements in a technology and we may find ways of improving safety by other means. My point is to make certain that the Coast Guard, the Secretary, other people who are in a position to review available technology, have an opportunity to examine different ideas and different techniques as we go along, so that the technology that is approved for use in offshore drilling, whether it is one technology or two or three or four, meet the standards that we are trying to achieve.

What I am asking the gentleman from New Jersey is: If we can come up with an addition to the section which clarifies that point, one which will allow the Secretary and the Coast Guard to permit and approve different technologies that meet the standards we desire, would the gentleman be satisfied?

Mr. HUGHES. No. Mr. Chairman, if the gentleman will yield, I think the language in the bill does exactly what the gentleman would intend. I think it gives the Secretary discretion to do exactly what the gentleman has indicated should be the broad public policy considerations.

I do not think there can be a value judgment given for any particular area for all times. The Secretary under this language has the flexibility to determine what is in the public interest at a given time.

Mr. EMERY. Mr. Chairman, the thing that disturbs me and, I think, disturbs some of the Members on this side is that the language in this particular section can be interpreted as meaning one technology rather than a variety of technologies, all of which accomplish the same thing but perhaps in different ways.

So all I am saying is that maybe we ought to consider minor amendments to the section to make it crystal clear that as long as the Coast Guard and the Secretary approve these technologies, as many as 2, 3, 10, or even a dozen technologies all could be approved and used, as long as they meet the minimum requirements. The language, as it is written, might be interpreted to mean one technology rather than 2, 3, or 4.

Mr. MURPHY of New York. I do not think so. I think the committee made it rather clear that the Secretary does have that discretion. I do not think it indicates in any way that it has to be one particular technology that would be considered to be the best and safest available technology.

Mr. EMERY. But, Mr. Chairman, to further clarify the point, it is the gentleman's understanding, and the understanding of the Members who wrote the original bill, that it is not their intent to limit the technology to only one, but that the Coast Guard and the Secretary may include any of those that may qualify?

Mr. MURPHY of New York. Yes, that is exactly right, and for that reason the amendment should be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. FORSYTHE).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 16, noes 18.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. TREEN

Mr. TREEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TREEN: On page 205, line 14, after the word "enactment" and before the word "with" insert the following: "in a frontier area".

Mr. TREEN. Mr. Chairman, this amendment, which has been discussed with the majority on the committee. would have the effect of making sure that sections (a) through (j) of the new section 25 of the OCSLA would apply only to the frontier area.

As I say, Mr. Chairman, the majority has indicated that it will support this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. TREEN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FISH

Mr. FISH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FISH: Section 23, page 200, line 8: At the end of the first sentence of section 23(a)(5) of H.R. 1614, i.e., ending with the words "such award is appropriate." insert the following new sentence: "The court shall award such costs of litigation to the appropriate party if it finds that the litigation is frivolous, or was brought primarily for the purpose of delaying activities authorized by, or conducted pursuant to, this Act or any regulation promulgated under this Act, or of the terms of any permit or lease issued by the Secretary under this Act."

Mr. FISH. Mr. Chairman, I would like to address my remarks to the majority.

This is an amendment which was printed in the RECORD by the gentleman from Nevada (Mr. SANTINI), who gave us a copy of it a couple of days ago asking for support. We said we would be glad to support his amendment.

Mr. Chairman, I want to protect the rights of the gentleman from Nevada (Mr. SANTINI), who is not on the floor at the moment. We are nearing the end of title II, and he may be precluded from offering this amendment by not being on the floor.

I previously indicated that I would support this amendment. I do not see how we can really disagree with it. We are talking about a penalty for bringing a frivolous lawsuit. Certainly, we are all conscious of the issue of delay, and I do not think anybody can be on the side of frivolous lawsuits.

Mr. Chairman, I think it was a good amendment when the gentleman from Nevada (Mr. SANTINI) brought it to the minority desk in the last couple of days. In his absence, I am introducing it at this time.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, the gentleman's amendment would provide that a court would have the authority to award costs against a plaintiff filing a citizen's suit if such action is frivolous or solely for delay. I am adamantly opposed to this provision.

The present language of a citizen's suit provides for symmetry and equity. Individuals are given the authority to sue and the court has the authority to award reasonable attorneys fees and cost to any party—whenever a court determines such award is proper. Thus, under the present provision, a plaintiff or defendant can obtain costs of litigation when felt to be appropriate. The decision is to be based on a case by case determination. No preference is given to the plaintiff and no preference is given to the defendant. The gentleman's amendment would give preference to the defendant. Thus, under the gentleman's amendment a special rule would be established for an oil company who is sued by, for example, a citizens group or a State or local government. No preference is given in the gentleman's amendment to a citizen or State when it is successful.

Under recent cases interpreting the provision such as that contained in our bill, Aleyska pipeline, the court can and will award fees to a defendant if the plaintiff acts frivolously, in bad faith or for oppressive reasons.

The effect of the gentleman's amendment would be to result in extended litigation as to whether or not "an action" is frivolous or for delay, rather than as now, allowing the court to make that determination as part of its decision.

The administration has indicated that they do not support this amendment but

rather believe it could result in a watering down of the citizen's suit section. The clear result would be that citizens would not sue under our provision, but would seek other remedies. Thus, one of the basic provisions of the bill—to provide one uniform procedure for challenges to actions under the OCS Lands Act would be seriously threatened if the House adopted this amendment.

Again, let me restate that our bill presently provides that a court can, in appropriate cases, award costs and fees to a plaintiff or defendant. The gentleman's amendment would provide such a standard only for a defendant. It is, therefore, unfair and one-sided.

Mr. FISH. Mr. Chairman, it is unlikely that any defendants would bring a lawsuit. This is not a question of acting precipitately. I do think passing this amendment would be a wise thing because we know the possibilities. We can cite many more cases of frivolous lawsuits being brought solely as a delaying tactic.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Massachusetts.

Mr. STUDDS. Mr. Chairman, I hope the gentleman from New York (Mr. FISH) is not suggesting that any suit that does not prevail is therefore, by definition, frivolous.

Mr. FISH. Absolutely not. There would have to be a determination of the courts. The amendment would not change the authority with respect to that.

Mr. STUDDS. If the gentleman will yield further, if I understand this amendment correctly, it would mean, for example, in the case of the suit brought 2 weeks ago by the Conservation Law Foundation against the Commonwealth of Massachusetts to delay a lease sale, that had the State of Massachusetts not prevailed in that suit, under this amendment the State would have had to reimburse the oil companies for their own attorneys' fees; is that correct?

Mr. FISH. Not at all.

Mr. STUDDS. That is not correct?

Mr. FISH. No, of course not.

Mr. STUDDS. Then perhaps the gentleman can reexplain the amendment.

Mr. FISH. I would not consider the Massachusetts suit a frivolous lawsuit. I do not think the court would either.

Mr. STUDDS. Had the State not prevailed, perhaps the gentleman would consider it frivolous.

Mr. FISH. No. That determination would be for the courts since "frivolous" is a term of art known to any lawyer.

Mr. STUDDS. If the gentleman will yield further, if we take it the other way around, then the oil companies should reimburse the State of Massachusetts; is that not correct?

Mr. FISH. I understand that under the present law it would work both ways, that the court has the authority to treat both the plaintiff and the defendant in that manner.

Mr. STUDDS. Mr. Chairman, I appreciate the gentleman's statement, but I oppose the amendment.

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Oregon.

Mr. DUNCAN of Oregon. Mr. Chairman, I am interested in clarifying the dialog.

In the event the amendment passes, I think it is important to make some legislative history here.

The amendment says as follows:

The court shall award such costs of litigation to the appropriate party.

It does not designate the plaintiff or the defendant.

It further says that it will do so if it finds that the litigation is frivolous.

I assume the gentleman intends that that frivolity would apply to both the defendant as well as to the plaintiff, so that the amendment is drawn in a balanced fashion, and awards could be made against either party in the event the litigation itself is frivolous; is that correct?

Mr. FISH. The amendment in that sense is similar to the current law, according to the chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. FISH).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 14, noes 15.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. EMERY

Mr. EMERY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EMERY: Line 9, page 193, after the word "technology", add the following language: ", not limited to one technology, but including any and all that the Secretary and the Coast Guard determines to meet safety standards consistent with this section,".

Mr. MURPHY of New York. Mr. Chairman, would the gentleman yield?

Mr. EMERY. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, I would merely point out to the gentleman from Maine that we do not have a copy of the gentleman's amendment.

Mr. EMERY. In response to the inquiry of the gentleman from New York let me say that a copy of the amendment is on its way to the gentleman's desk.

Mr. MURPHY of New York. I appreciate that.

Mr. Chairman, let me merely add to the gentleman now in the well and others, that we would appreciate that the amendments that are being offered be presented to the majority side before they are read by the Clerk so that we may have an opportunity to examine them in advance. We have been attempting to work diligently and rapidly in the consideration of amendments on this bill and that would help expedite matters.

Mr. EMERY. Mr. Chairman, let me state to the gentleman from New York that I apologize for any inconvenience that I may have caused the gentleman from New York. However, the gentleman from Maine can only be in one place at one time.

Mr. FISH. Mr. Chairman, would the gentleman yield?

Mr. EMERY. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I thank the gentleman for yielding and I have asked the gentleman to yield only for the purpose of saying that I am very sympathetic with the situation the gentleman has found himself in and also that of my colleague, the gentleman from New York (Mr. MURPHY). I realize as I am sure the gentleman from Maine does that we are working under great time limits and this certainly causes difficulty at times.

Mr. EMERY. I thank the gentleman.

Mr. Chairman, the amendment that I offer consists of very simple language, and it is the purpose of clarifying the language with respect to technology that we discussed a few moments ago. It merely ties down the principle that we agreed upon in our colloquy a few minutes ago, that the technology available guaranteeing safety, shall be approved by the Secretary and the Coast Guard, and will be limited not just to one but to all technologies that can do the job. It merely prevents the possibility of one technology being mandated when two or three other technologies are completely adequate, that are agreed to be adequate by the Secretary and the Coast Guard.

I urge an aye vote on the amendment.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. EMERY. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I certainly would say that the minority side is glad to accept the amendment offered by the gentleman from Maine (Mr. EMERY). This matter was thoroughly discussed during the debate on the amendment offered by the gentleman from New Jersey (Mr. FORSYTHE) a few minutes ago when we were discussing the effect of the safest and the best technology and the adverse consequences that may result from that.

Mr. Chairman, I would further add that I believe we are indeed fortunate to have in our midst a Member who has the expertise such as the gentleman from Maine (Mr. EMERY) does. I would hope that we can also receive the approval of the majority side so that this amendment offered by the gentleman from Maine (Mr. EMERY) will be accepted.

Mr. EMERY. Mr. Chairman, let me say that I thank the gentleman from New York (Mr. FISH) for the comments he has made. I would further like to say that the cooperation from both sides of the aisle in discussing the various aspects of this bill has been superlative, and I wish to congratulate both the gentleman from New York (Mr. FISH) and the gentleman from New York (Mr. MURPHY) for managing the legislation, and that I certainly can understand the confusion that has occurred on some aspects of the bill.

I realize we cannot think of all these things at once, but I really think this amendment begins to solve the problem, and I certainly hope it is accepted.

Mr. STUDDS. Mr. Chairman, I rise in opposition to the amendment.

There is a substitute being prepared which I believe will accomplish what we understand to be the purpose of the gentleman from Maine in introducing the amendment. I would suggest to the gentleman from Maine, if we understand his intent clearly, that his amendment is not properly drawn to achieve that purpose.

The gentleman fails to strike lines 9 through 14, which I think he intended to do.

I think what he is proposing is to get away from the feeling on the minority side, expressed a few minutes ago, where there was a fear the Secretary would be requiring a particular brand name or particular company's product, and I believe the gentleman from New Jersey intends to offer a substitute amendment changing the word "technology" to "technologies," to make it plural and quite clear that we do not wish to see the Secretary in a position of seeming anticompetitive.

AMENDMENT OFFERED BY MR. HUGHES AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. EMERY

Mr. HUGHES. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES as a substitute for the amendment offered by Mr. EMERY: Line 9, page 193, change "technology" to "technologies".

Mr. HUGHES. Mr. Chairman, I will speak just briefly. I think that this amendment makes it extremely clear that we are talking about perhaps a number of technologies. I do not think it is necessary to add a great deal of language that the gentleman from Maine has offered in his amendment. I think that this clarifies my colleague's concern and I would urge support of my amendment.

Mr. EMERY. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Maine.

Mr. EMERY. Mr. Chairman, as far as I am concerned, the amendment is fine. For my part I am willing to accept it. I thank the gentleman for his contribution.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, is the word "technologies" being modified by the word "best"?

Mr. HUGHES. Yes. They are both modifying it, "best" and "safest."

Mr. WIGGINS. I thank the gentleman. Now it is only 50 percent ambiguous instead of 100 percent. I only hope the wording is clear to the Secretary that he is not to pay attention to the word "best" if it means he is to select one.

I realize that is the intent of the gentleman and the intent of the gentleman from Maine, but we are just obstinate if we refuse to take the word out of the text.

Mr. HUGHES. Mr. Chairman, if the gentleman will permit me, I think the Secretary will understand.

Mr. FORSYTHE. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from New Jersey (Mr. FORSYTHE).

Mr. FORSYTHE. Mr. Chairman, I just want to say I think the gentleman is helping us to arrive at the point we wished to arrive at.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HUGHES) as a substitute for the amendment offered by the gentleman from Maine (Mr. EMERY).

The amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maine (Mr. EMERY), as amended.

The amendment, as amended, was agreed to.

AMENDMENTS OFFERED BY MR. BREAUX

Mr. BREAUX. Mr. Chairman, I offer several technical amendments, which I have talked to the majority and minority counsel about, and I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. BREAUX: Page 189: On line 2, strike "are not consistent with the national interest" and insert: "provide, or do not provide, for a reasonable balance between the national interest and the well-being of the citizens of the affected State".

SEC. 204. Section 5 of OSCLA "Administration of Leasing".

Page 153: line 25, strike ", ";

Page 154: line 1, strike "shrouding".

SEC. 204. Section 5 of OSCLA "Administration of Leasing".

Page 148: On line 20 strike the phrase ", in the national interest," insert at line 21 after the word "lease" the phrase "in the national interest".

Mr. BREAUX (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BREAUX. Mr. Chairman, just very briefly, these are technical amendments. I think they make sound drafting corrections in the language to make it more readable and clearly understood. I think they are amendments for the lack of which there would be some misunderstanding and difficulty. I ask that the Committee accept them.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, the Committee agrees that the amendments are technical in nature and would be supportive of the amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Louisiana (Mr. BREAUX).

The amendments were agreed to.

Mr. MURPHY of New York. Mr. Chairman, I believe those are all the amendments to title II.

The CHAIRMAN. The Clerk will designate the title which is now pending.

The Clerk read as follows:

TITLE III—OFFSHORE OIL SPILL POLLUTION FUND

DEFINITIONS

SEC. 301. As used in this title, unless the context indicates otherwise, the term—

(1) "cleanup costs" means all reasonable and actual costs, including administrative and other costs, to the Federal Government, to any State or local government, or to any foreign government, or to their contractors or subcontractors, or (A) removing or attempting to remove oil discharged from any offshore facility or vessel, or (B) taking other measures to prevent such discharge, or to reduce or mitigate damages to the public health or welfare, or to public property, including shorelines, beaches, and the natural resources of the marine environment;

(2) "damages" means compensation sought pursuant to this title by any person suffering any direct and actual injury proximately caused by the discharge of oil from an offshore facility or vessel, except that such term does not include clean-up costs;

(3) "discharge" includes any spilling, leaking, pumping, pouring, emptying, or dumping, regardless of whether it occurred intentionally or unintentionally;

(4) "offshore facility" includes any oil refinery, drilling structure, oil storage or transfer terminal, or pipeline, or any appurtenance related to any of the foregoing, which is used to drill for, produce, store, handle, transfer, process, or transport oil produced from the Outer Continental Shelf (as the term Outer Continental Shelf is defined in section 2(a) of the Outer Continental Shelf Lands Act (42 U.S.C. 1331(a))), and is located on the Outer Continental Shelf, except that such term does not include (A) a vessel, or (B) a deepwater port (as the term deepwater port is defined in section 3(10) of the Deepwater Port Act of 1974 (33 U.S.C. 1502));

(5) "Fund" means the Offshore Oil Pollution Compensation Fund established under section 302(a) of this title;

(6) "owner" means (A) with respect to an offshore facility, any person owning such facility, whether by lease, permit, contract, license, or other form of agreement, (B) with respect to any facility abandoned without prior approval of the Secretary of the Interior, the person who owned such facility immediately prior to such abandonment, and (C) with respect to a vessel, any person owning such vessel;

(7) "operator" means (A) with respect to an offshore facility, any person operating such facility, whether by lease, permit, contract, license, or other form of agreement, and (B) with respect to a vessel, any person operating or chartering by demise such vessel;

(8) "person" means an individual, a public or private corporation, partnership, or other association, or a government entity;

(9) "person in charge" means the individual immediately responsible for the operations of an offshore facility or vessel;

(10) "Secretary "means the Secretary of Transportation;

(11) "revolving account" means the account in the Treasury of the United States

which is established under section 302(b) of this title;

(12) "incident" means any occurrence or series of related occurrences, including one or more offshore facilities or vessels, which cause or pose an imminent threat of oil pollution; and

(13) "vessel" means every description of watercraft or other contrivance, whether or not self-propelled, which is operating in the waters above the Outer Continental Shelf (as the term "Outer Continental Shelf" is defined in section 2(a) of the Outer Continental Shelf Lands Act (42 U.S.C. 1331(a))), and which is transporting oil directly from an offshore facility, and such term specifically excludes any watercraft or other contrivance which is operating in the navigable waters of the United States (as the term "navigable waters" is defined in section 502 of the Federal Water Pollution Control Act (33 U.S.C. 1362)).

ESTABLISHMENT OF THE FUND AND THE REVOLVING ACCOUNT

SEC. 302. (a) There is established within the Department of Transportation an Offshore Oil Production Compensation Fund. The Fund may sue or be sued in its own name.

(b) There is established in the Treasury of the United States a revolving account, without fiscal year limitation, which shall be available to the Fund to carry out the provisions of this title.

PROHIBITION

SEC. 303. The discharge of oil from any offshore facility or vessel, in quantities which the President under section 311(b) of the Federal Water Pollution Control Act (33 U.S.C. 1321(b)) determines to be harmful, is prohibited.

NOTIFICATION

SEC. 304. (a) Any person in charge of an offshore facility or vessel shall, as soon as he has knowledge of any discharge of oil from such offshore facility or vessel which may be in violation of section 303 of this title, immediately notify the Secretary of such discharge.

(b) Any person in charge of an offshore facility or vessel who fails to immediately notify the Secretary, as required by subsection (a) of this section, shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than one year, or both, except that no person convicted under this section shall also be convicted for the same failure to notify under section 311(b)(5) of the Federal Water Pollution Control Act.

(c) Notification received pursuant to this section or information obtained by the exploitation of such notification shall not be used against any person providing such notification in any criminal case, except a prosecution for perjury or for giving a false statement.

REMOVAL OF DISCHARGED OIL

SEC. 305. (a) Whenever any oil is discharged from any offshore facility or vessel in violation of section 303 of this title, the President shall act to remove or arrange for the removal of such oil, unless he determines such removal will be done properly and expeditiously by the owner or operator of such offshore facility or vessel.

(b) Removal of oil and actions to minimize damage from oil discharged shall, to the greatest extent possible, be in accordance with the National Contingency Plan for removal of oil and hazardous substances established pursuant to section 311(c)(2) of the Federal Water Pollution Control Act.

(c) Whenever the President acts to remove a discharge of oil pursuant to this section, he is authorized to draw upon the money available in the revolving account. Such money shall be used to pay promptly for all cleanup costs incurred by the President in removing such oil or in minimizing damage caused by such oil discharge.

DUTIES AND POWERS

SEC. 306. (a) In order to carry out the purposes of this title, the Secretary shall—

(1) administer and maintain the Fund, in accordance with the provisions of this title;

(2) establish regulations and provide for the fair and expeditious settlement of claims in accordance with section 313 of this title;

(3) provide public access to information, in accordance with section 319(a) of this title;

(4) submit an annual report, in accordance with section 320 of this title; and

(5) perform such other functions as are prescribed by law.

(b) In the performance of his duties under this title, the Secretary is authorized to—

(1) utilize, with the consent of the agency concerned the services or personnel, on a reimbursable or replacement basis or otherwise, of any Federal Government agency, of any State or local government agency, or of any organization, to perform such functions on behalf of the Fund as are necessary or appropriate;

(2) make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this title;

(3) conduct such studies and investigations, obtain such data and information, and hold such meetings or public hearings as may be necessary or appropriate to facilitate the exercise of any authority granted to, or the performance of any duty imposed on, the Fund under this title;

(4) enter into such contracts, agreements, and other arrangements as are deemed necessary or appropriate for the acquisition of material, information, or other assistance related to, or required by, the implementation of this title; and

(5) issue and enforce orders during proceedings conducted pursuant to this title, including issuing subpenas, administering oaths, compelling the attendance and testimony of witnesses and the production of books, papers, documents, and other evidence, and the taking of depositions.

RECOVERABLE DAMAGES

SEC. 307. Damages may be recovered under this title for—

(1) the value of any loss or injury, at the time such loss or injury is incurred, with respect to any real or personal property which is damaged or destroyed as a result of a discharge of oil;

(2)(A) the cost to the owner of restoring, repairing, or replacing any real or personal property which is damaged or destroyed by a discharge of oil, (B) any income necessarily lost by such owner during the time such property is being restored, repaired, or replaced, and (C) any reduction in the value of such property caused by such discharge;

(3) any loss of income or impairment of earning capacity for a period of not to exceed five years due to damages to real or personal property, or to natural resources, without regard to ownership of such property or resources, which are damaged or destroyed by a discharge of oil, if the claimant derives at least 25 per centum of his earnings from activities which utilize such property or natural resources;

(4) any costs and expenses incurred by the Federal Government or any State government in the restoration, repair, or replacement of natural resources which are damaged or destroyed by a discharge of oil; and

(5) any loss of tax revenue by the Federal Government or any State or local government for a period of not to exceed one year due to injury to real or personal property resulting from a discharge of oil.

CLEANUP COSTS AND DAMAGES

SEC. 308. (a) All cleanup costs incurred by the President, the Secretary, or any other Federal, State, or local official or agency, in connection with a discharge of oil shall be borne by the owners and operator of the offshore facility or vessel from which the discharge occurred.

(b) Notwithstanding any other provision of law and except as provided in subsection (d) of this section, the owner and operator of an offshore facility shall be held jointly and severally liable, without regard to fault, for damages which result from a discharge of oil from such offshore facility. Such liability shall not exceed $35,000,000, except that if it can be shown that (1) such damages were the result of gross negligence or willful misconduct within the privity and knowledge of such owner or operator, or of the person in charge of such offshore facility, or (2) such discharge was the result of a violation of applicable safety, construction, or operating standards or regulations, such owner and operator shall be jointly and severally liable for the full amount of such damages.

(c) Notwithstanding any other provision of law and except as provided in subsection (d) of this section, the owner and operator of a vessel shall be jointly and severally liable, without regard to fault, for damages which result from a discharge of oil from such vessel. Such liability shall not exceed $150 per gross registered ton, except that if it can be shown that (1) such damages were the result of gross negligence or willful misconduct within the privity and knowledge of such owner or operator, or of the person in charge of such vessel, or (2) such discharge was the result of a violation of applicable safety, construction, or operating standards or regulations, such owner and operator shall be jointly and severally liable for the full amount of such damages.

(d) No liability shall be imposed under subsection (b) or (c) of this section to the extent the owner or operator establishes that the discharge of oil or that any damages resulting from such discharge were caused by (1) an act of war, or (2) the negligent or intentional act of the damaged party or of any third party (including any government entity).

(e)(1) To the extent that liability is not imposed, pursuant to subsection (d)(2) of this section, on the owner or operator of an offshore facility or vessel for cleanup costs or damages resulting from a discharge of oil from such facility or vessel, the damaged party or third party whose negligent or intentional act caused such discharge or any damages resulting from such discharge shall, if such damaged party or third party is also an offshore facility or vessel, be liable for such cleanup costs or damages to the same extent as if such discharge had occurred from the offshore facility or vessel of such damaged party or third party.

(2) Payment of cleanup costs or damages by the owner or operator of any offshore facility or vessel to any person pursuant to this title shall be subject to such owner or operator acquiring by subrogation all rights of such person to recover such cleanup costs or damages from any other person.

(3) The provisions of this section shall not in any way affect or limit any rights which an owner or operator of an offshore facility or vessel, or the Fund, may have against any third party whose acts may have caused or contributed to a discharge of oil.

(f) Notwithstanding any other provision of this title, no person shall be liable under this title for payment of cleanup costs or damages to any government of a foreign country, or any citizen of a foreign country not a resident of the United States, unless

(1) such payment is authorized by a treaty or executive agreement between such country and the United States, or (2) the Secretary of State, in consultation with the Attorney General, certifies that such country provides an adequate and substantially similar remedy for United States claimants for cleanup costs and damages related to discharges of oil produced from the Continental Shelf of such country.

(g) Any owner or operator of any offshore facility or vessel liable for damages to any person pursuant to subsection (b), (c), or (e)(1) of this section shall also be liable to such person for interest on the amount of such damages for which such owner or operator is liable, at the existing commercial interest rate, from the date the claim or amended claim including such damages was presented to the date on which the damages are paid. Such interest shall not be subject to any limitation of liability specified in subsection (b) or (c) of this section.

DISBURSEMENTS FROM THE REVOLVING ACCOUNT

SEC. 309. (a) Amounts in the revolving account shall be available for disbursement and shall be disbursed by the Fund for only the following purposes:

(1) Administrative and personnel expenses of the Fund.

(2) Cleanup costs resulting from the discharge of oil which are incurred pursuant to this title or pursuant to any State or local law, and costs of the removal of oil incurred by the owner or operator of an offshore facility or vessel to the extent that the discharge of such oil was caused solely by an act of war or negligence on the part of the Federal Government in establishing and maintaining aids to navigation.

(3) Subject to the provisions of section 313 of this title, all damages not actually compensated pursuant to section 308 (b) or (c) of this title.

(b) Payment of compensation by the Fund shall be subject to the Fund acquiring by subrogation all rights of the claimant to recover cleanup costs or damages from the person responsible for such discharge. The Fund shall diligently pursue recovery for any such subrogated rights.

(c) Notwithstanding any other provision of this section, the Fund shall not be liable to pay (1) cleanup costs and damages of any claimant to the extent that the discharge of oil or any damages resulting from such discharge were caused by the negligent or intentional act of the damaged party, or (2) damages of any claimant to the extent that the discharge of oil or any damages resulting from such discharge were caused by an act of war.

(d) In all claims or actions by the Fund against the owner, operator, or person providing financial responsibility, the Fund shall recover (1) except as otherwise provided in this title, the amount the Fund has paid to the claimant or to any government entity undertaking cleanup operations, without reduction, (2) interest on that amount, at the existing commercial interest rate, from the date upon which the request for reimbursement was issued from the Fund to the owner, operator, or such person, to the date on which the Fund is paid by such owner, operator, or person, and (3) all reasonable and actual administrative costs incurred by the Secretary and disbursed by the Fund in connection with such claim or action, including costs of investigation, processing, hearings, appeals, and collection. Costs recovered pursuant to clause (3) of this subsection shall not be subject to any limitation of liability applicable to such owner, operator, or person providing financial responsibility, under the provisions of subsection (b) or (c) of section 308 of this title.

(e) Whenever the amount in the revolving account is not sufficient to pay cleanup costs and damages for which the Fund is liable pursuant to this section, the Fund may issue, in an amount not to exceed $500,000,000, notes or other obligations to the Secretary of the Treasury, in such forms and denominations, being such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such notes or other obligations shall bear interest at a rate to be determined by the Secretary of the Treasury on the basis of the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of such notes or other obligations. Moneys obtained by the Fund under this subsection shall be deposited in the revolving account, and redemptions of any such notes or other obligations shall be made by the Fund from the revolving account. The Secretary of the Treasury shall purchase any such notes or other obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act. The purposes for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under this subsection. The Secretary of the Treasury may sell any such notes or other obligations at such times and prices and upon such terms and conditions as he shall determine in his discretion. All purchases, redemptions, and sales of such notes or other obligations by such Secretary of the Treasury shall be treated as public debt transactions of the United States.

FEE COLLECTION; DEPOSITS IN REVOLVING ACCOUNT

SEC. 310. (a)(1) The Secretary shall levy and the Secretary of the Treasury shall collect a fee of not to exceed 3 cents per barrel on oil obtained from the Outer Continental Shelf, which shall be imposed on the owner of the oil when such oil is produced.

(2) The collection of the fee imposed pursuant to paragraph (1) of this subsection shall continue until the amount in the revolving account totals at least $100,000,000, whereupon imposition of such fee may be suspended by the Secretary. Thereafter, the Secretary shall from time to time and in accordance with the limitation set forth in the first sentence of paragraph (1) of this subsection, modify by regulation the amount of the fee, if any, to be collected under this subsection in order to maintain the revolving account at a level of not less than $100,000,000 and not more than $200,000,000. For purposes of this paragraph, all sums deposited pursuant to subsection (b) of this section shall be included in the calculation of the balance in the revolving account.

(b) All sums received through fee collection, reimbursements, fines, penalties, investments, and judgments pursuant to this title shall be deposited in the revolving account.

(c) All sums not needed for the purposes specified in this title shall be prudently invested in income-producing securities issued by the United States and approved by the Secretary of the Treasury.

FINANCIAL RESPONSIBILITY

SEC. 311. (a) Each owner or operator of an offshore facility shall establish and maintain, under rules and regulations prescribed by the President, evidence of financial responsibility based on the capacity of the offshore facility and other relevant factors. Financial responsibility may be established by any one, or a combination of, the following methods acceptable to the President: (1) evidence of insurance, (2) surety bonds, (3) qualifications as a self-insurer, or (4) other evidence of financial responsibility satisfactory to the President.

(b) Each owner or operator of a vessel over three hundred gross registered tons (other than a vessel which is not self-propelled and which does not carry oil as cargo or fuel) shall establish and maintain, under rules and regulations prescribed by the Federal Maritime Commission, evidence of financial responsibility based on the liability requirements of this title and the tonnage of the vessel. In cases where an owner or operator owns, operates, or charters more than one such vessel, financial responsibility need only be established to meet the maximum liability to which the largest of such vessels could be subjected. Financial responsibility may be established by any one, or combination, of the following methods acceptable to the President: (1) evidence of insurance, (2) surety bonds, (3) qualifications as a self-insurer, or (4) other evidence of financial responsibility satisfactory to the President.

(c) Any claim for cleanup costs and damages by any claimant or by the Fund may be brought directly against the surety, the insurer, or any other person providing financial responsibility.

(d) Any person who fails to comply with the provisions of this section or any regulation issued under this section shall be subjected to a fine of not more than $25,000.

(e) The President shall adjust the requirements established under this section and the limit of liability under section 308 of this title annually, by an amount equal to the annual percentage change in the wholesale price index.

(f) No owner or operator of an offshore facility or vessel who establishes and maintains evidence of financial responsibility in accordance with this section shall be required under any State law, rule, or regulation to establish any other evidence of financial responsibility in connection with liability for the discharge of oil from such offshore facility or vessel. Evidence of compliance with the financial responsibility requirement of this section shall be accepted by a State in lieu of any other requirement of financial responsibility imposed by such State in connection with liability for the discharge of oil from such offshore facility or vessel.

TRUSTEE OF NATURAL RESOURCES

SEC. 312. (a) The President, or the authorized representative of any State, shall act on behalf of the public as trustee of the natural resources to recover for damages to such resources. Sums recovered shall be used to restore, rehabilitate, or acquire the equivalent of such natural resources by the appropriate agencies of the Federal Government, or the State government.

CLAIMS PROCEDURE

SEC. 313. The Secretary shall prescribe, and may from time to time amend, regulations for the filing, processing, settlement, and adjudication of claims for cleanup costs and damages resulting from the discharge of oil from an offshore facility or vessel.

(b)(1) Whenever the Secretary receives information from any person alleging the discharge of oil from any offshore facility or vessel in violation of section 303 of this title, he shall notify the owner and operator of such offshore facility or vessel of such allegation. Such owner or operator may, within five days after receiving such notification, deny such allegations, or deny liability for damages for any of the reasons set forth in section 308(d) of this title.

(2) Any denial made pursuant to paragraph (1) of this subsection shall be adjudicated in accordance with the provisions of subsection (i) of this section.

(c)(1) If a denial is not made pursuant to subsection (b)(1) of this section, the owner and operator, or the person providing financial responsibility, shall advertise, in accordance with regulations promulgated by

the Secretary, in any area where damages may occur, the procedures under which claims may be presented to such owners and operator or such person providing financial responsibility. The Secretary shall publish the text of such advertisement, in modified form if necessary, in the Federal Register. If any person fails to make any advertisement required by this paragraph, the Secretary shall do so and such person shall pay the costs of such advertisement.

(2) If a denial is made pursuant to subsection (b) of this section, the Secretary shall advertise and publish procedures under which claims may be presented to the Secretary for payment by the Fund from the revolving account.

(3) Any advertisement made under this subsection shall commence no later than fifteen days after the date of the notification and shall continue for a period of no less than thirty days. Such advertisement shall be repeated thereafter in such modified form as may be necessary, but not less frequently than once each calendar quarter for a total period of five years.

(d)(1) Any claim presented to any person under subsection (c)(1) of this section, or to the Secretary for payment from the Fund, shall be presented within one year after the date of discovery of any damages for which such claim is made, except that no such claim may be presented after the end of the five-year period beginning on the date on which advertising was commenced pursuant to subsection (c) of this section.

(2) Each person's damage claims arising from one incident which are presented to the Secretary shall be slated in one form, which may be amended to include new claims as they are discovered. Damages which are known or reasonably should be known, and which are not included in the claim at the time compensation is made, shall be deemed waived.

(e)(1) Except as provided in subsection (f) of this section, all claims shall be presented (A) to the owner and operator, or (B) to the person providing financial responsibility.

(2) Any person to whom a claim has been presented pursuant to paragraph (1) of this subsection shall promptly notify the claimant of the rights which such claimant may have under this title and notify the Secretary of receipt of such claim.

(f) The following claims may be presented to the Secretary for payment by the Fund from the revolving account:

(1) Any claim for damages resulting from any discharge with respect to which a denial has been made pursuant to subsection (b)(1) of this section.

(2) Any claim which has been presented to any person pursuant to subsection (c)(1) of this section, if such person—

(A) has not accepted liability for such claim for any reason,

(B) submits to the claimant a written offer for settlement of the claim, which the claimant rejects for any reason, or

(C) has not settled such claim by agreement with the claimant within sixty days after the date on which (i) such claim was presented, or (ii) advertising was commenced pursuant to subsection (c) of this section, whichever date is later.

(g) In the case of a claim which has been presented to any person under subsection (e)(1) of this section, and which may be presented to the Secretary under subsection (f)(2) of this section, such person shall, within two days after a request by the claimant, transmit directly to the Secretary such claim and such other supporting documents as the Secretary may by regulation prescribe, and such claim shall be deemed presented to the Secretary for payment by the Fund.

(h)(1) Except as provided in paragraph (2) of this subsection, the Secretary shall use the facilities and services of private insurance and claims adjusting organizations in administering this section and may contract to pay compensation for such facilities and services. Any contract made under the provisions of this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes, upon a showing by the Secretary that advertising is not reasonably practicable, and advance payments may be made. A payment to a claimant, for a single claim in excess of $100,000, or two or more claims aggregating in excess of $200,000, shall be first approved by the Secretary.

(2) In extraordinary circumstances in which the services of such private organizations are inadequate, the Secretary may use Federal personnel to administer the provisions of this section, to the extent necessitated by such extraordinary circumstances.

(i) The following matters in dspute shall be submitted to the Secretary and adjudicated pursuant to the provisions of this section:

(1) Upon the petition of a claimant, in the case of a claim which has been presented to the Secretary for payment by the Fund, and in which the Secretary—

(A) has, for any reason, denied liability for such claim; or

(B) has not settled such claim by agreement with such claimant within ninety days after the date on which (i) such claim was presented to the Secretary, or (ii) advertising was commenced pursuant to subsection (c)(2) of this section, whichever date is later.

(2) Upon the petition of the owner and operator or the person providing financial responsibility, who is or may be liable for cleanup costs and damages pursuant to section 308 of this title—

(A) any denial made pursuant to subsection (b)(1) of this section;

(B) any objection to an exception to the limit of liability set forth in section 308(b) or (c) of this title; and

(C) the amount of any payment or proposed payment by the Fund which may be recovered from such owner and operator, or such person providing financial responsibility, pursuant to section 309(d) of this title.

(j)(1) Upon receipt of any matter in dispute submitted for adjudication pursuant to subsection (i) of this section, the Secretary shall refer such matter to a hearing examiner appointed under section 3105 of title 5, United States Code. Such hearing examiner shall promptly adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code.

(2) For purposes of any hearing conducted pursuant to this subsection, the hearing examiner shall have the power to administer oaths and subpena the attendance and testimony of witnesses and the production of books, records, and other evidence relative or pertinent to the issues presented for determination.

(3) A hearing conducted under this subsection shall be conducted within the United States judicial district within which the matter in dispute occurred, or, if such matter occurred within two or more districts, in any of the affected districts or, if such matter in dispute occurred outside of any district, in the nearest district.

(k) Upon a decision by the hearing examiner and in the absence of a request for judicial review, any amount to be paid from the revolving account shall be certified to the Fund which shall promptly disburse the award. Such decision shall not be reviewable by the Secretary.

JUDICIAL REVIEW

SEC. 314. (a) Any person who suffers legal wrong or who is adversely affected or aggrieved by the decision of a hearing examiner may, no later than sixty days after such decision is made, seek judicial review of such decision (1) in the United States court of appeals for the circuit in which the damage occurred, or, if such damage occurred outside of any circuit, in the United States court of appeals for the nearest circuit, or (2) in the United States Court of Appeals for the District of Columbia.

(b) In any case in which the person responsible for the discharge, or the Fund, seeks judicial review, attorneys' fees and court costs shall be awarded to the claimant if the decision of the hearing examiner is affirmed.

CLASS ACTIONS

SEC. 315. (a) The Attorney General may act on behalf of any group of damaged citizens which the Secretary determines would be more adequately represented as a class in the recovery of claims under this title. Sums recovered shall be distributed to the members of such group, except that the reasonable and actual costs incurred by the Attorney General in representing such class shall be paid out of such sums recovered, and shall be deposited in the Treasury of the United States, and credited to miscellaneous receipts. The Attorney General shall not commence any action under this subsection against the Fund or any other department, agency, or instrumentality of the United States.

(b) If, within ninety days after a discharge of oil in violation of section 303 of this title has occurred, the Attorney General fails to act on behalf of a group who may be entitled to compensation, any member of such group may maintain a class action to recover such damages on behalf of such group. Failure of the Attorney General to act in accordance with this subsection shall have no bearing on any class action maintained in accordance with this subsection.

(c) In any case in which the number of members of the class seeking the recovery of claims under this title exceeds one thousand, publishing notice of the action in the Federal Register and in local newspapers serving the areas in which the damaged parties reside shall be deemed to fulfill the requirement for public notice established by rule 23(c)(2) of the Federal Rules of Civil Procedure.

REPRESENTATION

SEC. 316. The Secretary shall initially request the Attorney General to promptly institute court actions and to appear and represent the Fund for all claims under this title. Unless the Attorney General notifies the Secretary that he will institute such action or will otherwise appear within a reasonable time, attorney, appointed by the Secretary shall appear and represent the Fund.

JURISDICTION AND VENUE

SEC. 317. (a) The United States district courts shall have original jurisdiction over all controversies arising under this title, without regard to the citizenship of the parties or the amount in controversy.

(b) Venue shall lie in any district (1) wherein the damage complained of occurred, or, if such damage occurred outside of any district, in the nearest district, or (2) wherein the defendant resides, may be found, or has its principal office. For the purposes of this section, the Fund shall reside in the District of Columbia.

ACCESS TO RECORDS

SEC. 318. (a) Each person responsible for contributing to the Fund in accordance with this title shall keep such records and furnish such information as the Secretary shall prescribe in regulations. Collection shall be at such times and in such manner as shall be prescribed in such regulations.

(b) The Secretary shall have access to any books, documents, papers, and records of

such person relevant to the administration of this title, and shall undertake regular examinations of and audits on the collection of fees.

(c) The Comptroller General shall have access to any books, documents, papers, records, and other information of any person liable to contribute to the Fund, relevant to the administration of this title, and to all books, documents, papers, records, and other information of the Fund.

PUBLIC ACCESS TO INFORMATION

SEC. 319. (a) Copies of any communication, document, report, or information transmitted between any official of the Federal Government and any person concerning liability and compensation for damages resulting from the discharge of oil from an offshore facility or vessel shall be made available to the public for inspection, and shall be available for the purpose of reproduction at a reasonable cost, to the public upon identifiable request.

(b) Nothing contained in this section shall be construed to require the release of any information of the kind described in subsection (b) of section 552 of title 5, United States Code, or which is otherwise protected by law from disclosure to the public.

ANNUAL REPORT

SEC. 320. Within six months after the end of each fiscal year, the Secretary shall submit to the President of the Senate and the Speaker of the House of Representatives (1) a report on the administration of the Fund during such fiscal year, (2) a summary of the management and enforcement activities of the Fund, and (3) recommendations to the Congress for such additional legislative authority as may be necessary to improve the management of the Fund and the administration of the liability provisions of this title.

AUTHORIZATION OF APPROPRIATIONS

SEC. 321. (a) There is authorized to be appropriated for the administration of this title $10,000,000 for the fiscal year ending September 30, 1978, $5,000,000 for the fiscal year ending September 30, 1979, and $5,000,000 for the fiscal year ending September 30, 1980.

(b) There are also authorized to be appropriated to the Fund from time to time such amounts as may be necessary to carry out the purposes of the applicable provisions of this title, including the entering into contracts pursuant to section 306(b)(4) of this title, any disbursements of funds pursuant to section 309(a) of this title, and the issuance of notes or other obligations pursuant to section 309(e) of this title.

(c) Notwithstanding any other provision of this title, the authority to make contracts pursuant to section 306(b)(4) of this title, to make disbursements pursuant to section 309(a) of this title, to issue notes of other obligations pursuant to section 309(e) of this title, and to charge and collect fees pursuant to section 310(a) of this title shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this title.

(d) There are hereby authorized to be appropriated to the Fund such sums as may be necessary to reimburse the Fund for amounts paid for cleanup costs and damages in connection with discharges of oil caused by the negligent or intentional act of any department, agency, or instrumentality of the United States.

RELATIONSHIP TO OTHER LAW

SEC. 322. (a) Except as otherwise provided in this title, this title shall not be interpreted to preempt the field of liability or to preclude any State from imposing additional requirements or liability for any discharge of oil resulting in damages or cleanup costs within the jurisdiction of any State.

(b) Any person who receives compensation for damages or cleanup costs pursuant to this title shall be precluded from recovering compensation for the same damages or cleanup costs pursuant to any other State or Federal law. Any person who receives compensation for damages or cleanup costs pursuant to any other State or Federal law shall be precluded from receiving compensation for the same damages or cleanup costs under this title.

AMENDMENT OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MURPHY of New York: (To incorporate the relevant provisions of H.R. 6803 into Title III). On page 234, strike line 21 and all that follows through line 18 on page 264; and insert the following in lieu thereof:

"SEC. 301. For the purposes of this title, the term—

"(a) 'Secretary' means the Secretary of Transportation;

"(b) 'fund' means the fund established by section 302;

"(c) 'person' means an individual, firm, corporation, association, partnership, consortium, joint venture, or governmental entity;

"(d) 'incident' means any occurrence or series of related occurrences, involving one or more offshore facilities or vessels, or any combination thereof, which causes, or poses an imminent threat of oil pollution;

"(e) 'vessel' means every description of watercraft or other contrivance, whether or not self-propelled, which is operating in the waters above the Outer Continental Shelf (as the term 'Outer Continental Shelf' is defined in section 2(a) of the Outer Continental Shelf Lands Act (42 U.S.C. 1331(a))), and which is transporting oil directly from an offshore facility, and such term specifically excludes any watercraft or other contrivance which is operating in the navigable waters of the United States (as the term 'navigable waters' is defined in section 502 of the Federal Water Pollution Control Act (33 U.S.C. 1362));

"(f) 'public vessel' means a vessel which—

"(1) is owned or chartered by demise, and operated by (A) the United States, (B) a State or political subdivision thereof, or (C) a foreign government; and

"(2) is not engaged in commercial service;

"(g) 'ship' means either of the following types of vessels carrying oil in bulk as cargo:

"(1) a self-propelled vessel, or

"(2) a non-self-propelled vessel which is certificated to operate outside the internal waters of the United States;

"(h) 'facility' means a structure, or group of structures (other than a vessel or vessels), used for the purpose of transporting, drilling for, producing, processing, storing, transferring, or otherwise handling oil;

"(i) 'offshore facility' includes any oil refinery, drilling structure, oil storage or transfer terminal, or pipeline, or any appurtenance related to any of the foregoing, which is used to drill for, produce, store, handle, transfer, process, or transport oil produced from the Outer Continental Shelf (as the term Outer Continental Shelf is defined in section 2(a) of the Outer Continental Shelf Lands Act (42 U.S.C. 1331(a))), and is located on the Outer Continental Shelf, except that such term does not include (A) a vessel, of (B) deepwater port (as the term deepwater port is defined in section 3(10) of the Deepwater Port Act of 1974 (33 U.S.C. 1502));

(j) 'oil pollution' means—

(1) the presence of oil, either in an unlawful quantity or which has been discharged at an unlawful rate in or on the waters of the contiguous zone established by the United States under Article 24 of the Convention on the Territorial Sea and the Contiguous Zone (15 UST 1606); or

(2) the presence of oil in or on the waters of the high seas outside the territorial limits of the United States—

(A) when discharged in connection with activities conducted under the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1331 et seq.);

(B) causing injury to or loss of natural resources belonging to, appertaining to, or under the exclusive management authority of, the United States; or

(3) the presence of oil in or on the territorial sea, internal waters, or adjacent shoreline, of a foreign country, in a case where damages are recoverable by a foreign claimant under this title;

(k) 'United States claimant' means any person residing in the United States, the Government of the United States or an agency thereof, or the government of a State or a political subdivision thereof, who asserts a claim;

(l) 'foreign claimant' means any person residing in a foreign country, the government of a foreign country, or any agency or political subdivision thereof, who asserts a claim;

(m) 'United States' and 'State' include the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Canal Zone, Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Marianas, the Trust Territory of the Pacific Islands, and any other territory or possession over which the United States has jurisdiction;

(n) 'oil' means petroleum, including crude oil or any fraction or residue therefrom;

(o) 'cleanup costs' means costs of reasonable measures taken, after an incident has occurred, to prevent, minimize, or mitigate oil pollution from that incident;

(p) 'damages' means compensation sought pursuant to this title by any person suffering any direct and actual injury proximately caused by the discharge of oil from an offshore facility or vessel, except that such term does not include clean-up costs;

(q) 'person in charge' means the individual immediately responsible for the operation of a vessel or facility;

(r) 'claim' means a demand in writing for a sum certain;

(s) 'discharge' means any emission, intentional or unintentional, and includes spilling, leaking, pumping, pouring, emptying, or dumping;

(t) 'owner' means any person holding title to, or in the absence of title, any other indicia of ownership of, a vessel or offshore facility, whether by lease, permit, contract, license, or other form of agreement; or with respect to any facility abandoned without prior approval of the Secretary of the Interior, the person who owned such facility immediately prior to such abandonment; but does not include a person who, without participating in the management or operation of a vessel or offshore facility, holds indicia of ownership primarily to protect his security interest in the vessel or offshore facility;

(u) "operator" means—

(1) in the case of a vessel, a charterer by demise or any other person, except the owner, who is responsible for the operation, manning, victualing, and supplying of the vessel, or

(2) in the case of an offshore facility, any person, except the owner, responsible for the operation of the facility by agreement with the owner;

(v) "property" means littoral, riparian, or marine property;

(w) "removal costs" means—

(1) costs incurred under section 5 of the Intervention on the High Seas Act; and

(2) cleanup costs, other than the costs described in clause (1);

(x) "guarantor" means the person, other than the owner or operator, who provides evidence of financial responsibility for an owner or operator;

(y) "gross ton" means a unit of 100 cubic feet for the purpose of measuring the total unit capacity of a vessel; and

(z) "barrel" means 42 United States gallons at 60 degrees Fahrenheit.

FUND ESTABLISHMENT, ADMINISTRATIVE, AND FINANCING

SEC. 302. (a) There is hereby established in the Treasury of the United States an Offshore Oil Pollution Compensation Fund, not to exceed $200,000,000, except that such limitation shall be increased to the extent necessary to permit any moneys recovered or collected which are referred to in subsection (b)(2) and (3) of this section being paid into such fund. The fund shall be administered by the Secretary and the Secretary of the Treasury, as specified in this section. The fund may sue and be sued in its own name.

(b) The fund shall be constituted from—

(1) all fees collected pursuant to subsection (d);

(2) all moneys recovered on behalf of the fund under section 308; and

(3) all other moneys recovered or collected on behalf of the fund, under this title.

(c) In addition to the processing and settlement of claims under section 307, the fund shall be immediately available for the removal costs described in section 301(w)(1), and the Secretary is authorized to promulgate regulations designating the person or persons who may obligate available money in the fund for such purposes.

(d)(1) The Secretary shall levy and the Secretary of the Treasury shall collect a fee of not to exceed 3 cents per barrel on oil obtained from the Outer Continental Shelf, which shall be imposed on the owner of the oil when such oil is produced.

(2) The Secretary of the Treasury, after consulting with the Secretary, may promulgate reasonable rules and regulations relating to the collection of the fees authorized by paragraph (1) and, from time to time, the modification thereof. Modifications shall become effective on the date specified therein, but no earlier than the ninetieth day following the date the modifying regulation is published in the Federal Register. Any modification of the fee shall be designed to insure that the fund is maintained at a level not less than $100,000,000 and not more than $200,000,000. No regulation that modifies fees, nor any modification of such a regulation, whether or not in effect, may be stayed by any court pending completion of judicial review of that regulation or modification. No modified fees paid by any owner pending completion of judicial review of the modified fee regulation shall be repaid to such owner notwithstanding the final judicial determination.

(3)(A) Any person who fails to collect or pay fees as required by the regulations promulgated under paragraph (2) shall be liable for a civil penalty not to exceed $10,000, to be assessed by the Secretary of the Treasury, in addition to the fees required to be collected or paid and the interest on those fees at the rate the fees would have earned if collected or paid when due and invested in special obligations of the United States in accordance with subsection (e)(2). Upon the failure of any person so liable to pay any penalty, fee, or interest upon demand, the Attorney General may, at the request of the Secretary of the Treasury, bring an action in the name of the fund against that person for such amount.

(B) Any person who falsifies records or documents required to be maintained under any regulation promulgated under this subsection shall be subject to prosecution for a violation of section 1001 of title 18, United States Code.

(4) The Secretary of the Treasury may, by regulation, designate the reasonably necessary records and documents to be kept by persons from whom fees are to be collected pursuant to paragraph (1) of this subsection, and the Secretary of the Treasury and the Comptroller General of the United States shall have access to such required material for the purpose of audit and examination.

(e)(1) The Secretary shall determine the level of funding required for immediate access in order to meet potential obligations of the fund.

(2) The Secretary of the Treasury may invest any excess in the fund, above the level determined under paragraph (1), in interest-bearing special obligations of the United States. Such special obligations may be redeemed at any time in accordance with the terms of the special issue and pursuant to regulations promulgated by the Secretary of the Treasury. The interest on, and the proceeds from the sale of, any obligations held in the fund shall be credited to and form a part of the fund.

(f) If at any time the moneys available in the fund are insufficient to meet the obligations of the fund, the Secretary shall issue to the Secretary of the Treasury notes or other obligations in the forms and denominations, bearing the interest rates and maturities and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. Redemption of these notes or obligations shall be made by the Secretary from moneys in the fund. These notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of comparable maturity. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and, for that purpose, he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act. The purpose for which securities may be issued under that Act are extended to include any purchase of these notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of these notes or other obligations shall be treated as public debt transactions of the United States.

DAMAGES AND CLAIMANTS

SEC. 303. (a) Claims for damages for economic loss, arising out of or directly resulting from oil pollution, may be asserted for—

(1) removal costs;

(2) injury to, or destruction of, real or personal property;

(3) loss of use of real or personal property;

(4) injury to, or destruction of, natural resources;

(5) loss of use of natural resources;

(6) loss of profits or impairment of earning capacity due to injury or destruction of real or personal property or natural resources; and

(7) loss of tax revenue for a period of one year due to injury to real or personal property.

(b) A claim authorized by subsection (a) may be asserted—

(1) under item 1, by any claimant: *Provided*, That the owner or operator of a vessel of offshore facility involved in an incident may assert such a claim only if he can show that he is entitled to a defense to liability under section 304(c)(1) or 304(c)(2) or, if not entitled to such a defense to liability, that he is entitled to a limitation of liability under section 304(b): *Provided further*, That where he is not entitled to such a defense to liability but entitled to such a limitation of liability, such claim may be asserted only as to the removal costs incurred in excess of that limitation;

(2) under items 2, 3, and 5, by any United States claimant, if the property involved is owned or leased, or the natural resource involved is utilized, by the claimant;

(3) under item 4, by the President, as trustees for natural resources over which the United States Government has sovereign rights or exercises exclusive management authority; or by any State for natural resources within the boundary of the State belonging to, managed by controlled by, or appertaining to the State: Provided, That compensation paid under this item shall be used only for the restoration of the natural resources damaged or for acquisition of equivalent resources;

(4) under item 6, by any United States claimant if the claimant derives at least 25 per centum of his earnings from activities which utilize the property or natural resource;

(5) under item 7, by any State or political subdivision thereof;

(6) under items 2 through 7, by a foreign claimant to the same extent that a United States claimant may assert a claim if—

(A) the oil pollution occurred (1) in the navigable waters or (2) in or on the territorial sea or adjacent shoreline of a foreign country of which the claimant is a resident;

(B) the claimant is not otherwise compensated for his loss;

(C) the oil was discharged from an offshore facility or from a vessel in connection with activities conducted under the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1331 et seq.) and

(D) recovery is authorized by a treaty or an executive agreement between the United States and the foreign country involved, or if the Secretary of State, in consultation with the Attorney General and other appropriate officials, certifies that such country provides a comparable remedy for United States claimants.

(7) under any item, by the Attorney General, on his own motion or at the request of the Secretary, on behalf of any group of United States claimants who may assert a claim under this subsection, when he determines that the claimants would be more adequately represented as a class in asserting their claims.

(c) If the Attorney General fails to take action under clause (7) of subsection (b) within sixty days of the date on which the Secretary designates a source under section 306 any member of a group may maintain a class action to recover damages on behalf of that group. Failure of the Attorney General to take action shall have no bearing on any class action maintained by any claimant for damages authorized by this section.

(d) If the number of members of a class in an action brought under subsection (b)(7) or subsection (c) exceeds one thousand, publication of notice of such action in local newspapers of general circulation in the areas in which the damaged persons reside shall be deemed to fulfill the requirement for public notice established by rule 23(c)(2) of the Federal Rules of Civil Procedure.

LIABILITY

SEC. 304. (a) Subject to the provisions of subsections (b) and (c), the owner and operator of a vessel other than a public vessel, or of an offshore facility, which is the source of oil pollution, or poses a threat of oil pollution in circumstances which justify the incurrence of the type of costs described in section 301(w)(1) of this title, shall be jointly, severally, and strictly liable for all damages for which a claim may be asserted under section 303.

(b) Except when the incident is caused primarily by willful misconduct or gross

negligence, within the privity or knowledge of the owner or operator; or is caused primarily by a violation, within the privity or knowledge of the owner or operator, of applicable safety, construction, or operating standards or regulations of the Federal Government; or except when the owner or operator fails or refuses to provide all reasonable cooperation and assistance requested by the responsible Federal official in furtherance of cleanup activities, the total of the liability under subsection (a) and any removal costs incurred by, or on behalf of, the owner or operator shall be limited to—

(1) in the case of a vessel, $250,000 or $300 per gross ton (up to a maximum of $30,000,000), whichever is greater; or

(2) in the case of an offshore facility operated under authority of the Outer Continental Shelf Lands Act, the total of removal and cleanup costs, and other damages up to $35,000,000.

(c) There shall be no liability under subsection (a)—

(1) where the incident is caused primarily by an act of war, hostilities, civil war, or insurrection, or by a natural phenomenon of an exceptional, inevitable, and irresistible character;

(2) to the extent that the incident is caused by an act or omission of a person other than—

(A) the claimant,

(B) the owner or operator,

(C) an employee or agent of the claimant, the owner, or the operator, or

(D) one whose act or omission occurs in connection with a contractual relationship with the claimant, the owner, or the operator;

(3) as to a particular claimant, where the incident or the economic loss is caused, in whole or in part, by the gross negligence or willful misconduct of that claimant; or

(4) as to a particular claimant, to the extent that the incident or economic loss is caused by the negligence of that claimant.

(d) The Secretary shall, from time to time, report to Congress on the desirability of adjusting the monetary limitation of liability specified in subsection (b).

(e)(1) Subject to the provisions of paragraph (2) hereof, the fund shall be liable, without any limitation, for all damages for which a claim may be asserted under section 303, to the extent that the loss is not otherwise compensated.

(2) Except for the removal costs specified in clause (1) of section 301(w), there shall be no liability under paragraph (1) hereof—

(A) where the incident is caused primarily by an act of war, hostilities, civil war, or insurrection;

(B) as to a particular claimant, where the incident or economic loss is caused, in whole or in part, by the gross negligence or willful misconduct of that claimant; or

(C) as to a particular claimant, to the extent that the incident or economic loss is caused by the negligence of that claimant.

(f)(1) In addition to the damages for which claims may be asserted under section 303, and without regard to the limitation of liability provided in section 304(b), the owner, operator, or guarantor shall be liable to the claimant for interest on the amount paid in satisfaction of the claim for the period from the date upon which the claim was presented to such person to the date upon which the claimant is paid, inclusive, less the period, if any, from the date upon which the owner, operator, or guarantor shall offer to the claimant an amount equal to or greater than that finally paid in satisfaction of the claim to the date upon which the claimant shall accept that amount, inclusive. However, if the owner, operator, or guarantor shall offer to the claimant, within sixty days of the date upon which the claim was presented, or of the date upon which advertising was commenced pursuant to section 306, whichever is later, an amount equal to or greater than that finally paid in satisfaction of the claim, the owner, operator, or guarantor shall be liable for the interest provided in this paragraph only from the date the offer was accepted by the claimant to the date upon which payment is made to the claimant, inclusive.

(2) The interest provided in paragraph (1) shall be calculated at the average of the highest rate for commercial and finance company paper of maturities of one hundred and eighty days or less obtaining on each of the days included within the period for which interest must be paid to the claimant, as published in the Federal Reserve Bulletin.

(g) No indemnification, hold harmless, or similar agreement shall be effective to transfer from the owner or operator of a facility, to any other person, the liability imposed under subsection (a) hereof, other than as specified in this title.

(h) Nothing in this title, including the provisions of subsection (g) hereof, shall bar a cause of action that an owner or operator, subject to liability under subsection (a), or a guarantor, has or would have, by reason of subrogation or otherwise, against any person.

(i) To the extent that they are in conflict with, or otherwise inconsistent with, any other provisions of law relating to liability or the limitation thereof, the provisions of this section shall supersede all such other provisions of law, including those of section 4283 (a) of the Revised Statutes, as amended (46 U.S.C. 183(a)).

FINANCIAL RESPONSIBILITY

SEC. 305. (a)(1) The owner or operator of any vessel (except a non-self-propelled barge that does not carry oil as fuel or cargo), which uses an offshore facility shall establish and maintain, in accordance with regulations promulgated by the President, evidence of financial responsibility sufficient to satisfy the maximum amount of liability to which the owner or operator of such vessel would be exposed in a case where he would be entitled to limit his liability in accordance with the provisions of section 304(b) of this title. Financial responsibility may be established by any one, or any combination, of the following methods, acceptable to the President: evidence of insurance, guarantee, surety bond, or qualification as a self-insurer. Any bond filed shall be issued by a bonding company authorized to do business in the United States. In cases where an owner or operator owns, operates, or charters more than one vessel subject to this subsection, evidence of financial responsibility need be established only to meet the maximum liability applicable to the largest of such vessels.

(2) The Secretary of the Treasury shall refuse the clearance required by section 4197 of the Revised Statutes of the United States to any vessel, subject to this subsection, which does not have certification furnished by the President that the financial responsibility provisions of paragraph (1) of this subsection have been complied with.

(3) The Secretary, in accordance with regulations promulgated by him shall have access to all offshore facilities and vessels conducting activities under the Outer Continental Shelf Lands Act; and such facility or vessel shall, upon request, show certification of financial responsibility.

(b) The owner or operator of a facility which (1) is used for drilling for, producing, or processing oil, or (2) has the capacity to transport, store, transfer, or otherwise handle more than one thousand barrels of oil at any one time, shall establish and maintain, in accordance with regulations promulgated by the Secretary, evidence of financial responsibility sufficient to satisfy the maximum amount of liability to which the owner or operator of the facility would be exposed, in a case where he would be entitled to limit his liability, in accordance with the provisions of section 304(b) of this title, or $35,000,000, whichever is less.

(c) Any claim authorized by section 303(a) may be asserted directly against any guarantor providing evidence of financial responsibility as required under this section. In defending such claim, the guarantor shall be entitled to invoke all rights and defenses which would be available to the owner or operator under this title. He shall also be entitled to invoke the defense that the incident was caused by the willful misconduct of the owner or operator, but shall not be entitled to invoke any other defense which he might have been entitled to invoke in proceedings brought by the owner or operator against him.

(d) The President shall conduct a study to determine (1) whether adequate private oil pollution insurance protection is available on reasonable terms and conditions to the owners and operators of vessels, and offshore facilities subject to liability under section 304, and (2) whether the market for such insurance is sufficiently competitive to assure purchasers of features such as a reasonable range of deductibles, co-insurance provisions and exclusions. The President shall submit the results of his study, together with his recommendations, within one year of the date of enactment of this Act, and shall submit an interim report on his study within three months of the date of enactment of this Act.

NOTIFICATION, DESIGNATION, AND ADVERTISEMENT

SEC. 306. (a) The person in charge of a vessel or offshore facility, which is involved in an incident, shall immediately notify the Secretary of the incident, as soon as he has knowledge thereof. Notification received pursuant to this subsection or information obtained by the exploitation of such notification shall not be used against any such person of his employer in any criminal case, other than a case involving prosecution for perjury or for giving a false statement.

(b)(1) When the Secretary receives information, pursuant to subsection (a) or otherwise, of an incident which involves oil pollution, the Secretary shall, where possible, designate the source or sources of the oil pollution and shall immediately notify the owner and operator of such source, and the guarantor, of that designation.

(2) When a source designated under paragraph (1) is a vessel or offshore facility, and the owner, operator, or guarantor fails to inform the Secretary, within five days after receiving notification of the designation, of his denial of such designation, such owner, operator or guarantor, as required by regulations promulgated by the Secretary, shall advertise the designation and the procedures by which claims may be presented to him. If advertisement is not otherwise made in accordance with this paragraph, the Secretary shall, as he finds necessary, and at the expense of the owner, operator, or guarantor involved, advertise the designation and the procedures by which claims may be presented to that owner, operator, or guarantor.

(c) In a case where—

(1) the owner, operator, and guarantor all deny a designation in accordance with paragraph (2) of subsection (b),

(2) the source of the discharge was a public vessel or

(3) the Secretary is unable to designate the source or sources of the discharge under paragraph (1) of subsection (b),

the Secretary shall advertise or otherwise notify potential claimants of the procedures by which claims may be presented to the fund.

(d) Advertisement under subsection (b) shall commence no later than fifteen days from the date of the designation made there-

under to continue for a period of no less than thirty days.

CLAIMS SETTLEMENT

SEC. 307. (a) Except as provided in subsection (b), all claims shall be presented to the owner, operator, or guarantor.

(b) All claims shall be presented to the fund—

(1) Where the Secretary has advertised or otherwise notified claimants in accordance with section 306 (c), or

(2) where the owner or operator may recover under the provisions of section 303 (b) (1).

(c) In the case of a claim presented in accordance with subsection (a), and in which—

(1) the person to whom the claim is presented denies all liability for the claim, for any reason, or

(2) the claim is not settled by any person by payment to the claimant within sixty days of the date upon which (A) the claim was presented, or (B) advertising was commenced pursuant to section 306(b)(2), whichever is later,

the claimant may elect to commence an action in court against the owner, operator, or guarantor, or to present the claim to the fund, that election to be irrevocable and exclusive.

(d) In the case of a claim presented in accordance with subsection (a), where full and adequate compensation is unavailable, either because the claim exceeds a limit of liability invoked under section 304(b) or because the owner, operator, and guarantor are financially incapable of meeting their obligations in full, a claim for the uncompensated damages may be presented to the fund.

(e) In the case of a claim which has been presented to any person, pursuant to subsection (a), and which is being presented to the fund, pursuant to subsection (c) or (d), such person, at the request of the claimant, shall transmit the claim and supporting documents to the fund. The Secretary may, by regulation, prescribe the documents to be transmitted and the terms under which they are to be transmitted.

(f) In the case of a claim presented to the fund, pursuant to subsection (b), (c), or (d), and in which the fund—

(1) denies all liability for the claim, for any reason, or

(2) does not settle the claim by payment to the claimant within sixty days of the date upon which (A) the claim was presented to the fund or (B) advertising was commenced pursuant to section 306(c), whichever is later,

the claimant may submit the dispute to the Secretary for decision in accordance with section 554 of title 5, United States Code. However, a claimant who has presented a claim to the fund pursuant to subsection (b) may elect to commence an action in court against the fund in lieu of submission of the dispute to the Secretary for decision, that election is to be irrevocable and exclusive.

(g) (1) The Secretary shall promulgate regulations which establish uniform procedures and standards for the appraisal and settlement of claims against the fund.

(2) Except as provided in paragraph (3), the Secretary shall use the facilities and services of private insurance and claims adjusting organizations or State agencies in processing claims against the fund and may contract to pay compensation for those facilities and services. Any contract made under the provisions of this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), upon a showing by the Secretary that advertising is not reasonably practicable. The Secretary may make advance payments to a contractor for services and facilities, and the Secretary may advance to the contractor funds to be used for the payment of claims. The Secretary may review and audit claim payments made pursuant to this subsection. A payment to a claimant for single claim in excess of $100,000, or two or more claims aggregating in excess of $200,000, shall be first approved by the Secretary. When the services of a State agency are used in processing and settling claims, no payment may be made on a claim asserted by or on behalf of that State or any of its agencies or subdivisions unless the payment has been approved by the Secretary.

(3) To the extent necessitated by extraordinary circumstances, where the services of such private organizations or State agencies are inadequate, the Secretary may use Federal personnel to process claims against the fund.

(h) Without regard to subsection (b) of section 556 of title 5, United States Code, the Secretary is authorized to appoint, from time to time for a period not to exceed one hundred and eighty days, one or more panels, each comprised of three individuals, to hear and decide disputes submitted to the Secretary pursuant to subsection (f). At least one member of each panel shall be qualified in the conduct of adjudicatory proceedings and shall preside over the activities of the panel. Each member of a panel shall possess competence in the evaluation and assessment of property damage and the economic losses resulting therefrom. Panel members may be appointed from private life or from any Federal agency except the staff administering the fund. Each panel member appointed from private life shall receive a per diem compensation, and each panel member shall receive necessary traveling and other expenses while engaged in the work of a panel. The provisions of chapter 11 of title 18, United States Code, and of Executive Order 11222, as amended, regarding special government employees, apply to panel members appointed from private life.

(i) (1) Upon receipt of a request for decision from a claimant, properly made, the Secretary shall refer the dispute to (A) an administrative law judge, appointed under section 3105 of title 5, United States Code or (B) a panel appointed under subsection (h).

(2) The administrative law judge and each member of a panel to which a dispute is referred for decision shall be a resident of the United States judicial circuit within which the damage complained of occurred, or, if the damage complained of occurred within two or more circuits, of any of the affected circuits, or, if the damage occurred outside any circuit of the nearest circuit.

(3) Upon receipt of a dispute, the administrative law judge or panel shall adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code. In any proceeding subject to this subsection, the presiding officer may require by subpena any person to appear and testify or to appear and produce books, papers, documents, or tangible things at a hearing or deposition at any designated place. Subpenas shall be issued and enforced in accordance with procedures in subsection (d) of section 555 of title 5, United States Code, and rules promulgated by the Secretary. If a person fails or refuses to obey a subpena, the Secretary may invoke the aid of the district court of the United States where the person is found, resides, or transacts business in requiring the attendance and testimony of the person and the production by him of books, papers, documents, or any tangible things.

(4) A hearing conducted under this subsection shall be conducted within the United States judicial district within which, or nearest to which, the damage complained of occurred, or, if the damage complained of occurred within two or more districts, in any of the affected districts, or, if the damage occurred outside any district, of the nearest district.

(5) The decision of the administrative law judge or panel under this subsection shall be the final order of the Secretary, except that the Secretary, in his discretion and in accordance with rules which he may promulgate, any review the decision upon his own initiative or upon exception of the claimant or the fund.

(6) Final orders of the Secretary made under this subsection shall be reviewable pursuant to section 702 of title 5, United States Code, in the district courts of the United States.

(j) (1) In any action brought against an owner, operator, or guarantor, both the plaintiff and defendant shall serve a copy of the complaint and all subsequent pleadings therein upon the fund at the same time those pleadings are served upon the opposing parties.

(2) The fund may intervene in the action as a matter of right.

(3) In any action to which the fund is a party, if the owner, operator, or guarantor admits liability under this title, the fund upon its motion shall be dismissed therefrom to the extent of the admitted liability.

(4) If the fund receives from either the plaintiff or the defendant notice of such an action, the fund shall be bound by any judgment entered therein, whether or not the fund was a party to the action.

(5) If neither the plaintiff nor the defendant gives notice of such an action to the fund, the limitation of liability otherwise permitted by section 304(b) of this title is not available to the defendant, and the plaintiff shall not recover from the fund any sums not paid by the defendant.

(k) In any action brought against the fund, the plaintiff may join any owner, operator, or guarantor, and the fund may implead any person who is or may be liable to the fund under any provision of this title.

(l) No claim may be presented, nor may an action be commenced for damages recoverable under this title, unless that claim is presented to, or that action is commenced against, the owner, operator, or guarantor, or against the fund, as to their respective liabilities, within three years from the date of discovery of the economic loss for which a claim may be asserted under section 303(a), or within six years of the date of the incident which resulted in that loss, whichever is earlier.

SUBROGATION

SEC. 308. (a) Any person or governmental entity, including the fund, who shall pay compensation to any claimant for an economic loss, compensable under section 303, shall be subrogated to all rights, claims, and causes of action which that claimant has under this title.

(b) Upon request of the Secretary, the Attorney General may commence an action, on behalf of the fund, for the compensation paid by the fund to any claimant pursuant to this title. Such an action may be commenced against any owner, operator, or guarantor, or against any other person or governmental entity, who is liable, pursuant to any law, to the compensated claimant or to the fund, for damages for which the compensation was paid.

(c) In all claims or actions by the fund against any owner, operator, or guarantor, pursuant to the provisions of subsections (a) and (b), the fund shall recover—

(1) for a claim presented to the fund (where there has been a denial of source designation) pursuant to section 307(b)(1), or (where there has been a denial of liability) pursuant to section 307(c)(1)—

(A) subject only to the limitation of liability to which the defendant is entitled under section 304(b), the amount the fund has paid to the claimant, without reduction;

(B) interest on that amount, at the rate calculated in accordance with section 304(g)

(2), from the date upon which the claim was presented by the claimant to the defendant to the date upon which the fund is paid by the defendant, inclusive, less the period, if any, from the date upon which the fund shall offer to the claimant the amount finally paid by the fund to the claimant in satisfaction of the claim against the fund to the date upon which the claimant shall accept that offer, inclusive; and

(C) all costs incurred by the fund by reason of the claim, both the claimant against the fund and the fund against the defendant, including, but not limited to, processing costs, investigating costs, court costs, and attorneys' fees; and

(2) for a claim presented to the fund pursuant to section 307(c)(2)—

(A) in which the amount the fund has paid to the claimant exceeds the largest amount, if any, the defendant offered to the claimant in satisfaction of the claim of the claimant against the defendant—

(i) subject to dispute by the defendant as to any excess over the amount offered to the claimant by the defendant, the amount the fund has paid to the claimant;

(ii) interest, at the rate calculated in accordance with section 304(g)(2), for the period specified in clause (1) of this subsection; and

(iii) all costs incurred by the fund by reason of the claim of the fund against the defendant, including, but not limited to, processing costs, investigating costs, court costs, and attorneys' fees; or

(B) in which the amount the fund has paid to the claimant is less than or equal to the largest amount the defendant offered to the claimant in satisfaction of the claim of the claimant against the defendant—

(i) the amount of the fund has paid to the claimant, without reduction;

(ii) interest, at the rate calculated in accordance with section 304(g)(2), from the date upon which the claim was presented by the claimant to the defendant to the date upon which the defendant offered to the claimant the largest amount referred to in this subclause; *Provided*, That if the defendant tendered the offer of the largest amount referred to in this subclause within sixty days of the date upon which the claim of the claimant was either presented to the defendant or advertising was commenced pursuant to section 306, the defendant shall not be liable for interest for that period; and

(iii) interest from the date upon which the claim of the fund against the defendant was presented to the defendant to the date upon which the fund is paid, inclusive, less the period, if any, from the date upon which the defendant shall offer to the fund the amount finally paid to the fund in satisfaction of the claim of the fund to the date upon which the fund shall accept that offer, inclusive.

(d) The fund shall pay over to the claimant that portion of any interest the fund shall recover, pursuant to clause (1) and subclause (A) of clause (2) of subsection (c), for the period from the date upon which the claim of the claimant was presented to the defendant to the date upon which the claimant was paid by the fund, inclusive, less the period from the date upon which the fund offered to the claimant the amount finally paid to the claimant in satisfaction of the claim to the date upon which the claimant shall accept that offer, inclusive.

(e) The fund is entitled to recover for all interest and claim of the claimant was either presented to the defendant or advertising was commenced pursuant to section 306, the defendant shall not be liable for interest for that period; and

(iii) interest from the date upon which the claim of the fund against the defendant was presented to the defendant to the date upon which the fund is paid, inclusive, less the period, if any, from the date upon which the defendant shall offer to the fund the amount finally paid to the fund in satisfaction of the claim of the fund to the date upon which the fund shall accept that offer, inclusive.

(d) The fund shall pay over to the claimant that portion of any interest the fund shall recover, pursuant to clause (1) and subclause (A) of clause (2) of subsection (c), for the period from the date upon which the claim of the claimant was presented to the defendant to the date upon which the claimant was paid by the fund, inclusive, less the period from the date upon which the fund offered to the claimant the amount finally paid to the claimant in satisfaction of the claim to the date upon which the claimant shall accept that offer, inclusive.

(e) The fund is entitled to recover for all interest and costs specified in subsection (c) without regard to any limitation of liability to which the defendant may otherwise be entitled.

JURISDICTION AND VENUE

SEC. 309. (a) The United States district courts shall have exclusive original jurisdiction over all controversies arising under this title, without regard to the citizenship of the parties or the amount in controversy.

(b) Venue shall lie in any district wherein the injury complained of occurred, or wherein the defendant resides, may be found, or has his principal office. For the purposes of this section, the fund shall reside in the District of Columbia.

PREEMPTION

SEC. 310. (a) Except as provided in this title—

(1) no action may be brought in any court of the United States, or of any State or political subdivision thereof, for damages for an economic loss described in section 303(a), a claim for which may be asserted under this title, and

(2) no person may be required to contribute to any fund, the purpose of which is to pay compensation for such a loss, nor to establish or maintain evidence of financial responsibility relating to the satisfaction of a claim for such a loss

(b) Nothing in subsection (a) shall preclude any State from imposing a tax or fee upon any person or upon oil in order to finance the purchase and pre-positioning of oil pollution cleanup and removal equipment.

(c) Nothing in subsection (a) shall prohibit an action by the fund, under any other provision of law, to recover compensation paid pursuant to this title.

PROHIBITION

SEC. 311. The discharge of oil from any offshore facility or vessel, in quantities which the President under section 311(b) of the Federal Water Pollution Control Act (33 U.S.C. 1321(b)) determines to be harmful is prohibited.

PENALTIES

SEC. 312. (a)(1) Any person who fails to comply with the requirements of section 305, the regulations promulgated thereunder, or any denial or detention order, shall be subject to to a civil penalty of not more than $10,000.

(2) Such penalty may be assessed and compromised by the President or his designee, in connection with section 305(a)(1), and by the Secretary, in connection with section 305(a)(3) and section 305(b). No penalty shall be assessed until notice and an opportunity for hearing on the alleged violation have been given. In determining the amount of the penalty or the amount agreed upon in compromise, the demonstrated good faith of the party shall be taken into consideration.

(3) At the request of the official assessing the penalty, the Attorney General may bring an action in the name of the fund to collect the penalty assessed.

(b) Any person in charge, subject to the jurisdiction of the United States, who fails to give the notification required by section 306(a) shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than one year, of both.

AUTHORIZATION OF APPROPRIATIONS

SEC. 313. (a) There is authorized to be appropriated for the administration of this title $10,000,000, for the fiscal year ending September 30, 1979, $5,000,000 for the fiscal year ending September 30, 1980, and $5,000,000, for the fiscal year ending September 30, 1981.

(b) There are also authorized to be appropriated to the Fund from time to time such amounts as may be necessary to carry out the purposes of the applicable provisions of this title, including the entering into contracts, any disbursements of funds, and the issuance of notes or other obligations pursuant to section 302(f) of this title.

(c) Notwithstanding any other provision of this title, the authority to make contracts, to make disbursements, to issue notes of other obligations pursuant to section 302(f) of this title, and to charge and collect fees pursuant to section 302(d) of this title or to exercise any other spending authority shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this title.

ANNUAL REPORT

SEC. 314. Within six months after the end of each fiscal year, the Secretary shall submit to the Congress (1) a report on the administration of the fund during such fiscal year, and (2) his recommendations for such legislative changes as he finds necessary or appropriate to improve the management of the fund and the administration of the liability provisions of this title.

SEC. 315. (a) This section, subsection (d) of section 305, section 316, and all provisions of this title authorizing the delegation of authority or the promulgation of regulations shall be effective on the date of enactment of this Act.

(b) All other provisions of this title, and the regulations applicable thereto shall be effective on the one hundred and eightieth day after the date of enactment of this Act.

SEC. 316. If any provision of this Act or the applicability thereof is held invalid, the remainder of this Act shall not be affected thereby."

Mr. MURPHY of New York (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MURPHY of New York. Mr. Chairman, this amendment, which was introduced by the gentleman from Massachusetts (Mr. STUDDS), deals with a problem that the House dealt with very, very favorably in the last Congress. In fact, on September 12 of last year by a vote of 332 to 59 the House adopted a comprehensive oil pollution liability and compensation bill. That legislation is presently in the Senate awaiting Senate action. What we wanted to do was, because there was no comprehensive oil spill program for the Outer Continental Shelf, what we have done is taken the language of H.R. 6803

and request that the Committee adopt it as the language in H.R. 1614, so that there would be consistency with that legislation when it finally goes through the legislative process; but pending completion of action by the Senate of this bill, we feel this is necessary in H.R. 1614.

Mr. Chairman, I ask unanimous consent to substitute a committee amendment for title III of the bill, which establishes an offshore oil spill pollution fund.

No comprehensive national legislation presently exists for responsibility and liability for the effects of oil pollution resulting from OCS activities.

Title III provides the procedures to be followed in the event of an oil spill and compensation for cleanup costs and damages resulting from such a spill. The title applies to spills from any offshore facility operating in the OCS and any transportation device, while in OCS waters, including vessels for the delivery of the oil and gas from the offshore facility.

One need only to allude to such disasters as the recent North Sea oil platform blowout, the *Argo Merchant* oilspill, the Santa Barbara blowout and the *Torrey Canyon* oilspill to illustrate urgent need for a comprehensive offshore oilspill pollution fund. Such fund would provide expeditious relief for damages caused by OCS activities.

The committee strongly supports comprehensive legislation to establish a system of liability and compensation for oilspill damage. Title III received wide support in testimony before the committee, including environmental groups, State and local officials, and the administration. However, the administration did express a preference for the comprehensive oil pollution liability and compensation bill, H.R. 6803, reported by the Committees on Merchant Marine and Fisheries and Public Works and Transportation. H.R. 6803 passed the House under suspension of the rules by an overwhelming vote of 332 to 59 on September 12, 1977. The measure has been referred to the Senate Committees on Commerce, Science and Transportation and Environment and Public Works.

I and the rest of the OCS Committee overwhelmingly support a comprehensive approach to the problems of oilspill liability and compensation and hope that the Senate will act promptly on H.R. 6803 so that such legislation is enacted.

Since Senate action is not, unfortunately, imminent, some provision must therefore be made to provide for liability and compensation for, at the least, OCS and OCS-related oil pollution and damages. I, therefore, offer this amendment, retaining title III on oil pollution liability and compensation but adopting and incorporating those provisions of the comprehensive bill passed by the House, which relate to the scope of H.R. 1614 and the jurisdiction of the OCS Committee. If comprehensive legislation is passed, these provisions will easily "fold into" the comprehensive approach. If no such bill is enacted, citizens and businesses will be at least assured of the protection of the comprehensive bill as they affect OCS and OCS-related spills.

The new title III changes are largely technical in nature; they have been reviewed by the minority; and I know of no objection. Certain changes in the authorization language have been made to conform with the Budget Act, pursuant to an agreement with the chairman of the Budget Committee.

Title III establishes an offshore oil pollution compensation fund within the Department of Transportation. The fund would be supported by a fee of up to three cents per barrel of oil produced on the OCS, until the account totals at least $100 million and not more than $200 million. The fund will cover cleanup costs, payment of claims, and other administrative and personnel expenses. Authorization is provided for the appropriation of $10 million for fiscal year 1979, and $5 million for each of the two following fiscal years for the administration of the title.

A summary of major changes and the correspondence with the chairman of the Budget Committee follow; as well as the amendment:

First. In the case of a vessel, the extent of liability has been changed to $250,000, or $300 per gross ton, up to a maximum of $30 million, whichever is greater.

Second. To conform with the Congressional Budget and Impoundment Control Act of 1974, the $10 million authorization of appropriations for the administration of title III has been changed to the fiscal year ending September 30, 1979. Authorizations of $5 million each are provided for the following 2 fiscal years.

Third. The penalty for failure to comply with financial responsibility requirements has been reduced to $10,000, as in H.R. 6803.

Fourth. The $500,000,000 limit on borrowing authority on the part of the fund has been removed.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Massachusetts.

Mr. STUDDS. Mr. Chairman, I think it makes eminently good sense to conform this title to what we all hope will become law very, very soon. I fully support the chairman's conforming amendment.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, can the gentleman tell me, does this amendment we have before us track verbatim the bill that passed the House?

Mr. MURPHY of New York. Yes. It is in effect the bill that passed the House limited, of course, to the OCS areas.

Mr. FISH. Could the gentleman inform us of the status of the legislation pending in the Senate?

Mr. MURPHY of New York. Well, it is in the Commerce Committee of the Senate.

Mr. FISH. In the conference committee?

Mr. MURPHY of New York. No; in the Commerce Committee.

Mr. FISH. Are the prospects good for passage of that?

Mr. MURPHY of New York. Yes; the legislation is supported by the administration; however, the workload priority of that body is different than here and we feel with this legislation moving on schedule and the Senate having completed action on S. 9 it is appropriate to conform this to the prior action of the House.

Mr. FISH. Mr. Chairman, I think the gentleman.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, is the gentleman's amendment in the nature of a substitute for title III?

Mr. MURPHY of New York. Yes, it is to title III.

AMENDMENT OFFERED BY MR. WIGGINS TO THE AMENDMENT OFFERED BY MR. MURPHY OF NEW YORK

Mr. WIGGINS. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. WIGGINS to the amendment offered by Mr. MURPHY of New York: On page 13, strike out lines 12 through 18.

Mr. WIGGINS. Mr. Chairman, for the benefit of the majority, this is the amendment that was submitted yesterday for your examination. The effect of it is to strike language in the gentleman's substitute which is identical to language found in section 315(c) on page 260 of the bill.

Mr. MURPHY of New York. Mr. Chairman, if the gentleman will yield, I agree with my colleague, the gentleman from California, that it is a technical and conforming amendment and we are happy to accept it.

Mr. WIGGINS. Well, Mr. Chairman, I do not wish to mislead my colleague. It may not be conforming. It may be technical, but in all events, it is necessary.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, we are glad to accept the amendment.

Mr. WIGGINS. Mr. Chairman, as long as there are no other questions, I will reserve the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. WIGGINS) to the amendment offered by the gentleman from New York (Mr. MURPHY).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from New York (Mr. MURPHY), as amended.

The amendment, as amended, was agreed to.

The CHAIRMAN. The Clerk will now designate the title pending:

The Clerk read as follows:

TITLE IV—AMENDMENTS TO THE COASTAL ZONE MANAGEMENT ACT OF 1972

AMENDMENTS TO THE COASTAL ZONE MANAGEMENT ACT OF 1972

SEC. 401. (a) Paragraph (2) of section 308 (b) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(b)(2)) is amended—

(1) by striking out "The amounts" and inserting in lieu thereof "Subject to paragraph (3) of this subsection, the amounts";

(2) by striking out "(A), (B), (C), and (D)" and inserting in lieu thereof "(A) and (B)";

(3) in subparagraph (A), by striking out "one-third" and inserting in lieu thereof "one-half";

(4) by striking out subparagraph (B);

(5) by relettering subparagraph (C), and any references thereto, as subparagraph (B), and by striking out "one-sixth" in such subparagraph and inserting in lieu thereof "one-half"; and

(6) by striking out subparagraph (D).

(b) Such section 308(b) is amended—

(1) by renumbering paragraphs (3) through (5), and any references thereto, as paragraphs (4) through (6), respectively; and

(2) by inserting after paragraph (2) the following new paragraph:

"(3)(A) The Secretary shall not make grants under this subsection to any state in any fiscal year the total of which exceeds 30 per centum of the total amount available to the Secretary for payment to all states in such fiscal year.

"(B)(i) If, in any fiscal year, any coastal state will not receive a grant under subparagraph (A) or (B) of paragraph (2), the Secretary shall make a grant to such coastal state in an amount equal to 2 per centum of the total amount available for making grants to all states under such paragraph (2) in such fiscal year if any other coastal state in the same region is receiving a grant under either such subparagraph in such fiscal year.

"(ii) For purposes of this subparagraph—

"(I) the states of Connecticut, Delaware, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, and Virginia (the Atlantic coastal states) shall constitute one 'region';

"(II) the states of Alabama, Florida, Louisiana, Mississippi, and Texas (the Gulf coastal states) shall constitute one 'region';

"(III) the states of California, Oregon, and Washington (the Pacific coastal states) shall constitute one 'region'; and

"(IV) the state of Alaska shall constitute one 'region'.

"(C) If, in any fiscal year, the total amount of funds available for making grants to coastal states pursuant to this subsection is greater than the total amount of grants payable to such states pursuant to this subsection, the difference between such two amounts shall remain in the Treasury of the United States and be credited to miscellaneous receipts.

"(D) If, in any fiscal year, the total amount of funds available for making grants to coastal states pursuant to this subsection is less than the total amount of grants payable to all coastal states pursuant to this subsection, there shall be deducted from the amount payable to each coastal state an amount equal to the product of—

"(i) the amount by which the total amount of grants payable to all coastal states exceeds the total amount of funds available for such grants; multiplied by

"(ii) a fraction, the numerator of which is the amount of grants payable to such coastal state in such fiscal year and the denominator of which is the total amount of grants payable to all coastal states in such fiscal year.".

(c) Paragraph (5)(B)(i) of such section 308(b) (as renumbered by subsection (b) of this section) is amended—

(1) by striking out "necessary, because of the unavailability of adequate financing under any other subsection," and inserting in lieu thereof "necessary"; and

(2) by striking out "new or expanded".

(d) Paragraph (6) of such section 308(b) (as renumbered by subsection (b) of this section) is amended to read as follows:

"(6) After making the calculations provided in paragraphs (2) and (3) of this subsection, the Secretary shall require each coastal state which is to receive grants under this subsection to provide adequate assurances of being able to return to the United States any funds to which paragraph (8) of this subsection may apply. After obtaining such assurances, the Secretary shall disburse the proceeds of such grants to such coastal state.

"(7) Any coastal state which receives proceeds of any grant under this subsection only may expend or commit such proceeds—

"(A) after a determination by the Secretary that such proceeds will be expended or committed by such state in accordance with the purposes set forth in paragraph (5) of this subsection; and

"(B) before the close of the fiscal year immediately following the fiscal year in which the proceeds were received.

"(8) The United States shall be entitled to recover from any coastal state an amount equal to all or any portion of a grant made to such state under this subsection which is not expended or committed in compliance with paragraph (7) of this subsection.".

(e) Paragraph (3) of section 318(a) of the Coastal Zone Management Act of 1972 is amended to read as follows:

"(3) such sums, not to exceed $50,000,000 for the fiscal year ending September 30, 1978, and not to exceed $125,000,000 for each of the fiscal years ending September 30, 1979, September 30, 1980, September 30, 1981, September 30, 1982, September 30, 1983, and September 30, 1984, as may be necessary for grants under section 308(b);".

(f) The amendments made by this section shall take effect on October 1, 1977.

AMENDMENT OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MURPHY of New York: (To provide funds to coastal states, through the coastal zone management program, to assist such states in carrying out their responsibilities under the OCS Lands Act).

Page 269, immediately after line 11, insert and following new section:

OUTER CONTINENTAL SHELF GRANTS

SEC. 402. (a) Section 308(c) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456(a)(c)) is amended—

(1) by inserting "(1)" immediately after "(c)" and

(2) by adding at the end thereof the following new paragraph:

"(2) The Secretary shall make grants under this paragraph to any coastal state which the Secretary finds is likely to be affected by outer Continental Shelf energy activities. Such grants shall be used by such state to carry out its responsibilities under the Outer Continental Shelf Lands Act. The amount of any such grant shall not exceed 80 per centum of the cost of carrying out such responsibilities."

(b) Section 308(a)(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(a)(1)) is amended—

(1) in subparagraph (B) thereof, by striking out "subsection (c)" and inserting in lieu thereof "subsection (c)(1)"; and

(2) by redesignating subparagraphs (C) through (F), and all references thereto, as subparagraphs (D) through (G), respectively, and inserting immediately after subparagraph (B) the following new subparagraph:

"(C) grants, under subsection (c)(2), to coastal states to carry out their responsibilities under the Outer Continental Shelf Lands Act;".

(c) Section 308(h) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(h)) is amended by striking out "subsections (c)" each place it appears and inserting in lieu thereof "subsections (c)(1)".

(d) Section 308(k)(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(k)(1)) is amended by striking out "and (c)" and inserting in lieu thereof "and (c)(1)".

(e) Section 318(a) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1464(a)) is amended—

(1) by redesignating paragraphs (4) through (8), and all references thereto, as paragraphs (5) through (9), respectively; and

(2) by inserting immediately after paragraph (3) the following new paragraph:

"(4) such sums, not to exceed $5,000,000 for each of the fiscal years ending September 30, 1979, September 30, 1980, September 30, 1981, September 30, 1982, and September 30, 1983, as may be necessary for grants under section 308(c)(2), to remain available until expended;".

(f) Section 318(b) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1464(b)) is amended—

(1) by striking out "subsection (b)" and inserting in lieu thereof "subsections (b) and (c)(2)"; and

(2) by striking out "subsections (c)" and inserting in lieu thereof "subsections (c)(1)".

Page 264, strike out lines 21 and 22 and insert in lieu thereof "Coastal energy impact program".

Page 129, in the table of contents for title IV, strike out the item relating to section 401 and insert in lieu thereof the following:

"Sec. 401. Coastal energy impact program.
"Sec. 402. Outer Continental Shelf grants.".

Mr. MURPHY of New York (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MURPHY of New York. Mr. Chairman because of our Nation's need to accelerate its production of domestic offshore oil and gas resources, affected coastal States will play an increasing role in the Federal OCS leasing program.

The Coastal Zone Management Act (CZMA) Amendments of 1976 provide for Federal assistance to States for the public facilities, public services and environmental costs occasioned by OCS development.

However, the policy, operational, and managerial aspects of the Federal leasing program for which the States are beginning to assume responsibility—and will continue to do so under the amendments to the Outer Continental Shelf

Lands Act contained in H.R. 1614—are not presently covered by CZM.

The proposed amendments to the Outer Continental Shelf Lands Act call for significant State participation at both the policy and the technical levels, including:

The call for nominations;

Tract selection;

Input into Federal leasing schedule process;

Review of lease stipulations and operating orders;

Review of exploration and development plans;

Review of oil and gas resource information;

Input into environmental baseline studies; and

Input into nearshore and offshore research programs.

Additionally, States will be called upon to provide guidance and information for the preparation of environmental impact statements.

Consequently, the OCS administrative burdens on affected coastal States will be substantial. Because of the national interest dimensions of offshore oil and gas development, and because we are calling upon our coastal States to carry out much of the environmental and technical responsibilities in assuring a rational system for the management of our own offshore energy sources—a system which includes the balancing of competing demands on this Nation's coastal zone—we should provide funds to the States for administering these important OCS-related responsibilities.

This amendment provides for 80 percent grants to coastal States likely to be affected by OCS energy activities to carry out their responsibility under the OCS legislation. The grants are to be administered through the Coastal Zone Management Act and the amendment is an addition to the coastal energy impact program planning grant provision—section 308(c)—of CZMA.

The amount of funding authorized by the amendment is very moderate—$5 million per year for the next 5 fiscal years. The authorization will begin in fiscal year 1979 to conform with requirements of the Budget Act.

Under the language of the amendment, the Secretary of Commerce, who administers the CZM program, has a great deal of discretion in administering this new grant provision. This flexibility is needed because of the uncertainty of lease sale schedules, exploration and production timetables, and the precise incidence and magnitude of actual impacts on any individual coastal State.

However, the amendment evisions the establishment of some types of formula for the allocation of available moneys. It would be a formula contained in regulations promulgated by the Secretary.

In 1975, $3 million was appropriated in supplemental funds to coastal States through the coastal zone management program. This money was to be used by the States to improve their capabilities to plan for and manage projected OCS impacts. In the regulations which were developed to implement these grants, a formula was provided for their allocation among the States. Specifically, a uniform allocation of 1 percent to the affected States was established. Then, of the remaining funds, 40 percent was to be allocated based on the length of a State's marine shoreline; 40 percent on coastal county population; and 20 percent on the basis of identified needs.

Some formula along these lines is intended by this amendment although the precise system of allocation remains with the Secretary and should be based, to the maximum extent possible, on the actual OCS administrative responsibilities borne by each affected State.

Finally, it should be noted that the recipient executive agency in each State will vary—depending on which department or unit has OCS responsibilities. It need not be the same agency as the one which administers the coastal management program for the State or the one which receives coastal energy impact program financial assistance.

I urge that you support this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. MURPHY).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. HUGHES: On page 173, after line 2, insert the following new section:

DISPOSITION OF REVENUES

SEC. 206. Section 9 of the Outer Continetal Shelf Lands Act (43 U.S.C. 1338) is amended to read as follows:

"SEC. 9. Disposition of Revenues.—(a) For the period beginning June 5, 1950, and ending September 30, 1978, all rentals, royalties, revenues, or other sums paid to the Secretary or the Secretary of the Navy pursuant to, or in connection with, any lease for any area of the Outer Continental Shelf can be deposited in the Treasury of the United States and credited to miscellaneous recipts.

"(b) Beginning on October 1, 1978, and for each fiscal year thereafter, all rentals, royalties, revenues, or other sums paid to the Secretary or the Secretary of the Navy pursuant to, or in connection with any lease for any area of the Outer Continental Shelf shall be deposited in the Treasury of the United States and credited to miscellaneous receipts (other than any amount credited to the Land and Water Conservation Fund pursuant to section 2(c)(2) of the Land and Water Conservation Fund Act of 1965; and of the amounts so deposited, in each fiscal year, 20 percentum, up to a maximum of $200,000,000, shall be credited to the Coastal Energy Impact Fund established by section 308(h) of the Coastal Zone Management Act of 1972, as amended."

Redesignate sections 206 through 208 as 207 through 209 respectively.

On page 268, immediately after line 23, insert the following new subsection:

(e) Subsection (h) of section 308 of the Coastal Zone Management Act of 1972 is amended to read as follows:

"(h)(1) There is established in the Treasury of the United States the Coastal Energy Impact Fund. The Fund shall consist of—

"(A) amounts credited to the Fund under section 9 of the Outer Continental Shelf Lands Act;

"(B) any sums appropriated to the Fund;

"(C) payments of principal and interest received under any loan made under subsection (d)(1);

"(D) any fees received in connection with any guarantee made under subsection (d)(2); and

"(E) any recoveries and receipts under security, subrogation, and other rights and authorities described in subsection (f).

"(2) Amounts in the Fund received under clause (A) of paragraph (1) of this subsection shall be available to the Secretary for the purpose of carrying out subsection (b) of this section. All payments made by the Secretary to carry out the provisions of subsection (b) shall be paid from the Fund, only to the extent provided for in appropriation Acts. Sums in the Fund which are not appropriated for purposes of subsection (b) shall be returned to the Treasury.

"(4) Amounts in the Fund received under clauses (B) through (D) of paragraph (1) of this subsection shall be available to the Secretary without fiscal year limitation as a revolving fund for the purposes of carrying out subsections (c) and (d). All payments made by the Secretary to carry out the provisions of subsections (c), (d), and (f) (including reimbursements to other Government accounts) shall be paid from the Fund, only to the extent provided for in appropriations Acts. Sums in the Fund which are not currently needed for the purposes of subsections (c), (d), and (f) shall be kept on deposit or invested in obligations of, or guaranteed by, the United States."

On page 269, strike lines 1 through 9 and insert in lieu thereof the following: "Zone Management Act of 1972 is amended by striking "8 fiscal years occurring during the period beginning October 1, 1976, and ending September 30, 1984" and inserting in lieu thereof "fiscal years ending September 30, 1977 and September 30, 1978, respectively".".

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HUGHES. Mr. Chairman, the amendments I am offering provide for the sharing of 20 percent of OCS revenues, up to a maximum of $200 million per year, with the coastal States that are most directly affected by offshore development.

There is strong precedent for the type of program I am proposing.

For many years, the Federal Government has paid coal producing States a portion of the revenues received from Federal mineral leases in those States. Only 2 years ago, the Congress increased the States' share of Federal coal revenues from 37½ to 50 percent, and to 90 percent in the case of Alaska.

This sharing of mineral royalties with the States applies to oil and gas as well produced from federally owned onshore lands.

Money shared with the States under this program has risen from $56.7 million in 1974 to $173.9 in fiscal 1978. The administration estimates that coal revenue sharing will amount to $202 million in fiscal 1979, and we can doubtless expect further increases in future years.

I might add that those amounts paid to the coal States are in addition to

Federal payments in lieu of taxes for the same lands owned by the Bureau of Land Management.

There are, of course, very good reasons why the interior States should receive a share of Federal coal revenues. As was pointed out in the committee report to accompany the Coal Leasing Act Amendments, "when an area is newly opened to large scale mining, local governmental entities must assume the responsibility of providing public services needed for new communities, including schools, roads, hospitals, sewers, police protection, and other public facilities. * * * An effort must be made to alleviate these problems by making funds available for the various aspects of community development."

As a result of those findings, the Congress increased coal revenue sharing by 12½ percent.

The committee report also quoted a report by the Council on Economic Priorities as follows:

> The sudden jump in population growth, the emergence of urban centers, and the possible "boom-bust" economic cycle will cause many social and cultural changes. The Bureau of Reclamation predicts that coal development in the Northern Great Plains could result in "the seven-fold increase in the present population," because between 200,000 and 400,000 people are expected to migrate to eastern Montana.

I supported increased revenue sharing for coal-producing States in the last Congress because I was convinced of the need. And I am likewise convinced of the need to share Federal OCS revenues to a lesser extent with the coastal States.

It has been estimated that, in the mid-Atlantic region alone, between 5,600 and 20,000 people will move into the region, depending upon how much oil or gas is found off our shores. With these new residents will come the need for new public services, such as water and sewer, waste disposal, police and fire protection, educational and health facilities, and many other services.

We will also have to plan for and accommodate new facilities relating to offshore production, such as onshore operations bases, pipeline shore terminals, gas processing plants, offices of various kinds, cement and mud suppliers, warehouse, tool rental companies, and an endless array of other facilities.

A lot of people might look at this situation and conclude that it means we will have a great economic boom, and we do not need financial assistance. But I think my colleagues from the coal producing regions know that this is not true, as do my colleagues from the Gulf Coast States.

In Louisiana, between 1938 and 1971, 80 percent of all manufacturing investment—some $5 billion—was in the coastal parishes, reflecting support for offshore development. Over 100 major petroleum and petrochemical plants were located in the coastal parishes.

A 1973 study compared tax revenues in Louisiana from oil-related facilities with the costs incurred in providing public services and facilities for persons directly or indirectly involved in operating them, as well as their families. The study concluded that Louisiana had sustained a net loss of $38 million during 1972 from Federal offshore oil and gas operations.

This conclusion bears out the testimony we heard from local officials in the Cook Inlet, Alaska area, where tax revenues always lagged behind the need for improved public facilities generated by offshore development.

It is clear that decisions made in Washington on offshore leasing have a great deal of impact in the States that are adjacent to the lease area. But although it is the coastal States that must bear the impacts, the revenues go to Washington.

The coastal States in the frontier areas are prepared to do their part to meet our Nation's energy needs. But we do not want to see the mistakes of the past repeated in some of our coastal areas. To help cope with those impacts, I am hopeful that the House will recognize that additional funding is necessary, and entirely consistent with other efforts we have made to cope with impacts related to energy development.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. HUGHES) has expired.

(By unanimous consent, Mr. HUGHES was allowed to proceed for 2 additional minutes.)

Mr. HUGHES. Mr. Chairman, I think the committee bill which does provide $125 million for these purposes is a good measure. I congratulate the chairman of my committee for his leadership in seeing that we did have some provision for impact aid that does track to some extent the Coastal Zone Management Act.

I think, however, my amendment is a better approach. I think it is going to pave the way for the kind of OCS development we need in this country. I think it is going to provide the kind of assurance to the coastal States that they need to plan for offshore impact.

I am also going to offer two other amendments subsequently. They are amendments which would broaden the formula from a 50 percent leasing and 50 percent landing to a formula based on 50 percent leasing, 25 percent landing and 25 percent production. I will describe those amendments a little later in our debate.

I will also offer another amendment directed to the 2 percent minimum which I think improves the language of the bill and makes certain that the moneys will go to the areas that actually have the impact.

Mr. Chairman, I urge my colleagues to support these amendments.

Mr. TREEN. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I rise in strong support of the amendments offered by the gentleman from New Jersey (Mr. HUGHES).

This is an issue that we had in our committee, on which there was some division, but there was in the committee strong support for the proposition that the coastal States must be compensated for some of the impacts that result from OCS activity.

As a matter of fact, Mr. Chairman, the President of the United States recognizes this. During the campaign, a few days before the election, in Louisana, he pointed out that the coastal States do need help as a result of these impacts. He promised to try to provide that help.

Mr. Chairman, I suggest to the Members that this is where we should do it, and this is the manner in which we should do it.

Some people say that when we have OCS activity off the coast of a State, it helps the economy of that State. We have had a lot of economic activity in Louisiana, particularly along the coast, because of OCS activity, a lot of frantic activity, ever since we started with offshore drilling in 1946. That has been one of the problems. It has been frantic. As we have moved more and more into increased production on the OCS, we have had to rapidly make decisions and implement decisions which have affected our social life, our economic life, the public facilities that we have, and the wetlands that we enjoy in south Louisiana.

We have this increased economic activity, and the Members who represent other coastal States are going to have it as there is more and more OCS activity in their States.

However, Mr. Chairman, there is something we should recognize about this increased activity. We are not going to get from this increased activity the tax revenues that we do from economic activity which is located onshore. The reason is that this activity is carried on in the Federal domain, and we may not collect any sales taxes for what is sold that goes into the OCS activities beyond 3 miles. No ad valorem taxes may be collected on any of these facilities that are out there, whereas if they were onshore, your States and your local governments would have the capacity to extract taxes from these facilities. Therefore, with respect to two major sources of revenues, both local and State, some States are going to be shortchanged.

Therefore, Mr. Chairman, I say, yes, we do have increased economic activity onshore, but we are denied what ordinarily would be tax resources as a result of that activity if the same.

That has happened in Louisiana. We have economic activity, and we have sustained some impacts that are detrimental to our State.

Mr. Chairman, we have in south Louisiana one of the most magnificent wetland basins in the world, the Atchafalaya basin. It is laced now with pipelines. They are getting ready now for another one 67 miles long from one of our salt domes, where we are going to store oil, in the case of an emergency, under the strategic oil storage program. That will run 67 miles across this beautiful basin, a pipeline to bring the oil to another pipeline so that we can put it into our system if and when we have that emergency.

Our wetlands are crisscrossed with channels of all kinds, channels to permit rigs to be moved, channels for pipelines, gas pipelines and oil pipelines. Our highways are in deplorable condition because of the necessity to bring heavy

equipment across highways that were not designed for that purpose, to bring drill pipe and heavy drilling equipment that goes to these rigs. As a result, all down through this fragile wetlands area we find our roads in terrible condition.

Mr. Chairman, this has happened because off the coast of Louisiana we have been serving our interests, yes, but the interests of this country, in providing additional energy sources. The other States are going to have these problems that I am talking about. And, those Members who are from interior States should support this as well.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. TREEN) has expired.

(By unanimous consent, Mr. TREEN was allowed to proceed for 2 additional minutes.)

Mr. TREEN. As I was saying, Mr. Chairman, Members from interior States should support this, too, because one of the problems that we have had in this country is that there has been resistance from the coastal States, other than Louisiana, Texas, and Mississippi, to OCS activity. There have been concerns about the environment, and I appreciate these concerns that the other States have, but we have had a lot of resistance.

I would suggest to you that one of the advantages of this program will be to cut down some of the apprehension of these States so that we can get on with energy production. They will have some money to compensate for these impacts and that will tend to minimize their fears. I think that will be encouraging to our energy goals. That should concern all of us whether we live in a coastal zone or in an interior State.

The program is subject to appropriation, it is not an automatic revenue sharing program, so it can be controlled, if that is necessary, through the appropriations process. Also it is tied to the coastal zone management program.

I suggest to my colleagues that this is the way for us to move ahead to produce and to protect the legitimate interests of the coastal zones.

Mr. MURPHY of New York. Mr. Chairman, I rise in opposition to the amendments.

Mr. Chairman, the amendment drafted by my friend and colleague, the gentleman from New Jersey (Mr. HUGHES), certainly has a laudable purpose. The purpose, of course, is to take 20 percent of the revenues derived from the oil and gas presumably to be found on the coastal zones of up to $200 million and then, under a very complex formula, to allocate it on a State-by-State basis.

The committee in its wisdom dealt with this problem and set a ceiling of $125 million. The Senate in its deliberation set a ceiling of $75 million.

I might say that the distinguished Senator from Louisiana was the proponent of that level of funding.

Mr. TREEN. Will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Louisiana.

Mr. TREEN. The gentleman is not suggesting that our Senator JOHNSTON from Louisiana would not support this higher range?

Mr. MURPHY of New York. I was merely stating an historical legislative fact that the $75 million level on the Senate side was his proposition.

Mr. Chairman, a careful analysis of this committee as it went from coast to coast and evaluated the cost effects on the intrusion of OCS activities into the coastal zones gave rise to the Coastal Zone Management Act of the last Congress on which the gentleman from Louisiana (Mr. TREEN) and the gentleman from New Jersey (Mr. HUGHES) worked on very carefully to bring about, because where the Federal Government does impact a State, particularly its coastal line, the Federal Government should bear the burden of that impact. That is the philosophy. We are trying to narrow it down as indicated as to demonstrated impacts in this fund. The $200 million in my judgment and in the judgment of the committee, is too high a figure in dollars to be put aside.

Mr. Chairman, that is why I rise in strong opposition to the amendment offered by the gentleman from New Jersey. This amendment would provide for 20 percent of OCS revenues, with a ceiling of $200 million per year, within the context of the Coastal Zone Management Act.

I have two major objections to this amendment.

First, $200 million per year is a dangerously high figure and presumably unacceptable to the administration. The administration has already expressed its concern about the $125 million figure which is in the committee bill as an amendment to the Coastal Zone Management Act.

Finding the proper level of authorization for OCS formula grants is, of course, a difficult process. There is no magic number on which all can agree with respect to providing adequate compensation to the States for their public service, public facility, and environmental costs occasioned by OCS development.

However, after spending some 3 years working on the coastal zone management program in my committee and in analyzing all the information which has been brought to our attention regarding such impacts, the figure of $200 million a year appears to be unconscionably high.

It must be remembered that OCS development will have certain positive economic benefits for some coastal States and local governments. Although the Federal Government bears responsibility for keeping States in a level fiscal position with respect to offshore development, we should not be providing funds which could lead to major and unnecessary public works projects in the fragile coastal zone of our Nation.

Unnecessary funding may encourage strong pressures on States to engage in development activities which are not in the best interest of the preservation of coastal resources. We must attempt to find that delicate balance in terms of funding which will encourage the States to be responsible in their OCS-related decisions. The authorization figure contained in the committee's bill is a more reasonable and more appropriate figure.

The second concern I have with the gentleman's amendment is that I believe it will create complications for the congressional appropriations process. This amendment is technically within the Appropriations Act as it provides that payments made by the Secretary of Commerce can only be made as provided for in Appropriation Acts.

However, the crediting of $200 million per year to the coastal energy impact fund is automatic and beyond the discretion of the Congress. Consequently, enormous pressure will be brought to bear on the Appropriations Committee to appropriate that amount each year. This may or may not be appropriate depending on the level of OCS activities and the precise negative fiscal impacts which such activities may have on various coastal States and local governments.

The congressional authorization and appropriation process has worked well and I believe that we should maintain the integrity of the present process and use the regular authorization language which is contained in the committee bill.

I have always proposed legislation which has conformed to the requirements of the Budget Act and the appropriations process and I believe that it is in the interest of the entire Congress that we continue to do so in the coastal zone program. I have every reason to believe that appropriation levels for the OCS formula grants will be significantly increased at the request of the administration. The present debate of revenue sharing has indicated to the executive branch the strong concern of the Congress that these grants are considered critically important for States to address their public service, public facility, and environmental costs.

Therefore, for these reasons I urge the defeat of this amendment.

Mr. Chairman, at this point I would like to yield to my distinguished colleague, the distinguished gentleman from West Virginia (Mr. SLACK), the chairman of the Subcommittee on State, Justice, Commerce and Judiciary of the Committee on Appropriations.

Mr. STACK. I appreciate the gentleman's yielding.

Mr. Chairman, I, too, rise in opposition to the amendment offered by the distinguished gentleman from New Jersey. I, too, wish to associate myself with the remarks of the chairman of this committee, the gentleman from New York (Mr. MURPHY). As chairman of the Appropriations Subcommittee which has jurisdiction over the Coastal Energy Impact Fund within the Department of Commerce, our subcommittee has a strong record of support for the programs which are financed through this fund. Last year we appropriated $230 million in initial capital for the fund. We were able to do this, Mr. Chairman, through the regular congressional authorization and appropriation process which, in my judgment, has worked very well through the years.

Mr. Chairman, I see no compelling reason to complicate that process by automatically crediting large sums from the fund without any action by the Congress and thereby creating a strong pressure to appropriate such amounts each year. For this reason I wish to join the remarks of our chairman, the gentleman from New York (Mr. MURPHY) in my opposition to the amendment.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. STACK. I yield to the gentleman from New Jersey.

Mr. HUGHES. I thank the gentleman for yielding.

The gentleman does understand that the amendment does provide for the appropriation of funds. Until the funds are appropriated in the regular appropriating process of the Congress, no funds go to the coastal States that are impacted. It is still subject to the appropriation process.

Let me also say to the Chairman that this particular amendment when offered in the committee lost by one vote. It was not an overwhelming vote in support of the $125 million provided for energy impact in H.R. 1614.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. HUGHES, and by unanimous consent, Mr. MURPHY of New York was allowed to proceed for 1 additional minute.)

Mr. HUGHES. If the gentleman will yield further, let me just finish by saying that was in all fairness the case with a number of amendments in the committee.

Mr. MURPHY of New York. I think the gentleman characterizes the committee well. It was the 10–9 committee, but the very purpose of the committee work was that it be drawn on a regional basis, that it be drawn by membership from the recommendations of the chairmen of the committees who would have had sequential or concurrent jurisdiction over the issue. That is the reason the committee was sharply divided in these areas and, accordingly, we did stay with the $125 million figure. I would hope that the Committee of the Whole would support the committee's funding at the $125 million level and reject this amendment.

Mr. Chairman, I reserve the remainder of my time.

Mr. BAUMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman. I would like to address a question to the gentleman from New Jersey. As I understand it, because of the nature of the gentleman's amendment and the fact that he does create a fund which is certainly larger in amount than the committee bill provides, in the application of the formula in his amendment, States such as Maryland and Delaware which would have close proximity to such an area where oil and gas production will occur will in fact receive a much larger share of the revenues produced. In the case of Maryland, the amount increases from $16,200,000 to $25,300,000. Is that a correct estimate?

Mr. HUGHES. If the gentleman will yield, that is correct.

Mr. BAUMAN. It will also remove some of the inequities for some coastal States, because under the committee bill, as I understand it, depending upon where production occurs, some States might be completely ruled out of the benefits.

Mr. HUGHES. If the gentleman will yield further, I have three major amendments: one for increasing the amount so that 20 percent with a maximum of $200 million of the amount of the fund is still subject to the appropriation process.

Mr. BAUMAN. Yes.

Mr. HUGHES. I have an amendment which I will subsequently offer after we dispose of this amendment which will change the funding formula so it will track the Coastal Zone Management Act. In effect we will not just be paying out the money based upon 50 percent leasing and 50 percent landing, but will take production into account. Production is extremely important since as the gentleman well knows it is at that stage that often bears these onshore impacts.

The third amendment would be to modify the definition of region so that the Secretary would not be paying out the 2-percent minimum as contained in the committee bill unless in fact that State has been impacted. These are subsequent amendments that I will be offering.

Let me just say once again, $200 million is a cap or the maximum amount we are going to be paying out under my amendment. But the formula is based on 20 percent of the OCS revenues not to exceed $200 million. I am not so sure that we will reach the $200 million cap. But we do have such a cap.

Mr. BAUMAN. I thank the gentleman for his explanation and urge support of his amendment.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from New Jersey. I think he has made a number of good points.

One, in the committee bill as it exists now, it is my understanding when they are considering giving to a coastal State any portion of what is happening off the shore in terms of dollars, they are only considering the amount of oil leased off that coastal State and the amount that is landed. The problem is, many of the New England States will face the situation where they will have leasing done off their coastline but they will not have any oil and gas landed at all.

I am afraid that the formula is defective in that sense, and the formula of the gentleman from New Jersey with a second amendment is a far more preferable amendment and a better approach.

Another point I want to make is that the gentleman has said his formula says 20 percent, a maximum of 20 percent, of all the offshore revenues will go to the some 30 coastal States we have around the United States. I want Members to bear in mind that the interior States right now under the Mineral Leasing Act get 50 percent of all the revenues that are derived from leasing of Federal lands within their State boundaries. They do not have to show any impact whatsoever. They just take the dollar figure and see the total amount the Federal Government should get, and they get half of that.

So when we are talking about equity, we have 30 coastal States of the United States saying we want 30 percent of all the Federal revenues derived from Federal leasing. Unlike the interior States, the coastal States have to show they have been suffering from impact from the offshore leasing.

It is a tightly drawn formula. It is not just tossing out money. It is very tightly drawn and a very solid approach.

The only thing we are talking about in money is the difference between $125 million in the committee bill and $200 million which is in the amendment offered by the gentleman from New Jersey.

Bear in mind that no money will ever reach any coastal State unless we go through the entire appropriation process and through the appropriate committee.

The amendment offered by the gentleman from New Jersey, in my opinion, is a far more preferable approach and takes into consideration more of the things which should be considered and it is a more fair amendment.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from New York (Mr. MURPHY).

Mr. MURPHY of New York. Mr. Chairman, some of the concerns the gentleman just mentioned will apply to several subsequent amendments to be offered by the gentleman from New Jersey, which the committee feels are fully in order, but I might just hopefully close the debate by the statement that, should we go to this $200 million level, there would be enormous pressure on the Appropriations Committee to fund at that level even though the impact on the coastal States would not be at the level of $200 million.

We feel our studies fully bear out that even the $125 million may be very high. We carefully based our formula at that level after lengthy deliberations and I would hope we would not now have excessive funding and take money—which otherwise go to the Federal revenues for national problems—rather than going to a State where there has not been demonstrated an impact.

Mr. BREAUX. I would only say to my chairman in response that the $200 million is the absolute maximum as the outside figure. The 20 percent of offshore revenues could be a lot less than $200 million, and I might be talking about a figure less than the gentleman from New York, the chairman of the committee stated, and it could be less than $125 million. I would certainly hope that would not be the case, but it could be a cap and it might not go up to the $125 million figure.

I think the formula offered by the gentleman from New Jersey is a far more preferable formula. I hope the amendment will pass.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New Jersey (Mr. HUGHES).

The question was taken; and on a di-

vision (demanded by Mr. MURPHY of New York) there were—ayes 21, noes 12.

Mr. MURPHY of New York. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Forty-two Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Commitee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 32]

Addabbo	Eckhardt	Moss
Alexander	Edwards, Ala.	Nichols
Ambro	Edwards, Okla.	Panetta
Archer	Evans, Ga.	Perkins
Armstrong	Fraser	Rhodes
Ashley	Gibbons	Richmond
Beard, R.I.	Gradison	Risenhoover
Bingham	Harsha	Roncalio
Breckinridge	Hawkins	Runnels

Derwinski	Mitchell, Md.	Wilson, C. H.
Dickinson	Mitchell, N.Y.	Wright
Diggs	Moorhead, Pa.	Young, Alaska

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 1614, and finding itself without a quorum, he had directed the Members to record their presence by electronic device, whereupon 355 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. At the time the point of order of no quorum was made, the gentleman from New York (Mr. MURPHY) demanded a recorded vote. Does the gentleman insist upon his request?

RECORDED VOTE

Mr. MURPHY of New York. I demand a recorded vote, Mr. Chairman.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 279, noes 120, not voting 33, as follows:

[Roll No. 33]

NOT VOTING—33

Armstrong	Krueger	St Germain
Bingham	Latta	Stockman
Breckinridge	Lehman	Teague
Broomfield	Mitchell, N.Y.	Thone
Brown, Ohio	Moss	Tucker
Clausen, Don H.	Panetta	Wiggins
	Perkins	Wilson, Bob
Dent	Rhodes	Wilson, C. H.
Dickinson	Richmond	Wright
Gradison	Risenhoover	Wylie
Huckaby	Roncalio	
Jones, Tenn.	Ruppe	

The Clerk announced the following pairs:

On this vote:

Mr. Jones of Tennessee for, with Mr. Bingham against.

Mr. Panetta for, with Mr. Breckinridge against.

Mr. Dent for, with Mr. Lehman against.

Mr. Huckaby for, with Mr. Risenhoover against.

Mr. Charles H. Wilson of California for, with Mr. Broomfield against.

Mr. Bob Wilson for, with Mr. Thone against.

Mr. Mitchell of New York for, with Mr. Richmond against.

So the amendments were agreed to.

The result of the vote was announced as above recorded.

Mr. MURPHY of New York. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to advise the committee that if we could keep the present membership on the floor, I think we just have some relatively technical amendments remaining. The ones I have seen seem to be agreeable to the committee, and we may be able to proceed very expeditiously toward the passage if the membership present would stay.

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: On page 265, strike lines 4 through 13 and insert in lieu thereof the following:

(2) by striking out "(A), (B), (C), and (D)" and inserting in lieu thereof "(A), (B), and (C)";

(3) in subparagraph (A), by striking out "one-third" and inserting in lieu thereof "one-half";

(4) in subparagraph (B), by striking out "one-sixth" and inserting in lieu thereof "one-quarter";

(5) in subparagraph (C), by striking out "one-sixth" and inserting in lieu thereof "one-quarter";

(6) by striking out subparagraph (D).

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HUGHES. Mr. Chairman, this amendment has a very simple purpose and should not be controversial.

Under the formula now in H.R. 1614 for allocating funds to coastal States, 50 percent of the funds are distributed on the basis of the amount of Federal acreage that is leased off the coast of each State. The remaining 50 percent would be distributed on the basis of how much oil and gas is landed within each State. In other words, to qualify for funds under the latter part of the formula, a State must actually have oil or gas coming ashore.

Although I strongly support the emphasis of present language on the leasing factor, I suspect that it is possible, if not inevitable, that some otherwise deserving States will be excluded from their fair share under the landings factor.

That is because of the likelihood that some States will have substantial offshore development, with consequent impacts, but no landings.

Massachusetts is one such State—it has no refineries, so there is a good chance it will have no landings. Yet, if oil or gas is found off the New England coast, Massachusetts is likely to experience substantial impacts. Similarly, production from offshore New Jersey might go to some other State, even though we have substantial refining capacity. It is also possible that production from offshore Alaska might be tankered down to the Lower 48 States, rather than be landed in Alaska.

My amendment simply includes offshore production as a 25-percent factor, and reduces landings to a 25 percent factor. The 50-percent allocation to acreage leased is left unchanged by my amendment.

Offshore production inevitably leads to onshore impacts, even though there may be no landings. I feel that the inclusion of offshore production as a factor will provide a meaningful measurement for distributing funds on the basis of a formula that assures that no State receives less than its fair share.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, we have examined the gentlemans' amendment, and we feel that we can accept it.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, we have also examined the gentleman's amendment, and we will be happy to accept it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. HUGHES).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: On page 265, strike line 24 through line 7 on page 266, and insert in lieu thereof the following:

"(B) (i) If, in any fiscal year, any coastal state will not receive a grant under subparagraph (A), (B) or (C) of paragraph (2), the Secretary shall make a grant to each coastal state in an amount equal to 2 percentum of the total amount available for making grants to all states under such paragraph (2) in such fiscal year if any other coastal state in the same region is receiving a grant under such subparagrhs in such fiscal year: *provided*, That no coastal state shall receive such grant unless the Secretary determinees that it is an affected state.

"(ii) For purposes of this subparagraph, the term 'affected state" means any State—

"(I) the laws of which are declared, pursuant to section 4(a)(2) of the Outer Continental Shelf Lands Act, to be the law of the United States for the portion of the outer Continental Shelf on which any program, plan, lease sale, or other activiity is proposed, conducted, or approved pursuant to the provisions of such Act;

"(II) which is or is proposed to be directly connected by transportation facilities to any artificial island, installation, or other device referred to in section 4(a)(1) of the Outer Continental Shelf Lands Act;

"(III) which is receiving, or in accordance with a proposed activity will receive, oil for processing, refining, or transshipment which was extracted from the outer Continental Shelf and transported directly to such State by means of vessels or by a combination of means including vessels;

"(IV) which is designated by the Secretary as a State in which there is a substantial probability of significant impact on or damage to the coastal, marine, or human environment, or a State in which there will be significant changes in the social, governmental, or economic-infrastructure, resulting from the exploration, devleopment, and production of oil and gas anywhere on the outer Continental Shelf; or

"(V) in which the Secretary finds that because of outer Continental Shelf activity there is, or will be, a significant risk of serious damage, due to factors such as prevailing winds and currents, to the marine or coastal environment in the event of any oilspill, blowout, or release of oil or gas from vessels, pipelines, or other transshipment facilities. "(iii) For purposes of this subparagraph—".

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HUGHES. Mr. Chairman, my amendment deals with the issue of the 2-percent minimum payment to any State within one of the regions defined in H.R. 1614.

The 2-percent minimum payment is an excellent idea, since it will assure that each State will have a continuity of funding. This is critical since, in the early phases of OCS development, a State will not have any of the offshore production or landings necessary to trigger funding under the formula. Yet, it is during that early startup phase of OCS development that planning funds are most important to prepare for onshore impacts.

The unfortunate aspect of the minimum is that it could result in payments being made to States that do not have and will never have onshore impacts related to OCS development. At present, we do not know which States will or will not have onshore impacts, since we do not know which of our offshore areas will be productive, and which will be dry.

If the area of a particular State is not going to be productive, however, I feel it would be inappropriate to provide that State with the 2-percent minimum. The funding is scarce enough, and it should be devoted only to those States with the greatest need.

To remedy this problem, my amendment provides that the 2-percent minimum funding will continue only so long as a State is determined to be an "affected coastal State." In determining which States are affected coastal States, my amendment utilizes the definition set forth in section (2)(f) of the OCS Lands Act. That section lists five separate criteria to be used in determining whether a State is affected by OCS development. It includes prospective impacts as well.

My amendment will assure that all States with present or prospective onshore impacts will benefit from the 2-percent minimum payment provision. But it also assures that funding will not go to States without impacts, and allow those funds to be channeled to States that are suffering impacts.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, we have examined the gentleman's amendment, and we accept it.

Mr. HUGHES. Mr. Chairman, I thank my colleague.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, we will be happy to accept the gentleman's amendment.

Mr. HUGHES. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HUGHES).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. TREEN

Mr. TREEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TREEN: Page 265, beginning on line 22, strike out "available to the Secretary for payment to all States" and insert in lieu thereof: "credited to the Coastal Energy Impact Fund under section 9 of the Outer Continental Shelf Lands Act for payment to all States".

Mr. TREEN. Mr. Chairman, I hope the majority will accept this amendment. It is being offered here now to conform the bill with the program that was just passed through the Hughes amendment.

There is a limitation in the coastal energy impact program, as now changed by the Hughes amendment, that limits any State to 30 percent of the fund, and I am, with this amendment, simply adding the language that that 30 percent applies to the amount credited to that fund under section 9 of the OCS Lands Act.

So the 30-percent limitation applies to the amount that is credited to the fund as a result of the amendment offered by the gentleman from New Jersey (Mr. HUGHES), and I hope the majority will accept this amendment.

Mr. MURPHY of New York. Mr. Chairman, I move to strike the last word.

Part of the language contained in the amendment offered by the gentleman from Louisiana (Mr. TREEN)—that is, to strike "1977" and insert "1978" on page 269, line 11, would be acceptable to me. It is in the nature of a technical amendment.

But I have to oppose the section which would place a ceiling of 30 percent on the amount of funds which any individual State could receive under the coastal energy impact program.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman, the amendment I am offering now does only one thing: It changes the language on line 22, page 265, so instead of talking about money available to the Secretary, we are talking about money credited to the coastal energy impact fund under section 9.

In other words, the 30-percent limitation will now apply in this fashion: 30 percent to any State in equal amounts credited to the fund. This language is required, because we made the change in the program through the Hughes amendment.

Mr. MURPHY of New York. Mr. Chairman, with that change, I will state to the gentleman that the amendment is acceptable to the committee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. TREEN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. TREEN

Mr. TREEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TREEN: On page 269, line 7, strike all on lines 7, 8, and 9 and insert in lieu thereof: "September 30, 1982, September 30, 1983, September 30, 1984, and September 30, 1985, as may be necessary for grants under section 308(b);"

On line 11, strike "1977" and insert "1978".

The CHAIRMAN. The gentleman from Louisiana (Mr. TREEN) will be recognized for 5 minutes in support of his amendment.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. TREEN. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, this amendment is, of course, a wise one. It moves the years up, and it is necessary, because we passed the one having to do with the year 1978. The committee is happy to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. TREEN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. TREEN

Mr. TREEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TREEN: On page 268, after line 23, insert a new subsection (9):

(9) The provisions of Section 308(g)(1) shall not apply to grants made pursuant to this subsection. Any state with a program for managing its coastal resources, whether approved pursuant to Section 306 or not, shall qualify for assistance under this subsection.

Mr. TREEN. Mr. Chairman, this amendment is pretty simple in its impact.

What we have done here a few moments ago, in passing the Hughes amendment, is to improve the coastal energy impact program so that we have a maximum of $200 million to compensate the States for the impacts of offshore development.

Unfortunately, however, there is a problem with that program. No State can qualify for this program unless it has an approved coastal zone management program.

Mr. Chairman, under the Coastal Zone Management Act of 1972, which has been amended several times since, the States are encouraged to set up coastal zone management programs for their wetlands areas, and that is a good idea. I support that concept in Louisiana.

Under the Coastal Zone Management Act, however, that plan must be approved by the Federal Government, if the State is going to be the beneficiary of any of the programs that are set forth in that act, the carrot and stick approach.

The coastal energy impact program that we have in the law now and which has been changed by the amendment of the gentleman from New Jersey (Mr. HUGHES), improved upon by that amendment, is still tied to the Coastal Zone Management Act, so that the coastal State that does not have an approved coastal zone management program will not be able to get a CEIP grant. In other words, those in a coastal State will not be able to get the benefits of the program, which we have just adopted by an overwhelming margin, unless the Federal Government approves the State's land-use program. That is what it is.

In the Coastal Zone Management Act there are lots of criteria set forth which the Federal Government must look at in determining whether a coastal zone management program is approved; for example, "direct State land and water use planning and regulation," * * * "a method for assuring that local land and water use regulations within the coastal zone do not unreasonably restrict or exclude land and water uses of regional benefit."

Mr. Chairman, the Federal Government, through this program, gets involved in the land use decisions and gets involved in the relationship between local governments and State governments with regard to land use. Therefore, Mr. Chairman, I think we have a dangerous precedent if my amendment is not adopted, because in our other revenue-sharing and other type of grant programs we find that those grants would be conditioned upon the bureaucracy up here approving a local land-use or local land-control program.

Mr. Chairman, those Members who do not believe that the Federal Government ought to get into that sort of thing will want to support my amendment.

Mr. MURPHY of New York. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I think the key words in the gentleman's amendment are "any State with a program for managing its coastal resources."

When the Coastal Zone Management Act was passed, the Federal Government sent to the various coastal States $3 million to assist those States in drawing the State's coastal zone management program so that it would be very carefully drawn and would meet certain Federal guidelines. Then it would have consistency with Federal law.

However, Mr. Chairman, this amendment would permit a State, a State like Louisiana which just picked up $414 million in the last amendment, to merely, by having a program, one that is not approved as in accordance with Federal guidelines, go ahead and dispose of this money. However, the amendment makes such a serious modification to the existing requirements that the coastal State could only receive energy impact funds if it is participating in the program.

Mr. Chairman, we want the States to participate in a program that meets certain guidelines and not to just utilize funding that they could get for reasons that are outside of these guidelines.

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Louisiana.

Mr. BREAUX. Mr. Chairman, I thank the gentleman for yielding.

I would just like the record to show that Louisiana is making progress in developing a coastal zone management program and, therefore, would be eligible for the funds under either provision.

Again, I just want the record to show that we are making that progress.

Mr. MURPHY of New York. Mr. Chairman, I think the gentleman should not support this language, because we are dealing not only with Louisiana; we are dealing with 32 other

coastal States, many of which have not made progress and are nowhere near the 3-year requirement we have set, and consequently, I think it would be most unwise to adopt this language.

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman, it should be understood that in my amendment I do not say a State does not have to have a coastal zone management program. As a matter of fact, my amendment specifically says that a State must have a program for managing its coastal zone areas, but it does not have to have a program that is approved by the Federal Government.

The gentleman from New York (Mr. MURPHY) makes the point that there are a number of States that do not have them approved by the Federal Government. That is my point. They will not be entitled to the funds which have been established in this program if their coastal zone management plans are not approved by the Federal Government.

The State of Louisiana does not have an approved coastal zone management program. I think there are only two or three States of the coastal zones that have these programs approved by the Federal Government. But I reiterate that I am in favor of it for my own State. I hope we can continue it whether or not it is necessary to get these grant funds. But if the grant program has as its legitimate purpose relief to those States for the impacts that they will have as a result of the OCS development then it should not be conditioned upon the State having its program approved by the Federal Government, with each "t" crossed and every "i" dotted by the Federal Government. How the States should manage their coastal zones is a matter which the States are capable of handling themselves.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Chairman, I certainly want to rise in support of the amendment offered by the gentleman from Louisiana (Mr. TREEN).

Mr. Chairman, in the State of Maryland where almost all of my district is in a coastal zone area—and we have other such districts—there has been a great deal of local opposition to the Federal mandate where, in order to have a plan approved, the bureaucrats can make all sorts of comments and say, "This is what we want you to have, otherwise you will not have the plan funded." They can cut off the funding for the plan. But to make contingent the receipt of of funds we get from the coastal zone development of oil and gas upon Federal approval of the local CZM plan or else it will be rejected is wrong. That kind of a statutory approach, telling the States how they must abide by the Federal planning, is not right.

I would hope we would adopt this amendment so as to give the States the right that they have already under this bill. They do not need Federal planning in the interior States and they do not need it in the coastal zones.

Mr. FISH. Mr. Chairman, I would like to ask the author of this amendment the gentleman from Louisiana (Mr. TREEN) a question. As I understand, this amendment deals with State plans under the coastal zone law at present?

Mr. TREEN. That is right.

Mr. FISH. And as to the penalty to that State that does not have this in its plans?

Mr. TREEN. Yes, a State will not be able to receive the benefits of this program unless it has an approved Federal program. As I understand there are only two States that have federally approved plans. Even though we have had this act since 1972, it is my understanding that only two States have approved Federal programs.

There is something else I would like to point out to my colleagues from New York and that is that they have a tremendous problem in the State of New York on ever getting a federally approved coastal zone management program. As I understand, in the State of New York, under its constitution, local governments have the authority for zoning. There is a great conflict in the State of New York as to whether they ever can get a State plan that is federally approved because the local authorities would have to give up their constitutional power for zoning. So those Members in the State of New York may never get an approved coastal zone management program by the Federal Government. This means that they will not qualify for the CEIP program, the Federal grant program that we have just improved upon a few minutes ago.

Mr. MURPHY of New York. Mr. Chairman, if the gentleman will yield, the classic example of the need for the Coastal Zone Management Act program and the Continental Shelf Land Act is the State of Louisiana.

In the very first hearing official after official, businessman after businessman, environmentalist after environmentalist from the State of Louisiana freely admitted that the movement of oil and gas there has had a severe impact on the State of Louisiana. What we are trying to do is to take the experience of the State of Louisiana and prevent it from occurring across the other coastal areas, and I would hope that that situation does not happen again.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. FISH was allowed to proceed for 2 additional minutes.)

Mr. MURPHY of New York. So I may continue, will the gentleman yield further?

Mr. FISH. I yield to the gentleman from New York.

Mr. MURPHY of New York. I thank the gentleman.

We have made such substantial progress in 30 of the other States in their moving toward the guidelines of a proper coastal zone management plan, I just think that this amendment here which would uncouple these funds from that legislation is unwise, and I will not support it.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Louisiana.

Mr. TREEN. I thank the gentleman for yielding.

I have just one final comment. Yes, we have had problems in Louisiana about the impact on our coastal zone; there is no question about it. Maybe we should have moved to do something about it sooner, but we think we are capable of doing that ourselves. Insofar as sharing our experience with the rest of the country, we do not have to do that via the Federal bureaucracy. We would be delighted to have all of the administrators of the coastal zones in their respective States come to Louisiana and see how we have coped with the problems we have had. We do not have to go through the Federal bureaucracy for that purpose.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. TREEN).

The question was taken, and on a division (demanded by Mr. FISH) there were—ayes 41, noes 63.

RECORDED VOTE

Mr. TREEN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electonic device, and there were—ayes 159, noes 230, not voting 43, as follows:

[Roll No. 34]

Mitchell, N.Y.	Roncalio	Wilson, Bob
Moss	Rudd	Wilson, C. H.
Panetta	Ruppe	Wright
Perkins	Solarz	Wylie

The Clerk announced the following pairs:

On this vote:

Mr. Jones of Tennessee for, with Mr. Bingham against.

Mr. Huckaby for, with Mr. Panetta against.

Mr. Risenhoover for, with Mr. Brown of California against.

Mr. Teague for, with Mr. Breckinridge against.

Mr. Broomfield for, with Mr. Lehman against.

Mr. Brown of Ohio for, with Mr. Richmond against.

Mr. Crane for, with Mr. Dent against.

Mr. Dickinson for, with Mr. Charles H. Wilson of California against.

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there additional amendments to title IV? If not, the Clerk will designate the title now pending.

The Clerk read as follows:

TITLE V—MISCELLANEOUS PROVISIONS

REVIEW OF SHUT-IN OR FLARING WELLS

SEC. 501. (a) In a report submitted within six months after the date of enactment of this Act, and in his annual report thereafter, the Secretary shall list all shut-in oil and gas wells and wells flaring natural gas on leases issued under the outer Continental Shelf Lands Act. Each such report shall be submitted to the Comptroller General and shall indicate why each well is shut-in or flaring natural gas, and whether the Secretary intends to require production on such a shut-in well or order cessation flaring.

(b) Within six months after receipt of the Secretary's report, the Comptroller General shall review and evaluate the methodology used by the Secretary in allowing the wells to be shut-in or to flare natural gas and submit his findings and recommendations to the Congress.

REVIEW AND REVISION OF ROYALTY PAYMENTS

SEC. 502. As soon as feasible but no later than ninety days after the date of enactment of this Act, and annually thereafter, the Secretary of the Interior shall submit a report or reports to the Congress describing the extent, during the two-year period preceding such report, of delinquent royalty accounts under leases issued under any Act which regulates the development of oil and gas on Federal lands, and what new auditing, post-auditing, and accounting procedures have been adopted to assure accurate and timely payment of royalties and net profit shares. Such report or reports shall include any recommendations for corrective action which the Secretary of the Interior determines to be appropriate.

NATURAL GAS DISTRIBUTION

SEC. 503. The Federal Power Commission shall, pursuant to its authority under section 7 of the Natural Gas Act, permit any natural gas distributing company which engages, directly or indirectly, in development and production of natural gas from the Outer Continental Shelf to transport to its service area for distribution any natural gas obtained by such natural gas distributing company from such development and production. For purposes of this section, the term "natural gas distributing company" means any person (1) engaged in the distribution of natural gas at retail, and (2) regulated or operated as a public utility by a State or local government.

ANTIDISCRIMINATION PROVISIONS

SEC. 504. Each Federal agency or department given responsibility for the promulgation or enforcement of regulations under this Act or the Outer Continental Shelf Lands Act shall take such affimative action as deemed necessary to assure that no person shall, on the grounds of race, creed, color, national origin, or sex, be excluded from receiving or participating in any activity, sale, or employment conducted pursuant to the provisions of this Act or the Outer Contnental Shelf Lands Act. The agency or department shall promulgate such rules as it deems necessary to carry out the purposes of this section, and any rules promulgated under this section, through agency and department provisions and rules which shall be similar to those established and in effect under title VI of the Civil Rights Act of 1964.

SUNSHINE IN GOVERNMENT

SEC. 505. (a) Each officer or employee of the Department of the Interior who—

(1) performs any function or duty under this Act or the Outer Continental Shelf Lands Act, as amended by this Act; and

(2) has any known financial interest in any person who (A) applies for or receives any permit or lease under, or (B) is otherwise subject to, the provisions of this Act or the Outer Continental Shelf Lands Act,

shall, beginning on February 1, 1978, annually file with the Secretary of the Interior a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

(b) The Secretary of the Interior shall—

(1) within ninety days after the date of enactment of this Act—

(A) define the term "known financial interest" for purposes of subsection (a) of this section; and

(B) establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Secretary of such statements; and

(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b) of this section, the Secretary may identify specific positions within the Department of the Interior which are of a nonregulatory or nonpolicymaking nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, this section shall be fined not more than $2,500 or imprisoned not more than one year, or both.

INVESTIGATION OF AVAILABILITY OF OIL AND NATURAL GAS FROM THE OUTER CONTINENTAL SHELF

SEC. 506. (a) The Congress hereby finds that—

(1) there is a serious lack of adequate basic energy information available to the Congress and the Secretary of the Interior with respect to the availability of oil and natural gas from the Outer Continental Shelf;

(2) there is currently an urgent need for such information;

(3) the existing collection of information by Federal departments and agencies relevant to the determination of the availability of such oil and natural gas is uncoordinated, is jurisdictionally limited in scope,

and relies too heavily on unverified information from industry sources;

(4) adequate, reliable, and comprehensive information with respect to the availability of such oil and natural gas is essential to the natural security of the United States; and

(5) this lack of adequate reserve data requires a reexamination of past data as well as the acquisition of adequate current data.

(b) The purpose of this section is to enable the Secretary of the Interior and the Congress to gain the best possible knowledge of the status of Outer Continental Shelf oil and natural gas reserves, resources, productive capacity, and production available to meet current and future energy supply emergencies, to gain accurate knowledge of the potential quantity of oil and natural gas resources which could be made available to meet such emergencies, and to aid in establishing energy pricing and conservation policies.

(c) The Secretary of the Interior shall conduct a continuing investigation, based on data and information which he determines has been adequately and independently audited and verified, for the purpose of determining the availability of all oil and natural gas produced or located on the Outer Continental Shelf.

(d) The investigation conducted pursuant to this section shall include, among other items—

(1) an independent determination of the MER (maximum efficient rate) and MPR (maximum production rate) in relation to the actual production from the fields, reservoirs, and wells on the Outer Continental Shelf commencing with production during the twelve-month period immediately prior to the date of enactment of this section, and an independent estimate indicating whether production from such fields, reservoirs, and wells has been less than the maximum efficient rate and maximum production rate, and, if so, the reason for such difference;

(2) an independent estimate of total discovered reserves (including proved and indicated reserves) and undiscovered resources (including hypothetical and speculative resources) of Outer Continental Shelf oil and natural gas by fields and reservoirs;

(3) a determination of the utilization of Outer Continental Shelf oil and natural gas in terms of end-use markets so as to ascertain the consumption by different classes and types of end users;

(4) the relationship of any and all such information to the requirements of conservation, industry, commerce, and the national defense; and

(5) an independent evaluation of trade association estimates of Outer Continental Shelf reserves, ultimate recovery, and productive capacity since 1965 which shall be accompanied by a detailed description of procedures used by such associations and the manner in which their data relates to the results yielded in the investigation under this section. In order to provide maximum opportunity for evaluation and continuity, the Secretary of the Interior shall obtain all of the available data and other records which the trade associations have used in compiling their data with respect to reserves.

(e) The Secretary of the Interior shall, not later than six months after the date of enactment of this section, submit an initial report to the Congress on the results of the continuing investigation required under this section and shall submit subsequent reports annually thereafter. The initial report shall include cost estimates for the separate components of the continuing investigation and a time schedule for meeting all of its specifications. The schedule shall provide for producing all the required information within a year after the date of enactment of this section. The Secretary of the Interior shall make separate reports on past data as follows:

(1) within six months after the date of enactment of this section, on the acquisition and details of trade association data and information; and

(2) within twelve months after such date, an evaluation of the trade association materials, and within eighteen months after such date, the relationship between trade association data and the new data collected under this section.

(f) The Secretary of the Interior shall consult with the Federal Trade Commission regarding categories of information acquired pursuant to this section. Notwithstanding any other provision of law, the Secretary of the Interior shall, upon request of the Federal Trade Commission, make available to such Commission any information acquired under this section.

(g) For purposes of this section, the term "Outer Continental Shelf" has the meaning given such term in section 2(a) of the Outer Continental Shelf Lands Act.

STATE MANAGEMENT PROGRAM

SEC. 507. Section 307(c)(3)(B)(ii) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456(c)(3)(B)(ii)) is amended to read as follows:

"(ii) concurrence by such state with such certification is conclusively presumed as provided for in subparagraph (A), except that the time period after which such concurrence shall be presumed shall be three months; or".

RELATIONSHIP TO EXISTING LAW

SEC. 508. Except as otherwise expressly provided in this Act, nothing in this Act shall be construed to amend, modify, or repeal any provision of the Coastal Zone Management Act of 1972, the National Environmental Policy Act of 1969, the Mining and Mineral Policy Act of 1970, or any other Act.

AMENDMENT OFFERED BY MR. MOORE

Mr. MOORE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MOORE: Page 277, immediately after line 18, add the following new section:

RULE AND REGULATION REVIEW

SEC. 508. (a) Any rule or regulation prescribed pursuant to this Act or the Outer Continental Shelf Lands Act, as amended by this Act, by the head of any Federal department or agency may by resolution of either House of Congress be disapproved, in whole or in part, if such resolution of disapproval is adopted not later than the end of the first period of 60 calendar days when Congress is in session (whether or not continuous) which period begins on the date such rule or regulation is finally adopted by the head of such department or agency. The head of any Federal department or agency who prescribes such a rule or regulation shall transmit such rule or regulation to each House of Congress immediately upon its final adoption. Upon adoption of such a resolution of disapproval by either House of Congress within such 60-day period, such rule or regulation, or part thereof, as the case may be, shall cease to be in effect.

(b) Congressional inaction on or rejection of a resclution of disapproval of a rule or regulation promulgated under this Act or the Outer Continental Shelf Lands Act, as amended by this Act, shall not be deemed an expression of approval of such rule or regulation.

(c) The provisions of this section shall not apply to any finding or action by the Secretary of the Interior pursuant to section 8(a)(5)(C)(ii) or 8(b)(4) of the Outer Continental Shelf Lands Act, as amended by this Act.

Page 277, line 20, strike out "508" and insert in lieu thereof "509".

Page 129, strike out—

"SEC. 508. RELATIONSHIP TO EXISTING LAW."

And insert in lieu thereof—

"SEC. 508. RULE AND REGULATION REVIEW.

"SEC. 509. RELATIONSHIP TO EXISTING LAW.".

Mr. MOORE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. MOORE. Mr. Chairman, I will not take the full 5 minutes. This amendment is what is commonly known as the legislative veto amendment. This amendment has been adopted by this Congress in the first session some five times which became law and in some additional nine times which is currently awaiting completion of the legislative process.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. MOORE. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, the committee will accept the gentleman's amendment.

Mr. MOORE. I thank the chairman.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. MOORE. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, the minority has examined the amendment and is happy to accept it.

Mr. MOORE. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. MOORE).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CLAY

Mr. CLAY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CLAY: On Page 271, strike lines 6 to 19, and insert in lieu thereof the following:

SEC. 504. Each agency or department given responsibility for the promulgation or enforcement of regulations under this Act or the Outer Continental Shelf Lands Act, shall take such affirmative action as deemed necessary to prohibit all unlawful employment practices and to assure that no person shall, on the grounds of race, creed, color, national origin, or sex, be excluded from receiving or participating in any activity, sale, or employment, conducted pursuant to the provisions of this Act or the Outer Continental Shelf Lands Act. The agency or department shall promulgate such rules as it deems necessary to carry out the purposes of this section, and any rules promulgated under this section, through agency and department provisions and rules which shall be similar to those established and in effect under title VI and title VII of the Civil Rights Amendments of 1964, except that such provisions under this Act shall be made to apply to aliens and include employment outside the United States and to which the Secretary of Labor shall not have the authority to grant exemptions.

Mr. CLAY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CLAY. Mr. Chairman, I rise today to offer an amendment to section 504 of H.R. 1614, the Outer Continental Shelf Lands Act Amendment of 1977. My amendment would incorporate into the bill, three integral components: First, compliance with title VII of the civil rights act, as amended; second, inclusion of aliens under the requirements of title VII; and three, the incorporation of employment outside the United States under the umbrella of title VII.

H.R. 1614, as reported out of the ad hoc select committee on OCS lands act, contains a provision (second 504) that is exactly the same as contained in S9 already passed by the Senate relating to antidiscrimination. However, as it now stands, it incorporates only title VI of the Civil Rights Act of 1964. Title VI, in general terms, prohibits exclusion from activity or employment on grounds of race, creed, color, national origin, or sex, but it specifically provides that there shall be no administrative correction of unlawful employment practices. Title VII of the Civil Rights Act prohibits unlawful employment practices, which are defined in broad scope and provides administrative remedy as well as Department of Justice intervention.

I also include a provision whereby title VII would apply to aliens and include employment outside the United States and to which the Secretary of Labor would not have authority to grant exemptions.

The report of the ad hoc committee states on page 198 that several Federal programs designated to guarantee equal employment and contracting opportunity, might not be automatically applicable to activities on the Outer Continental Shelf; to insure that such provisions would become applicable, the committee adopted a provision (section 504) to assure that no person shall be excluded from receiving or participating in any activity, sale or employment pursuant to the provisions of the act, on the grounds of race, creed, color, national origin, or sex. The agencies and department, however, are directed to promulgate rules and regulations to provide this protection only in accordance with title VI of the civil rights amendments. If my amendment is not adopted, the important, in fact the vital, part of the Civil Rights Act will be left out of the Outer Continental Shelf Lands Act.

Leaving out title VII of the Civil Rights Act does serious damage to the concept of civil rights. When we examine title VI we find that it specifically states that the construction of its provisions shall not authorize administrative action with respect to employment practices except where the primary objective of Federal assistance is to provide employment. Since the primary purpose of neither the Outer Continental Shelf Lands Act nor this amendment is to provide employment, employers may be able to engage in unlawful employment practices without restriction under these amendments as currently written. If my amendment is adopted, it will add title VII of the Civil Rights Act, which specifically prohibits unlawful employment practices of employers, of employment agencies, of labor unions, and of others.

An unlawful employment practice on the part of an employer is failing to, or refusing to hire, or to compensate, or to grant privileges of employment, because of race, color, religion, sex, or national origin; or to limit, segregate or classify employees or deprive an individual of employment because of race, color, religion, sex, or national origin.

By the same token, an unlawful employment practice on the part of a labor union is to exclude or expel from membership or to limit, to segregate, or to classify its membership or to refuse to refer for employment, because of race, color, religion, sex, or national origin.

Further, recent proposed amendments to the Civil Rights Acts have recognized the fact that civil rights should extend to aliens as well as citizens and should extend to employment outside the United States, and that no one should have the right to grant exemptions.

Only by the adoption of this amendment can it be said that we have served the cause of civil rights in the development of our Outer Continental Shelf lands. Only through adoption of this amendment, can we insure the protection of equal rights under the law.

The ad hoc committee in its report on the bill now before us states on page 198 that all agencies responsible for regulations relating to OCS must insure that equal opportunity be provided to all persons and to all activities associated with exploration, leasing, development, and production, and that specifically includes employment, bidding and awarding of contracts and subcontracts relating to the Outer Continental Shelf. We have no assurance that affirmative action programs will be required in these leases and in these contracts unless we make certain that the provisions of title VII come into play.

It can be argued that these programs will automatically apply to Outer Continental Shelf activities, and therefore, we do not need these antidiscrimination provisions. That argument has some validity because we are dealing here with binding contracts between the Government of the United States and contractors and subcontractors that provide for the use of Government property. However, the ad hoc committee has already decided that the antidiscrimination provisions should be spelled out as applicable here. Therefore, they should be. But let us spell them all out, not just one.

The Congress long ago adopted the policy of enumerating constitutional requirements in legislation for the purpose of using the leverage of the Government's immense purchasing power to assure equal employment opportunity, raise labor standards and prevent unlawful employment practices.

The Equal Employment Opportunity Commission has recently announced new "procedural regulations" on administering and enforcing title VII of the Civil Rights Act of 1964.

Unless this amendment is adopted we will not have the benefit of any of these progressive steps relating to equal rights. We must make certain that the requirements of title VII of the Civil Rights Act are included in H.R. 1614.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. CLAY. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, the committee is happy to accept the gentleman's amendment.

Mr. CLAY. I thank the Chairman.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. CLAY. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, the minority is familiar with this amendment from past offerings in legislation, and we will be glad to accept it.

Mr. CLAY. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. CLAY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LAGOMARSINO

Mr. LAGOMARSINO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LAGOMARSINO: Page 277, immediately after line 18, insert the following new section:

RECOMMENDATIONS FOR TRAINING PROGRAM

SEC. 508. Not later than 90 days after the date of enactment of this Act, the Secretary of the Interior, in consultation with the Secretary of the Department in which the Coast Guard is operating, shall prepare and submit to the Congress a report which sets forth the recommendations of the Secretary for a program to assure that any individual—

(1) who is employed on any artificial island, installation, or other device located on the Outer Continental Shelf; and

(2) who, as part of such employment, operates, or supervises the operation of pollution-prevention equipment, is properly trained to operate, or supervise the operation of such equipment, as the case may be.

Page 277, line 20, strike out "Sec. 508." and insert in lieu thereof "Sec. 509."

Page 129, in the table of contents for title V, strike out "Sec. 508. Relationship to existing law." and insert in lieu thereof the following:

"Sec. 508. Recommendations for training program."

"Sec. 509. Relationship to existing law."

Mr. LAGOMARSINO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LAGOMARSINO. Mr. Chairman, I offer an amendment to title V of the bill to help insure that those individuals who are directly responsible for the operation, implementation, and/or supervision of antipollution equipment know how to operate this equipment and can effectively install and operate it during emergency conditions.

My amendment is quite simple and, I should think, not controversial. Simply

stated, the amendment would require the Secretary of the Interior, in consultation with the Coast Guard, to submit his recommendations to Congress within 90 days after the date of enactment for a training program for key OCS employees. The program should be directed to those individuals who are directly responsible for the implementation and operation of antipollution equipment, and primarily we are talking about antiblowout preventers. At such time the Congress receives the Secretary's recommendations, it would be my hope that the appropriate committees would review the Secretary's recommendations in both an oversight capacity and also to determine if further legislation is necessary.

Mr. Chairman, as you may know, the Department of Interior, through the U.S. Geological Survey, recently completed work on such a training and certification program and declared that all drilling crew members must attend a certified school in order to stay on the job. I commend the Department for their commitment and responsiveness in this matter. I should point out that the Department now has the regulatory authority to institute such a program.

In light of this recent development, I believe my amendment has perhaps a greater significance and need now than before the Department's action. First, it would provide for congressional oversight, which I believe to be very important to assure the training program is both effective and would not seriously disrupt OCS activities for frivolous purposes. Second, it would mandate into law, the commitment of Congress to a training and certification program for key OCS workers. Under the current authority, the Department of Interior may or may not institute such a program; and subsequent administrations may decide to discontinue the program. It seems to me this matter is of vital concern. It could lead to significantly improved OCS safety records and the Congress should endorse it.

The need for a Federal training program has been tragically demonstrated all too often in the past. The disastrous blowout in the Santa Barbara Channel in 1969 resulted in millions of dollars in damage and severe environmental impacts. Thousands of birds were contaminated and died, the beaches were fouled, and commercial and pleasure craft were coated with black crude. This tragedy resulted at least in part because of inexperienced and poorly trained crews who failed to act with established procedure during an emergency situation. In fact, the crews committed one mistake after another, and still the situation could have been brought under control if the proper procedure had been followed at the very last.

Following the most recent blowout, in the North Sea, an official commission of inquiry ruled that insufficient training, poor organization, and inadequate inspections were responsible for that mishap which resulted in millions of gallons of crude being dumped into the ocean. I understand that the crew tried to put the blowout preventer upside down. In fact, if one studies the causes of all of the significant accidents on the OCS you find that a major portion is directly attributable to human error and poor training; not equipment failure. Clearly, there is sufficient cause for responsible Government action to rectify this situation and just as clearly there is a responsibility with this body to insure that Federal training programs are effective and will not unnecessarily disrupt production activities on the OCS.

Mr. Chairman, I want to emphasize that my amendment will not in any way interfere with the ongoing efforts of the Department of the Interior to establish a training and certification program. The amendment will, however, demonstrate congressional interest in the safe development of OCS oil and gas.

In closing, I want to point out I have contacted every responsible party I could think of that may have an interest in this amendment. I, and my staff, have checked with industry representatives, environmental groups, and the U.S. Geological Survey and all have been supportive of the concept.

I urge adoption of the amendment.

Parties we have contacted:

Santa Fe International Corp., Mr. Charles R. Ball, Jr.

American Petroleum Institute, Mr. Jack Ware.

U.S. Geological Survey, Mr. Dick Foot.

Majority counsel, OCS Committee, Marty Belsky.

National Oceans Industry Association, Charlie Mathews.

Congressman BREAUX, Val Marmillion.

NACOA, Mr. Jack Willis.

All the above individuals expressed support, or at least did not express opposition to the amendment.

Mr. Chairman, as you know, the proponents of H.R. 1614, the Outer Continental Shelf Lands Act amendments say it is legislation critical to the future safe and ecologically compatible development of our offshore oil and gas reserves. This legislation is of, perhaps, greater concern to my constituents because they live along the Santa Barbara Channel, which has the dubious distinction of being the only area in the United States to have suffered through a massive offshore oil well spill. Certainly no one in my district, or anywhere for that matter, whether they be opponents or proponents of increased offshore drilling, would like to see a repeat of the 1969 blowout. As such, some legislation is necessary for both the beauty and environmental integrity of the area and also for economic prosperity.

Without a doubt, H.R. 1614 is controversial. I, for one, had serious reservations about certain provisions contained in the bill which came to us from committee. I am pleased to say, however, that I feel that this body has acted responsibly during our consideration of this legislation by adopting amendments which, in my opinion, greatly improve the legislation. I supported and was pleased to see amendments adopted which struck the Federal exploration and drilling provisions, the dual leasing provisions, mandatory experimental bidding, and expanded OSHA authorities over OCS workers when the Coast Guard has done such a good job in the past.

I was also most pleased to have the House adopt two amendments I offered—one to insure greater local participation in the tract selection process by providing for local public hearings, and another to insure greater environmental safety by demonstrating congressional interest and establishing a degree of congressional oversight in training programs for key OCS workers to insure that they know how to operate antipollution devices such as blowout preventers.

In my opinion, this bill has been greatly improved in critical areas. While some have said that H.R. 1614 is neither an environmental bill nor an energy bill, I think it can now be both if it remains in its present form. We have contributed greatly to the safety, the environmental compatibility, and the well-planned development of our OCS resources to help insure against accidents which result in damaging oil spills which foul our beaches and oceans, and threaten fisheries and other industries which are dependent on the ocean. At the same time, this legislation now provides assurances and direction so that we can get on with the business of producing offshore oil and gas resources so critical to our Nation's energy needs.

Mr. Chairman, I urge my colleagues who will sit on the conference committee on this bill to retain those critical improvements in the legislation made by the House.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, the committee has examined the amendment, agrees with the content, and will accept the amendment.

Mr. LAGOMARSINO. I thank the gentleman.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, the minority accepts the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. LAGOMARSINO).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DINGELL

Mr. DINGELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DINGELL: Page 277, line 20, after "SEC. 508." insert "(a)".

Page 277, after line 24, insert the following:

(b) Nothing in this Act or any amendment made by this Act to the Outer Continental Shelf Lands Act (43 U.S.C. 1331, et seq.) or any other Act shall be construed to affect or modify the provisions of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.) which provide for the transferring and vesting of functions to and in the Secretary of Energy or any component of the Department of Energy.

Mr. DINGELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DINGELL. Mr. Chairman, I offer this amendment to title V. It has been printed in the RECORD, and I offer it on behalf of the ranking minority member of our subcommittee, Mr. BROWN of Ohio, and myself.

Mr. Chairman, on August 4, 1977, Congress enacted the Department of Energy Organization Act which transferred certain Interior Department functions relative to the OCS to the new Energy Department. It also transferred functions of the former Federal Power Commission relative to the OCS to FERC. Additionally, it provided that the information gathering authorities of the DOE Act and section 11 of the Energy Supply and Environmental Coordination Act of 1974 would apply to all functions transferred to the DOE.

The DOE Act, however, was enacted after Chairman MURPHY and the ad hoc committee ordered reported H.R. 1614. Indeed there are some provisions in the bill, such as the new section 5(e) of the OCS Act relative to pipeline rights-of-way and section 506 of the bill relative to information gathering, that appear to be inconsistent with the DOE Act.

Our amendment is technical and conforming. It merely recognizes that the DOE Act provisions shall apply to this bill. I understand that Chairman MURPHY agrees that it was never the intention of the ad hoc committee to undo what Congress did in establishing the new Energy Department and I am sure that he will agree that this amendment is sound and needed.

Our amendment is supported by the administration and by Chairman JACK BROOKS of the Government Operations Committee which handled the DOE law. I urge adoption.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I am happy to yield to my good friend and colleague, the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, this is the consistency provision having to do with the Department of Energy, and the committee is happy to accept the amendment.

Mr. DINGELL. Mr. Chairman, I thank my good friend, the gentleman from New York.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I thank the gentleman for yielding.

I understand the gentleman has two amendments, and this is the one having to do with page 277 that deals with the matter of consistency?

Mr. DINGELL. Mr. Chairman, the gentleman is correct. This is the amendment at page 277, line 20. It is the second of the two amendments I have.

Mr. FISH. Mr. Chairman, I thank the gentleman. I am happy to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. DINGELL).

The amendment was agreed to.

Mr. BAUMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to direct a question to the chairman of the committee.

On pages 274 and 275 of the committee bill there is mandated an investigation by the Department of the Interior to find certain information relative to the extent of energy resources on the Outer Continental Shelf. On page 275, line 9, the bill specifically mandates an investigation which will include an independent estimate of total discovered reserves, and so on.

Is my interpretation correct that this in no way would permit the Department of the Interior to engage in any sort of exploratory drilling or production or other activities of this nature such as were ruled out by Studs-Treen amendment yesterday?

Mr. MURPHY of New York. Mr. Chairman, if the gentleman will yield, let me state that the gentleman from New Jersey (Mr. HUGHES) was the author of this amendment in the committee, and I will ask him to respond to the gentleman's question.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, I thank the gentleman for yielding.

I can assure the gentleman from Maryland (Mr. BAUMAN) that there is nothing in the language that would permit the Secretary to enter into Federal exploration to determine oil and gas resources.

I might also say to the gentleman that I do have some additional perfecting language which is supported by the administration. I will be offering such an amendment.

Mr. BAUMAN. In the additional language the gentleman will offer, would there be any authorization for any Federal drilling or production activity?

Mr. HUGHES. Mr. Chairman, I can assure the gentleman there would not.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, if I may respond further, just to make it crystal clear, I will say that the intent of the gentleman from New Jersey (Mr. HUGHES) would agree with the intent of the committee.

Mr. HUGHES. Mr. Chairman, I thank the gentleman for clarifying this matter.

Mr. BAUMAN. Mr. Chairman, I would just at this point like to urge the support of this legislation.

I was one of those Members who voted against reporting this bill from the committee, although I had supported an improved version last year.

One of the principal reasons I opposed the legislation was, as has been noted, that it did at one point, before our deliberations changed it by an overwhelming vote, offer the possibility of Federal exploration and perhaps production of oil and gas. That we do not need. There has been a number of major improvements made in this bill. It contains provisions to protect coastal areas and give States and local governments a say in leasing decisions. Its revenue sharing provision has been improved.

The only thing I would hope is that we would not now go to conference with the other body and sell out the position of this House. I would recall the history of this legislation last year. That is precisely what happened last year, and the net result was that the OCS bill came back from conference, was defeated, and sent back to conference where it died.

So, Mr. Chairman, I would hope, after the debate we have had during these many days, that we will stand by our position, and I urge support for the legislation.

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: On page 274, strike line 21 through line 25 on page 276, and insert in lieu thereof the following:

(d) The investigation conducted pursuant to this section shall include, among other items—

(1)(A) a determination of the maximum attainable rate of production (MAR) of crude oil and natural gas from significant fields on the Outer Continental Shelf; and

(B) an analysis of whether the actual production has been less than the MAR and, if so, the reasons for the differences.

(C) For purposes of this subsection, the term "maximum attainable rate of production" or "MAR" means the maximum rate of production of crude oil and natural gas which may be produced under actual operating conditions without loss of ultimate recovery of crude oil and natural gas.

(2) an estimate of the total discovered crude oil and natural gas reserves by fields (including proved and indicated reserves) and undiscovered crude oil and natural gas resources (including hypothetical and speculative resources) of the Outer Continental Shelf;

(3) the relationship of any and all such information to the requirements of conservation, industry, commerce, and the national defense;

(4) an independent evaluation of trade association procedures for estimating Outer Continental Shelf reserves, ultimate recovery, and productive capacity for years in which trade associations made such estimates. In order to provide maximum opportunity for evaluation and continuity, the Secretary shall obtain all the available data and other records, including a description of the methodology and estimating procedures, which the trade associations used in compiling their data with respect to the reserves.

(e) The Secretary shall, not later than one year after the date of enactment of this section, submit an initial report to Congress. The initial report shall include cost estimates for the separate components of the continuing investigation and a time schedule for meeting all of its specifications. The schedule shall provide for producing all the information required in subsections (d)(1)(A), (d)(2), and (d)(3) of this section on the day following the first complete calendar year after enactment, and every two years thereafter. The Secretary shall make separate re-

ports on the data acquired pursuant to subsection (d)(4) of this section as follows:

(1) a report within six months after the date of enactment of this section, on the acquisition and details of trade association data and information;

(2) within twelve months after submission of the report required by subsection (e)(1) above, an evaluation of the trade association materials; and

(3) within twelve months after submission of the report required by clause 2 of this subsection, the relationship between trade association data and the new data collected under this section.

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HUGHES. Mr. Chairman, the amendments I am offering incorporates the recommendations of the administration with regard to section 506, which provides for an investigation and review of the availability of oil and natural gas from the Outer Continental Shelf.

The basic purpose of the section 506 is to assure that the Federal Government has adequate, independent information concerning the amount of our oil and gas resources on the Outer Continental Shelf. However, as now drafted, they have pointed out a number of problem areas. As the individual who offered this section 506 in committee, I am happy to accept the administration's recommendations, which I feel would make the program more workable and feasible.

Basically, the amendment changes three aspects of section 506:

It substitutes the term "maximum attainable rate of production" for "maximum efficient rate." Over past years, the maximum efficient rates has proved difficult to work with, since it is more or less hypothetical. Maximum attainable rate is a much more feasible and practical term for assessing the actual producing capacity of any given reservoir.

The amendment requires review of only significant fields, rather than an undefined category of fields as now provided in section 506. By concentrating on significant fields, the program can be more cost effective;

The amendment also provides for a revised time frame for reports to Congress under this section, to provide for continuity in statistical data collection techniques.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, the administration supports this amendment, and the committee supports it.

Also, it would reduce the costs of investigation and fulfill the original intent and it would further allay the concerns of the gentleman from Maryland (Mr. BAUMAN).

Mr. Chairman, we are happy to support the amendment.

Mr. HUGHES. I thank the gentleman.

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Louisiana.

Mr. BREAUX. Mr. Chairman, I would like to ask the gentleman a question.

The gentleman's amendment says that the Federal Government should find out more about the reserves and resources. There is no problem with that.

However, the Senate version of this amendment goes one step further and says that the Federal Government can do a lot more in finding out what the resources are.

The gentleman's amendment, as I understand, does not have that provision in it; does it?

Mr. HUGHES. I can assure the gentleman that it does not.

Mr. BREAUX. Mr. Chairman, I would hope that the gentleman would support that provision when we get to conference and not support the Senate provision which would add that section to it.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I am not going to oppose the gentleman's amendment because I consider it to be an improvement over the committee bill, although my preference would be to see the entire section 506 stricken.

As the gentleman knows, section 506 says that there is a serious lack of adequate basic energy information, which should be called for; and that again, there is currently an urgent need for this information. I think what it says is totally erroneous and misleading.

Mr. Chairman, would the gentleman turn to page 217 of the bill. On line 5 it says the following:

"(b)(1) Information provided to the Secretary pursuant to subsection (a) of this section shall be processed, analyzed, and interpreted by the Secretary for purposes of carrying out his duties under this Act.

I do not think there is any justification for a finding that there is indeed a serious lack of adequate basic energy information in the Nation. I think we have all the information we need today.

Mr. HUGHES. Mr. Chairman, I welcome the gentleman's support.

All I can say is that I think much of the data we have resembles fiction sheets more than anything else because we have relied too heavily upon industry to furnish us with this data.

I do think it is time that we have an independent determination of our resources.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HUGHES).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DINGELL

Mr. DINGELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DINGELL: Page 270, strike out line 18 and all that follows down through the period on line 4 on page 271 and insert in lieu thereof the following:

SEC. 503. (a) The purpose of this section is to encourage expanded participation by local distribution companies in acquisition of leases and development of natural gas resources on the Outer Continental Shelf by facilitating the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company.

(b) The Federal Energy Regulatory Commission shall, after opportunity for presentation of written and oral views, promptly promulgate and publish in the Federal Register a statement of Commission policy which carries out the purpose of this section and sets forth the standards under which the Commission will consider applications for certificates of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, for the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company. Such statement of policy shall specify the criteria, limitations, or requirements the Commission will apply in determining:

(1) whether the application of any local distribution company qualifiies for consideration under the statement of policy; and

(2) whether the public convenience and necessity will be served by the issuance of the requested certificate of transportation. Such statement of policy shall also set forth the terms or limitations on which the Commission may condition, pursuant to section 7 of the Natural Gas Act, the issuance of a certificate of transportation under such statement of policy.

(c) For purposes of this section:

(1) the term "local distribution company" means any person:

(A) engaged in the distribution of natural gas at retail; and

(B) regulated, or operated as a public utility, by a State or local government or agency thereof.

(2) The term "interstate commerce" shall have the same meaning as such term has under section 2(7) of the Natural Gas Act.

(3) The term "Commission" means the Federal Energy Regulatory Commission.

Mr. DINGELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MURPHY of New York. Mr. Chairman, would the gentleman yield?

Mr. DINGELL. I would be glad to yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, this amendment again is acceptable to the committee and acceptable to the administration and is in consistency with the other regulations.

Mr. DINGELL. I thank the gentleman.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I would be glad to yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I would hope the gentleman from Michigan (Mr. DINGELL) would take just a few minutes to explain his amendment.

Mr. DINGELL. I would be happy to do so briefly.

Mr. FISH. I thank the gentleman.

Mr. DINGELL. Mr. Chairman, this is an amendment that is very similar to an amendment offered earlier by myself on behalf of my friend and colleague, the gentleman from Ohio (Mr. BROWN), who is the senior minority member of the Subcommittee on Energy and Power of the Committee on Interstate and Foreign Commerce. The amendment is quite similar to that offered and accepted to the Breaux substitute by the House last week. In order to clarify the purposes of the section, some changes have been made at the suggestion of FERC and Mr. Fred Moring of the Associated Gas Distributors who are the beneficiaries of this provision. Both FERC and the AGD advised my staff that they support this amendment. The administration supports this amendment, as changed.

Section 503 relates solely to the certification, transportation, and distribution of natural gas and directly affects matters within the jurisdiction of our committee. It is a special interest section benefiting the big gas distributors, such as Washington Gas Light, Philadelphia Gas, and others. It is opposed by the Federal Energy Regulatory Commission, as noted in a January 26, 1978, letter to me (CONGRESSIONAL RECORD, page 977, January 26, 1978).

Our amendment achieves the objectives sought to be accomplished by the ad hoc committee without creating the potential adverse consequences of the broader language utilized by the ad hoc committee. Our amendment goes beyond present law. Under present law, the discretionary nature of FERC's authority has created uncertainty. It is this uncertainty which the ad hoc committee sought to remove. The amendment changes present law by requiring FERC to promptly prescribe, after a period of public participation, including public hearings, a statement of Commission policy setting forth the standards on which future Commission action on applications for transportation certificates by local distribution companies will be based. The policy must be consistent with the purposes of the section. This statement of policy will give local distribution companies the assurances, lacking today, but needed before they can justify the large front-end investment required to develop OCS natural gas resources.

The amendment leaves the FERC its existing authority under the Natural Gas Act to assure that the public convenience and necessity is served by the grant of a transportation certificate. The retention of this authority is essential to assuring that abuses and unintended adverse consequences may be controlled or eliminated by FERC. The policy statement and any later revision thereof will prescribe general terms and conditions to be included in the certificate. It allows FERC to provide special conditions that may be needed on a case-by-case basis.

In summation, the amendment requires FERC to set forth the rules of the game, in advance, thereby removing the uncertainty which presently limits participation by local distribution companies in OCS leasing. Thus, the amendment accomplishes the objectives set forth in the report of the ad hoc committee, but avoids the potental for serious adverse consequences created by the overly broad language in the bill. It allows FERC to determine, by policy, when and under what circumstances such certificates are, in fact, in the public interest and to avoid or prevent problems for the pipelines, other distributors, and the users and to prevent, to the greatest extent possible, high costs to the ratepayers.

I urge its adoption.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I am glad to yield to my friend, the gentleman from New York.

Mr. FISH. I thank the gentleman for yielding. If I could just ask a few questions of the gentleman, I will try to abbreviate them.

In the amendment it calls for a statement of commission policy. I am curious as to the effect of the statement of commission policy. Will it stipulate certain conditions which if met by an applicant distribution company would result in its being granted the right to transport any OCS gas they find back to their services area?

Mr. DINGELL. That is correct. I would like to tell the gentleman that the issuance would be automatic at that point, but what would happen would be that the gas company then, after the rules were drafted, would go in to FERC, and if it could show it met the criteria, it could get almost the pro forma issuance of the certificate for the carrier, assuming there was space in the pipeline and other good-sense conditions were met.

Mr. FISH. If the FERC finds under 503(b)(2) of the gentleman's amendment that the public convenience and necessity will be served by the issuance of a requested certificate of transportation, does that mean that a company would get the certificate just on the basis of this finding?

Mr. DINGELL. Yes, subject to the availability of space in the pipeline and subject to the fact that it would not foul up, let us say, the existing priorities with regard to small businesses, residential householders, schools, hospitals, and agricultural priorities, and perhaps some safety conditions that might be sensibly imposed by FERC.

Mr. FISH. I thank the gentleman and support his amendment.

Mr. DINGELL. I yield back the remainder of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. DINGELL).

The amendment was agreed to.

TECHNICAL AMENDMENTS OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Chairman, I ask unanimous consent that I may be permitted to offer certain technical amendments that have already been agreed to by the minority and have already been drafted.

The Clerk read as follows:

Technical amendments offered by Mr. MURPHY of New York:

On page 140, between 13 and 14, add the following new subsection: "(r) The term 'minerals' includes oil gas, sulphur, geopressured-geothermal and associated resources, and all other minerals which are authorized by an act of Congress to be produced from 'public lands' as defined in Section 103 of the Federal Land Policy and Management Act of 1976."

On page 135, lines 3 and 4, change "(1) deposits of oil, gas or other minerals, or (2) geothermal steam;" to "deposits of minerals:". On page 128, lines 6 and 7, change "oil, natural gas, or other minerals, or geothermal steam," to "minerals", and make the same change in three other places: page 138, line 18; page 139, lines 1 and 2; and page 139, line 14. On page 139, lines 16 and 22 and on page 140, line 1, delete the words "or geothermal steam". On page 148, lines 3 and 4 add line 25, delete the words "or geothermal steam resources."

On page 145, lines 6–8 delete "within the fishery conservation zone or within fifty miles of any artificial island, installation, or other device referred to in subsection (a) of this section"; on lines 15–16 delete "jurisdiction of such Secretary with respect to the"; and on page 146, line 20, delete "; and "and all that follows through line 23.

On page 148, line 21, change "unavailability" to "construction or negotiation for use".

On page 149, line 3, add "under (A) or (B)" after "prohibition".

On page 152, line 13, change "extension, renewal, or replacement" to "assignment or other transfer".

On page 152, delete lines 16–19.

On page 152, line 22, delete "if the" and all that follows through "hereof" on page 153, line 1.

On page 153, line 8, delete "if the lease" and all that follows through "hereof" on line 12.

On page 156, lines 13–14, delete "which are not covered by leases meeting the requirements of subsection (a) of section 6 of this Act."

On page 156, line 14, before the word "The" add the following sentence: "Such regulations may provide for the deposit of cash bids in an interest-bearing account until the Secretary announces his decision on whether to accept the bids, with the interest earned thereon to be paid to the Treasury as to bids that are accepted and to the unsuccessful bidders as to bids that are rejected."

On page 165, line 9, add the word "planned" after "systems".

On page 165, line 11, add the word "expected" before "benefits".

On page 167, line 25, after the word "areas" add "because"; and on page 168, amend line 1 as follows: "unusually deep water or other unusually adverse".

On page 169, amend lines 19 through 25 to read as follows: "No lease may be issued to a bidder if the Secretary finds that the bidder is not meeting due diligence requirements on other leases."

On page 170, line 16, before the word "offered" add "proposed to be".

On page 172, delete lines 21 through 25, and on page 173, delete lines 1 through 2.

On page 179, line 25, delete the word "indicate" and in its place add "consist of a schedule of proposed lease sales indicating".

On page 182, change "baseline" to "environmental", and on line 23 delete "baseline"; on page 189, line 19, change, "BASELINE AND MONITORING" to "ENVIRONMENTAL", one line 21 delete "baseline", and on line 22 change "concerning the status of" to "needed for assessment and management of environ-

mental impacts on"; on page 190, line 11, change "baseline" to "environmental", and on line 22 change "baseline" to "environmental"; on page 191, line 22 change "baseline" to "environmental"; and on page 128, change the title of Section 20 from "Baseline and Monitoring Studies" to "Environmental Studies".

On page 188, line 13, delete the word "full".

On page 190, line 4, change the word "scheduled" to "announced by publication of a notice of proposed lease sale".

On page 190, lines 9 through 10, delete the words "in conducting any such study".

On page 194, line 11, delete "or duplicate".

On page 196, line 22, change "over" to "during".

On page 205, change the word "section" to "Act" on lines 4, 5 and 7.

On page 205, line 15, change "commercial quantities" to "paying quantities."

On page 208, amend lines 4 through 7 as follows: "the Governor of any affected State, and upon request, to the executive of any local government, and shall make such draft available to any appropriate interstate regional entity and the public."

On page 208, line 12, after the word "Secretary" add the words "or from the date it is made available".

On page 214, amend lines 1 through 5 as follows: "be cancelled in accordance with section 5 (c) and (d). Termina-"

On page 216, amend lines 3 through 6 as follows: "the Secretary access to all data and information (including processed, analyzed and interpreted information) obtained from such activity and shall provide copies of such data and information as the Secretary may request. Such data and information shall be provided in accord-"

On page 217, line 5, change "Information" to "Data and information".

On page 219, line 22, add the following after "section": "and to hold the United States harmless from any violations of the regulations prescribed pursuant to subsection (c) that the State or its employees may commit."

On page 221, line 10, change "sections 6 and 7" to "section 7".

On page 221, lines 12 and 18, delete "or permit".

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. ROUSSELOT. Reserving the right to object, can the gentleman from New York explain why this is necessary?

Mr. MURPHY of New York. If the gentleman will yield, the question is that the creation of the Department of Energy and FERC has caused certain consistency questions in language, and many of these amendments are technical to conform the language of this act to those very recent changes.

Mr. ROUSSELOT. The gentleman can assure us that there are absolutely no substantive changes in any way?

Mr. MURPHY of New York. There are no substantive changes, and these amendments have all been agreed to by the minority.

Mr. ROUSSELOT. They have nothing to do with cargo preference?

Mr. MURPHY of New York. No cargo preference, only a 20-percent provision.

Mr. ROUSSELOT. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New York (Mr. MURPHY).

The amendments were agreed to.

Mr. HUBBARD. Mr. Chairman, I move to strike the last word.

Mr. Chairman, when the Committee of the Whole rises, I plan to demand a separate vote on the Seiberling amendment. I shall ask for a rollcall vote to be taken on the amendment offered yesterday by the gentleman from Ohio (Mr. SEIBERLING) and passed 20 to 19 by a division vote of the House. An issue as important as the transfer of the Department of the Interior's authority to regulate OCS oil pipelines to the Department of Energy and specifically to the Federal Energy Regulatory Commission should not be resolved by a single vote when less than one-tenth of the House membership is present.

To repeat the strong arguments to defeat this amendment made by my colleague, the gentleman from New York (Mr. FISH) yesterday, this amendment could allow nonowners of pipelines to force expansion of the throughput capacity of a pipeline while not being forced to bear the cost or the risks associated with such an expansion. The language of the Seiberling amendment gives the Secretary of Energy the power to determine that owners will pay if, and I quote:

. . . alternative allocation of costs and risks is equitably required . . .

This dangerously vague language offers no real guidelines to the Secretary and encourages litigation. Should the Secretary determine that an allocation of costs is "equitably required," owners of an affected pipeline would surely sue to require nonowners to pay for the expansion. Likewise, if the Secretary requires nonowners to pay for the expansion of the pipeline's capacity, nonowners are likely to sue, claiming that the owners should pay for the expansion if equity is to be recognized.

In closing I would say that the language of the Seiberling amendment provides for regulation of pipelines unless the Secretary specifically, by order or regulation, exempts them from overall regulation. Such regulation was not advocated by the administration or anyone else during the 2½ years of hearings held by the select committee, and there is no reason to adopt such regulation at this time.

Again, a vote soon will be asked on the Seiberling amendment. We hope we can defeat it.

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do not know if I am going to be the last person this afternoon to take the well of the House before we vote on a straight motion to recommit and the final passage, but I share the hopes of the Members that I am.

At the start of this debate I warned of the danger that H.R. 1614 had so many defects that I doubted it could be perfected and would ultimately be written in conference. The patience, diligence, and wisdom of this body has proved me wrong. While not perfect, the bill before us is now much improved.

As the author of a comprehensive substitute that the committee bill now more nearly resembles, the consistent position on my part is to favor passage of this legislation.

Here is the record of what we have accomplished in the last 3 days:

Dual leasing has been knocked out of the bill;

The Santa Barbara Channel has been removed as an automatic frontier area;

We have deleted Federal exploration;

We have changed the mandate for new systems from a minimum of 50 percent to a minimum of 20 and a maximum of 50 percent;

We have knocked out OSHA's authority on the OCS;

Just compensation has been reinstated as the sole measure of the damages should a lease be canceled;

And we have increased the impact funds for coastal areas.

But Mr. Chairman, a conference with the Senate is still ahead of us, and the Senate bill contains many provisions the House has deemed to be not in the public interest. If some in this body believe the House changes that we have adopted were merely tactical, I believe they seriously misjudged the temper of this body, and I remind my colleagues that once before this House has recommitted a conference report on this bill. After long debate I think the House is more aware of the numerous problems that were inherent in this legislation.

If the will of this House is not adhered to in the conference with the Senate, we shall be back to seek instructions for the conferees, and if necessary, regrettably, we shall again return to seek recommital.

At this point I hope the Members will vote in favor of this legislation.

Mr. LEGGETT. Mr. Chairman, in considering this amendment, I would first like to express my support for passage of the committee version of the Outer Continental Shelf Lands Act amendments. H.R. 1614 is a comprehensive revision of the statutes pertaining to the development of oil and gas resources of the Continental Shelf of the United States. The bill would revise the existing statutes in order to insure the speedy development of these much needed resources while at the same time providing for the necessary protection of our coastal and marine environment. The bill would also provide a mechanism for State participation in offshore and coastal oil and gas development plans and the means for States to manage the impacts resulting from such development.

The balancing of the many different and sometimes conflicting interests of energy development and environmental conservation is a difficult task. H.R. 1614 is the consensus product of a special "ad hoc" committee which spent many hours considering testimony from a wide array of witnesses, and produced hearing transcripts running to thousands of pages. The broad support that has been expressed for H.R. 1614 by public interest groups and the concerned Federal agencies is testimony to the effectiveness of the hard work of the "ad hoc" committee and to the fairness of the bill's pro-

visions. In this regard, I must congratulate Mr. MURPHY on his fine work as chairman of the Outer Continental Shelf Ad Hoc Committee.

Despite its general excellence, the bill contains a major deficiency in that it does not provide an adequate basis for the maintenance of the health of the U.S. offshore oil construction industry.

Construction of drilling and production platforms for the offshore oil industry is in itself a major industry. Mobile drilling rigs are massive structures costing in excess of $50 million, requiring over 1,500 man-years of labor and in excess of 4,000 tons of steel to construct. Production platforms are permanent structures placed over a well after drilling in order to control the flow of oil during the production phase. These permanent production platforms are also massive structures costing millions of dollars. Presently over 8,000 workers are employed directly in offshore oil rig construction while at least 16,000 are employed in a variety supporting industries in the United States.

Until the early part of this decade, the U.S. offshore oil construction was predominant in the world. However, this predominance has been eroded away so that less than 30 percent of current orders for drilling rigs are placed in the United States. The seriousness of the situation is more clearly understood when it is realized that our less than 30 percent share of the market represents only 7 orders in 1977 compared for example with 33 orders which were active in 1972.

It is illuminating to review the history of the offshore oil construction industry to see the possible reasons for the erosion in the United States position relative to other countries. The technology required for offshore drilling was developed substantially in the United States and almost all of the early offshore drilling took place in the U.S. coastal zone. However, in the early 1970's, there was a very rapid expansion in offshore drilling in many parts of the world. Drilling in Europe and Asia was at first carried out with U.S. built rigs.

Many nations particularly Great Britain and Japan, quickly developed their own offshore oil construction industry. In some countries this development was financed by the national government as a means to relieve unemployment in their shipbuilding industries. In each country the offshore oil construction industry was developed with the aid of technology transferred from the United States, often with U.S. citizens in key managerial roles.

At the same time that drilling activities outside the United States were expanding rapidly the rate of growth of drilling activities was slowing in the U.S. coastal zone. Some of the decline in the U.S. offshore oil construction industry was, therefore, related to the shift of drilling activities away from the United States.

The present situation sees the U.S. coastal zone as the area for rapidly expanding exploratory drilling in waters deeper than previously leased, requiring the construction of a number of drilling rigs. However, the rate of growth of exploratory drilling is beginning to slow in other parts of the world and the requirement for offshore drilling rig construction is falling. The foreign yards who have now developed a capability for construction of offshore drilling rigs are, therefore, looking towards the U.S. market for continued sales. Just as they did when the foreign offshore oil construction industry was being developed, some foreign governments are likely to provide support for the industry in bidding on U.S. contracts. Indeed this may already have happened in at least one instance.

An amendment has been offered to H.R. 1614 by Chairman MURPHY, which seeks to recognize the reality of the competitive situation of the world offshore oil construction industry. This amendment would require offshore drilling lease holders who wished to use drilling rigs or support vessels constructed outside the United States, to demonstrate to the Secretary of the Interior that such purchase would aid the timely or cost effective development of our Outer Continental Shelf oil reserves. Such foreign purchases would only be approved by the Secretary if the rig or vessel purchased from the foreign source could not be purchased in the United States because of unsatisfactory quality, price, availability, or delivery date. This is clearly not a protectionist measure as portrayed by some. The requirement for purchase of U.S.-built drilling rigs as proposed in the Murphy amendment will insure that American jobs will not be lost to unfair competition from Government-subsidized foreign yards, but its most important effect may be to protect the U.S. coastline from unnecessary oilspills.

Accidental spillage of oil from oil rigs due to operation error or malfunctioning equipment can and has in the past created large scale degradation of the beaches and the ecology of our coastline. The development of our Outer Continental Shelf must be carried out in such a manner as to reduce the chances of such spills to the minimum possible, and to provide for orderly, rapid, and effective control and clearing of a spill when it occurs. We must avoid the use of inferior equipment that could result if offshore drilling rigs were to be built for sale at below their cost by foreign firms with Government support designed to keep their industry alive. The temptation in such an instance would be to reduce the quality of the product to minimize losses.

The American public will pay the bill for offshore oil and gas development. They must be guaranteed that foreign competitors do not benefit unfairly from that investment and that every possible effort will be made to prevent the unacceptable cost of unnecessary environmental degradation.

Mr. GLICKMAN. Mr. Chairman, earlier today, I voted against the so-called preference America amendment offered by our colleague from New York (Mr. MURPHY). I feel that I should clarify my vote because the size of our trade deficit and the amount of unemployment in our country are both problems which concern me greatly. I recognize that Mr. MURPHY sincerely believes that the amendment he offered would have benefited American workers. I must disagree. The result of amendments like that one could be devastating if other nations decided to respond with similar restrictions. We certainly do not need a trade war at a time when we are trying to increase our exports of agricultural commodities in effort to stabilize this country's severely sagging farm economy.

On the other hand, I would point out that I did oppose the amendment offered by Mr. WHALEN to delete the language included in the committee bill to provide reasonable assurances that work related to Outer Continental Shelf would benefit American workers. The point I am trying to make and which I think should be evident by those two votes is that I recognize the need for some reasonable language to protect American jobs, but I feel strongly that language to achieve that end needs to be carefully drafted to assure a balanced approach. We certainly do not need to lose more jobs and further worsen our balance of trade as a result of good intentions.

Mr. HARRIS. Mr. Chairman, I am quite concerned about several provisions in H.R. 1614, the Outer Continental Shelf Lands Act, which unfairly place strict requirements on career Federal employees.

DISCLOSURE SHOULD PROTECT PRIVACY OF FEDERAL EMPLOYEES

Specifically, section 505 requires employees who work in the OCS program in Interior and who have a financial interest in a company or concern subject to the OCS Act to annually file a public statement of any "interest held." Commendably, there is a provision allowing the Secretary to identify positions that are nonregulatory or nonpolicymaking and to exempt them from the public disclosure provision.

While I believe that disclosure of financial interests is a strong deterrent to conflicts of interest—sunshine is the best disinfectant—I think that the language of this bill is too vague and uncertain and is subject to discretionary judgment. It could place unreasonable and unwarranted requirements on career Federal employees who should not have to live in a public "fish bowl."

The bill should clearly delineate what is meant by financial interests, rather than leave it to the discretion of the Secretary. For example, would the bill cover earned income, unearned income, investments, assets, liabilities, stock, or other transactions?

I believe also that a clearer distinction should be made in law as to who would and would not be required to file disclosure reports. I believe the "political" officials of the executive branch—Presidential appointees, executive level personnel, and schedule C personnel—should accept the responsibility of public disclosure and accountability to the public when they accept their appointment. I do not believe career, civil service employees should have to agree as a condition of employment to open up all of their private finances to the public.

Additionally, both the House Judiciary Committee and the Post Office and Civil Service Committee have reported H.R. 1, a financial disclosure bill covering all agencies. This legislation outlines with some specificity the types of financial disclosure requirements and attempts to balance the public interest and the employee's right to privacy. With these bills proceeding toward enactment, I think it is wrong to place additional and possibly conflicting requirements on this single group of Interior employees. Should both bills be enacted, certain employees could be required to file similar information on different forms twice in 1 year. I believe that we should have consistent, governmentwide standards—not conflicting and duplicative ones.

TOTAL BAN ON POSTEMPLOYMENT, MISPLACED EMPHASIS

I also believe that in section 208 the committee has erred by adding the new section 29 which would bar for 2 years all full-time employees GS–16 and up of the Department of Interior who worked in the OCS program from accepting employment with a firm subject to OCS regulation. I am firmly against the "revolving door" notion. I do not think it is right for an employee to work in an agency for the public, gain "inside" knowledge about the subject matter, and then go outside to a regulated firm and represent that special interest against the Government. A 1976 Common Cause study entitled "Serving Two Masters" produced evidence that of the 35 commissioners who left their regulatory agency within a 4-year period, 17 or 50 percent took jobs with a company they previously regulated. The report concluded,

> The information on former commissioners indicates a tendency to take jobs with regulated companies or with law firms that represent them in government proceedings.

The study lays out what is wrong with this quite clearly: First, a commissioner who envisions working for a regulated company in the future might have a vested interest in making decisions favorable to that company; second, a commissioner anticipating future employment in the regulated industry knows, consciously or subconsciously, that more opportunities will be available if he or she maintains friendly relations with the industry and generally acts to promote or protect the industry's interests while in office. This in my view is the evil—going from the agency to the industry and coming back to the agency representing the industry viewpoint in a matter in which the former employee was previously representing the public interest. The revolving door practice would be severely curtailed by the provision in H.R. 1 which I supported. We must remove the revolving door when necessary to assure impartial performance and public confidence. But we must not stifle people's right to seek the job of their choice when it is not in conflict with this principle.

The key here is representation. In H.R. 1, in the Judiciary Committee, we drafted and I supported a ban on representation of industry viewpoints before an agency or matter in which the former employee was involved. This bill, H.R. 1614, takes a blunderbuss approach by prohibiting employees from accepting any employment or compensation; it is not fine tuned to bar representation before the agency. Thus, I support the amendment that would bring this bill more in line with the provision of H.R. 1 which bars representation and would delete the blanket postemployment ban.

I will support amendments to this bill along the lines I have suggested. We must stop conflict of interest. We must not let the revolving door syndrome continue. And in the process we must not abridge individual rights.

Mr. EVANS of Delaware. Mr. Chairman, I rise in support of H.R. 1614, the Outer Continental Shelf Lands Act. As one who had serious questions regarding the original version of this legislation as reported to the full House, I am extremely pleased that the House has worked its will and has, through the amendatory process, corrected several serious concerns that I had regarding the bill as reported by the ad hoc committee.

It is important that this legislation be passed because our Nation desperately needs a national policy on the Outer Continental Shelf. In recent days, we have seen very clearly what will be the result of not passing an OCS bill. Judge Garrity in Massachusetts forbid the Secretary of the Interior to lease lands in the Georges Bank area in the Atlantic. It was also not so very long ago that another Federal judge forbid the leasing of lands in the Baltimore Canyon. The case could very well end up in the Supreme Court. Another Federal oil and gas lease planned for March off the coast of Georgia may be in doubt because of recent court decisions. If Congress does not pass an OCS bill, I am deeply concerned that we will see more and more cases in litigation, and Federal judges will assume the responsibility of determining whether this Nation will explore for and develop its oil and gas resources in the OCS.

We have had too many delays already. Each day this Nation imports vast quantities of foreign oil. These imports not only place us at the mercy of a few Arab sheiks, but they are having an increasingly disastrous effect on our country's economy. The decline in the dollar is a clear barometer of what effect increasing oil imports are having on this Nation.

Mr. Chairman, I am unalterably opposed to allowing the Federal Government to get into the business of developing and producing the energy resources off our coast. Private industry is willing to take the risks. I think we should let them, instead of saddling the taxpayer with the tremendous costs which exploration and production will mean. As my colleagues know, the original bill would, in my opinion, have moved the Government dangerously close to getting into the actual exploration and production of oil resources. Fortunately, however, the House has adopted amendments deleting the dual leasing provisions as well as language allowing the Secretary to conduct geological and geophysical explorations and core and test drillings. The bill, as it now stands, will enable the Federal Government to closely monitor the resources of the Outer Continental Shelf, thus assuring that the American taxpayer receives full value for those resources, while at the same time allowing private enterprise to take the risks and do the actual production work.

There are other provisions of H.R. 1614 which I also fully support.

The tough environmental regulations in the bill will protect our beaches, our wildlife, and the economic benefits which stem from tourism.

The offshore oilspill pollution fund will protect those beaches and allow persons damaged by the oilspills to be compensated. This legislation is very similar to a measure I cosponsored and which has previously passed the House.

The encouragement of new bidding systems will help small- and medium-sized drillers compete for the resources in the OCS.

And the grant program in the bill will provide precious millions of dollars to States like Delaware through the existing coastal zone management program to allow for planning and construction of needed roads, schools, and other on-land impacts.

But, above all, the bill sets out national policy with regard to the Outer Continental Shelf. It has been nearly a quarter century since the original OCS bill was passed. Our Nation has experienced much in that time period. We have an energy problem which, if not dealt with quickly, will undoubtedly wreck our economy. Therefore, we must begin exploring and developing the known oil and gas resources in our frontier areas. This bill establishes national policy in this critical area and I urge my colleagues to support its passage.

Mr. LEGGETT. Mr. Chairman, we all know that the United States needs additional energy. Our offshore reserves of oil and gas obviously represent one of the primary sources of the extra energy America must have, especially as onshore petroleum production continues to decline. According to U.S. Geological Survey estimates, offshore reserves account for about one-third of our discoverable and producible oil, and over 20 percent of our natural gas deposits. It is clear that we must develop these valuable offshore reserves if we are to meet our needs for fossil fuels without further dependence on foreign sources in the ensuing decades.

It is equally clear, however, that development of Outer Continental Shelf petroleum cannot be allowed to proceed at the expense of environmental and other concerns. The proper approach to OCS exploration and development requires us to do a number of things.

It is essential that we protect the coastal and marine environment. We must involve the States affected by it in the planning and decision process. I believe we should also encourage greater competition and the involvement of smaller, independent producers to the extent possible. And we ought to structure the leasing process for OCS re-

serves so as to obtain the maximum return for all American citizens, to whom the Outer Continental Shelf ultimately belongs. What is needed is an approach that finds a balance among the many interests and concerns, some conflicting, which are involved in OCS development.

With an era of significantly increased reliance on offshore oil and gas ahead, it is particularly appropriate to have before us the bill H.R. 1614 to amend the OCS Lands Act of 1953, unchanged for 25 years. A more comprehensive policy in this area is clearly needed. The bill would establish specific statutory guidelines, standards and procedures to govern all aspects of OCS development.

This legislation obviously represents a considerable effort on the part of our ad hoc committee to find a balance among the many diverse and competing interests involved in such a complicated area. Many of us could no doubt find one or more provisions which we would change. I find the outcome, whatever its imperfections, to be definitely preferable to having no bill at all. In the interest of time, I will confine my remarks to certain of the provisions which are of particular interest to me.

A basic purpose of H.R. 1614 is to establish a comprehensive policy for the rational management of offshore oil and gas reserves in accordance with the basic interests involved. New responsibility is vested in the Secretary of the Interior for this purpose. He must first develop an overall 5-year leasing plan which would set forth the size, timing, and location of OCS leases. This plan is to represent a balanced assessment of the proposed program's environmental consequences, discovery potential, and impact on the coastal zone. The Secretary must submit his plan to the Attorney General and the Federal Trade Commission to determine its effect on competition within the energy industry.

The intention of Attorney General and Federal Trade Commission review is that the leasing plan should promote more competition in the offshore oil industry than is presently the case. This review is backed up by a provision that the Justice Department and the Federal Trade Commission should have 30 days in which to review any particular OCS lease sale for anticompetitive consequences before the Interior Department issues the leases.

In addition to the prior review of lease sales by the Justice Department, a report must be submitted to Congress at least 30 days before a lease sale identifying bidding systems to be used, lease tracts selected to be offered, and the reasons lease tracts are to be offered under a particular bidding system. The Congress has the authority to withdraw lands from particular lease sales by a concurrent resolution. Proper public debate of controversial lease sales is, therefore, insured.

One of the major emphases of this bill, of prime importance in the effort to increase competition in OCS development, is the provision for reform of the bidding process in offshore leasing. It has been brought out in study after study that the practice of awarding OCS leases on the basis of front end, or cash bonus, bidding is probably the greatest defect in the current leasing procedure.

There is no question but that this procedure is anticompetitive. It requires a company to have vast amounts of capital to bid on a tract, and the price is set without sufficient knowledge of the value of its reserves. The system appears almost to be designed to prevent all but the major oil companies from being able to compete for OCS leases.

Another of the effects of this system is to prevent the public from getting a fair return for its oil and gas reserves. This is so not only because cash bonus bidding reduces competition, but also because bids are not usually based on meaningful estimates of the amount of oil or gas that could actually be obtained from a lease. With only the majors competing, bids tend to be based as much on the availability as the potential of the tracts being bid. Furthermore, in periods of accelerated sales, as in recent years, bids tend to fall in response to the greater supply of available tracts.

As a start toward changing this oligopolistic system, increasing competition, and gaining higher returns for the public, the bill would allow Interior to utilize other bidding methods—based on net profits, royalties, or percentages of a lease area. Since the 1953 law already gives the Interior Secretary broad discretionary authority which would encompass these alternative bidding systems, the significant provision is the one requiring the Secretary to use one of the alternatives in between 20 and 50 percent of all lease sales in frontier areas over the next 5 years.

Mr. Chairman, the 20-percent minimum provision is but a modest attempt to try changing a system which has prevailed, not as a requirement of law but at the discretion of the Interior Department, for over 20 years. The alternative bidding systems have been used by both foreign countries and coastal States for some time. They represent "experiments" only to a Federal department which took 23 years to try any of them.

The 20- to 50-percent provision is perhaps the most contentious aspect of H.R. 1614. However, it is my firm belief that this provision is necessary to insure rapid development of our OCS oil reserves. The fact is that the industry opposes the new leasing systems. However, they themselves testified before the ad hoc committee that payment of large quantities of up-front money when the present leasing system is extended to a large number of new exploration areas would deplete their capital resources and so inhibit lease development. The alternative leasing systems insure that the industry will maintain sufficient capital to vigorously pursue exploration of the maximum possible number of new lease areas. The alternative, as I have already described, is that industry capital will be preserved for exploration by bidding very low for new leases. The losers in this event would be the American people and the winners the oil companies, who would insure much larger returns on their leasing investments when oil is eventually brought in. Nobody has yet suggested that if the oil companies pay less for their leases that they will sell the oil eventually produced at a lower price.

I regret that as many as 80 percent of new leases will still be subject to the bonus bid system if this bill passes. However, it is at least a small step forward that at least 20 percent of the lease sales will use alternative bidding systems.

Another major purpose of the bill is to provide the States a much greater degree of participation in the entire decision process on OCS exploitation. This is of particular importance in my home State of California, which has experienced so many difficulties in obtaining information from the Department of the Interior, not to speak of involvement in decisionmaking, concerning the leasing program off the California coast.

Section 18 of the bill would require the Secretary of the Interior's 5-year plan to be submitted to both the States and local governments for their review. Furthermore, section 19 would establish a mechanism for the Governors and local government officials to work with Federal agencies on OCS activities. The key provision is that any recommendation concerning a proposed lease sale or development and production plan, made by either a Regional Board or the Governor of an affected State, can be rejected by the Secretary only if he determines that it is not consistent with an overriding national interest.

A closely related matter is the access of both Federal and State and local authorities to information about OCS activities. The bill would require all OCS operators to provide the Secretary of the Interior all of the data obtained from their offshore activities, as well as any other specific information he requires. A summary of this data, including estimates of reserves, size and timing of development, and location of pipelines and onshore facilities, is to be made available to the States to assist them in planning to deal with the effects of offshore activity on them. This provision should help my State and others deal with one of the major problems they have encountered in OCS development—the inability to find out what is going on and what the Federal Government and the oil companies are doing.

In order to provide a forum for local interests to fully discuss issues raised by a proposed lease sale, the Secretary of the Interior is required to hold a public hearing prior to announcement of the lease sale in the States adjacent to the continental shelf where the proposed lease tract is located upon the request of the Governor of the State.

Another provision which is of real importance to both my own and other coastal States concerns State lands, those within 3 miles of the seaward boundary of a coastal State. The bill requires Interior to offer the Governor of the affected State the opportunity to lease jointly any such area which might contain a geological structure or trap common to both State and Federal lands. This provision would prevent Federal lessees from draining State resources by

drilling close to the borderline and would not delay the leasing process.

H.R. 1614 also establishes a revenue sharing program which deposits 20 percent of OCS revenues, up to $200 million, into a coastal energy impact fund for distribution to States under the coastal energy impact program.

I have dwelled at length on the decisionmaking processes and leasing procedures embodied in the bill. Just as important, perhaps more so, are the provisions of H.R. 1614 directly oriented toward protection of the marine, coastal, and human environment.

There is now no law establishing either responsibility or liability for dealing with oil pollution resulting from development of OCS oil and gas reserves. Similarly, just as current law gives the States no voice in decisionmaking on OCS leasing and development, neither does it provide for consultation with or assistance to States which are adversely affected by offshore development. H.R. 1614 would fill a number of these gaps.

Title III of the bill would establish procedures for dealing with oil spills from any offshore facility in the OCS, and any device or vessel used to transport oil or gas from such a facility to shore. It provides that the owner or operator involved is strictly liable for all costs of cleaning up an oil spill, as well as for the first $35 million of damages resulting from an oil spill. In addition, the bill creates an offshore oil pollution fund, which would pay any damages or cleanup costs not covered by the perpetrator of the oil spill, as well as those involved in cases where the spiller was not identified. This fund would be maintained at between $100 and $200 million by a 3-cent surcharge on each barrel of oil produced on the OCS, and it would also be authorized to borrow up to $500 million from the Treasury in the event that the costs of a spill exceeded its financial reserves.

A similar fund, the fishermen's gear compensation fund, may be set up for each appropriate lease area to insure that losses of fishermen's equipment caused by OCS equipment are compensated in those instances where no liability for the loss can be established. This is an important provision which should do much to minimize the impact of OCS development in prime fishing areas such as the Georges Bank. Experience in the North Sea has shown that the most difficult problem posed by OCS activities to fishermen is the problem of loss of their gear due to OCS structures.

The environmental impact process which the bill establishes is closely related to the new role of Governors and regional advisory boards in OCS decisionmaking. Section 25 requires environmental impact statements and a hearing for each major lease area in previously undeveloped regions prior to approval of development and production. The Governors and regional boards are assured that their recommendations stemming from this process will be a part of the decisions on whether to approve such plans. And if the environmental studies show that safe operation of an offshore facility cannot be insured, as a result of unusual circumstances, then the Secretary is authorized to cancel the lease in question, with all costs of the lessee reimbursed.

I should note that the effects of OCS development on the marine environment are certainly not limited to the problem of well blowouts and oilspills. The bill also authorized the National Oceanic and Atmospheric Administration to try to predict the impact of OCS activities and possible oilspills, on the marine biota in a proposed exploration area. NOAA's studies must be completed prior to approval of any development or production plan.

The bill would also call for establishment of a new set of regulations for employee and navigational safety, as well as environmental protection. These regulations would require use of the best and safest technologies economically feasible on all new drilling and production operations, as well as in existing areas if practicable.

In sum, the many provisions of the bill relating to the marine and coastal environment would establish a comprehensive new regime for the governance of OCS activities. It is my hope that these new new procedures will enable us to combine the OCS development that is needed with maintenance of the natural environment.

We must keep in mind, though, that the impact of OCS development is not limited to its effects on the coasts and oceans. It will also have major consequences for coastal States as the oil and gas is brought ashore, processed, stored, and transported. The States will need assistance to minimize the adverse effects of the various stages of the process, as well as new infrastructure in the form of housing, schools, roads, and other services in the areas where onshore activities take place. The bill would authorize an impact fund as a means of providing the necessary assistance.

Permit me to mention one other issue in conclusion. The bill retains the existing provisions of law authorizing the Secretary of the Interior tc conduct offshore geophysical and geological surveys, either with Government personnel or via private contractors. Frankly, I had hoped the bill would go further toward establishing a greater Federal role in offshore exploration and development.

One of the biggest flaws in the current system is that our Government is now able to obtain very little knowledge of the public petroleum resources which it is selling to the oil companies in OCS leases. And with essentially none of the substantive geological work done before leasing, the companies do not really know what they are bidding on. We could help solve many of these problems by obtaining geological and physical information on potential lease areas in a federally contracted exploration program, designed to supplement, not replace, the activities of the companies. I think we should consider not taking over offshore oil exploration, but starting a limited program of exploration on contract designed to tell both the seller and the buyer more about the value of what is being leased.

Let me reiterate, however, that this reservation and those I expressed earlier do not cause me to oppose the bill. I urge my colleagues to support H.R. 1614 because, on balance, it will provide a comprehensive process for the management of both our valuable offshore petroleum resources and the equally valuable resources represented by the marine and coastal environment in which they are located. I had hoped for more from this bill and would have preferred the version that the ad hoc OCS committee reported without the amendments that the Committee of the Whole House adopted. However, reform of the Outer Continental Shelf Lands Act is long overdue, and this bill represents at least a first step in the right direction.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1614) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes, pursuant to House Resolution 964, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole?

Mr. HUBBARD. Mr. Speaker, I demand a separate vote on the so-called Seiberling amendment.

The SPEAKER. Is a separate vote demanded on any other amendment?

If not, the Clerk will report the amendment upon which a separate vote has been demanded.

The Clerk read as follows:

Amendment: On page 153, line 16, strike everything down through line 16 on page 154, and insert in lieu thereof the following:

"(e) Rights-of-way through the submerged lands of the outer Continental Shelf, whether or not such lands are included in a lease maintained or issued pursuant to this Act, may be granted by the Secretary for pipeline purposes for the transportation of minerals under such regulations and upon such conditions as may be prescribed by the Secretary, or where appropriate by the Secretary of Transportation, including utilization of the best available and safest technology in accordance with the standard established in section 21(b) of this Act. All pipelines constructed on rights-of-way or constructed pursuant to easements granted under this

Act, except pipelines operated entirely within a single lease, shall (1) be subject to regulation under the Natural Gas Act, as amended, in the case of pipelines carrying natural gas, and under the Interstate Commerce Act, as amended, in the case of other pipelines, and shall (2) accept, convey, transport or purchase, without discrimination and at reasonable rates, minerals produced from submerged lands in the vicinity of the pipeline in such proportionate amounts as the Secretary of Energy in the case of energy minerals, and the Interstate Commerce Commission in the case of other minerals, may determine to be reasonable, taking into account, among other things, conservation of resources and the prevention of waste. Grants of rights-of-way or easements for such pipelines for energy minerals shall be subject to any other reasonable condition deemed necessary by the Secretary of Energy, after consideration of the views of the Attorney General, to promote competition, including, without limitation, conditions requiring open and nondiscriminatory access to such pipelines, conditions requiring the construction and nondiscriminatory operation of oil storage facilities directly related to such pipelines, and conditions relating to the initial sizing or subsequent expansion of throughput capacity of such pipelines and facilities within technological limits and economic feasibility; *provided*, That subsequent throughput capacity expansion may be ordered pursuant to this subsection only upon the specific request of one or more shippers, owners or non-owners able to provide a guaranteed level of throughput and on the condition that the person or persons requesting such expansion shall be responsible for bearing the costs and risks related to the requested expansion, except where the Secretary of Energy determines that an alternative allocation of the costs and risks is equitably required; and *provided further*, That authority to require throughput capacity expansion pursuant to this subsection shall not apply to any pipeline for which United States Government approvals have been obtained or construction begun, on or before the effective date of this subsection. After giving the Secretary of Energy and the Attorney General reasonable opportunity for comment, the Secretary may by order or regulation exempt from any or all requirements of the preceding two sentences any pipeline or class of pipelines which feeds into a facility where oil and gas are first collected or into a facility where oil and gas are first separated, dehydrated or otherwise processed. Failure to comply with the provisions of this subsection or the regulations and conditions prescribed under this subsection shall be grounds for forfeiture of the grant in an appropriate judicial proceeding instituted by the United States in any district court of the United States having jurisdiction under the provisions of this Act. For purposes of this subsection, the term 'energy minerals' shall incorporate those minerals listed in section 2 of the Department of Energy Organization Act. As to any authority or functions under this subsection which are exercised by the Federal Energy Regulatory Commission, or which are similar to those exercised by the Federal Energy Regulatory Commission with respect to onshore pipelines, the term 'Secretary of Energy' shall be deemed to mean the Federal Energy Regulatory Commission."

Mr. HUBBARD (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER. The question is on the amendment.

The amendment was rejected.

The SPEAKER. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. ASHBROOK. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ASHBROOK moves to recommit the bill H.R. 1614 to the Ad Hoc Select Committee on the Outer Continental Shelf.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 291, nays 91, not voting 50, as follows:

LaFalce	Rhodes	Tucker
Latta	Richmond	Wilson, Bob
Lehman	Risenhoover	Wright
McKay	Roncalio	Wylie
Mitchell, N.Y.	Rudd	
Moss	Ruppe	

The Clerk announced the following pairs:

On this vote:

Mr. Panetta for, with Mr. Jones of Tennessee against.

Mr. Breckinridge for, with Mr. Pickle against.

Mr. Bingham for, with Mr. Teague against.

Mr. Richmond for, with Mr. Huckaby against.

Mr. Mottl for, with Mr. Risenhoover against.

Mr. Duncan of Tennessee for, with Mr. Crane against.

Mr. Mitchell of New York for, with Mr. Dickinson against.

Mr. Quillen for, with Mr. Latta against.

Mr. Sawyer for, with Mr. Rudd against.

Mr. Anderson of California for, with Mr. Dent against.

Until further notice:

Mr. Lehman with Mr. Badham.
Mr. Nichols with Mr. Conable.
Mr. LaFalce with Mr. Ford of Tennessee.
Mr. Tucker with Mr. Ruppe.
Mr. Baucus with Mr. Brown of Ohio.
Mr. Corman with Mr. Roncalio.
Mr. Wright with Mr. Armstrong.
Mr. Sikes with Mr. Broomfield.
Mr. Alexander with Mr. Don H. Clausen.
Mr. Santini with Mr. Thone.
Mr. Gonzalez with Mr. Bob Wilson.
Mr. McKay with Mr. Wylie.
Mr. Moss with Miss Jordan.
Mr. Perkins with Mr. Krueger.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. MURPHY of New York. Mr. Speaker, pursuant to the provisions of House Resolution 964, I call up from the Speaker's table the Senate bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MURPHY of New York moves to strike out all after the enacting clause of the Senate bill S. 9, and to insert in lieu the provisions of H.R. 1614, as passed, as follows:

That this Act may be cited as the "Outer Continental Shelf Lands Act Amendments of 1977".

TABLE OF CONTENTS

TITLE I—FINDINGS AND PURPOSES WITH RESPECT TO MANAGING THE RESOURCES OF THE OUTER CONTINENTAL SHELF

Sec. 101. Findings.
Sec. 102. Purposes.

TITLE II—AMENDMENTS TO THE OUTER CONTINENTAL SHELF LANDS ACT

Sec. 201. Definitions.
Sec. 202. National policy for the Outer Continental Shelf.
Sec. 203. Laws applicable to the Outer Continental Shelf.
Sec. 204. Outer Continental Shelf exploration and development administration.
Sec. 205. Revision of bidding and lease administration.
Sec. 206. Disposition of revenues.
Sec. 207. Outer Continental Shelf oil and gas exploration.
Sec. 208. Reservations by the Congress.
Sec. 209. Annual report.
Sec. 210. New sections of the Outer Continental Shelf Lands Act.
"Sec. 18. Outer Continental Shelf leasing program.
"Sec. 19. Coordination and consultation with affected States and local governments.
"Sec. 20. Environmental studies.
"Sec. 21. Safety regulations.
"Sec. 22. Enforcement.
"Sec. 23. Citizen suits, court jurisdiction, and judicial review.
"Sec. 24. Remedies and penalties.
"Sec. 25. Oil and gas development and production.
"Sec. 26. Outer Continental Shelf oil and gas information program.
"Sec. 27. Federal purchase and disposition of oil and gas.
"Sec. 28. Limitations on exports.
"Sec. 29. Restrictions on employment.
"Sec. 30. Fishermen's gear compensation funds.
"Sec. 31. Documentation, registry, and manning requirements."

TITLE III—OFFSHORE OIL SPILL POLLUTION FUND

Sec. 301. Definitions.
Sec. 302. Funds establishment, administrative, and financing.
Sec. 303. Damages and claimants.
Sec. 304. Liability.
Sec. 305. Financial responsibility.
Sec. 306. Notification, designation, and advertisement.
Sec. 307. Claims settlement.
Sec. 308. Subrogation.
Sec. 309. Jurisdiction and venue.
Sec. 310. Preemption.
Sec. 311. Prohibition.
Sec. 312. Penalties.
Sec. 313. Authorization of appropriations.
Sec. 314. Annual report.

TITLE IV—AMENDMENTS TO THE COASTAL ZONE MANAGEMENT ACT OF 1972

Sec. 401. Coastal energy impact program.
Sec. 402. Outer Continental Shelf grants.

TITLE V—MISCELLANEOUS PROVISIONS

Sec. 501. Review of shut-in or flaring wells.
Sec. 502. Review of revision of royalty payments.
Sec. 503. Natural gas distribution.
Sec. 504. Antidiscrimination provisions.
Sec. 505. Sunshine in Government.
Sec. 506. Investigation of availability of oil and natural gas from the Outer Continental Shelf.
Sec. 507. State management program.
Sec. 508. Rule and Regulation Review.
Sec. 509. Recommendations for training program.
Sec. 510. Relationship to existing law.

TITLE I—FINDINGS AND PURPOSES WITH RESPECT TO MANAGING THE RESOURCES OF THE OUTER CONTINENTAL SHELF

FINDINGS

SEC. 101. The Congress finds and declares that—

(1) the demand for energy in the United States is increasing and will continue to increase for the foreseeable future;

(2) domestic production of oil and gas has declined in recent years;

(3) the United States has become increasingly dependent upon imports of oil from foreign nations to meet domestic energy demand;

(4) increasing reliance on imported oil is not inevitable, but is rather subject to significant reduction by increasing the development of domestic sources of energy supply;

(5) consumption of natural gas in the United States has greatly exceeded additions to domestic reserves in recent years;

(6) technology is or can be made available which will allow significantly increased domestic production of oil and gas without undue harm or damage to the environment;

(7) the lands and resources of the Outer Continental Shelf are public property which the Government of the United States holds in trust for the people of the United States;

(8) the Outer Continental Shelf contains significant quantities of oil and natural gas and is a vital national resource reserve which must be carefully managed so as to realize fair value, to preserve and maintain competition, and to reflect the public interest;

(9) there presently exists a variety of technological, economic, environmental, administrative, and legal problems which tend to retard the development of the oil and natural gas reserves of the Outer Continental Shelf;

(10) environmental and safety regulations relating to activities on the Outer Continental Shelf should be reviewed in light of current technology and information;

(11) the development, processing, and distribution of the oil and gas resources of the Outer Continental Shelf, and the siting of related energy facilities, may cause adverse impacts on various States and local governments;

(12) policies, plans, and programs developed by States and local governments in response to activities on the Outer Continental Shelf cannot anticipate and ameliorate such adverse impacts unless such States and local governments are provided with timely access to information regarding activities on the Outer Continental Shelf and an opportunity to review and comment on decisions relating to such activities;

(13) funds must be made available to pay for the prompt removal of any oil spilled or discharged as a result of activities on the Outer Continental Shelf and for any damages to public or private interests caused by such spills or discharges; and

(14) because of the possible conflicts between exploitation of the oil and gas resources in the Outer Continental Shelf and other uses of the marine environment, including fish and shellfish growth and recovery, and recreational activity, the Federal Government must assume responsibility for the minimization or elimination of any conflict associated with such exploitation.

PURPOSES

SEC. 102. The purposes of this Act are to—

(1) establish policies and procedures for managing the oil and natural gas resources of the Outer Continental Shelf in order to achieve national economic and energy policy goals, assure national security, reduce dependence on foreign sources, and maintain a favorable balance of payments in world trade;

(2) preserve, protect, and develop oil and natural gas resources in the Outer Continental Shelf in a manner which is consistent with the need (A) to make such resources available to meet the Nation's energy needs as rapidly as possible, (B) to balance orderly energy resource development with protection of the human, marine, and coastal environments, (C) to insure the public a fair and equitable return on the resources of the Outer Continental Shelf, and (D) to preserve and maintain free enterprise competition;

(3) encourage development of new and improved technology for energy resource production which will eliminate or minimize risk of damage to the human, marine, and coastal environments;

(4) provide States, and through States, local governments, which are impacted by Outer Continental Shelf oil and gas exploration, development, and production with comprehensive assistance in order to anticipate and plan for such impact, and thereby to assure adequate protection of the human environment;

(5) assure that States, and through States, local governments, have timely access to information regarding activities on the Outer Continental Shelf, and opportunity to review and comment on decisions relating to such activities, in order to anticipate, ameliorate, and plan for the impacts of such activities;

(6) assure that States, and through States, local governments, which are directly affected by exploration, development, and production of oil and natural gas are provided an opportunity to participate in policy and planning decisions relating to management of the resources of the Outer Continental Shelf;

(7) minimize or eliminate conflicts between the exploration, development, and production of oil and natural gas, and the recovery of other resources such as fish and shellfish;

(8) establish an oilspill liability fund to pay for the prompt removal of any oil spilled or discharged as a result of activities on the Outer Continental Shelf and for any damages to public or private interests caused by such spills or discharges; and

(9) insure that the extent of oil and natural gas resources of the Outer Continental Shelf is assessed at the earliest practicable time.

TITLE II—AMENDMENTS TO THE OUTER CONTINENTAL SHELF LANDS ACT

DEFINITIONS

SEC. 201. (a) Paragraphs (b) and (c) of section 2 of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(c)) are amended to read as follows:

"(b) The term 'Secretary' means the Secretary of the Interior, except that with respect to functions under this Act transferred to, or vested in, the Secretary of Energy or the Federal Energy Regulatory Commission by or pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), the term 'Secretary' means the Secretary of Energy, or the Federal Energy Regulatory Commission, as the case may be.

"(c) The term 'lease' means any form of authorization which is issued under section 8 or maintained under section 6 of this Act and which authorizes exploration for, and development and production of (1) oil, gas, or other minerals, or (2) geothermal steam;".

(b) Such section is further amended—

(1) in subsection (d), by striking out the period and inserting in lieu thereof a semicolon; and

(2) by adding at the end thereof the following new paragraphs:

"(e) The term 'coastal zone' means the coastal water (including the lands therein and thereunder) and the adjacent shorelands (including the waters therein and thereunder), strongly influenced by each other and in proximity to the shorelines of the several coastal States, and includes islands, transition and intertidal areas, salt marshes, wetlands, and beaches, which zone extends seaward to the outer limit of the United States territorial sea and extends inland from the shorelines to the extent necessary to control shorelands, the uses of which have a direct and significant impact on the coastal waters, and the inward boundaries of which may be identified by the several coastal States, pursuant to the authority of section 305(b)(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1454(b)(1));

"(f) The term 'affected State' means, with respect to any program, plan, lease sale, or other activity proposed, conducted, or approved pursuant to the provisions of this Act, any State—

"(1) the laws of which are declared, pursuant to section 4(a)(2) of this Act, to be the law of the United States for the portion of the outer Continental Shelf on which such activity is, or is proposed to be, conducted;

"(2) which is or is proposed to be directly connected by transportation facilities to any artificial island, installation, or other device referred to in section 4(a)(1) of this Act;

"(3) which is receiving, or in accordance with the proposed activity will receive, oil for processing, refining, or transshipment which was extracted from the outer Continental Shelf and transported directly to such State by means of vessels or by a combination of means including vessels;

"(4) which is designated by the Secretary as a State in which there is a substantial probability of significant impact on or damage to the coastal, marine, or human environment, or a State in which there will be significant changes in the social, governmental, or economic infrastructure, resulting from the exploration, development, and production of oil and gas anywhere on the outer Continental Shelf; or

"(5) in which the Secretary finds that because of such activity there is, or will be, a significant risk of serious damage, due to factors such as prevailing winds and currents, to the marine or coastal environment in the event of any oilspill, blowout, or release of oil or gas from vessels, pipelines, or other transshipment facilities;

"(g) The term 'marine environment' means the physical, atmospheric, and biological components, conditions, and factors which interactively determine the productivity, state, condition, and quality of the marine ecosystem, including waters of the high seas, the contiguous zone, transitional and intertidal areas, salt marshes, and wetlands within the coastal zone and on the outer Continental Shelf;

"(h) The term 'coastal environment' means the physical, atmospheric, and biological components, conditions, and factors which interactively determine the productivity, state, condition, and quality of the terrestrial ecosystem from the shoreline inward to the boundaries of the coastal zone;

"(i) The term 'human environment' means the physical, esthetic, social, and economic components, conditions, and factors which interactively determine the state, condition, and quality of living conditions, recreation, air and water, employment, and health of those affected, directly or indirectly, by activities occurring on the outer Continental Shelf;

"(j) The term 'Governor' means the Governor of a State, or the person or entity designated by, or pursuant to, State law to exercise the powers granted to such Governor pursuant to this Act;

"(k) The term 'exploration' means the process of searching for minerals, including (1) geophysical surveys where magnetic, gravity, seismic, or other systems are used to detect or imply the presence of such resources, and (2) any drilling, whether on or off known geological structures, including the drilling of a well in which a discovery of oil or natural gas in paying quantities is made, the drilling of any additional delineation well after such discovery which is needed to delineate any reservoir and to enable the lessee to determine whether to proceed with development and production;

"(l) The term 'development' means those activities which take place following discovery of minerals in paying quantities, including geophysical activity, drilling, platform construction, pipeline routing, and operation of all on-shore support facilities, and which are for the purpose of ultimately producing the resources discovered;

"(m) The term 'production' means those activities which take place after the successful completion of any means for the removal of resources, including such removal, field operations, transfer of minerals to shore, operation monitoring, maintenance, and workover drilling;

"(n) The term 'antitrust law' means—

"(1) the Sherman Act (15 U.S.C. 1 et seq.);

"(2) the Clayton Act (15 U.S.C. 12 et seq.);

"(3) the Federal Trade Commission Act (15 U.S.C. 41 et seq.);

"(4) the Wilson Tariff Act (15 U.S.C. 8 et seq.); or

"(5) the Act of June 19, 1936, chapter 592 (15 U.S.C. 13, 13a, 13b, and 21a);

"(o) The term 'fair market value' means the value of any minerals (1) computed at a unit price equivalent to the average unit price at which such mineral was sold pursuant to a lease during the period for which any royalty or net profit share is accrued or reserved to the United States pursuant to such lease, or (2) if there were no such sales, or if the Secretary finds that there were an insufficient number of such sales to equitably determine such value, computed at the average unit price at which such mineral was sold pursuant to other leases in the same region of the outer Continental Shelf during such period, or (3) if there were no sales of such mineral from such region during such period, or if the Secretary finds that there are an insufficient number of such sales to equitably determine such value, at an appropriate price determined by the Secretary;

"(p) The term 'major Federal action' means any action or proposal by the Secretary which is subject to the provisions of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C));

"(q) The term 'frontier area' means any area where there has been no development of oil and gas prior to October 1, 1975, and includes the outer Continental Shelf off southern California, including the Santa Barbara Channel, except for those tracts in the channel in which leasing was begun prior to October 1, 1975, and on which exploration, or development, or production was begun prior to January 1, 1978; and

"(r) The term 'minerals' includes oil, gas, sulfur, geopressured-geothermal and associated resources, and all other minerals which are authorized by an Act of Congress to be produced from 'public lands' as defined in section 103 of the Federal Land Policy and Management Act of 1976.".

NATIONAL POLICY FOR THE OUTER CONTINENTAL SHELF

SEC. 202. Section 3 of the Outer Continental Shelf Lands Act (43 U.S.C. 1332) is amended to read as follows:

"SEC. 3. NATIONAL POLICY FOR THE OUTER CONTINENTAL SHELF.—It is hereby declared to be the policy of the United States that—

"(1) the subsoil and seabed of the outer Continental Shelf appertain to the United States and are subject to its jurisdiction, control, and power of disposition as provided in this Act;

"(2) this Act shall be construed in such a manner that the character of the waters above the outer Continental Shelf as high seas and the right to navigation and fishing therein shall not be affected;

"(3) the outer Continental Shelf is a vital national resource reserve held by the Federal Government for the public, which should be made available for orderly development, subject to environmental safeguards, in a

manner which is consistent with the maintenance of competition and other national needs;

"(4) since exploration, development, and production of the mineral resources and geothermal steam of the outer Continental Shelf will have significant impacts on coastal and noncoastal areas of the coastal States, and on other affected States, and, in recognition of the national interest in the effective management of the marine, coastal, and human environments—

"(A) such States and their affected local governments may require assistance in protecting their coastal zones and other affected areas from any temporary or permanent adverse effects of such impacts; and

"(B) such States, and through such States, affected local governments, are entitled to an opportunity to participate, to the extent consistent with the national interest, in the policy and planning decisions made by the Federal Government relating to exploration for, and development and production of, mineral resources and geothermal steam of the outer Continental Shelf;

"(5) the rights and responsibilities of all States and, where appropriate, local governments to preserve and protect their marine, human, and coastal environments through such means as regulation of land, air, and water uses, of safety, and of related development and activity should be considered and recognized; and

"(6) operations on the outer Continental Shelf should be conducted in a safe manner by well-trained personnel using technology, precautions, and techniques sufficient to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstruction to other users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property, or endanger life or health.".

LAWS APPLICABLE TO THE OUTER CONTINENTAL SHELF

SEC. 203. (a) Section 4(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1333 (a)) is amended—

(1) in paragraph (1), by striking out "and fixed structures" and inserting in lieu thereof ", and all installations and other devices permanently or temporarily attached to the seabed,";

(2) in paragraph (1), by striking out "removing and transporting resources therefrom" and inserting in lieu thereof "or producing resources therefrom, or any such installation or other device (other than a ship or vessel for the purpose of transporting such resources"; and

(3) in paragraph (2), by striking out "artificial islands and fixed structures erected thereon" and inserting in lieu thereof "those artificial islands, installations, and other devices referred to in paragraph (1) of this subsection".

(b) Section 4(d) of such Act is amended to read as follows:

"(d) For the purposes of the National Labor Relations Act, as amended, any unfair labor practice, as defined in such Act, occurring upon any artificial island, installation, or other device referred to in subsection (a) of this section shall be deemed to have occurred within the judicial district of the State, the laws of which apply to such artificial island, installation, or other device pursuant to such subsection, except that until the President determines the areas within which such State laws are applicable, the judicial district shall be that of the State nearest the place of location of such artificial island, installation, or other device.".

(c) Section 4 of such Act is amended—

(1) in paragraph (1) of subsection (e), by striking out "the islands and structures referred to in subsection (a)", and inserting in lieu thereof "the artificial islands, installations, and other devices referred to in subsection (a)";

(2) in subsection (f), by striking out "artificial islands and fixed structures located on the outer Continental Shelf" and inserting in lieu thereof "the artificial islands, installations, and other devices referred to in subsection (a)"; and

(3) in subsection (g), by striking out "the artificial islands and fixed structures referred to in subsection (a)" and inserting in lieu thereof "the artificial islands, installations, and other devices referred to in subsection (a)".

(d) Section 4(e)(1) of such Act is amended by striking out "head" and inserting in lieu thereof "Secretary".

(e) Section 4(e)(2) of such Act is amended to read as follows:

"(2) The Secretary of the Department in which the Coast Guard is operating may mark for the protection of navigation any artificial island, installation, or other device referred to in subsection (e) whenever the owner has failed suitably to mark such island, installation, or other device in accordance with regulations issued under this Act, and the owner shall pay the cost of such marking.".

(f) Section 4(e) of such Act is amended by adding at the end thereof the following new paragraph:

"(3)(A) Any owner or operator of a vessel which is not a vessel of the United States shall, prior to conducting any activity pursuant to this Act or in support of any activity pursuant to this Act, enter into an agreement pursuant to this paragraph with the Secretary of the Department in which the Coast Guard is operating. Subject to the provisions of subparagraph (B) of this paragraph, such agreement shall provide that such vessel, while engaged in the conduct or support of such activities, shall be subject, in the same manner and to the same extent as a vessel of the United States, to the laws of the United States relating to the operation, design, construction, and equipment of vessels, the training of the crews of vessels, and the control of discharges from vessels.

"(B) An agreement entered into between the owner or operator of a vessel and the Secretary of the Department in which the Coast Guard is operating pursuant to subparagraph (A) of this paragraph shall provide that such vessel shall not be subject to the jurisdiction of such Secretary with respect to laws relating to vessel design, construction, equipment, and similar matters—

"(i) if such vessel is engaged in making an emergency call (as defined by such Secretary) at any artificial island, installation, or other device referred to in subsection (a) of this section; or

"(ii) if such vessel is in compliance with standards relating to vessel design, construction, equipment, and similar matters imposed by the country in which such vessel is registered, and such standards are substantially comparable to the standards imposed by such Secretary.

"(C) As used in this paragraph—

"(i) the term 'vessel of the United States' means any vessel, whether or not self-propelled, which is documented under the laws of the United States or registered under the laws of any State; and

"(ii) the term 'support of any activity' includes the transportation of resources from any artificial island, installation, or other device referred to in subsection (a) of this section.".

(g) Section 4 of such Act is further amended by striking out subsection (b) and relettering subsections (c), (d), (e), (f), and (g) as subsections (b), (c), (d), (e), and (f) respectively.

OUTER CONTINENTAL SHELF EXPLORATION AND DEVELOPMENT ADMINISTRATION

SEC. 204. Section 5 of the Outer Continental Shelf Lands Act (43 U.S.C. 1334) is amended to read as follows:

"SEC. 5. ADMINISTRATION OF LEASING OF THE OUTER CONTINENTAL SHELF.—(a) The Secretary shall administer the provisions of this Act relating to the leasing of the Outer Continental Shelf, and shall prescribe such rules and regulations as may be necessary to carry out such provisions. The Secretary may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservation of the natural resources of the Outer Continental Shelf, and the protection of correlative rights therein, and, notwithstanding any other provisions herein, such rules and regulations shall apply to all operations conducted under a lease issued or maintained under the provisions of this Act. In the enforcement of safety, environmental, and conservation laws and regulations, the Secretary shall cooperate with the relevant departments and agencies of the Federal Government and of the affected States. In the formulation and promulgation of regulations, the Secretary shall request and give due consideration to the views of the Attorney General and the Federal Trade Commission with respect to matters which may affect competition. The regulations prescribed by the Secretary under this subsection shall include, but not be limited to, provisions—

"(1) for the suspension or temporary prohibition of any operation or activity, including production, pursuant to any lease or permit (A) at the request of a lessee, to facilitate proper development of a lease in the national interest, or to allow for the construction or negotiation for use of transportation facilities, or (B) if there is a threat of serious, irreparable, or immediate harm or damage to life (including fish and other aquatic life), to property, to any mineral deposits (in areas leased or not leased), or to the marine, coastal, or human environment, and for the extension of any permit or lease affected by such suspension or prohibition under (A) or (B) by a period equivalent to the period of such suspension or prohibition, except that no permit or lease shall be so extended when such suspension or prohibition is the result of gross negligence or willful violation of such lease or permit, or of regulations issued concerning such lease or permit;

"(2) with respect to cancellation of any lease or permit—

"(A) that such cancellation may occur at any time, if the Secretary determines, after a hearing, that—

"(i) continued activity pursuant to such lease or permit would probably cause serious harm or damage to life (including fish and other aquatic life), to property, to any mineral deposits or geothermal steam resources (in areas leased or not leased), to the national security or defense, or to the marine, coastal, or human environments;

"(ii) the threat of harm or damage will not disappear or decrease to an acceptable extent within a reasonable period of time; and

"(iii) the advantages of cancellation outweigh the advantages of continuing such lease or permit in force;

"(B) that such cancellation shall not foreclose any claim for compensation as may be required by the Constitution of the United States or any other law;

"(3) for the assignment or relinquishment of a lease;

"(4) for unitization, pooling, and drilling agreements;

"(5) for the subsurface of oil and gas other than by the Federal Government;

"(6) for drilling or easements necessary for exploration, development, and production;

"(7) for the prompt and efficient exploration and development of a lease area;

"(8) for compliance with the national ambient air quality standards or requirements pursuant to the Clean Air Act, to the extent that activities authorized under this Act affect the air quality of any state; and

"(9) for the establishment of air quality standards for operations on the outer Continental Shelf under this Act consistent with standards or requirements under the Clean Air Act.

"(b) The issuance and continuance in effect of any lease, or of any assignment or other transfer of any lease, under the provisions of this Act shall be conditioned upon compliance with the regulations issued under this Act.

"(c) Whenever the owner of a nonproducing lease fails to comply with any of the provisions of this Act, or of the lease, or of the regulations issued under this Act, such lease may be canceled by the Secretary, subject to the right of judicial review as provided in this Act, if such default continues for the period of thirty days after mailing of notice by registered letter to the lease owner at his record post office address.

"(d) Whenever the owner of any producing lease fails to comply with any of the provisions of this Act, or of the lease, or of the regulations issued under this Act, such lease may be forfeited and canceled by an appropriate proceeding in any United States district court having jurisdiction under the provisions of this Act.

"(e) Rights-of-way through the submerged lands of the outer Continental Shelf, whether or not such lands are included in a lease maintained or issued pursuant to this Act, may be granted by the Secretary for pipeline purposes for the transportation of oil, natural gas, sulfur, or other mineral, or geothermal steam, under such regulations and upon such conditions as may be prescribed by the Secretary, or where appropriate the Secretary of Transportation, including (as provided in section 21(b) of this Act) utilization of the best available and safest technology for pipeline burial and other procedures, and upon the express condition that such oil or gas pipelines shall transport or purchase without discrimination, oil or natural gas produced from such lands in the vicinity of the pipeline in such proportionate amounts as the Federal Power Commission, in the case of gas, and the Interstate Commerce Commission, in consultation with the Administrator of the Federal Energy Administration, in the case of oil, may, after a full hearing with due notice thereof to the interested parties, determine to be reasonable, taking into account, among other things, conservation and the prevention of waste. Failure to comply with the provisions of this section or the regulations and conditions prescribed under this section shall be ground for forfeiture of the grant in an appropriate judicial proceeding instituted by the United States in any district court of the United States having jurisdiction under the provisions of this Act.

"(f)(1) The lessee shall produce any oil or gas, or both, obtained pursuant to an approved development and production plan, at rates consistent with any rule or order issued by the President in accordance with any provision of law.

"(2) If no rule or order referred to in paragraph (1) has been issued, the lessee shall produce such oil or gas, or both, at rates consistent with any regulation promulgated by the Secretary which is to assure the maximum rate of production which may be sustained without loss of ultimate recovery of oil or gas, or both, under sound engineering and economic principles, and which is safe for the duration of the activity covered by the approved plan. The Secretary may permit the lessee to vary such rates if he finds that such variance is necessary.

"(g)(1) In administering the provisions of this Act, the Secretary shall coordinate the activities of any Federal department or agency having authority to issue any license, lease, or permit to engage in any activity related to the exploration, development, or production of oil or gas from the outer Continental Shelf for purposes of assuring that, to the maximum extent practicable, inconsistent or duplicative requirements are not imposed upon any applicant for, or holder of, any such license, lease, or permit.

"(2) The head of any Federal department or agency who takes any action which has a direct and significant effect on the outer Continental Shelf or its development shall promptly notify the Secretary of such action and the Secretary shall thereafter notify and consult with the Governor of any affected State and the Secretary may thereafter recommend such change or changes in such action as are considered appropriate.

"(h) After the date of enactment of this section, no holder of any oil and gas lease issued or maintained pursuant to this Act shall be permitted to flare natural gas from any well unless the Secretary finds that there is no practicable way to complete production of such gas, or that such flaring is necessary to alleviate a temporary emergency situation or to conduct testing or work-over operations.".

REVISION OF BIDDING AND LEASE ADMINISTRATION

SEC. 205. (a) Subsections (a) and (b) of section 8 of the Outer Continental Shelf Lands Act (43 U.S.C. 1337 (a) and (b)) are amended to read as follows:

"(a)(1) The Secretary is authorized to grant to the highest responsible qualified bidder or bidders by competitive bidding, under regulations promulgated in advance, an oil and gas lease on submerged lands of the outer Continental Shelf. Such regulations may provide for the deposit of cash bids in an interest-bearing account until the Secretary announces his decision on whether to accept the bids, with the interest earned thereon to be paid to the Treasury as to bids that are accepted and to the unsuccessful bidders as to bids that are rejected. The bidding shall be by sealed bid and, at the discretion of the Secretary, on the basis of—

"(A) cash bonus bid with a royalty at not less than 12½ per centum fixed by the Secretary in amount or value of the production saved, removed, or sold;

"(B) variable royalty bid based on a per centum of the production saved, removed, or sold, with a cash bonus as determined by the Secretary;

"(C) cash bonus bid with diminishing or sliding royalty based on such formulae as the Secretary shall determine as equitable to encourage continued production from the lease area as resources diminish, but not less than 12½ per centum at the beginning of the lease period in amount or value of the production saved, removed, or sold;

"(D) cash bonus bid with a fixed share of the net profits of not less than 30 per centum to be derived from the production of oil and gas from the lease area;

"(E) fixed cash bonus with the net profit share reserved as the bid variable;

"(F) cash bonus bid with a royalty at not less than 12½ per centum fixed by the Secretary in amount or value of the production saved, removed, or sold and a per centum share of net profits of not less than 30 per centum to be derived from the production of oil and gas from the lease area;

"(G) fixed cash bonus of not less than sixty-two dollars per hectare with a work commitment stated in a dollar amount as the bid variable;

"(H) a fixed royalty at not less than 12½ per centum in amount or value of the production saved, removed, or sold, or a fixed per centum share of net profits of not less than 30 per centum to be derived from the production of oil and gas from the lease area, with a work commitment stated in a dollar amount as the bid variable;

"(I) a fixed cash bonus of not less than sixty-two dollars per hectare, with a fixed royalty of not less than 12½ per centum in amount or value of the production saved, removed or sold, or a fixed per centum share of net profits of not less than 30 per centum to be derived from the production of oil and gas from the lease area with a work commitment stated in dollar amounts as the bid variable; or

"(J) any modification of bidding systems authorized in subparagraphs (A) through (I) of this paragraph and any other systems of bid variables, terms, and conditions which the Secretary determines to be useful to accomplish the purposes and policies of this section.

"(2) The Secretary may, in his discretion, defer any part of the payment of the cash bonus, as authorized in paragraph (1) of this subsection, according to a schedule announced at the time of the announcement of the lease sale, but such payment shall be made in total no later than five years from the date of the lease sale.

"(3) The Secretary may, in order to promote increased production on the lease area, through direct, secondary, or tertiary recovery means, reduce or eliminate any royalty or net profit share set forth in the lease for such area.

"(4)(A) Before utilizing any bidding system authorized in subparagraphs (C) through (J) of paragraph (1), the Secretary shall establish such system in accordance with this paragraph.

"(B) The establishment by the Secretary of any bidding system pursuant to subparagraph (A) of this paragraph shall be by rule, after an opportunity for a hearing, in accordance with section 501 of the Department of Energy Organization Act (42 U.S.C. 7191). Any modification of any such bidding system shall be by rule in accordance with such section 501.

"(C) Not later than thirty days before the effective date of any rule prescribed under subparagraph (B) of this paragraph, the Secretary shall transmit such rule to Congress.

"(5)(A) The Secretary shall utilize the bidding alternatives from among those authorized by this subsection, in accordance with subparagraphs (B) and (C) of this paragraph, so as to accomplish the purposes and policies of this Act, includng (i) providing a fair return to the Federal Government, (ii) increasing competition, (iii) assuring competent and safe operations, (iv) avoiding undue speculation, (v) avoiding unnecessary delays in exploration, development, and production, (vi) discovering and recovering oil and gas, (vii) developing new oil and gas resources in an efficient and timely manner, and (viii) limiting administrative burdens on government and industry. In order to select a bid to accomplish these purposes and policies, the Secretary may, in his discretion, require each bidder to submit bids for any area of the outer Continental Shelf in accordance with more than one of the bidding alternatives set forth in paragraph (1) of this subsection.

"(B) During the five year period commencing on the date of enactment of this subsection, the Secretary may, in order to obtain statistical information to determine which bidding alternatives will best accom-

plish the purposes and policies of this Act, require each bidder to submit bids for any area of the outer Continental Shelf in accordance with more than one of the bidding systems set forth in paragraph (1) of this subsection. For such statistical purposes, leases may be awarded using a bidding alternative selected at random or determined by the Secretary to be desirable for the acquisiton of valid statistical data and otherwise consistent with the provisions of this Act.

"(C) The bidding systems authorized by subparagraphs (C) through (I) of paragraph (1) of this subsection shall be applied to not less than 20 per centum and not more than 50 per centum of the total area offered for lease each year during the five-year period beginning on the date of enactment of this subsection, unless the Secretary determines that the requirement set forth in this subparagraph is inconsistent with subparagraph (A) of this paragraph.

"(D) Within six months after the end of each fiscal year, the Secretary shall report to the Congress with respect to the use of the various bidding options provided for in this subsection. Such report shall include—

"(i) the schedule of all lease sales held during such year and the bidding system or systems utilized;

"(ii) the schedule of all lease sales to be held the following year and the bidding system or systems to be utilized;

"(iii) the benefits and costs associated with conducting lease sales using the various bidding systems;

"(iv) if applicable, the reasons why a particular bidding system has not been or will not be utilized; and

"(v) an analysis of the capability of each bidding system to accomplish the purposes and policies stated in subparagraph (A) of this paragraph.

"(E) If, not later than the thirtieth day before the initial announcement of the tracts selected for inclusion in a proposed lease sale based upon public nominations of lease tracts submitted to the Secretary, the Governor of any State which may be an affected State as a result of such lease sale, or the chief executive officer of any local government of such State which may be an affected local government as a result of such lease sale, requests that the Secretary hold a public hearing to consider suggestions and comments from any residents of the State. The Secretary, prior to such initial announcement, shall hold such a public hearing within the area of such State which is adjacent to the area of the outer Continental Shelf where such lease tracts are located.

"(6) The Secretary may, by regulation, permit submission of bids made jointly by or on behalf of two or more persons for an oil and gas lease under this Act unless more than one of the joint bidders, directly or indirectly, controls or is chargeable worldwide with an average daily production of one million six hundred thousand barrels a day or more, or the equivalent, in crude oil, natural gas, and liquefied petroleum products.

"(7) Not later than thirty days before any lease sale, the Secretary shall submit to the Congress and publish in the Federal Register a notice—

"(A) identifying any bidding system which will be utilized for such lease sale and the reasons for the utilization of such bidding system; and

"(B) designating the lease tracts selected which are to be offered in such sale under the bidding system authorized by subparagraph (A) of paragraph (1) and the lease tracts selected which are to be offered under any one or more of the bidding systems authorized by subparagraphs (B) through (J) of paragraph (1), and the reasons such lease tracts are to be offered under a particular bidding system.

"(b) An oil and gas lease issued pursuant to this section shall—

"(1) be for a tract consisting of a compact area not exceeding five thousand seven hundred and sixty acres, as the Secretary may determine, unless the Secretary finds that a larger area is necessary to comprise a reasonable economic production unit;

"(2) be for an initial period of—

"(A) five years; or

"(B) not to exceed ten years where the Secretary finds that such longer period is necessary to encourage exploration and development in areas because of unusually deep water or other unusually adverse conditions, and as long after such initial period as oil or gas may be produced from the area in paying quantities, or drilling or well reworking operations as approved by the Secretary are conducted thereon;

"(3) require the payment of amount or value as determined by one of the bidding systems set forth in subsection (a) of this section;

"(4) entitle the lessee to explore, develop, and produce oil and gas resources contained within the lease area, conditioned upon due diligent requirements and the approval of the development and production plan required by this Act;

"(5) provide for suspension or cancellation of the lease during the initial lease term or thereafter pursuant to section 5 of this Act;

"(6) contain such rental and other provisions as the Secretary may prescribe at the time of offering the area for lease; and

"(7) provide a requirement that the lessee offer 20 per centum of the crude oil, condensate, and natural gas liquids produced from such lease, at the market value and point of delivery applicable to Federal royalty oil, to small or independent refiners as defined in the Emergency Petroleum Allocation Act of 1973.".

(b) Section 8 of the Outer Continental Shelf Lands Act (43 U.S.C. 1337) is further amended by striking out subsection (j), by relettering subsections (c) through (i), and all references thereto, as subsections (i) through (o), respectively, and by inserting immediately after subsection (b) the following new subsection:

"(c)(1) Following each notice of a proposed lease sale and before the acceptance of bids and the issuance of leases based on such bids the Secretary shall allow the Attorney General and the Federal Trade Commission thirty days to review the results of such lease sale, except that the Attorney General and the Federal Trade Commission may agree to a shorter review period.

"(2) The Attorney General and the Federal Trade Commission may each conduct such antitrust review on the likely effects the issuance of such leases would have on competition as the Attorney General and the Federal Trade Commission deem appropriate and each shall advise the Secretary with respect to such review. The Secretary shall provide such information as the Attorney General and the Federal Trade Commission may require in order to conduct any antitrust review pursuant to this paragraph and to make recommendations pursuant to paragraph (3) of this subsection.

"(3) The Attorney General and the Federal Trade Commission may make such recommendations to the Secretary, including the nonacceptance of any bid, as may be appropriate to prevent any situation inconsistent with the antitrust laws. If the Secretary determines, or if the Attorney General or the Federal Trade Commission advises the Secretary, prior to the issuance of any lease, that such lease may create or maintain a situation inconsistent with the antitrust laws, the Secretary may—

"(A) refuse (i) to accept an otherwise qualified bid for such lease or (ii) to issue such lease, notwithstanding subsection (a) of this section; or

"(B) issue such lease, and notify the lessee, the Attorney General, and the Federal Trade Commission of the reason for such decision.

"(4) An antitrust review authorized by this subsection shall be deemed an 'antitrust investigation' within the meaning of the Antitrust Civil Process Act (15 U.S.C. 1311 et seq.).

"(5) Neither the issuance of a lease nor anything in this subsection shall be admissible in any way as a defense to any civil or criminal action for violation of the antitrust laws or modify or abridge any private right of action under such laws.

(d) No lease may be issued to a bidder if the Secretary finds that the bidder is not meeting due diligence requirements on other leases.

"(e) No lease issued under this Act may be sold, exchanged, assigned, or otherwise transferred except with the approval of, and subject to renegotiation by, the Secretary. Prior to any such approval, the Secretary shall consult with and give due consideration to the views of the Attorney General and the Federal Trade Commission.

"(f) Nothing in this Act shall be deemed to convey to any person, association, corporation, or other business organization immunity from civil or criminal liability, or to create defenses to actions, under any antitrust law.

"(g)(1) At the time of soliciting nominations for the leasing of lands within three miles of the seaward boundary of any coastal State, the Secretary shall provide the Governor of any such State—

"(A) an identification and schedule of the areas and regions proposed to be offered for leasing;

"(B) all information concerning the geographical, geological, and ecological characteristics of such regions;

"(C) an estimate of the oil and gas reserves in the areas proposed for leasing; and

"(D) an identification of any field, geological structure, or trap located within three miles of the seaward boundary of a coastal State.

"(2) After receipt of nominations for any area of the outer Continental Shelf within three miles of the seaward boundary of any coastal State, the Secretary shall inform the Governor of such coastal State of any such area which the Secretary believes should be given further consideration for leasing and which he concludes, in consultation with the Governor of such coastal State, may contain one or more oil or gas pools or fields underlying both the outer Continental Shelf and lands subject to the jurisdiction of such State. If, with respect to such area, the Secretary selects a tract or tracts which may contain one or more oil or gas pools or fields underlying both the outer Continental Shelf and submerged lands subject to the jurisdiction of such State, the Secretary shall offer the Governor of such coastal State the opportunity to enter into an agreement concerning the disposition of revenues which may be generated by a Federal lease within such area in order to permit their fair and equitable division between the State and Federal Government.

"(3) Within ninety days after the offer by the Secretary pursuant to paragraph (2) of this subsection, the Governor shall elect whether to enter into such agreement and shall notify the Secretary of his decision. If the Governor accepts the offer, the terms of any lease issued shall be consistent with the provisions of this Act, with applicable regulations, and, to the maximum extent practicable, with the applicable laws of the coastal State. If the Governor declines the offer, or if the parties cannot agree to terms concerning the disposition of rev-

enues from such lease (by the time the Secretary determines to offer the area for lease), the Secretary may nevertheless proceed with the leasing of the area.

"(4) Notwithstanding any other provision of this Act, the Secretary shall deposit in a separate account in the Treasury of the United States all bonuses, royalties, and other revenues attributable to oil and gas pools underlying both the outer Continental Shelf and submerged lands subject to the jurisdiction of any coastal State until such time as the Secretary and the Governor of such coastal State agree on, or if the Secretary and the Governor of such coastal State cannot agree, as a district court of the United States determines, the fair and equitable disposition of such revenues and any interest which has accrued and the proper rate of payments to be deposited in the treasuries of the Federal Government and such coastal State.

"(h) Nothing contained in this section shall be construed to alter, limit, or modify any claim of any State to any jurisdiction over, or any right, title, or interest in, any submerged lands.".

DISPOSITION OF REVENUES

SEC. 206. Section 9 of the Outer Continental Shelf Lands Act (43 U.S.C. 1338) is amended to read as follows:

"SEC. 9. Disposition of Revenues.—(a) For the period beginning June 5, 1950, and ending September 30, 1978, all rentals, royalties, revenues, or other sums paid to the Secretary or the Secretary of the Navy pursuant to, or in connection with, any lease for any area of the Outer Continental Shelf shall be deposited in the Treasury of the United States and credited to miscellaneous receipts.

"(b) Beginning on October 1, 1978, and for each fiscal year thereafter, all rentals, royalties, revenues, or other sums paid to the Secretary or the Secretary of the Navy pursuant to, or in connection with any lease for any area of the Outer Continental Shelf shall be deposited in the Treasury of the United States and credited to miscellaneous receipts (other than any amount credited to the Land and Water Conservation Fund pursuant to section 2(c)(2) of the Land and Water Conservation Fund Act of 1965); and of the amounts so deposited, in each fiscal year, 20 per centum, up to a maximum of $200,000,000, shall be credited to the Coastal Energy Impact Fund established by section 308(h) of the Coastal Zone Management Act of 1972, as amended."

OUTER CONTINENTAL SHELF OIL AND GAS EXPLORATION

SEC. 207. Section 11 of the Outer Continental Shelf Lands Act (43 U.S.C. 1340) is amended to read as follows:

"SEC. 11. OUTER CONTINENTAL SHELF OIL AND GAS EXPLORATION.—(a)(1) Any person whom the Secretary by permit or regulation may authorize, may conduct geological and geophysical explorations, in the Outer Continental Shelf, which do not interfere with or endanger actual operations pursuant to any lease issued or maintained pursuant to this Act, and which are not unduly harmful to the marine environment.

"(2) The provisions of paragraph (1) of this subsection shall not apply to any person conducting explorations pursuant to an approved exploration plan on any area under lease to such person pursuant to the provisions of this Act.

"(b) Except as provided in subsection (f) of this section, beginning ninety days after the date of enactment of this subsection, no exploration pursuant to any oil and gas lease issued or maintained under this Act may be undertaken by the holder of such lease, except in accordance with the provisions of this section.

"(c)(1) Except as otherwise provided in this Act, prior to commencing exploration pursuant to any oil and gas lease issued or maintained under this Act, the holder thereof shall submit an exploration plan to the Secretary for approval. Such plan may apply to more than one lease held by a lessee in any one region of the outer Continental Shelf, or by a group of lessees acting under a unitization, pooling, or drilling agreement, and shall be approved by the Secretary if he finds that such plan is consistent with the provisions of this Act, regulations prescribed under this Act, and the provisions of such lease or leases. The Secretary shall require such modifications or remodifications of such plan as are necessary to achieve such consistency. The Secretary shall approve such plan, as submitted or modified, within 30 days of its submission or resubmission, except that the Secretary shall disapprove such plan if he determines that (A) any proposed activity under such plan would result in any condition described in section 5(a)(2)(A)(i) of this Act, and (B) such proposed activity cannot be modified to avoid such condition. If the Secretary disapproves a plan under the preceding sentence, he may, subject to section 5(a)(2)(B)(i) of this Act, cancel such lease and the lessee shall be entitled to compensation in accordance with the regulations prescribed under section 5(a)(2)(B)(ii) or (iii) of this Act

"(2) The Secretary shall not grant any license or permit for any activity described in detail in an exploration plan and affecting any land use or water use in the coastal zone of a state with a coastal zone management program approved pursuant to Section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455), unless the state concurs or is conclusively presumed to concur with the consistency certification accompanying such plan pursuant to subsections 307(c)(3)(B)(i) or (ii) of such Act, or the Secretary of Commerce makes the finding authorized by subsection 307(c)(3)(B)(iii) of such Act.

"(3) An exploration plan submitted under this subsection shall include, in the degree of detail which the Secretary may by regulation require—

"(A) a schedule of anticipated exploration activities to be undertaken;

"(B) a description of equipment to be used for such activities;

"(C) the general location of each well to be drilled; and

"(D) such other information deemed pertinent by the Secretary.

"(4) The Secretary may, by regulation, require that such plan be accompanied by a general statement of anticipated onshore activity resulting from such exploration, the effects and impacts of such activity, and the development and production intentions, which shall be for planning purposes only and which shall not be binding on any party.

"(d) The Secretary may, by regulation, require any lessee operating under an approved exploration plan to obtain a permit prior to drilling any well in accordance with such plan.

"(e)(1) If a revision of an exploration plan approved under this subsection is submitted to the Secretary, the process to be used for the approval of such revision shall be the same as set forth in subsection (c) of this section.

"(2) Except as otherwise provided in this Act, all exploration activities pursuant to any lease shall be conducted in accordance with an approved exploration plan or an approved revision of such plan.

"(f)(1) Exploration activities pursuant to any lease on which a drilling permit has been issued prior to the date of enactment of this subsection shall be considered in compliance with this section, but the Secretary may require such activities to be described in an exploration plan, or require a revised exploration plan, and require any such plan to be accompanied by a general statement in accordance with subsection (c)(3) of this section.

"(2) In accordance with section 5(a) of this Act, the Secretary may require the submission of additional information or establish additional requirements of lessees conducting exploration activities pursuant to any lease issued prior to the date of enactment of this subsection.

"(g)(1) The Secretary may permit qualified applicants to conduct geological explorations, including core and test drilling, in those areas and subsurface geological structures of the outer Continental Shelf which the Secretary or the applicants believe contain significant hydrocarbon accumulations.

"(2) The Secretary shall, at least once during the two-year period beginning on the date of enactment of this subsection, offer persons wishing to conduct geological explorations pursuant to permits issued under paragraph (1) of this subsection an opportunity to apply for such permits.

"(3) The Secretary shall provide by regulation the length of time during which he will offer applicants the opportunity to obtain a permit pursuant to this subsection.

"(h) Any permit for geological explorations authorized by this section shall be issued only if the Secretary determines, in accordance with regulations issued by the Secretary, that—

"(1) the applicant for such permit is qualified;

"(2) the exploration will not interfere with or endanger operations under any lease issued or maintained pursuant to this Act; and

"(3) such exploration will not be unduly harmful to acquatic life in the area, result in pollution, create hazardous or unsafe conditions, unreasonably interfere with other uses of the area, or disturb any site, structure, or object of historical or archeological significance.

"(i) The Secretary shall exclude from any lease or pre-lease exploratory drilling any tract lying within fifteen miles of the boundaries of any existing National Wilderness Area, except if a State conducts a leasing or development within its tidelands adjacent to such area."

RESERVATIONS BY THE CONGRESS

SEC. 208. Section 12(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1341) is amended by inserting "(1)" immediately after "(a)" and by adding at the end thereof the following new paragraph:

"(2) The Congress of the United States may, from time to time, withdraw from disposition any of the unleased lands of the outer Continental Shelf by the passage of a concurrent resolution so declaring and identifying the lands to be withdrawn.".

ANNUAL REPORT

SEC. 209. (a) Section 15 of the Outer Continental Shelf Lands Act (43 U.S.C. 1344) is amended to read as follows:

"SEC. 15. ANNUAL REPORT BY SECRETARY TO CONGRESS.—Within six months after the end of each fiscal year, the Secretary shall submit to the President of the Senate and the Speaker of the House of Representatives the following reports:

"(1) A report on the leasing and production program in the outer Continental Shelf during such fiscal year, which shall include—

"(A) a detailed accounting of all moneys received and expended;

"(B) a detailed accounting of all exploration, exploratory drilling, leasing, development, and production activities;

"(C) a summary of management, supervision, and enforcement activities;

"(D) a list of all shut-in and flaring wells; and

"(E) recommendations to the Congress (1) for improvements in management, safety,

and amount of production from leasing and operations in the outer Continental Shelf, and (ii) for resolution of jurisdictional conflicts or ambiguities.

"(2) A report, prepared after consultation with the Attorney General, with recommendations for promoting competition in the leasing of outer Continental Shelf lands, which shall include any recommendations or findings by the Attorney General, any plans for implementing recommended administrative changes, and drafts of any proposed legislation, and which shall contain—

"(A) an evaluation of the competitive bidding systems permitted under the provisions of section 8 of this Act, and, if applicable, the reasons why a particular bidding system has not been utilized;

"(B) an evaluation of alternative bidding systems not permitted under section 8 of this Act, and why such system or systems should or should not be utilized;

"(C) an evaluation of the effectiveness of restrictions on joint bidding in promoting competition and, if applicable, any suggested administrative or legislative action on joint bidding;

"(D) an evaluation of present measures and a description of any additional measures to encourage entry of new competitors; and

"(E) an evaluation of present measures and a description of additional measures to insure an adequate supply of oil and gas to independent refiners and distributors.".

NEW SECTIONS OF THE OUTER CONTINENTAL SHELF LANDS ACT

SEC. 210. The Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 18. OUTER CONTINENTAL SHELF LEASING PROGRAM.—(a) The Secretary, pursuant to procedures set forth in subsections (c) and (d), shall prepare, periodically revise, and maintain an oil and gas leasing program to implement the policies of this Act. The leasing program shall consist of a schedule of proposed lease sales indicating as precisely as possible the size, timing, and location of leasing activity which he determines will best meet national energy needs for the five-year period following its approval or reapproval. Such leasing program shall be prepared and maintained in a manner consistent with the following principles:

"(1) Management of the outer Continental Shelf shall be conducted in a manner which considers economic, social, and environmental values of the renewable and nonrenewable resources contained in the outer Continental Shelf, and the potential impact of oil and gas exploration on other resource values of the outer Continental Shelf and the marine, coastal, and human environments.

"(2) Timing and location of exploration, development, and production of oil and gas among the oil- and gas-bearing physiographic regions of the outer Continental Shelf shall be based on a consideration of—

"(A) existing information concerning the geographical, geological, and ecological characteristics of such regions;

"(B) an equitable sharing of developmental benefits and environmental risks among the various regions;

"(C) the location of such regions with respect to, and the relative needs of, regional and national energy markets;

"(D) the location of such regions with respect to other uses of the sea and seabed, including fisheries, navigation, existing or proposed sealanes, potential sites of deepwater ports, and other anticipated uses of the resources and space of the outer Continental Shelf;

"(E) the interest of potential oil and gas producers in the development of oil and gas resources as indicated by exploration or nomination;

"(F) laws, goals, and policies of affected States which have been specifically identified by the Governors of such States as relevant matters for the Secretary's consideration;

"(G) whether the oil and gas producing industry will have sufficient resources, including equipment and capital, to bring about the exploration, development, and production of oil and gas in such regions in an expeditious manner;

"(H) the relative environmental sensitivity and marine productivity of different areas of the outer Continental Shelf; and

"(I) relevant environmental and predictive information for different areas of the outer Continental Shelf.

"(3) The Secretary shall select the timing and location of leasing, to the maximum extent practicable, so as to obtain a proper balance between the potential for environmental damage, the potential for the discovery of oil and gas, and the potential for adverse impact on the coastal zone.

"(4) Leasing activities shall be conducted to assure receipt of fair value for the lands leased and the rights conveyed by the Federal Government.

"(b) The leasing program shall include estimates of the appropriations and staff required to—

"(1) obtain resource information and any other information needed to prepare the leasing program required by this section;

"(2) analyze and interpret the exploratory data and any other information which may be compiled under the authority of this Act;

"(3) conduct environmental studies and prepare any environmental impact statement required in accordance with this Act and with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332 (2)(C)); and

"(4) supervise operations conducted pursuant to each lease in the manner necessary to assure due diligence in the exploration and development of the lease area and compliance with the requirements of applicable law and regulations, and with the terms of the lease.

"(c)(1) During the preparation of any proposed leasing program under this section, the Attorney General and the Federal Trade Commission shall report to the Secretary with respect to the effect on competition of outer Continental Shelf exploration, development, and production. Such reports shall analyze competition and individual market shares within regional markets.

"(2) During the preparation of any proposed leasing program under this section, the Secretary shall invite and consider suggestions for such program from any interested Federal agency, from the Governor of any State which may become an affected State under such proposed program, and from the executive of any affected local government unit in such an affected State. The Secretary may also invite or consider suggestions from any other person.

"(3) After such preparation and at least sixty days prior to publication of a proposed leasing program in the Federal Register pursuant to paragraph (4) of this subsection, the Secretary shall transmit a copy of such proposed program to the Governor of each affected State for review and comment. The Governor shall solicit comments from the executives of local governments in his State affected by the proposed program. If any comment is received by the Secretary at least fifteen days prior to submission to the Congress pursuant to such paragraph (4) and includes a request for any modification of such proposed program, the Secretary shall reply in writing, granting or denying such request in whole or in part, or granting such request in such modified form as the Secretary considers appropriate, and stating his reasons therefor. All such correspondence between the Secretary and the Governor of any affected State, together with any additional information and data relating thereto, shall accompany such proposed program when it is submitted to the Congress.

"(4) Within nine months after the date of enactment of this section, the Secretary shall submit a proposed leasing program to the Congress, the Attorney General, the Federal Trade Commission, the Governors of affected States, and through the Governors, the executives of affected local governments, and shall publish such proposed program in the Federal Register.

"(d)(1) Within ninety days after the date of publication of a proposed leasing program, the Attorney General shall submit comments on the anticipated effects of such proposed program upon competition, and any State, local government, or other person may submit comments and recommendations as to any aspect of such proposed program.

"(2) At least sixty days prior to approving a proposed leasing program, the Secretary shall submit it to the President and the Congress, together with any comments received. Such submission shall indicate why any specific recommendation of the Attorney General or a State or a local government was not accepted.

"(3) After the leasing program has been approved by the Secretary, or after eighteen months following the date of enactment of this section, whichever first occurs, no lease shall be issued unless it is for an area included in the approved leasing program and unless it contains provisions consistent with the approved leasing program, except that leasing shall be permitted to continue until such program is approved and for so long thereafter as such program is under judicial or administrative review pursuant to the provisions of this Act.

"(e) The Secretary shall review the leasing program approved under this section at least once each year, and he may revise and reapprove such program, at any time, in the same manner as originally developed.

"(f) The Secretary shall, by regulation, establish procedures for—

"(1) receipt and consideration of nominations for any area to be offered for lease or to be excluded from leasing;

"(2) public notice of and participation in development of the leasing program;

"(3) review by State and local governments which may be impacted by the proposed leasing;

"(4) periodic consultation with State and local governments, oil and gas lessees and permittees, and representatives of other individuals or organizations engaged in activity in or on the outer Continental Shelf, including those involved in fish and shellfish recovery, and recreational activities; and

"(5) consideration of the coastal zone management program being developed or administered by an affected coastal State pursuant to section 305 or section 306 respectively of the Coastal Zone Management Act of 1972 (16 U.S.C. 1454, 1455).

Such procedures shall be applicable to any revision or reapproval of the leasing program.

"(g) The Secretary may obtain from public sources, or purchase from private sources, any survey, data, report, or other information (including interpretations of such data, survey, report, or other information) which may be necessary to assist him in preparing any environmental impact statement and in making other evaluations required by this Act. Data of a classified nature provided to the Secretary under the provisions of this subsection shall remain confidential for such period of time as agreed to by the head of the department or agency from whom the information is requested. The Secretary shall maintain the confidentiality of all privileged data or information for such period of time

as is provided for in this Act, established by regulation, or agreed to by the parties.

"(h) The heads of all Federal departments and agencies shall provide the Secretary with any nonprivileged information and may provide the Secretary with any privileged information he requests to assist him in preparing the leasing program. Privileged information provided to the Secretary under the provisions of this subsection shall remain confidential for such period of time as agreed to by the head of the department or agency from whom the information is requested. In addition, the Secretary shall utilize the existing capabilities and resources of such Federal departments and agencies by appropriate agreement.

"SEC. 19. COORDINATION AND CONSULTATION WITH AFFECTED STATES AND LOCAL GOVERNMENTS.—(a) Any Governor of any affected State or the executive of any affected local government in such State may submit recommendations to the Secretary regarding the size, timing, or location of a proposed lease sale or with respect to a proposed development and production plan.

"(b) Such recommendations shall be submitted within sixty days after notice of such proposed lease sale or ninety days after receipt of such development and production plan.

"(c) The Secretary shall accept recommendations of the Governor and may accept recommendations of the executive of any affected local government if he determines, after having provided the opportunity for consultation, that they provide for a reasonable balance between the national interest and the well-being of the citizens of the affected State. For the purposes of this subsection, a determination of the national interest shall be based on the desirability of obtaining oil and gas supplies in a balanced manner and on the findings, purposes, and policies of this Act. The Secretary shall communicate to the Governor, in writing, the reasons for his determination to accept or reject such Governor's recommendations, or to implement any alternative means identified in consultation with the Governor to provide for a reasonable balance between the national interest and the well-being of the citizens of the affected State.

"(d) The Secretary's determination that recommendations provide, or do not provide, for a reasonable balance between the national interest and the well-being of the citizens of the affected state shall be final and shall not, alone, be a basis for invalidation of a proposed lease sale or a proposed development and production plan in any suit or judicial review pursuant to section 23 of this Act, unless found to be arbitrary or capricious.

"(e) The Secretary is authorized to enter into cooperative agreements with affected States for purposes which are consistent with this Act and other applicable Federal law. Such agreements may include, but not be limited to, the sharing of information (in accordance with the provisions of section 26 of this Act), the joint utilization of available expertise, the facilitating of permitting procedures, joint planning and review, and the formation of joint surveillance and monitoring arrangements to carry out applicable Federal and State laws, regulations, and stipulations relevant to outer Continental Shelf operations both onshore and offshore.

"SEC. 20. ENVIRONMENTAL STUDIES.—(a)(1) The Secretary shall conduct a study of any area or region included in any lease sale in order to establish information needed for assessment and management of environmental impacts on the human, marine, and coastal environments of the outer Continental Shelf and the coastal areas which may be affected by oil and gas development in such area or region.

"(2) Each study required by paragraph (1) shall be commenced not later than six months after the date of enactment of this section with respect to any area or region where a lease sale has been held or announced by publication of a notice of proposed lease sale before such date of enactment, and not later than six months prior to the holding of a lease sale with respect to any area or region where no lease sale has been held or scheduled before such date of enactment. The Secretary may utilize information collected in any study prior to such date of enactment.

"(3) In addition to developing environmental information, any study of an area or region, to the extent practicable, shall be designed to predict impacts on the marine biota which may result from chronic low level pollution or large spills associated with outer Continental Shelf production, from the introduction of drill cuttings and drilling muds in the area, and from the laying of pipe to serve the offshore production area, and the impacts of development offshore on the affected and coastal areas.

"(b) Subsequent to the leasing and developing of any area or region, the Secretary shall conduct such additional studies to establish environmental information as he deems necessary and shall monitor the human, marine, and coastal environments of such area or region in a manner designed to provide time-series and data trend information which can be used for comparison with any previously collected data for the purpose of identifying any significant changes in the quality and productivity of such environments, for establishing trends in the areas studied and monitored, and for designing experiments to identify the causes of such changes.

"(c) The Secretary shall, by regulation, establish procedures for carrying out his duties under this section, and shall plan and carry out such duties in full cooperation with affected States. To the extent that other Federal agencies have prepared environmental impact statements, are conducting studies, or are monitoring the affected human, marine, or coastal environment, the Secretary may utilize the information derived therefrom in lieu of directly conducting such activities. The Secretary may also utilize information obtained from any State or local government entity, or from any person, for the purposes of this section. For the purpose of carrying out his responsibilities under this section, the Secretary may by agreement utilize, with or without reimbursement, the services, personnel, or facilities of any Federal, State, or local government agency.

"(d) The Secretary shall consider available relevant environmental information in making decisions (including those relating to exploration plans, drilling permits, and development and production plans), in developing appropriate regulations and lease conditions, and in issuing operating orders.

"(e) As soon as practicable after the end of each fiscal year, the Secretary shall submit to the Congress and make available to the general public an assessment of the cumulative effect of activities conducted under this Act on the human, marine, and coastal environments.

"(f) In executing his responsibilities under this section, the Secretary shall, to the maximum extent practicable, enter into appropriate arrangements to utilize on a reimbursable basis the capabilities of the Department of Commerce. In carrying out such arrangements, the Secretary of Commerce is authorized to enter into contracts or grants with any person, organization, or entity with funds appropriated to the Secretary of the Interior pursuant to this Act.

"SEC. 21. SAFETY REGULATIONS.—(a) Upon the date of enactment of this section, the Secretary and the Secretary of the Department in which the Coast Guard is operating shall, in consultation with each other and, as appropriate, with the heads of other Federal departments and agencies, promptly commence a joint study of the adequacy of existing safety regulations, and of the technology, equipment, and techniques available for the exploration, development, and production of the natural resources of the outer Continental Shelf. The results of this study shall be submitted to the President who shall submit a plan to Congress of his proposals to promote safety and health in the exploration, development, and production of the natural resources of the outer Continental Shelf.

"(b) In exercising their respective responsibilities for the artificial islands, installations, and other devices referred to in section 4(a)(1) of this Act, the Secretary, and the Secretary of the Department in which the Coast Guard is operating, shall require, on all new drilling and production operations and, wherever practicable, on existing operations, the use of the best available and safest technologies which the Secretary determines to be economically feasible, wherever failure of equipment would have a significant effect on safety, health, or the environment, except where the Secretary determines that the incremental benefits are clearly insufficient to justify the incremental costs of utilizing such technology.

"(c) Within sixty days after the date of enactment of this section, the Secretary of the Department in which the Coast Guard is operating shall promulgate regulations or standards applying to diving activities in the waters above the outer Continental Shelf, and to other unregulated hazardous working conditions for which he determines such regulations or standards are necessary. Such regulations or standards may be modified from time to time as necessary, and shall remain in effect until final regulations or standards are promulgated.

"(d) Nothing in this section shall affect any authority provided by law to the Secretary of Transportation to establish and enforce pipeline safety standards and regulations.

"(e)(1) In administering the provisions of this section, the Secretary shall consult and coordinate with the heads of other appropriate Federal departments and agencies for purposes of assuring that, to the maximum extent practicable, inconsistent or duplicative requirements are not imposed.

"(2) The Secretary shall make available to any interested person a compilation of all safety and other regulations which are prepared and promulgated by any Federal department or agency and applicable to activities on the outer Continental Shelf. Such compilation shall be revised and updated annually.

"SEC. 22. ENFORCEMENT.—(a) The applicable Federal officials shall strictly enforce safety and environmental regulations promulgated pursuant to this Act. Each Federal department and agency may by agreement utilize, with or without reimbursement, the services, personnel, or facilities of other Federal departments and agencies for the enforcement of their respective regulations.

"(b) It shall be the duty of any holder of a lease or permit under this Act to—

"(1) maintain all places of employment within such lease area or within the area covered by such permit in compliance with occupational safety and health standards and, in addition, free from recognized hazards to employees of the lease holder or permit holder or of any contractor or subcontractor operating within such lease area or within the area covered by such permit on the outer Continental Shelf;

"(2) maintain all operations within such lease area or within the area covered by such permit in compliance with regulations intended to protect persons, property, and the environment on the outer Continental Shelf; and

"(3) allow prompt access, at the site of any operation subject to safety regulations, to any inspector, and to provide such documents and records which are pertinent to occupational or public health, safety, or environmental protection, as may be requested.

"(c) The Secretary and the Secretary of the Department in which the Coast Guard is operating shall individually, or jointly if they so agree, promulgate regulations to provide for—

"(1) scheduled onsite inspection, at least once a year, of each facility on the outer Continental Shelf which is subject to any environmental or safety regulation promulgated pursuant to this Act, which inspection shall include all safety equipment designed to prevent or ameliorate blowouts, fires, spillages, or other major accidents; and

"(2) periodic onsite inspection, at least once a year, without advance notice to the operator of such facility to assure compliance with such environmental or safety regulations.

"(d)(1) The Secretary or the Secretary of the Department in which the Coast Guard is operating shall make an investigation and public report on each major fire and each major oil spillage occurring as a result of operations conducted pursuant to this Act, and may, in his discretion, make an investigation and report of lesser oil spillages. For purposes of this subsection, a major oil spillage is any spillage in one instance of more than two hundred barrels of oil during a period of thirty days. All holders of leases or permits issued or maintained under this Act shall cooperate with the appropriate Secretary in the course of any such investigation.

"(2) The Secretary or the Secretary of the Department in which the Coast Guard is operating shall make an investigation and public report on any death or serious injury occurring as a result of operations conducted pursuant to this Act, and may, in his discretion, make an investigation and report of any injury. For purposes of this subsection, a serious injury is one resulting in substantial impairment of any bodily unit or function. All holders of leases or permits issued or maintained under this Act shall cooperate with the appropriate Secretary in the course of any such investigation.

"(3) For purposes of carrying out their responsibilities under this section, the Secretary and the Secretary of the Department in which the Coast Guard is operating may by agreement utilize, with or without reimbursement, the services, personnel, or facilities of any Federal department or agency.

"(e) The Secretary, or, in the case of occupational safety and health, the Secretary of the Department in which the Coast Guard is operating, shall consider any allegation from any person of the existence of a violation of a safety regulation issued under this Act. The respective Secretary shall answer such allegation no later than ninety days after receipt thereof, stating whether or not such alleged violation exists and if so, what action has been taken.

"(f) In any investigation conducted pursuant to this section, the Secretary or the Secretary of the Department in which the Coast Guard is operating shall have power to summon witnesses and to require the production of books, papers, documents, and any other evidence. Attendance of witnesses or the production of books, papers, documents, or any other evidence shall be compelled by a similar process as in district courts of the United States. Such Secretary, or his designee, shall administer all necessary oaths to any witnesses summoned before such investigation.

"(g) The Secretary shall, after consultation with the Secretary of the Department in which the Coast Guard is operating, include in his annual report to Congress required by section 15 of this Act the number of violations of safety regulations reported or alleged, the investigations undertaken, the results of such investigations, and any administrative or judicial action taken as a result of such investigations.

"SEC. 23. CITIZEN SUITS, COURT JURISDICTION, AND JUDICIAL REVIEW.—(a)(1) Except as provided in this section, any person having a valid legal interest which is or may be adversely affected may commence a civil action on his own behalf to compel compliance with this Act against any person, including the United States, and any other government instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution) for any alleged violation of this Act or any regulation promulgated under this Act, or of the terms of any permit or lease by the Secretary under this Act.

"(2) Except as provided in paragraph (3) of this subsection, no action may be commenced under subsection (a)(1) of this section—

"(A) prior to sixty days after the plaintiff has given notice of the alleged violation, in writing under oath, to the Secretary and any other appropriate Federal official, to the State in which the violation allegedly occurred or is occurring, and to any alleged violator; and

"(B) if the Attorney General has commenced and is diligently prosecuting a civil action in court of the United States of a State with respect to such matter, but in any such action any person having a legal interest which is or may be adversely affected may intervene as a matter of right.

"(3) An action may be brought under this subsection immediately after notification of the alleged violation in any case in which the alleged violation constitutes an imminent threat to the public health or safety or would immediately affect a legal interest of the plaintiff.

"(4) In any action commenced pursuant to this section, the Attorney General, upon the request of the Secretary, or any other appropriate Federal official, may intervene as a matter of right.

"(5) A court, in issuing any final order in any action brought pursuant to subsection (a)(1) or subsection (c) of this section, may award costs of litigation, including reasonable attorneys' and expert witness fees, to any party, whenever such court determines such award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in a sufficient amount to compensate for any loss or damage suffered, in accordance with the Federal Rules of Civil Procedure.

"(6) Except as provided in subsection (c) of this section, all suits challenging actions or decisions allegedly in violation of, or seeking enforcement of, the provisions of this Act, or any regulation promulgated under this Act, or the terms of any permit or lease issued by the Secretary under this Act, shall be undertaken in accordance with the procedures described in this subsection. Nothing in this section shall restrict any right which any person or class of persons may have under any other Act or common law to seek appropriate relief.

"(b) Except as provided in subsection (c) of this section, the district courts of the United States shall have jurisdiction of cases and controversies arising out of, or in connection with (1) any operation conducted on the outer Continental Shelf which involves exploration, development, or production of the natural resources of the subsoil and seabed of the outer Continental Shelf, or which involves rights to such natural resources, or (2) the cancellation, suspension, or termination of a lease or permit under this Act. Proceedings with respect to any such case or controversy may be instituted in the judicial district in which any defendant resides or may be found, or in the judicial district of the State nearest the place the cause of action arose.

"(c)(1) Any action of the Secretary to approve a leasing program pursuant to section 18 of this Act shall be subject to judicial review only in the United States Court of Appeals for the District of Columbia.

"(2) Any action of the Secretary to approve, require modification of, or disapprove any exploration plan or any development and production plan under this Act shall be subject to judicial review only in a United States court of appeals for a circuit in which an affected State is located.

"(3) The judicial review specified in paragraphs (1) and (2) of this subsection shall be available only to a person who (A) participated in the administrative proceedings related to the actions specified in such paragraphs, (B) is adversely affected or aggrieved by such action, (C) files a petition for review of the Secretary's action within sixty days after the date of such action, and (D) promptly transmits copies of the petition to the Secretary and to the Attorney General.

"(4) Any action of the Secretary specified in paragraph (1) or (2) shall only be subject to review pursuant to the provisions of this subsection, and shall be specifically excluded from citizen suits which are permitted pursuant to subsection (a).

"(5) The Secretary shall file in the appropriate court the record of any public hearings required by this Act and any additional information upon which the Secretary based his decision, as required by section 2112 of title 28, United States Code. Specific objections to the action of the Secretary shall be considered by the court only if the issues upon which such objections are based have been submitted to the Secretary during the administrative proceedings related to the actions involved.

"(6) The court of appeals conducting a proceeding pursuant to this subsection shall consider the matter under review solely on the record made before the Secretary. The findings of the Secretary, if supported by substantial evidence on the record considered as a whole, shall be conclusive. The court may affirm, vacate, or modify any order or decision or may remand the proceedings to the Secretary for such further action as it may direct.

"(7) Upon the filing of the record with the court pursuant to paragraph (5), the jurisdiction of the court shall be exclusive and its judgment shall be final, except that such judgment shall be subject to review by the Supreme Court of the United States upon writ of certiorari.

"SEC. 24. REMEDIES AND PENALTIES.—(a) Upon a request by the Secretary, the Attorney General may institute a civil action in the District Court of the United States for the District in which the affected operation is located for a temporary restraining order, injunction, or other appropriate remedy to enforce any provision of this Act, any regulation or order issued under this Act, of any term of a lease, license, or permit issued pursuant to this Act.

"(b) If any person fails to comply with any provision of this Act, or any term of a lease, license, or permit issued pursuant to this Act, or any regulation or order issued under this Act, after notice of such failure and expiration of any reasonable period

allowed for corrective action, such person shall be liable for a civil penalty of not more than $10,000 for each day of the continuance of such failure. The Secretary may assess, collect, and compromise any such penalty. No penalty shall be assessed until the person charged with a violation has been given an opportunity for a hearing.

"(c) Any person who knowingly and willfully (1) violates any provision of this Act, any term of a lease, license, or permit issued pursuant to this Act, or any regulation or order issued under the authority of this Act designed to protect health, safety, or the environment or conserve natural resources, (2) makes any false statement, representation, or certification in any application, record, report, or other document filed or required to be maintained under this Act, (3) falsifies, tampers with, or renders inaccurate any monitoring device or method of record required to be maintained under this Act, or (4) reveals any data or information required to be kept confidential by this Act shall, upon conviction, be punished by a fine of not more than $100,000, or by imprisonment for not more than ten years, or both. Each day that a violation under clause (1) of this subsection continues, or each day that any monitoring device or data recorder remains inoperative or inaccurate because of any activity described in clause (3) of this subsection, shall constitute a separate violation.

"(d) Whenever a corporation or other entity is subject to prosecution under subsection (c) of this section, any officer or agent of such corporation or entity who knowingly and willfully authorized, ordered, or carried out the proscribed activity shall be subject to the same fines or imprisonment, or both, as provided for under subsection (c) of this section.

"(e) The remedies and penalties prescribed in this Act shall be concurrent and cumulative and the exercise of one shall not preclude the exercise of the others. Further, the remedies and penalties prescribed in this Act shall be in addition to any other remedies and penalties afforded by any other law or regulation.

"SEC. 25. OIL AND GAS DEVELOPMENT AND PRODUCTION.—(a)(1) Prior to development and production pursuant to an oil and gas lease issued after the date of enactment of this section in a frontier area, or issued or maintained prior to such date of enactment, in a frontier area, with respect to which no oil or gas has been discovered in paying quantities prior to such date of enactment, the lessee shall submit a development and production plan (hereinafter in this section referred to as a 'plan') to the Secretary, for approval pursuant to this section.

"(2) A plan shall be accompanied by a statement describing all facilities and operations, other than those on the outer Continental Shelf, proposed by the lessee and known by him (whether or not owned or operated by such lessee) which will be constructed or utilized in the development, production, transportation, processing, or refining of oil or gas from the lease area, including the location and site of such facilities and operations, the land, labor, material, and energy requirements associated with such facilities and operations, and all environmental and safety safeguards to be implemented.

"(3) Except for any privileged information (as such term is defined in regulations issued by the Secretary), the Secretary, within ten days after receipt of a plan and statement, shall (A) submit such plan and statement to the Governor of any affected State, and upon request, to the executive of any affected local government, and (B) make such plan and statement available to any other appropriate interstate regional entity and the public.

"(b) After the date of enactment of this section, no oil and gas lease may be issued pursuant to this Act in any frontier area, unless such lease requires that development and production of reserves be carried out in accordance with a plan which complies with the requirements of this section.

"(c) A plan may apply to more than one oil and gas lease, and shall set forth, in the degree of detail established by regulations issued by the Secretary—

"(1) the specific work to be performed;

"(2) a description of all facilities and operations located on the outer Continental Shelf which are proposed by the lessee or known by him (whether or not owned or operated by such lessee) to be directly related to the proposed development, including the location and size of such facilities and operations, and the land, labor, material, and energy requirements associated with such facilities and operations;

"(3) the environmental safeguards to be implemented on the outer Continental Shelf and how such safeguards are to be implemented;

"(4) all safety standards to be met and how such standards are to be met;

"(5) an expected rate of development and production and a time schedule for performance; and

"(6) such other relevant information as the Secretary may by regulation require.

"(d) The Secretary shall not grant any license or permit for any activity described in detail in a plan and affecting any land use or water use in the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455), unless the State concurs or is conclusively presumed to concur with the consistency certification accompanying such plan pursuant to subsections 307(c)(3)(B)(i) or (ii) of such Act, or the Secretary of Commerce makes the finding authorized by subsection 307(c)(3)(B)(iii) of such Act.

"(e)(1) The Secretary shall, at least once in each frontier area, declare the approval of a development and production plan or plans to be a major Federal action. In preparing an environmental impact statement on such action, the Secretary shall evaluate the cumulative effect on the area and the affected States as a result of activities proposed in the plan or plans submitted for approval, plans previously approved and available preliminary plans for production in the area.

"(2) The Secretary may require lessees of tracts for which development and production plans have not been approved, to submit preliminary or final plans for their leases, prior to or immediately after a determination by the Secretary that the procedures under the National Environmental Policy Act of 1969 shall commence.

"(f) If approval of a development and production plan is found to be a major Federal action, the Secretary shall transmit the draft environmental impact statement to the Governor of any affected State, and upon request, to the executive of any local government, and shall make such draft available to any appropriate interstate regional entity and the public.

"(g) If approval of a development and production plan is not found to be a major Federal action, the Governor of any affected State, and the executive of any affected local government area shall have ninety days from receipt of the plan from the Secretary or from the date it is made available to submit comments and recommendations. Such comments and recommendations shall be made available to the public upon request. In addition, any interested person may submit comments and recommendations.

"(h)(1) After reviewing the record of any public hearing held with respect to the approval of a plan pursuant to the National Environmental Policy Act of 1969 or the comments and recommendations submitted under subsection (g) of this section, the Secretary shall, within sixty days after the release of the final environmental impact statement prepared pursuant to the National Environmental Policy Act of 1969 in accordance with subsection (e) of this section, or sixty days after the period provided for comment under subsection (g) of this section, approve, disapprove, or require modifications of the plan. The Secretary shall require modification of a plan if he determines that the lessee has failed to make adequate provision in such plan for safe operations on the lease area or for protection of the human, marine, or coastal environment, including compliance with the regulations prescribed by the Secretary pursuant to paragraphs (8) and (9) of section 5(a) of this Act. The Secretary shall disapprove a plan—

"(A) if the lessee fails to demonstrate that he can comply with the requirements of this Act or other applicable Federal law, including the regulations prescribed by the Secretary pursuant to paragraphs (8) and (9) of section 5(a) of this Act;

"(B) if any of the activities described in detail therein for which a federal license or permit is required and which affects any land use or water use in the coastal zone of a state with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455), do not receive concurrence by such state with respect to the consistency certification accompanying such plan pursuant to subsections 307(c)(3)(B)(i) or (ii) of such Act and the Secretary of Commerce does not make the finding authorized by section 307(c)(3)(B)(iii) of such Act;

"(C) if operations threaten national security or national defense; or

"(D) if the Secretary determines, because of exceptional geological conditions in the lease area, exceptional resource values in the marine or coastal environment, or other exceptional circumstances, that (i) implementation of the plan would probably cause serious harm or damage to life (including fish and other aquatic life), to property, to any mineral deposits (in areas leased or not leased), to the national security or defense, or to the marine, coastal or human environments, (ii) the threat of harm or damage will not disappear or decrease to an acceptable extent within a reasonable period of time, and (iii) the advantages of disapproving the plan outweigh the advantages of development and production.

"(2)(A) If a plan is disapproved—

"(i) under subparagraph (A) of paragraph (1); or

"(ii) under subparagraph (B) of paragraph (1) with respect to a lease issued after approval of a coastal zone management program pursuant to the Coastal Zone Management Act of 1972 (16 US.C. 1455),

the lessee shall not be entitled to compensation because of such disapproval.

"(B) If a plan is disapproved—

"(i) under subparagraph (C) or (D) of paragraph (1); or

"(ii) under subparagraph (B) of paragraph (1) with respect to a lease issued before approval of a coastal zone management program pursuant to the Coastal Zone Management Act of 1972, and such approval occurs after the lessee has submitted a plan to the Secretary,

the term of the lease shall be duly extended, and at any time within five years after such disapproval, the lessee may reapply for approval of the same or a modified plan, and the Secretary shall approve, disapprove, or require modifications of a plan in accordance with this subsection.

"(C) Upon the expiration of the five-year period described in subparagraph (B) of this

paragraph, or, in the Secretary's discretion, at an earlier time upon request of a lessee, if the Secretary has not approved a plan, the Secretary shall cancel the lease. Such cancellation shall not foreclose any claim for compensation as may be required by the Constitution of the United States or any other law. The Secretary may, at any time within the five-year period described in such subparagraph (B), require the lessee to submit a plan of development and production for approval, disapproval, or modification. If the lessee fails to submit a required plan expeditiously and in good faith, the Secretary shall find that the lessee has not been duly diligent in pursuing his obligations under the lease, and shall immediately cancel such lease, without compensation, under the provisions of section 5(c) of this Act.

"(3) The Secretary shall, from time to time, review each plan approved under this section. Such review shall be based upon changes in available information and other onshore or offshore conditions affecting or impacted by development and production pursuant to such plan. If the review indicates that the plan should be revised to meet the requirements of this subsection, the Secretary shall require such revision.

"(i) The Secretary may approve any revision of an approved plan proposed by the lessee if he determines that such revision will lead to greater recovery of oil and natural gas, improve the efficiency, safety, and environmental protection of the recovery operation, is the only means available to avoid substantial economic hardship to the lessee, or is otherwise not inconsistent with the provisions of this Act, to the extent such revision is consistent with protection of the marine and coastal environments. Any revision of an approved plan which the Secretary determines is significant shall be reviewed in accordance with subsections (d) through (g) of this section.

"(j) Whenever the owner of any lease fails to submit a plan in accordance with regulations issued under this section, or fails to comply with an approved plan, the lease may be cancelled in accordance with section 5(c) and (d). Termination of a lease because of failure to comply with an approved plan, including required modifications or revisions, shall not entitle a lessee to any compensation.

"(k) If any development and production plan submitted to the Secretary pursuant to this section provides for the production and transportation of natural gas, the lessee shall contemporaneously submit to the Federal Power Commission that portion of such plan which relates to production of natural gas and the facilities for transportation of natural gas. The Secretary and the Federal Power Commission shall agree as to which of them shall prepare any environmental impact statement which may be required pursuant to the National Environmental Policy Act of 1969 applicable to such portion of such plan, or conduct studies as to the effect on the environment of implementing it. Thereafter, the findings and recommendations by the agency preparing such environmental impact statement or conducting any studies which they may deem desirable pursuant to that agreement shall be adopted by the other agency, and such other agency shall not independently prepare another environmental impact statement or duplicate such studies with respect to such portion of such plan, but the Federal Power Commission, in connection with its review of an application for a certificate of public convenience and necessity applicable to such transportation facilities pursuant to section 7 of the Natural Gas Act (15 U.S.C. 717), may prepare such environmental studies or statement relevant to certification of such transportation facilities as have not been covered by an environmental impact statement or studies prepared by the Secretary. The Secretary, in consultation with the Federal Power Commission, shall promulgate rules to implement this subsection, but the Federal Power Commission shall retain sole authority with respect to rules and procedure applicable to the filing of any application with the Commission and to all aspects of the Commission's review of, and action on, any such application.

"(l) An oil and gas lease issued or maintained under this Act which is located in any area which is not a frontier area shall be subject to the provisions of this section if the Secretary determines, pursuant to regulations prescribed by the Secretary, that the likely environmental or onshore impacts of the development and production of such lease make the application of the provisions of this section in the public interest.

"SEC. 26. OUTER CONTINENTAL SHELF OIL AND GAS INFORMATION PROGRAM.—(a)(1)(A) Any lessee or permittee conducting any exploration for, or development or production of, oil or gas pursuant to this Act shall provide the Secretary access to all data and information (including processed, analyzed and interpreted information) obtained from such activity and shall provide copies of such data and information as the Secretary may request. Such data and information shall be provided in accordance with regulations which the Secretary shall prescribe.

"(B) If an interpretation provided pursuant to subparagraph (A) of this paragraph is made in good faith by the lessee or permittee, such lessee or permittee shall not be held responsible for any consequence of the use of or reliance upon such interpretation.

"(C) Whenever any data is provided to the Secretary pursuant to subparagraph (A) of this paragraph—

"(i) by a lessee, in the form and manner of processing which is utilized by such lessee in the normal conduct of his business, the Secretary shall pay the reasonable cost of reproducing such data; and

"(ii) by a lessee, in such other form and manner of processing as the Secretary may request, or by a permittee, the Secretary shall pay the reasonable cost of processing and reproducing such data,

pursuant to such regulations as he may prescribe.

"(2) Each Federal department and agency shall provide the Secretary with any data obtained by such Federal department or agency conducting exploration pursuant to section 11 of this Act, and any other information which may be necessary or useful to assist him in carrying out the provisions of this Act.

"(b)(1) Data and information provided to the Secretary pursuant to subsection (a) of this section shall be processed, analyzed, and interpreted by the Secretary for purposes of carrying out his duties under this Act.

"(2) As soon as practicable after information provided to the Secretary pursuant to subsection (a) of this section is processed, analyzed, and interpreted, the Secretary shall make available to the affected States and to any requesting affected local government, a summary of data designed to assist them in planning for the onshore impacts of possible oil and gas development and production. Such summary shall include estimates of (A) the oil and gas reserves in areas leased or to be leased, (B) the size and timing of development if and when oil or gas, or both is found, (C) the location of pipelines, and (D) the general location and nature of onshore facilities.

"(c) The Secretary shall prescribe regulations to (1) assure that the confidentiality of privileged information received by the Secretary under this section will be maintained, and (2) set forth the time periods and conditions which shall be applicable to the release of such information. Such regulations shall include a provision that no such information will be transmitted to any affected State unless the lessee, or the permittee and all persons to whom such permittee has sold such information under promise of confidentiality, agree to such transmittal.

"(d)(1) The Secretary shall transmit to any affected State—

"(A) a copy of all relevant actual or proposed programs, plans, reports, environmental impact statements, tract nominations (including negative nominations) and other lease sale information, any similar type of relevant information, and all modifications and revisions thereof and comments thereon, prepared or obtained by the Secretary pursuant to this Act;

"(B)(i) the summary of data prepared by the Secretary pursuant to subsection (b)(2) of this section, and (ii) any other processed, analyzed, or interpreted data prepared by the Secretary pursuant to subsection (b)(1) of this subsection, unless the Secretary determines that transmittal of such data prepared pursuant to subsection (b)(1) would unduly damage the competitive position of the lessee or permittee who provided the Secretary with the information which the Secretary had processed, analyzed, or interpreted; and

"(C) any relevant information received by the Secretary pursuant to subsection (a) of this section, subject to any applicable requirements as to confidentiality which are set forth in regulations prescribed under subsection (c) of this section.

"(2) Notwithstanding the provisions of any regulation required pursuant to the second sentence of subsection (c) of this section, the Governor of any affected State may designate an appropriate State official to inspect, at a regional location which the Secretary shall designate, any privileged information received by the Secretary regarding any activity adjacent to such State, except that no such inspection shall take place prior to the sale of a lease covering the area in which such activity was conducted. Knowledge obtained by such State during such inspection shall be subject to applicable requirements as to confidentiality which are set forth in regulations prescribed under subsection (c) of this section.

"(e) Prior to transmitting any privileged information to any State, or granting such State access to such information, the Secretary shall enter into a written agreement with the Governor of such State in which such State agrees, as a condition precedent to receiving or being granted access to such information, to waive the defenses set forth in subsection (f)(2) of this section, and to hold the United States harmless from any violations of the regulations prescribed pursuant to subsection (c) that the State or its employees may commit.

"(f)(1) Whenever any employee of the Federal Government or of any State reveals information in violation of the regulations prescribed pursuant to subsection (c) of this section, the lessee or permittee who supplied such information to the Secretary or to any other Federal official, and any person to whom such lessee or permittee has sold such information under promise of confidentiality, may commence a civil action for damages in the appropriate district court of the United States against the Federal Government or such State, as the case may be.

"(2) In any action commenced against the Federal Government or a State pursuant to paragraph (1) of this subsection, the Federal Government or such State, as the case may be, may not raise as a defense (A) any claim of sovereign immunity, or (B) any claim that the employee who revealed the privileged information which is the basis of

such suit was acting outside the scope of his employment in revealing such information.

"(g) Any provisions of State or local law which provides for public access to any privileged information received or obtained by any person pursuant to this Act is expressly preempted by the provisions of this section, to the extent that it applies to such information.

"(h) If the Secretary finds that any State cannot or does not comply with the regulations issued under subsection (c) of this section, he shall thereafter withhold transmittal and deny inspection of privileged information to such State until he finds that such State can and will comply with such regulations.

"(i) The regulations prescribed pursuant to subsection (c) of this section, and the provisions of subsection 552(b)(9) of title 5, United States Code, shall not apply to any information obtained in the conduct of geological or geophysical explorations by any Federal agency (or any person acting under a service contract with such agency) pursuant to section 11 of this Act.

"SEC. 27. FEDERAL PURCHASE AND DISPOSITION OF OIL AND GAS.—(a)(1) Except as may be necessary to comply with the provisions of section 7 of this Act, all royalties or net profit shares, or both, accruing to the United States under any oil and gas lease issued or maintained under this Act, shall, on demand of the Secretary, be paid in oil or gas.

"(2) Except as otherwise provided in section 12(b) of this Act, the United States shall have the right to purchase not to exceed 16⅔ per centum by volume of the oil and gas produced pursuant to a lease issued under this Act, at the regulated price, or, if no regulated price applies, at the fair market value at the wellhead of the oil and gas saved, removed, or sold, except that any oil or gas obtained by the United States as royalty or net profit share shall be credited against the amount that may be purchased under this subsection.

"(3) Title to any royalty, net profit share, or purchased oil or gas may be transferred, upon request, by the Secretary to the Secretary of Defense, to the Administrator of the General Services Administration, or to the Administrator of the Federal Energy Administration, for disposal within the Federal Government.

"(b)(1) The Secretary, pursuant to such terms as he determines and in the absence of any provision of law which provides for the mandatory allocation of such oil in amounts and at prices determined by such provision, or regulations issued in accordance with such provision, may offer to the public and sell by competitive bidding for not more than its regulated price, or, if no regulated price applies, not less than its fair market value any part of the oil (A) obtained by the United States pursuant to any lease as royalty or net profit share, or (B) purchased by the United States pursuant to subsection (a)(2) of this section.

"(2) Whenever, after consultation with the Administrator of the Federal Energy Administration, the Secretary determines that small refiners do not have access to adequate supplies of oil at equitable prices, the Secretary may dispose of any oil which is taken as a royalty or net profit share accruing or reserved to the United States pursuant to any lease issued or maintained under this Act, or purchased by the United States pursuant to subsection (a)(2) of this section, by conducting a lottery for the sale of such oil, or may equitably allocate such oil among the competitors for the purchase of such oil, at the regulated price, or if no regulated price applies, at its fair market value. The Secretary shall limit participation in any lottery or allocated sale to assure such access and shall publish notice of such sale, and the terms thereof, at least thirty days in advance of such sale. Such notice shall include qualifications for participation, the amount of oil to be sold, and any limitation in the amount of oil which any participant may be entitled to purchase. Any oil sold or allocated to small refiners under this paragraph shall be credited against the amount required to be offered to small refiners under section 8(b)(7) of this Act.

"(3) Whenever a provision of law is in effect which provides for the mandatory allocation of such oil in amounts or at prices determined by such provision, or regulations issued in accordance with such provision, the Secretary may only sell such oil in accordance with such provision of law or regulations.

"(c)(1) Except as provided in paragraph (2) of this subsection, the Secretary, pursuant to such terms as he determines, may offer to the public and sell by competitive bidding for not more than its regulated price, or, if no regulated price applies, not less than its fair market value any part of the gas (A) obtained by the United States pursuant to a lease as royalty or net profit share, or (B) purchased by the United States pursuant to subsection (a)(2) of this section.

"(2) Whenever, after consultation with and advice from the Administrator of the Federal Energy Administration and the Chairman of the Federal Power Commission, the Secretary determines that an emergency shortage of natural gas is threatening to cause severe economic or social dislocation in any region of the United States and that such region can be serviced in a practical, feasible, and efficient manner by royalty, net profit share, or purchased gas obtained pursuant to the provisions of this subsection, the Secretary may allocate or conduct a lottery for the sale of such gas, and shall limit participation in any allocated or lottery sale of such gas to any person servicing such region, but he shall not sell any such gas for more than its regulated price, or, if no regulated price applies, less than its fair market value. Prior to allocating any gas pursuant to this paragraph, the Secretary shall consult with the Federal Power Commission.

"(d) The lessee shall take any Federal oil or gas for which no acceptable bids are received, as determined by the Secretary, and which is not transferred pursuant to subsection (a)(3) of this section, and shall pay to the United States a cash amount equal to the regulated price, or, if no regulated price applies, the fair market value of the oil or gas so obtained.

"(e) As used in this section—

"(1) the term 'regulated price' means the highest price—

"(A) at which Federal oil may be sold pursuant to the Emergency Petroleum Allocation Act of 1973 and any rule or order issued under such Act;

"(B) at which natural gas may be sold to natural-gas companies pursuant to the Natural Gas Act and any rule or order issued under such Act; or

"(C) at which either Federal oil or gas may be sold under any other provision of law or rule or order thereunder which sets a price (or manner for determining a price) for oil or gas produced pursuant to a lease or permit issued in accordance with this Act; and

SEC. 28. LIMITATIONS ON EXPORTS.—(a) Except as provided in subsection (d), any oil or gas produced from the outer Continental Shelf shall be subject to the requirements and provisions of the Export Administration Act of 1969.

(b) Before any oil or gas subject to this section may be exported under the requirements and provisions of the Export Administration Act of 1969, the President shall make and publish an express finding that such exports will not increase the number of barrels of oil or cubic feet of gas imported into this country, are in the national interest, and are in accordance with the provisions and requirements of the Export Administration Act of 1969.

(c) The President shall submit reports to the Congress containing the findings made under this section, and after the date of receipt of such reports Congress shall have a period of sixty calendar days, thirty days of which Congress must have been in session, to consider whether exports under the terms of this section meet the requirements of subsection (b). If Congress within such time period passes a concurrent resolution of disapproval stating disagreement with any of the President's findings concerning the requirements of subsection (b), further exports made pursuant to such Presidential findings shall cease.

(d) The provisions of this section shall not apply to any oil or gas which is either exchanged in similar quantity for convenience or increased efficiency of transportation with persons or the government of an adjacent foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States, or which is exchanged or exported pursuant to an existing international agreement.

"(2) the term 'small refiner' has the meaning given such term by Small Business Administration Standards 128.3-8 (d) and (g).

"(f) Nothing in this section shall prohibit the right of the United States to purchase any oil or gas produced on the outer Continental Shelf, as provided in section 12(b) of this Act.

"SEC. 29. RESTRICTIONS ON EMPLOYMENT.—No full-time-officer or employee of the Department of Interior who directly or indirectly discharged duties or responsibilities under this Act, and who was at any time during the twelve months preceding the termination of his employment with the Department compensated under the Executive Schedule or compensated at or above the annual rate of basic pay for grade GS-16 of the General Schedule shall—

"(a) within two years after his employment with the Department has ceased, knowingly act as agent or attorney for, or otherwise represent, any other person (except the United States), in any formal or informal appearance before, or with the intent to influence, make any oral or written communication on behalf of any other person (except the United States) to, or knowingly aid or assist in representing any other person (except the United States) in any formal or informal appearance before—

"(1) any department, agency, or court of the United States, or any officer or employee thereof, and

"(2) in connection with any judicial or other proceeding, application, request for a ruling or other determination, regulation, order, lease, permit, rulemaking, or other particular matter involving a specific party or parties in which the United State is a party or has a direct and substantial interest, and

"(3) which was actually pending under his official responsibility as an officer or employee within a period of one year prior to the termination of such responsibility or in which he participated personally and substantially as an officer or employee; or

"(b) within one year after his employment with the Department has ceased, knowingly act as agent or attorney for or otherwise represent any other person (except the United States) in any formal or informal appearance before, or with the intent to influence, make any oral or written communication on behalf of any other person (except the United States) to—

"(1) the Department of Interior, or any officer or employee thereof, and

"(2) in connection with any judicial, rulemaking, regulation, order, lease, permit, regulation, or other particular matter, and

"(3) which is pending before the Department of Interior or in which the Department has a direct and substantial interest.".

"SEC. 30. FISHERMEN'S GEAR COMPENSATION FUND.—(a) As used in this section, the term—

"(1) 'commercial fisherman' means any citizen of the United States who owns, operates, or derives income from being employed on, a commercial fishing vessel;

"(2) 'commercial fishing vessel' means any vessel which is used primarily for the handling or harvesting of living marine resources for commercial purposes; and

"(3) 'fishing gear' means (A) any commercial fishing vessel, and (B) any equipment, whether or not attached to such a vessel, which is used in the handling or harvesting of living marine resources for commercial purposes.

"(b)(1) There is hereby established in the Treasury of the United States a Fishermen's Gear Compenstaion Fund (hereafter in this section referred to as the 'Fund'). The Fund shall be available to the Secretary without fiscal year limitation as a revolving fund for the purpose of making payments pursuant to this section. The total amount in the Fund shall at no time exceed $600,000. Amounts paid pursuant to the provisions of paragraphs (3) and (4) of this subsection shall be deposited in the Fund. The Fund may sue or be sued in its own name.

"(2) The Secretary is authorized to establish and maintain an area account within the Fund for any area of the outer Continental Shelf for purposes of providing reasonable compensation for damages to fishing gear and any resulting economic loss to commercial fishermen due to activities related to oil and gas exploration, development, and production in such area.

"(3) Upon assessment by the Secretary, any holder of a lease issued under section 8 of this Act for any tract in any area of the Outer Continental Shelf, and any holder of a permit issued for the construction of a pipeline in such area shall pay the amount specified by the Secretary for the purpose of the establishment and maintenance of an area account for such area. In any calendar year, no lessee or permittee shall be required by the Secretary to pay an amount in excess of $5,000 per lease.

"(4) Subject to paragraph (1) of this subsection, each area account established pursuant to this section shall be maintained at a level not to exceed $120,000 and, if depleted, shall be replenished by equal assessments by the Secretary of each lease holder and each pipeline permit holder in such area.

"(5) Amounts in each such area account shall be available for disbursement and shall be disbursed, subject to such amounts as are provided in appropriations Acts, for only the following purposes:

"(A) Administrative and personnel expenses of such area account and administrative and personnel expenses of the Fund which relate to such area account except that amounts disbursed for such expenses in any fiscal year shall not exceed 15 per centum of the amounts deposited in such revolving account in such fiscal year.

"(B) The payment of any claim in accordance with procedures established under this section for damages suffered as a result of activities in the area for which such area account was established.

"(C) Reasonable attorney's fees awarded pursuant to subsection (e)(2)(B) of this section.

"(6) After the date of enactment of this section, any exploration plan and any develcpment and production plan approved by the Secretary for an area of the outer Continental Shelf and any permit issued for the construction of a pipeline in such area shall contain a condition that the lessee or permittee, upon request by the Secretary shall pay the amount specified by the Secretary for purposes of the establishment and maintenance of a fishermen's gear compensation fund for such area. No lessee or permittee shall be required by the Secretary to pay in any calendar year an amount in excess of $5,000 per lease or permit.

"(c)(1) In carrying out this section, the Secretary may—

"(A) prescribe, and from time to time amend, regulations for the filing, processing, and fair and expeditious settlement of claims pursuant to this section, including a time limitation on the filing of such claims;

"(B) establish and classify all potential hazards to commercial fishing caused by outer Continental Shelf oil and gas exploration, development, and production activities, including all obstructions on the bottom, throughout the water column, and on the surface; and

"(C) establish regulations requiring all materials, equipment, tools, containers, and all other items used on the outer Continental Shelf to be properly stamped or labeled, wherever practicable, with the owner's identification prior to actual use.

"(2)(A) Payments may be disbursed by the Secretary from the appropriate area account to compensate commercial fishermen for actual and consequential damages, including loss of profits, due to the damage of fishing gear by materials, equipment, tools, containers, or other items associated with oil and gas exploration, development, or production activities in such area.

"(B) Notwithstanding the provisions of subparagraph (A) of this paragraph, no payment may be made by the Secretary from any area account established under this section—

"(i) where the damage set forth in a claim was caused by materials, equipment, tools, containers, or other items attributable to a financially responsible party;

"(ii) in an amount in excess of $75,000 per incident;

"(iii) to the extent that damages were caused by the negligence or fault of the commercial fisherman making the claim;

"(iv) when the damage set forth in the claim was sustained prior to the date of enactment of this section;

"(v) in an amount in excess of the depreciated value of the fishing gear with respect to which the claim is filed;

"(vi) in the case of a claim for loss of profits (I) for any period in excess of 6 months, and (II) unless such claim is supported by records with respect to the claimant's profits during the previous 12-month period; and

"(vii) for any portion of the damages claimed with respect to which the claimant has or will receive compensation from insurance.

"(d) With respect to any claim for damages filed pursuant to this section, there shall be a presumption that such claim is valid if the claimant establishes that—

"(1) the commercial fishing vessel was being used for fishing and was located in an area prescribed by the Secretary of Commerce as an area affected by outer Continental Shelf activities;

"(2) a report on the location of the material, equipment, tool, container, or other item which caused such damages and the nature of such damages was made within five days after the date on which such damages were discovered;

"(3) there was no record on nautical charts or the Notice to Mariners on the date such damages were sustained that such material, equipment, tool, container, or other item existed in such area; and

"(4) there was no proper surface marker or lighted buoy which was attached or closely anchored to such material, equipment, tool, container, or other item.

"(e)(1) Any commercial fisherman suffering damages compensable under this section may file a claim for compensation with the Secretary, except that no such claim may be filed more than 60 days after the date of discovery of the damages with respect to which such claim is made.

"(2)(A) Upon receipt of any claim under this section, the Secretary shall refer such matter to a hearing examiner appointed under section 3105 of title 5, United States Code, and shall make reasonable efforts to notify all persons known to have engaged in activities associated with outer Continental Shelf energy activity in the vicinity. Each such person shall promptly notify the Secretary as to whether he admits or denies responsibility for the damages claimed. Any such person, including lessees or permittees or their contractors or subcontractors, may submit evidence at any hearing conducted with respect to such claim. The hearing examiner shall, within 120 days after such matter is referred to him by the Secretary, adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code.

"(B) If the decision of the hearing examiner is in favor of the commercial fisherman filing the claim, such hearing examiner shall include, as part of the amount certified to the Secretary under paragraph (5)(A) of this subsection, reasonable attorneys' fees incurred by such commercial fisherman in pursuing such claim.

"(3)(A) For purposes of any hearing conducted pursuant to this section, the hearing examiner shall have the power to administer oaths and subpena the attendance of testimony of witnesses and the production of books, records, and other evidence relative or pertinent to the issues being presented for determination.

"(B) In any hearing conducted pursuant to this section with respect to a claim for damages resulting from activities on any area of the outer Continental Shelf, the hearing examiner shall consider evidence of obstructions in such area which have been identified pursuant to the survey conducted under subsection (1) of this section.

"(4) A hearing conducted under this section shall be conducted within the United States judicial district within which the matter giving rise to the claim occurred, or, if such matter occurred within two or more districts, in any of the affected districts, or, if such matter occurred outside of any district, in the nearest district.

"(5)(A) Upon a decision by the hearing examiner and in the absence of a request for judicial review, any amount to be paid, subject to the limitations of this section, shall be certified to the Secretary, who shall promptly disburse the award. Such decision shall not be reviewable by the Secretary.

"(B) Upon payment of a claim by the Secretary pursuant to this paragraph, the Secretary shall acquire by subrogation all rights of the claimants against any person found to be responsible for the damages with respect to which such claim was made.

"(C) Any person who denies responsibility for damages with respect to which a claim is made and who is subsequently found to be responsible for such damages, and any commercial fisherman who files a claim for damages and who is subsequently found to be responsible for such damages, shall pay the costs of the proceedings under this subsection with respect to such claim.

"(6) Any person who suffers legal wrong or who is adversely affected or aggrieved by the decision of a hearing examiner under this section may, no later than 60 days after such decision is made, seek judicial review of such decision in the United States court of appeals for the circuit in which the damage occurred, or, if such damage occurred outside of any circuit, in the United States court of appeals for the nearest circuit.

"(k) The Secretary shall submit an annual report to the Congress which shall set forth—

"(1) an evaluation of the feasibility and comparative cost of preventing or reducing obstructions on the outer Continental Shelf which pose potential hazards to commercial fishing or fishing gear by (A) imposing fines or penalties on lessees or permittees, or contractors or subcontractors of lessees or permittees, who are responsible for such obstructions, or (B) requiring the bonding of such lessees or permittees or such contractors or subcontractors;

"(2) a description of the types of damages set forth in claims filed with the Secretary during the previous year for compensation from a fishermen's gear compensation fund;

"(3) the amount of compensation awarded to claimants during the previous year; and

"(4) the number of cases during the previous year in which damages were determined to be the responsibility of a lessee or permittee conducting operations on the outer Continental Shelf, or the contractor or subcontractor of such a lessee or permittee.

"(l) (1) The Administrator of the National Oceanic and Atmospheric Administration shall conduct a two-year survey of obstructions on the outer Continental Shelf. Such survey shall be conducted for purposes of identifying (A) natural obstructions on the outer Continental Shelf which pose potential hazards to commercial fishing or fishing gear, and (B) in addition, in the case of areas in which oil and gas exploration, development, or production is taking place, man-made obstructions relating to such activities which pose potential hazards to commercial fishing or fishing gear.

"(2) The Administrator shall report the results of the survey conducted under this subsection to the Secretary and to the Secretary of Commerce, and shall, on the basis of such survey, develop charts for commercial fishermen identifying obstructions on the outer Continental Shelf.

"(3) During the first six months of the survey conducted under this subsection, the Administrator shall concentrate on areas of the outer Continental Shelf where oil and gas production has commenced or is expected to commence prior to the expiration of the two-year period of such survey.".

"SEC. 31. DOCUMENTATION, REGISTRY, AND MANNING REQUIREMENTS.—Within six months after the date of enactment of this section, the Secretary of the Department in which the Coast Guard is operating shall by regulation require that any vessel, rig, platform, or other vehicle or structure—

"(1) which is used at any time after the one-year period beginning on the effective date of such regulation for activities pursuant to this Act shall be manned or crewed by citizens of the United States or aliens lawfully admitted to the United States for permanent residence, unless (A) specific contractual provisions or national registry manning requirements in effect on such date of enactment provide to the contrary, or (B) there are not a sufficient number of such citizens or aliens who are qualified and available for such work;

"(2) which is used at any time after the one-year period beginning on the effective date of such regulation for activities pursuant to this Act and which is built or rebuilt at any time after such one-year period, when required to be documented, shall be documented under the laws of the United States; and

"(3) which is used for activities pursuant to this Act, shall comply with such minimum standards of design, construction, alteration, and repair as the Secretary of the Department in which the Coast Guard is operating establishes.".

TITLE III—OFFSHORE OIL SPILL POLLUTION FUND

DEFINITIONS

SEC. 301. For the purposes of this title, the term

(a) "Secretary" means the Secretary of Transportation;

(b) "fund" means the fund established by section 302;

(c) "person" means an individual, firm, corporation, association, partnership, consortium, joint venture, or governmental entity;

(d) "incident" means any occurrence or series of related occurrences, involving one or more offshore facilities or vessels, or any combination thereof, which causes, or poses an imminent threat of oil pollution;

(e) "vessel" means every description of watercraft or other contrivance, whether or not self-propelled, which is operating in the waters above the Outer Continental Shelf (as the term "Outer Continental Shelf" is defined in section 2(a) of the Outer Continental Shelf Lands Act (42 U.S.C. 1331(a))), and which is transporting oil directly from an offshore facility, and such term specifically excludes any watercraft or other contrivance which is operating in the navigable waters of the United States (as the term 'navigable waters' is defined in section 502 of the Federal Water Pollution Control Act (33 U.S.C. 1362));

(f) "public vessel" means a vessel which—

(1) is owned or chartered by demise, and operated by (A) the United States, (B) a State or political subdivision thereof, or (C) a foreign government, and

(2) is not engaged in commercial service;

(g) "ship" means either of the following types of vessels carrying oil in bulk as cargo:

(1) a self-propelled vessel, or

(2) a non-self-propelled vessel which is certificated to operate outside the internal waters of the United States;

(h) "facility" means a structure, or group of structures (other than a vessel or vessels), used for the purpose of transporting, drilling for, producing, processing, storing, transferring, or otherwise handling oil;

(i) "offshore facility" includes any oil refinery, drilling structure, oil storage or transfer terminal, or pipeline, or any appurtenance related to any of the foregoing, which is used to drill for, produce, store, handle, transfer, process, or transport oil produced from the Outer Continental Shelf (as the term Outer Continental Shelf is defined in section 2(a) of the Outer Continental Shelf Lands Act (42 U.S.C. 1331(a))), and is located on the Outer Continental Shelf, except that such term does not include (A) a vessel, or (B) a deepwater port (as the term deepwater port is defined in section 3(10) of the Deepwater Port Act of 1974 (33 U.S.C. 1502));

(j) "oil pollution" means—

(1) the presence of oil, either in an unlawful quantity or which has been discharged at an unlawful rate in or on the waters of the contiguous zone established by the United States under Article 24 of the Convention on the Territorial Sea and the Contiguous Zone (15 UST 1606); or

(2) the presence of oil in or on the waters of the high seas outside the territorial limits of the United States—

(A) when discharged in connection with activities conducted under the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1331 et seq.);

(B) causing injury to or loss of natural resources belonging to, appertaining to, or under the exclusive management authority of, the United States; or

(3) the presence of oil in or on the territorial sea, internal waters, or adjacent shoreline, of a foreign country, in a case where damages are recoverable by a foreign claimant under this title

(k) "United States claimant" means any person residing in the United States, the Government of the United States or an agency thereof, or the government of a State or a political subdivision thereof. who asserts a claim;

(l) "foreign claimant" means any person residing in a foreign country, the government of a foreign country, or any agency or political subdivision thereof, who asserts a claim;

(m) "United States" and "State" include the several States of the United States, The District of Columbia, the Commonwealth of Puerto Rico, the Canal Zone, Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Marianas, the Trust Territory of the Pacific Islands, and any other territory or possession over which the United States has jurisdiction;

(n) "oil" means petroleum, including crude oil or any fraction of residue therefrom;

(o) "cleanup costs" means costs of reasonable measures taken, after an incident has occurred, to prevent, minimize, or mitigate oil pollution from that incident;

(p) "damages" means compensation sought pursuant to this title by any person suffering any direct and actual injury proximately caused by the discharge of oil from an offshore facility or vessel, except that such term does not include clean-up costs;

(q) "person in charge" means the individual immediately responsible for the operation of a vessel or facility;

(r) "claim" means a demand in writing for a sum certain;

(s) "discharge" means any emission, intentional or unintentional, and includes spilling, leaking, pumping, pouring, emptying, or dumping;

(t) "owner" means any person holding title to, or in the absence of title, any other indicia of ownership of, a vessel or offshore facility, whether by lease, permit, contract, license. or other form of agreement; or with respect to any facility abandoned without prior approval of the Secretary of the Interior, the person who owned such facility immediately prior to such abandonment; but does not include a person who, without participating in the management or operation of a vessel or offshore facility, holds indicia of ownership primarily to protect his security interest in the vessel or offshore facility;

(u) "operator" means—

(1) in the case of a vessel, a charterer by demise or any other person, except the owner, who is responsible for the operation, manning, victualing, and supplying of the vessel, or

(2) in the case of an offshore facility, any person, except the owner, responsible for the operation of the facility by agreement with the owner;

(v) "property" means littoral, riparian, or marine property;

(w) "removal costs" means—

(1) costs incurred under section 5 of the Intervention on the High Seas Act; and

(2) cleanup costs other than the costs described in clause (1);

(x) "guarantor" means the person, other than the owner or operator, who provides evidence of financial responsibility for an owner or operator;

(y) "gross ton" means a unit of 100 cubic feet for the purpose of measuring the total unit capacity of a vessel; and

(z) "barrel" means 42 United States gallons at 60 degrees Fehrenheit.

FUND ESTABLISHMENT, ADMINISTRATIVE, AND FINANCE

SEC. 302. (a) There is hereby established in the Treasury of the United States an Offshore Oil Pollution Compensation Fund, not to exceed $200,000,000, except that such limitation shall be increased to the extent necessary to permit any moneys recovered or collected which are referred to in subsection (b)(2) and (3) of this section being paid into such fund. The fund shall be administered by the Secretary and the Secretary of the Treasury, as specified in this section. The fund may sue and be sued in its own name.

(b) The fund shall be constituted from—
(1) all fees collected pursuant to subsection (d);
(2) all moneys recovered on behalf of the fund under section 308; and
(3) all other moneys recovered or collected on behalf of the fund, under this title.

(c) In addition to the processing and settlement of claims under section 307, the fund shall be immediately available for the removal costs described in section 301(w)(1), and the Secretary is authorized to promulgate regulations designating the person or persons who may obligate available money in the fund for such purposes.

(d)(1) The Secretary shall levy and the Secretary of the Treasury shall collect a fee of not to exceed 3 cents per barrel on oil obtained from the Outer Continental Shelf, which shall be imposed on the owner of the oil when such oil is produced.

(2) The Secretary of the Treasury, after consulting with the Secretary, may promulgate reasonable rules and regulations relating to the collection of the fees authorized by paragraph (1) and, from time to time, the modification thereof. Modifications shall become effective on the date specified therein, but no earlier than the ninetieth day following the date the modifying regulation is published in the Federal Register. Any modification of the fee shall be designed to insure that the fund is maintained at a level not less than $100,000,000 and not more than $200,000,000. No regulation that modifies fees, nor any modification of such a regulation, whether or not in effect, may be stayed by any court pending completion of judicial review of that regulation or modification. No modified fees paid by any owner pending completion of judicial review of the modified fee regulation shall be repaid to such owner notwithstanding the final judicial determination.

(3)(A) Any person who fails to collect or pay fees as required by the regulations promulgated under paragraph (2) shall be liable for a civil penalty not to exceed $10,000, to be assessed by the Secretary of the Treasury, in addition to the fees required to be collected or paid and the interest on those fees at the rate the fees would have earned if collected or paid when due and invested in special obligations of the United States in accordance with subsection (e)(2). Upon the failure of any person so liable to pay any penalty, fee, or interest upon demand, the Attorney General may, at the request of the Secretary of the Treasury, bring an action in the name of the fund against that person for such amount.

(B) Any person who falsifies records or documents required to be maintained under any regulation promulgated under this subsection shall be subject to prosecution for a violation of section 1001 of title 18, United States Code.

(4) The Secretary of the Treasury may, by regulation, designate the reasonably necessary records and documents to be kept by persons from whom fees are to be collected pursuant to paragraph (1) of this subsection, and the Secretary of the Treasury and the Comptroller General of the United States shall have access to such required material for the purpose of audit and examination.

(e)(1) The Secretary shall determine the level of funding required for immediate access in order to meet potential obligations of the fund.

(2) The Secretary of the Treasury may invest any excess in the fund, above the level determined under paragraph (1), in interest-bearing special obligations of the United States. Such special obligations may be redeemed at any time in accordance with the terms of the special issue and pursuant to regulations promulgated by the Secretary of the Treasury. The interest on, and the proceeds from the sale of, any obligations held in the fund shall be credited to and form a part of the fund.

(f) If at any time the moneys available in the fund are insufficient to meet the obligations of the fund, the Secretary shall issue to the Secretary of the Treasury notes or other obligations in the forms and denominations, bearing the interest rates and maturities and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. Redemption of these notes or obligations shall be made by the Secretary from moneys in the fund. These notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of comparable maturity. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and, for that purpose, he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act. The purpose for which securities may be issued under that Act are extended to include any purchase of these notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of these notes or other obligations shall be treated as public debt transactions of the United States.

DAMAGES AND CLAIMANTS

SEC. 303. (a) Claims for damages for economic loss, arising out of or directly resulting from oil pollution, may be asserted for—
(1) removal costs;
(2) injury to, or destruction of, real or personal property;
(3) loss of use of real or personal property;
(4) injury to, or destruction of, natural resources;
(5) loss of use of natural resources;
(6) loss of profits or impairment of earning capacity due to injury or destruction of real or personal property or natural resources; and
(7) loss of tax revenue for a period of one year due to injury to real or personal property.

(b) A claim authorized by subsection (a) may be asserted—
(1) under item 1, by any claimant: *Provided*, That the owner or operator of a vessel of offshore facility involved in an incident may assert such a claim only if he can show that he is entitled to a defense to liability under section 304(c)(1) or 304(c)(2) or, if not entitled to such a defense to liability, that he is entitled to a limitation of liability under section 304(b): *Provided further*, That where he is not entitled to such a defense to liability but entitled to such a limitation of liability, such claim may be asserted only as to the removal costs incurred in excess of that limitation;
(2) under items 2, 3, and 5, by any United States claimant, if the property involved is owned or leased, or the natural resource involved is utilized by the claimant;
(3) under item 4, by the President, as trustees for natural resources over which the United States Government has sovereign rights or exercises exclusive management authority; or by any State for natural resources within the boundary of the State belonging to, managed by, controlled by, or appertaining to the State: *Provided*, That compensation paid under this item shall be used only for the restoration of the natural resources damaged or for acquisition of equivalent resources;
(4) under item 6, by any United States claimant if the claimant derives at least 25 per centum of his earnings from activities which utilize the property or natural resource;
(5) under item 7, by any State or political subdivision thereof;
(6) under items 2 through 7, by a foreign claimant to the same extent that a United States claimant may assert a claim if—
(A) the oil pollution occurred (1) in the navigable waters or (2) in or on the territorial sea or adjacent shoreline of a foreign country of which the claimant is a resident;
(B) the claimant is not otherwise compensated for his loss;
(C) the oil was discharged from an offshore facility or from a vessel in connection with activities conducted under the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1331 et seq.) and
(D) recovery is authorized by a treaty or an executive agreement between the United States and the foreign country involved, or if the Secretary of State, in consultation with the Attorney General and other appropriate officials, certifies that such country provides a comparable remedy for United States claimants.
(7) under any item, by the Attorney General, on his own motion or at the request of the Secretary, on behalf of any group of United States claimants who may assert a claim under this subsection, when he determines that the claimants would be more adequately represented as a class in asserting their claims.

(c) If the Attorney General fails to take action under clause (7) of subsection (b) within sixty days of the date on which the Secretary designates a source under section 306 any member of a group may maintain a class action to recover damages on behalf of that group. Failure of the Attorney General to take action shall have no bearing on any class action maintained by any claimant for damages authorized by this section.

LIABILITY

SEC. 304. (a) Subject to the provisions of subsections (b) and (c), the owner and operator of a vessel other than a public vessel, or of an offshore facility, which is the source of oil pollution, or poses a threat of oil pollution in circumstances which justify the incurrence of the type of costs described in section 301(w)(1) of this title, shall be jointly, severally, and strictly liable for all damages for which a claim may be asserted under section 303.

(b) Except when the incident is caused primarily by willful misconduct or gross negligence, within the privity or knowledge of the owner or operator; or is caused primarily by a violation, within the privity or knowledge of the owner or operator, of applicable safety, construction, or operating standards or regulations of the Federal Government; or except when the owner or operator fails or refuses to provide all reasonable cooperation and assistance requested by the responsible Federal official in furtherance of cleanup activities, the total of the liability under subsection (a) and any removal costs incurred by, or on behalf of, the owner or operator shall be limited to—
(1) in the case of a vessel, $250,000 or $300 per gross ton (up to a maximum of $30,000,000), whichever is greater; or
(2) in the case of an offshore facility operated under authority of the Outer Continental Shelf Lands Act, the total of removal and cleanup costs, and other damages up to $35,000,000.

(c) There shall be no liability under subsection (a)—
(1) where the incident is caused primarily by an act of war, hostilities, civil war, or insurrection, or by a natural phenomenon of an exceptional, inevitable, and irresistible character;
(2) to the extent that the incident is caused by an act or omission of a person other than—
(A) the claimant,
(B) the owner or operator,

(C) an employee or agent of the claimant, the owner, or the operator, or

(D) one whose act or omission occurs in connection with a contractural relationship with the claimant, the owner, or the operator;

(3) as to a particular claimant, where the incident or the economic loss is caused, in whole or in part, by the gross negligence or willful misconduct of that claimant; or

(4) as to a particular claimant, to the extent that the incident or economic loss is caused by the negligence of that claimant.

(d) The Secretary shall, from time to time, report to Congress on the desirability of adjusting the monetary limitation of liability specified in subsection (b).

(e)(1) Subject to the provisions of paragraph (2) hereof, the fund shall be liable, without any limitation, for all damages for which a claim may be asserted under section 303, to the extent that the loss is not otherwise compensated.

(2) Except for the removal costs specified in clause (1) of section 301(w), there shall be no liability under paragraph (1) hereof—

(A) where the incident is caused primarily by an act of war, hostilities, civil war, or insurrection;

(B) as to a particular claimant, where the incident or economic loss is caused, in whole or in part, by the gross negligence or willful misconduct of that claimant; or

(C) as to a particular claimant, to the extent that the incident or economic loss is caused by the negligence of that claimant.

(f)(1) In addition to the damages for which claims may be asserted under section 303, and without regard to the limitation of liability provided in section 304(b), the owner, operator, or guarantor shall be liable to the claimant for interest on the amount paid in satisfaction of the claim for the period from the date upon which the claim was presented to such person to the date upon which the claimant is paid, inclusive, less the period, if any, from the date upon which the owner, operator, or guarantor shall offer to the claimant an amount equal to or greater than that finally paid in satisfaction of the claim to the date upon which the claimant shall accept that amount, inclusive. However, if the owner, operator, or guarantor shall offer to the claimant, within sixty days of the date upon which the claim was presented, or of the date upon which advertising was commenced pursuant to section 306, whichever is later, an amount equal to or greater than that finally paid in satisfaction of the claim, the owner, operator, or guarantor shall be liable for the interest provided in this paragraph only from the date the offer was accepted by the claimant to the date upon which payment is made to the claimant, inclusive.

(2) The interest provided in paragraph (1) shall be calculated at the average of the highest rate for commercial and finance company paper of maturities of one hundred and eighty days or less obtaining on each of the days included within the period for which interest must be paid to the claimant, as published in the Federal Reserve Bulletin.

(g) No indemnification, hold harmless, or similar agreement shall be effective to transfer from the owner or operator of a facility, to any other person, the liability imposed under subsection (a) hereof, other than as specified in this title.

(h) Nothing in this title, including the provisions of subsection (g) hereof, shall bar a cause of action that an owner or operator, subject to liability under subsection (a), or a guarantor, has or would have, by reason of subrogation or otherwise, against any person.

(i) To the extent that they are in conflict with, or otherwise inconsistent with, any other provisions of law relating to liability or the limitation thereof, the provisions of this section shall supersede all such other provisions of law, including those of section 4283 (a) of the Revised Statutes, as amended (46 U.S.C. 183 (a)).

FINANCIAL RESPONSIBILITY

SEC. 305. (a)(1) The owner or operator of any vessel (except a non-self-propelled barge that does not carry oil as fuel or cargo), which uses an offshore facility shall establish and maintain, in accordance with regulations promulgated by the President, evidence of financial responsibility sufficient to satisfy the maximum amount of liability to which the owner or operator of such vessel would be exposed in a case where he would be entitled to limit his liability in accordance with the provisions of section 304 (b) of this title. Financial responsibility may be established by any one, or any combination, of the following methods, acceptable to the President: evidence of insurance, guarantee, surety bond, or qualification as a self-insurer. Any bond filed shall be issued by a bonding company authorized to do business in the United States. In cases where an owner or operator owns, operates, or charters more than one vessel subject to this subsection, evidence of financial responsibility need be established only to meet the maximum liability applicable to the largest of such vessels.

(2) The Secretary of the Treasury shall refuse the clearance required by section 4197 of the Revised Statutes of the United States to any vessel, subject to this subsection, which does not have certification furnished by the President that the financial responsibility provisions of paragraph (1) of this subsection have been complied with.

(3) The Secretary, in accordance with regulations promulgated by him shall have access to all offshore facilities and vessels conducting activities under the Outer Continental Shelf Lands Act; and such facility or vessel shall, upon request, show certification of financial responsibility.

(b) The owner or operator of a facility which (1) is used for drilling for, producing, or processing oil, or (2) has the capacity to transport, store, transfer, or otherwise handle more than one thousand barrels of oil at any one time, shall establish and maintain, in accordance with regulations promulgated by the Secretary, evidence of financial responsibility sufficient to satisfy the maximum amount of liability to which the owner or operator of the facility would be exposed, in a case where he would be entitled to limit his liability, in accordance with the provisions of section 304(b) of this title, or $35,000,000, whichever is less.

(c) Any claim authorized by section 303 (a) may be asserted directly against any guarantor providing evidence of financial responsibility as required under this section. In defending such claim, the guarantor shall be entitled to invoke all rights and defenses which would be available to the owner or operator under this title. He shall also be entitled to invoke the defense that the incident was caused by the willful misconduct of the owner or operator, but shall not be entitled to invoke any other defense which he might have been entitled to invoke in proceedings brought by the owner or operator against him.

(d) The President shall conduct a study to determine (1) whether adequate private oil pollution insurance protection is available on reasonable terms and conditions to the owners and operators of vessels, and offshore facilities subject to liability under section 304, and (2) whether the market for such insurance is sufficiently competitive to assure purchasers of features such as a reasonable range of deductibles, co-insurance provisions and exclusions. The President shall submit the results of his study, together with his recommendations, within one year of the date of enactment of this Act, and shall submit an interim report on his study within three months of the date of enactment of this Act.

NOTIFICATION, DESIGNATION, AND ADVERTISEMENT

SEC. 306. (a) The person in charge of a vessel or offshore facility, which is involved in an incident, shall immediately notify the Secretary of the incident, as soon as he has knowledge thereof. Notification received pursuant to this subsection or information obtained by the exploration of such notification shall not be used against any such person or his employer in any criminal case, other than a case involving prosecution for perjury or for giving a false statement.

(b)(1) When the Secretary receives information, pursuant to subsection (a) or otherwise, of an incident which involves oil pollution, the Secretary shall, where possible, designate the source or sources of the oil pollution and shall immediately notify the owner and operator of such source, and the guarantor, of that designation.

(2) When a source designated under paragraph (1) is a vessel or offshore facility, and the owner, operator, or guarantor fails to inform the Secretary, within five days after receiving notification of the designation, of his denial of such designation, such owner, operator or guarantor, as required by regulations promulgated by the Secretary, shall advertise the designation and the procedures by which claims may be presented to him. If advertisement is not otherwise made in accordance with this paragraph, the Secretary shall, as he finds necessary, and at the expense of the owner, operator, or guarantor involved, advertise the designation and the procedures by which claims may be presented to that owner, operator, or guarantor.

(c) In a case where—

(1) the owner, operator, and guarantor all deny a designation in accordance with paragraph (2) of subsection (b),

(2) the source of the discharge was a public vessel or

(3) the Secretary is unable to designate the source or sources of the discharge under paragraph (1) of subsection (b),

the Secretary shall advertise or otherwise notify potential claimants to the procedures by which claims may be presented to the fund.

(d) Advertisement under subsection (b) shall commence no later than fifteen days from the date of the designation made thereunder to continue for a period of no less than thirty days.

CLAIMS SETTLEMENT

SEC. 307. (a) Except as provided in subsection (b), all claims shall be presented to the owner, operator, or guarantor.

(b) All claims shall be presented to the fund—

(1) Where the Secretary has advertised or otherwise notified claimants in accordance with section 306(c), or

(2) where the owner or operator may recover under the provisions of section 303 (b)(1).

(c) In the case of a claim presented in accordance with subsection (a), and in which—

(1) the person to whom the claim is presented denies all liability for the claim, for any reason, or

(2) the claim is not settled by any person by payment to the claimant within sixty days of the date upon which (A) the claim was presented, or (B) advertising was commenced pursuant to section 306(b)(2), whichever is later,

the claimant may elect to commerce an action in court against the owner, operator, or guarantor, or to present the claim to the fund, that election to be irrevocable and exclusive.

(d) In the case of a claim presented in accordance with subsection (a), where full and adequate compensation is unavailable, either because the claim exceeds a limit of liability invoked under section 304(b) or because the owner, operator, and guaranator are financially incapable of meeting their obligations in full, a claim for the uncompensated damages may be presented to the fund.

(e) In the case of a claim which has been presented to any person, pursuant to subsection (a), and which is being presented to the fund, pursuant to subsection (c) or (d), such person, at the request of the claimant, shall transmit the claim and supporting documents to the fund. The Secretary may, by regulation, prescribe the documents to be transmitted and the terms under which they are to be transmitted.

(f) In the case of a claim presented to the fund, pursuant to subsection (b), (c) or (d), and in which the fund—

(1) denies all liability for the claim, for any reason, or

(2) does not settle the claim by payment to the claimant within sixty days of the date upon which (A) the claim was presented to the fund or (B) advertising was commenced pursuant to section 306 (c), whichever is later,

the claimant may submit the dispute to the Secretary for decision in accordance with section 554 of title 5, United States Code. However, a claimant who has presented a claim to the fund pursuant to subsection (b) may elect to commence an action in court against the fund in lieu of submission of the dispute to the Secretary for decision, that election is to be irrevocable and exclusive.

(g)(1) The Secretary shall promulgate regulations which establish uniform procedures and standards for the appraisal and settlement of claims against the fund.

(2) Except as provided in paragraph (3), the Secretary shall use the facilities and services of private insurance and claims adjusting organizations or State agencies in processing claims against the fund and may contract to pay compensation for those facilities and services. Any contract made under the provisions of this paragraph may be made without regard to the provisions of setcion 3709 of the Revised Statutes, as amended (41 U.S.C. 5), upon a showing by the Secretary that advertising is not reasonably practicable. The Secretary may make advance payments to a contractor for services and facilities, and the Secretary may advance to the contractor funds to be used for the payment of claims. The Secretary may review and audit claim payments made pursuant to this subsection. A payment to a claimant for single claim in excess of $100,000, or two or more claims aggregating in excess of $200,000, shall be first approved by the Secretary. When the services of a State agency are used in processing and settling claims, no payment may be made on a claim asserted on or behalf of that State or any of its agencies or subdivisions unless the payment has been approved by the Secretary.

(3) To the extent necessitated by extraordinary circumstances, where the services of such private organizations or State agencies are inadequate, the Secretary may use Federal personnel to process claims against the fund.

(h) Without regard to subsection (b) of section 556 of title 5, United States Code, the Secretary is authorized to appoint, from time to time for a period not to exceed one hundred and eighty days, one or more panels, each comprised of three individuals, to hear and decide disputes submitted to the Secretary pursuant to subsection (f). At least one member of each panel shall be qualified in the conduct of adjudicatory proceedings and shall preside over the activities of the panel. Each member of a panel shall possess competence in the evaluation and assessment of property damage and the economic losses resulting therefrom. Panel members may be appointed from private life or from any Federal agency except the staff administering the fund. Each panel member appointed from private life shall receive a per diem compensation and each panel member shall receive necessary traveling and other expenses while engaged in the work of a panel. The provisions of chapter 11 of title 18, United States Code, and of Executive Order 11222, as amended, regarding special government employees, apply to panel members appointed from private life.

(i)(1) Upon receipt of a request for decision from a claimant, properly made, the Secretary shall refer the dispute to (A) an administrative law judge, appointed under section 3105 of title 5, United States Code, or (B) a panel appointed under subsection (h).

(2) The administrative law judge and each member of a panel to which a dispute is referred for decision shall be a resident of the United States judicial circuit within which the damage complained of occurred, or, if the damage complained of occurred within two or more circuits, of any of the affected circuits, or, if the damage occurred outside any circuit of the nearest circuit.

(3) Upon receipt of a dispute, the administrative law judge or panel shall adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code. In any proceeding subject to this subsection, the presiding officer may require by subpena any person to appear and testify or to appear and produce books, papers, documents, or tangible things at a hearing or deposition at any designated place. Subpenas shall be issued and enforced in accordance with procedures in subsection (d) of section 555 of title 5, United States Code, and rules promulgated by the Secretary. If a person fails or refuses to obey a subpena, the Secretary may invoke the aid of the district court of the United States where the person is found, resides, or transacts business in requiring the attendance and testimony of the person and the production by him of books, papers, documents or any tangible things.

(4) A hearing conducted under this subsection shall be conducted within the United States judicial district within which, or nearest to which, the damage complained of occurred, or, if the damage complained of occurred within two or more ditsricts, in any of the affected districts, or, if the damage occurred outside any district, of the nearest district.

(5) The decision of the administrative law judge or panel under this subsection shall be the final order of the Secretary, except that the Secretary, in his discretion and in accordance with rules which he may promulgate, may review the decision upon his own initiative or upon exception of the claimant or the fund.

(6) Final orders of the Secretary made under this subsection shall be reviewable pursuant to section 702 of title 5, United States Code, in the district courts of the United States.

(j)(1) In any action brought against an owner, operator, or guarantor, both the plaintiff and defendant shall serve a copy of the complaint and all subsequent pleadings therein upon the fund at the same time those pleadings are served upon the opposing parties.

(2) The fund may intervene in the action as a matter of right.

(3) In any action to which the fund is a party, if the owner, operator, or guarantor admits liability under this title, the fund upon its motion shall be dismissed therefrom to the extent of the admitted liability.

(4) If the fund receives from either the plaintiff or the defendant notice of such an action, the fund shall be bound by any judgment entered therein, whether or not the fund was a party to the action.

(5) If neither the plaintiff nor the defendant gives notice of such an action to the fund, the limitation of liability otherwise permitted by section 304(b) of this title is not available to the defendant, and the plaintiff shall not recover from the fund any sums not paid by the defendant.

(k) In any action brought against the fund, the plaintiff may join any owner, operator, or guarantor, and the fund may implead any person who is or may be liable to the fund under any provision of this title.

(l) No claim may be presented nor may an action be commenced for damages recoverable under this title, unless that claim is presented to, or that action is commenced against, the owner, operator, or guarantor, or against the fund, as to their respective liabilities, within three years from the date of discovery of the economic loss for which a claim may be asserted under section 303 (a), or within six years of the date of the incident which resulted in that loss, whichever is earlier.

SUBROGATION

SEC. 308. (a) Any person or governmental entity, including the fund, who shall pay compensation to any claimant for an economic loss, compensable under section 303, shall be subrogated to all rights, claims, and causes of action which that claimant has under this title.

(b) Upon request of the Secretary, the Attorney General may commence an action, on behalf of the fund, for the compensation paid by the fund to any claimant pursuant to this title. Such an action may be commenced against any owner, operator, or guarantor, or against any other person or governmental entity, who is liable, pursuant to any law, to the compensated claimant or to the fund, for damages for which the compensation was paid.

(c) In all claims or actions by the fund against any owner, operator, or guarantor, pursuant to the provisions of subsections (a) and (b), the fund shall recover—

(1) for a claim presented to the fund (where there has been a denial of source designation) pursuant to section 307(b)(1), or (where there has been a denial of liability) pursuant to section 307(c)(1)—

(A) subject only to the limitation of liability to which the defendant is entitled under section 304(b), the amount the fund has paid to the claimant, without reduction;

(B) interest on that amount, at the rate calculated in accordance with section 304 (g)(2), from the date upon which the claim was presented by the claimant to the defendant to the date upon which the fund is paid by the defendant, inclusive, less the period, if any, from the date upon which the fund shall offer to the claimant the amount finally paid by the fund to the claimant in satisfaction of the claim against the fund to the date upon which the claimant shall accept that offer, inclusive; and

(C) all costs incurred by the fund by reason of the claim, both of the claimant against the fund and the fund against the defendant, including, but not limited to, processing costs, investigating costs, court costs, and attorneys' fees; and

(2) for a claim presented to the fund pursuant to section 307(c)(2)—

(A) in which the amount the fund has paid to the claimant exceeds the largest amount, if any, the defendant offered to the claimant in satisfaction of the claim of the claimant against the defendant—

(i) subject to dispute by the defendant as to any excess over the amount offered to

the claimant by the defendant, the amount the fund has paid to the claimant;

(ii) interest, at the rate calculated in accordance with section 304(g)(2), for the period specified in clause (1) of this subsection; and

(iii) all costs incurred by the fund by reason of the claim of the fund against the defendant, including, but not limited to, processing costs, investigating costs, court costs, and attorneys' fees; or

(B) in which the amount the fund has paid to the claimant is less than or equal to the largest amount the defendant offered to the claimant in satisfaction of the claim of the claimant against the defendant—

(i) the amount of the fund has paid to the claimant, without reduction;

(ii) interest, at the rate calculated in accordance with section 304(g)(2), from the date upon which the claim was presented by the claimant to the defendant to the date upon which the defendant offered to the claimant the largest amount referred to in this subclause; *Provided*, That if the defendant tendered the offer of the largest amount referred to in this subclause within sixty days of the date upon which the claim of the claimant was either presented to the defendant or advertising was commenced pursuant to section 306, the defendant shall not be liable for interest for that period; and

(iii) interest from the date upon which the claim of the fund against the defendant was presented to the defendant to the date upon which the fund is paid, inclusive, less the period, if any, from the date upon which the defendant shall offer to the fund the amount finally paid to the fund in satisfaction of the claim of the fund to the date upon which the fund shall accept that offer, inclusive.

(d) The fund shall pay over to the claimant that portion of any interest the fund shall recover, pursuant to clause (1) and subclause (A) of clause (2) of subsection (c), for the period from the date upon which the claim of the claimant was presented to the defendant to the date upon which the claimant was paid by the fund, inclusive, less the period from the date upon which the fund offered to the claimant the amount finally paid to the claimant in satisfaction of the claim to the date upon which the claimant shall accept that offer, inclusive.

(e) The fund is entitled to recover for all interest and claim of the claimant was either presented to the defendant or advertising was commenced pursuant to section 306, the defendant shall not be liable for interest for that period; and

(iii) interest from the date upon which the claim of the fund against the defendant was presented to the defendant to the date upon which the fund is paid, inclusive, less the period, if any, from the date upon which the defendant shall offer to the fund the amount finally paid to the fund in satisfaction of the claim of the fund to the date upon which the fund shall accept that offer, inclusive.

(d) The fund shall pay over to the claimant that portion of any interest the fund shall recover, pursuant to clause (1) and subclause (A) of clause (2) of subsection (c), for the period from the date upon which the claim of the claimant was presented to the defendant to the date upon which the claimant was paid by the fund, inclusive, less the period from the date upon which the fund offered to the claimant the amount finally paid to the claimant in satisfaction of the claim to the date upon which the claimant shall accept that offer, inclusive.

(e) The fund is entitled to recover for all interest and costs specified in subsection (c) without regard to any limitation of liability to which the defendant may otherwise be entitled.

JURISDICTION AND VENUE

SEC. 309. (a) The United States district courts shall have exclusive original jurisdiction over all controversies arising under this title, without regard to the citizenship of the parties or the amount in controversy.

(b) Venue shall lie in any district wherein the injury complained of occurred, or wherein the defendant resides, may be found, or has his principal office. For the purposes of this section, the fund shall reside in the District of Columbia.

PREEMPTION

SEC. 310. (a) Except as provided in this title—

(1) no action may be brought in any court of the United States, or of any State or political subdivision thereof, for damages for an economic loss described in section 303(a), a claim for which may be asserted under this title, and

(2) no person may be required to contribute to any fund, the purpose of which is to pay compensation for such a loss, nor to establish or maintain evidence of financial responsibility relating to the satisfaction of a claim for such a loss.

(b) Nothing in subsection (a) shall preclude any State from imposing a tax or fee upon any person or upon oil in order to finance the purchase and pre-positioning of oil pollution cleanup and removal equipment.

(c) Nothing in subsection (a) shall prohibit an action by the fund, under any other provision of law, to recover compensation paid pursuant to this title.

PROHIBITION

SEC. 311. The discharge of oil from any offshore facility or vessel, in quantities which the President under section 311(b) of the Federal Water Pollution Control Act (33 U.S.C. 1321(b)) determines to be harmful is prohibited.

PENALTIES

SEC. 312. (a)(1) Any person who fails to comply with the requirements of section 305, the regulations promulgated thereunder, or any denial or detention order, shall be subject to a civil penalty of not more than $10,000.

(2) Such penalty may be assessed and compromised by the President or his designee, in connection with section 305(a)(1), and by the Secretary, in connection with section 305(a)(3) and section 305(b). No penalty shall be assessed until notice and an opportunity for hearing on the alleged violation have been given. In determining the amount of the penalty or the amount agreed upon in compromise, the demonstrated good faith of the party shall be taken into consideration.

(3) At the request of the official assessing the penalty, the Attorney General may bring an action in the name of the fund to collect the penalty assessed.

(b) Any person in charge, subject to the jurisdiction of the United States, who fails to give the notification required by section 306(a) shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than one year, or both.

AUTHORIZATION OF APPROPRIATIONS

SEC. 313. (a) There is authorized to be appropriated for the administration of this title $10,000,000, for the fiscal year ending September 30, 1979, $5,000,000 for the fiscal year ending September 30, 1980, and $5,000,000, for the fiscal year ending September 30, 1981.

(b) There are also authorized to be appropriated to the Fund from time to time such amounts as may be necessary to carry out the purposes of the applicable provisions of this title, including the entering into contracts, any disbursements of funds, and the issuance of notes or other obligations pursuant to section 302(f) of this title.

(c) Notwithstanding any other provision of this title, the authority to make contracts, to make disbursements, to issue notes or other obligations pursuant to section 302(f) of this title, and to charge and collect fees pursuant to section 302(d) of this title or to exercise any other spending authority shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this title.

ANNUAL REPORT

SEC. 314. Within six months after the end of each fiscal year, the Secretary shall submit to the Congress (1) a report on the administration of the fund during such fiscal year, and (2) his recommendations for such legislative changes as he finds necessary or appropriate to improve the management of the fund and the administration of the liability provisions of this title.

SEC. 315. (a) This section, subsection (d) of section 305, section 316, and all provisions of this title authorizing the delegation of authority or the promulgation of regulations shall be effective on the date of enactment of this Act.

(b) All other provisions of this title, and the regulations applicable thereto shall be effective on the one hundred and eightieth day after the date of enactment of this Act.

SEC. 316. If any provision of this Act or the applicability thereof is held invalid, the remainder of this Act shall not be affected thereby.

TITLE IV—AMENDMENTS TO THE COASTAL ZONE MANAGEMENT ACT OF 1972

COASTAL ENERGY IMPACT AND PROGRAM

SEC. 401. (a) Paragraph (2) of section 308(b) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(b)(2)) is amended—

(1) by striking out "The amounts" and inserting in lieu thereof "Subject to paragraph (3) of this subsection, the amounts";

(2) by striking out "(A), (B), (C), and (D)" and inserting in lieu thereof "(A), (B), and (C)";

(3) in subparagraph (A), by striking out "one-third" and inserting in lieu thereof "one-half";

(4) in subparagraph (B), by striking out "one-sixth" and inserting in lieu thereof "one-quarter";

(5) in subparagraph (C), by striking out "one-sixth" and inserting in lieu thereof "one-quarter";

(6) by striking out subparagraph (D).

(b) Such section 308(b) is amended—

(1) by renumbering paragraphs (3) through (5), and any references thereto, as paragraphs (4) through (6), respectively; and

(2) by inserting after paragraph (2) the following new paragraph:

"(3)(A) The Secretary shall not make grants under this subsection to any state in any fiscal year the total of which exceeds 30 per centum of the total amount credited to the Coastal Energy Impact Fund under section 9 of the Outer Continental Shelf Lands Act for payment to all states in such fiscal year.

"(B)(i) If, in any fiscal year, any coastal state will not receive a grant under subparagraph (A), (B) or (C) of paragraph (2), the Secretary shall make a grant to each coastal state in an amount equal to 2 percentum of the total amount available for making grants to all states under such paragraph (2) in such fiscal year if any other coastal state in the same region is receiving a grant under such subparagraphs in such fiscal year: *Provided*, That no coastal state

shall receive such grant unless the Secretary determines that it is an affected state.

"(ii) For purposes of this subparagraph, the term 'affected state' means any State—

"(I) the laws of which are declared, pursuant to section 4(a)(2) of the Outer Continental Shelf Lands Act, to be the law of the United States for the portion of the outer Continental Shelf on which any program, plan, lease sale, or other activity is proposed, conducted or approved pursuant to the provisions of such Act;

"(II) which is or is proposed to be directly connected by transportation facilities to any artificial island, installation, or other device referred to in section 4(a)(1) of the Outer Continental Shelf Lands Act;

"(III) which is receiving, or in accordance with a proposed activity will receive, oil for processing, refining, or transshipment which was extracted from the outer Continental Shelf and transported directly to such State by means of vessels or by a combination of means including vessels;

"(IV) which is designated by the Secretary as a State in which there is a substantial probability of significant impact on or damage to the coastal, marine, or human environment, or a State in which there will be significant changes in the social, governmental, or economic infrastructure, resulting from the exploration, development, and production of oil and gas anywhere on the outer Continental Shelf; or

"(V) in which the Secretary finds that because of outer Continental Shelf activity there is, or will be, a significant risk of serious damage, due to factors such as prevailing winds and currents, to the marine or coastal environment in the event of any oilspill, blowout, or release of oil or gas from vessels, pipelines, or other transshipment facilities.

"(iii) For purposes of this subparagraph—".

"(I) the states of Connecticut, Delaware, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, and Virginia (the Atlantic coastal states) shall constitute one 'region';

"(II) the states of Alabama, Florida, Louisiana, Mississippi, and Texas (the Gulf coastal states) shall constitute one 'region';

"(III) the states of California, Oregon, and Washington (the Pacific coastal states) shall constitute one 'region'; and

"(IV) the state of Alaska shall constitute one 'region'.

"(C) If, in any fiscal year, the total amount of funds available for making grants to coastal states pursuant to this subsection is greater than the total amount of grants payable to such states pursuant to this subsection, the difference between such two amounts shall remain in the Treasury of the United States and be credited to miscellaneous receipts.

"(D) If, in any fiscal year, the total amount of funds available for making grants to coastal states pursuant to this subsection is less than the total amount of grant payable to all coastal states pursuant to this subsection, there shall be deducted from the amount payable to each coastal state an amount equal to the product of—

"(i) the amount by which the total amount of grants payable to all coastal states exceeds the total amount of funds available for such grants; multiplied by

"(ii) a fraction, the numerator of which is the amount of grants payable to such coastal state in such fiscal year and the denominator of which is the total amount of grants payable to all coastal states in such fiscal year.".

(c) Paragraph (5)(B)(i) of such section 308(b) (as renumbered by subsection (b) of this section is amended—

(1) by striking out "necessary, because of the unavailability of adequate financing under any other subsection," and inserting in lieu thereof "necessary"; and

(2) by striking out "new or expanded".

(d) Paragraph (6) of such section 308(b) (as renumbered by subsection (b) of this section) is amended to read as follows:

"(6) After making the calculations provided in paragraphs (2) and (3) of this subsection, the Secretary shall require each coastal state which is to receive grants under this subsection to provide adequate assurances of being able to return to the United States any funds to which paragraph (8) of this subsection may apply. After obtaining such assurances, the Secretary shall disburse the proceeds of such grants to such coastal state.

"(7) Any coastal state which receives proceeds of any grants under this subsection only may expend or commit such proceeds—

"(A) after a determination by the Secretary that such proceeds will be expended or commited by such state in accordance with the purposes set forth in paragraph (5) of this subsection; and

"(B) before the close of the fiscal year immediately following the fiscal year in which the proceeds were received.

"(8) The United States shall be entitled to recover from any coastal state an amount equal to all or any portion of a grant made to such state under this subsection which is not expended or commited in compliance with paragraph (7) of this subsection.

"(9) The provisions of section 308(g)(1) shall not apply to grants made pursuant to this subsection. Any state with a program for managing its coastal resources, whether approved pursuant to section 306 or not, shall qualify for assistance under this subsection.".

(e) Subsection (h) of section 308 of the Coastal Zone Management Act of 1972 is amended to read as follows:

"(h)(1) There is established in the Treasury of the United States the Coastal Energy Impact Fund. The Fund shall consist of—

"(A) amounts credited to the Fund under section 9 of the Outer Continental Shelf Lands Act;

"(B) any sums appropriated to the Fund;

"(C) payments of principal and interest received under any loan made under subsection (d)(1);

"(D) any fees received in connection with any guarantee made under subsection (d)(2); and

"(E) any recoveries and receipts under security, subrogation, and other rights and authorities described in subsection (f).

"(2) Amounts in the Fund received under clause (A) of paragraph (1) of this subsection shall be available to the Secretary for the purpose of carrying out subsection (b) of this section. All payments made by the Secretary to carry out the provisions of subsection (b) shall be paid from the Fund, only to the extent provided for in appropriations Acts. Sums in the Fund which are not appropriated for purposes of subsection (b) shall be returned to the Treasury.

"(3) Amounts in the Fund received under clauses (B) through (D) of paragraph (1) of this subsection shall be available to the Secretary without fiscal year limitation as a revolving fund for the purposes of carrying out subsections (c) and (d). All payments made by the Secretary to carry out the provisions of subsections (c), (d), and (f) (including reimbursements to other Government accounts) shall be paid from the Fund, only to the extent provided for in appropriations Acts. Sums in the Fund which are not currently needed for the purposes of subsections (c), (d), and (f) shall be kept on deposit or invested in obligations of, or guaranteed by, the United States."

(f) The amendments made by this section shall take effect on October 1, 1978.

OUTER CONTINENTAL SHELF GRANTS

SEC. 402. (a) Section 308(c) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456(a)(c) is amended—

(1) by inserting "(1)" immediately after "(c)" and

(2) by adding at the end thereof the following new paragraph:

"(2) The Secretary shall make grants under this paragraph to any coastal state which the Secretary finds is likely to be affected by outer Continental Shelf enrgy activities. Such grants shall be used by such state to carry out its responsibilities under the Outer Continental Shelf Lands Act. The amount of any such grant shall not exceed 80 per centum of the cost of carrying out such responsibilities."

(b) Section 308(a)(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(a)(1)) is amended—

(1) in subparagraph (B) thereof, by striking out "subsection (c)" and inserting in lieu thereof "subsection (c)(1)"; and

(2) by redesignating subparagraphs (C) through (F), and all references thereto, as subparagraphs (D) through (G), respectively, and inserting immediately after subparagraph (B) the following new subparagraph:

"(C) grants, under subsection (c)(2), to coastal states to carry out their responsibilities under the Outer Continental Shelf Lands Act;".

(c) Section 308(h) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(h)) is amended by striking out "subsections (c)" each place it appears and inserting in lieu thereof "subsections (c)(1)".

(d) Section 308(k)(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(k)(1)) is amended by striking out "and (c)" and inserting in lieu thereof "and (c)(1)".

(e) Section 318(a) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1464(a)) is amended—

(1) by redesignating paragraphs (4) through (8), and all references thereto, as paragraphs (5) through (9), respectively; and

(2) by inserting immediately after paragraph (3) the following new paragraph:

"(4) such sums, not to exceed $5,000,000 for each of the fiscal years ending September 30, 1979, September 30, 1980, September 30, 1981, September 30, 1982, and September 30, 1983, as may be necessary for grants under section 308(c)(2), to remain available until expended;".

(f) Section 318(b) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1464(b)) is amended—

(1) by striking out "subsection (b)" and inserting in lieu thereof "subsections (b) and (c)(2)"; and

(2) by striking out "subsections (c)" and inserting in lieu thereof "subsections (c)(1)".

TITLE V—MISCELLANEOUS PROVISIONS

REVIEW OF SHUT-IN OR FLARING WELLS

SEC. 501. (a) In a report submitted within six months after the date of enactment of this Act, and in his annual report thereafter, the Secretary shall list all shut-in oil and gas wells and wells flaring natural gas on leases issued under the Outer Continental Shelf Lands Act. Each such report shall be submitted to the Comptroller General and shall indicate why each well is shut-in or flaring natural gas, and whether the Secretary intends to require production on such a shut-in well or order cessation flaring.

(b) Within six months after receipt of the Secretary's report, the Comptroller General shall review and evaluate the methodology used by the Secretary in allowing the wells to be shut-in or to flare natural gas and submit his findings and recommendations to the Congress.

REVIEW AND REVISION OF ROYALTY PAYMENTS

SEC. 502. As soon as feasible but no later than ninety days after the date of enactment of this Act, and annually thereafter, the Secretary of the Interior shall submit a report or reports to the Congress describing the extent, during the two-year period preceding such report, of delinquent royalty accounts under leases issued under any Act which regulates the development of oil and gas on Federal lands, and what new auditing, post-auditing, and accounting procedures have been adopted to assure accurate and timely payment of royalties and net profit shares. Such report or reports shall include any recommendations for corrective action which the Secretary of the Interior determines to be appropriate.

NATURAL GAS DISTRIBUTION

SEC. 503. (a) The purpose of this section is to encourage expanded participation by local distribution companies in acquisition of leases and development of natural gas resources on the Outer Continental Shelf by facilitating the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company.

(b) The Federal Energy Regulatory Commission shall, after opportunity for presentation of written and oral views, promptly promulgate and publish in the Federal Register a statement of Commission policy which carries out the purpose of this section and sets forth the standards under which the Commission will consider applications for certificates of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, for the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company. Such statement of policy shall specify the criteria, limitations, or requirements the Commission will apply in determining:

(1) whether the application of any local distribution company qualifies for consideration under the statement of policy; and

(2) whether the public convenience and necessity will be served by the issuance of the requested certificate of transportation. Such statement of policy shall also set forth the terms or limitations on which the Commission may condition, pursuant to section 7 of the Natural Gas Act, the issuance of a certificate of transportation under such statement of policy.

(c) For purposes of this section:

(1) the term "local distribution company" means any person:

(A) engaged in the distribution of natural gas at retail; and

(B) regulated, or operated as a public utility, by a State or local government or agency thereof.

(2) The term "interstate commerce" shall have the same meaning as such term has under section 2(7) of the Natural Gas Act.

(3) The term "Commission" means the Federal Energy Regulatory Commission.

ANTIDISCRIMINATION PROVISIONS

SEC. 504. Each agency or department given responsibility for the promulgation or enforcement of regulations under this Act or the Outer Continental Shelf Lands Act, shall take such affirmative action as deemed necessary to prohibit all unlawful employment practices and to assure that no person shall, on the grounds of race, creed, color, national origin, or sex, be excluded from receiving or participating in any activity, sale, or employment, conducted pursuant to the provisions of this Act or the Outer Continental Shelf Lands Act. The agency or department shall promulgate such rules as it deems necessary to carry out the purposes of this section, and any rules promulgated under this section, through agency and department provisions and rules which shall be similar to those established and in effect under title VI and title VII of the Civil Rights Amendments of 1964, except that such provisions under this Act shall be made to apply to aliens and include employment outside the United States and to which the Secretary of Labor shall not have the authority to grant exemptions.

SUNSHINE IN GOVERNMENT

SEC. 505. (a) Each officer or employee of the Department of the Interior who—

(1) performs any function or duty under this Act or the Outer Continental Shelf Lands Act, as amended by this Act; and
